Milton Imaging
MRI Safety Training
Business Goal: To achieve a 100% injury-free and incident-free launch of our new MRI suite at Milton Imaging, ensuring the highest safety standards for both employees and patients.
Action: Safely enter the MRI suite.
Action: Ask patients and staff about potential hazards they may be bringing into the MRI suite.
Action: Follow safety protocols in all zones of the MRI suite.
Task: participate in a decision-based scenario preparing to enter the MRI suite with rewards and consequences relating to choices.
Action: Inform patients of the risks by practicing pre-screening interviews with patients to ensure their safety.
Task: Use an interactive map & visual aids to locate and identify hazardous objects on individuals & within the MRI suite.
Task: participate in a dialogue sequence between staff / patient through the prescreening process with positive & negative feedback to potential responses.
Information: Risks between MRI & metal.
Information: Common metallic items that may be easily overlooked, that could cause injury/incident.
Information: Medical devices patients may have that are metal.
