RIGID BRONCHOSCOPY

The standard adults bronchoscopy kit is composed of:

- A rigid bronchoscope set comprising:
 - Universal base with silicone caps and main obturators
 - Three bronchial tubes with length 36 cm (colour code: orange, black, red)
 - Compact base with silicone caps, and large diameter yellow tracheal tube useable for patient intubation.
- Various bronchial tubes of smaller diameter can then be inserted through this tube, without having to extubate and reintubate the patient.
- Autoclavable HD Bronchoscope compatible with AMNOTEC optical forceps (on request)
- Choice between either a semi-rigid or optical forceps kit

The AMNOTEC Bronchoscopy system features the following main ergonomic advantages:

- Metric scale engraving along tubes length
- Unique locking system between tubes and bases
- Patented distal safety stop for safe introduction of silicone stents
- Optimal efficiency of ventilation port
- 360° rotating ventilation port
- Closable jet ventilation integrated in universal base
- Tubes colour-coding correspond with matching stent placement instrumentation and silicone stents
- Stainless steel instrumentation
