AMNOCUT Arthroskopie
Stanzen und Fasszangen

**AMNOCUT Arthroscopy
punches and grasping forceps**

AMNOCUT

- Unsere AMNOCUT Arthroskopie Stanzen basieren auf einem langjährig angewandten, mechanischem Prinzip der stiflosen Führung in der Bewegungsachse des Maulteils. Der Hauptvorteil für den Anwender besteht darin, dass er in den engsten Gelenkspalten komfortabel operieren kann.
- Die Präzision unserer CNC gefertigten Maulteile garantiert eine lange Lebensdauer, höchste Schnittqualität und absoluten Korrosionsschutz.
- Das ergonomische Griffdesign gewährleistet ein ermüdungsfreies Arbeiten über mehrere operative Eingriffe.
- Der offene Schaft bietet eine rückstandsfreie Aufbereitung und somit Sicherheit in der Asepsis.
- Eine kompetente Beratung und ein ausgezeichneter Kundenservice garantieren Ihnen höchste Zufriedenheit mit dieser Produktlinie.

- Our AMNOCUT arthroscopy punches are based on a long-standing mechanical principle of pinless guidance in the axis of movement of the jaw. Main benefit for the user is the working capability in very narrow areas of the joint.
- The precision of the CNC milled jaw parts guarantees a long life, highest possible cutting ability and absolutely protection from corrosion.
- The ergonomically designed handle allows a non-tiring operating across multiple surgical interventions.
- The open shaft accommodates a residue-free treatment and therefore totally safeness in the asepsis.
- A professional consultation and an excellent after sales service guarantee you highest satisfaction with this product line.

B = Schnittbreite
B = Bite width

W = Maulbreite
W = Tip width

H = Maulhöhe
H = Tip height

STRAIGHT

Das Hauptmodell für direkten Zugang.

The primary style for direct approach.

UPBITER

25° aufgewinkelt an der Spitze für verbesserten Zugang zum hinteren Teil des Meniskus.

25° upwards angled tip for increased access to the posterior meniscus.

UPSWEPT

Aufgewinkelter Schaft für verbesserten Zugang zum Gelenk und die Schneidefläche bleibt parallel zum Tibiakopf.

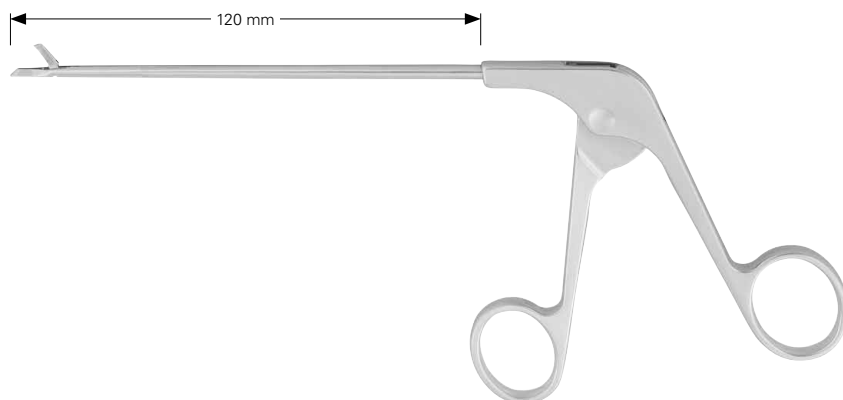

Angled shaft follows the contour of the condyle and keeps the cutting surface parallel to the tibial plateau.

LEFT I RIGHT

Gebogen für verbesserten Zugang zum medialen und lateralen Teil des Meniskus.

Curved to reach the medial and lateral meniscus.
