

McCormick & Murphy: Denver TBI Attorney Comparison

Understanding Traumatic Brain Injury Cases in Colorado

Based on Denver Tbi Attorney by McCormick and Murphy

Factor	McCormick & Murphy	General Legal Standard	Key Considerations
Definition of TBI in Colorado	Disruption to normal brain function caused by an external force.	Any disruption to normal brain function caused by an external force.	Includes concussions, contusions, diffuse axonal injuries, penetrating injuries.
Causes of TBI	Direct blow to the head, rapid acceleration/deceleration (e.g., car crash), violent shaking.	External force leading to brain function disruption.	Accidents causing changes in brain function.
Legal Requirement for Diagnosis/Imaging	Colorado law does not require a specific diagnosis or imaging result.	Not explicitly stated, but focus is on functional change.	What matters is whether the accident caused a change in brain function.
Evidence of TBI	Documented through symptoms such as confusion, memory loss, headaches, dizziness, or cognitive difficulties.	Symptoms indicating a change in brain function.	Real and measurable harm resulting from the injury.
Severity of TBI	Even a so-called mild TBI qualifies if it produces real and measurable harm.	Severity is determined by the impact on brain function and resulting harm.	Focus on documented harm, not just the label 'mild'.
Focus of Legal Claims	Establishing that an accident caused a change in brain function.	Proving the link between the accident and the change in brain function.	Demonstrating documented symptoms and measurable harm.
