The Game Modes

Tutorials

Tutorials give you the knowledge you need to get the most from your locomotives and trains via interactive lessons that teach you key concepts. If you're new to Train Sim World, we recommend you start here to learn the fundamentals.

Scenarios

Provides a selection of operations over the Great Western Main Line route, Scenarios are objective based activities which provides unique experiences. Put your skills to the test mastering the busy Paddington Station or challenge your mettle by powering heavy freight through one of the busiest railways in Britain.

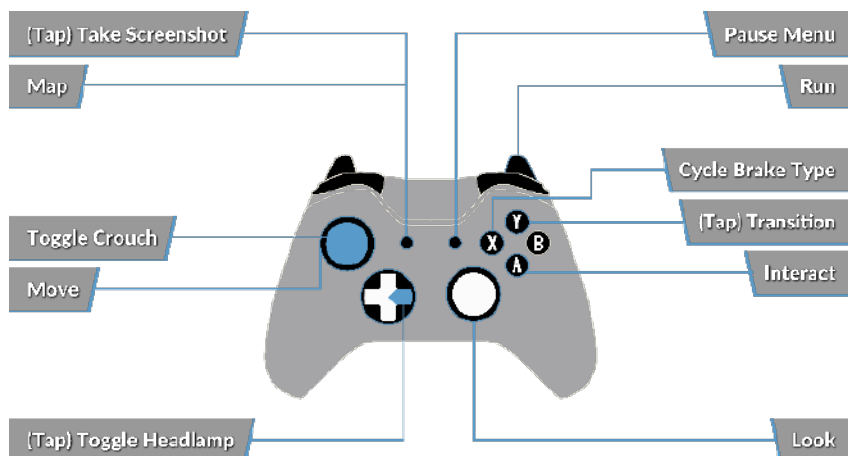

Services

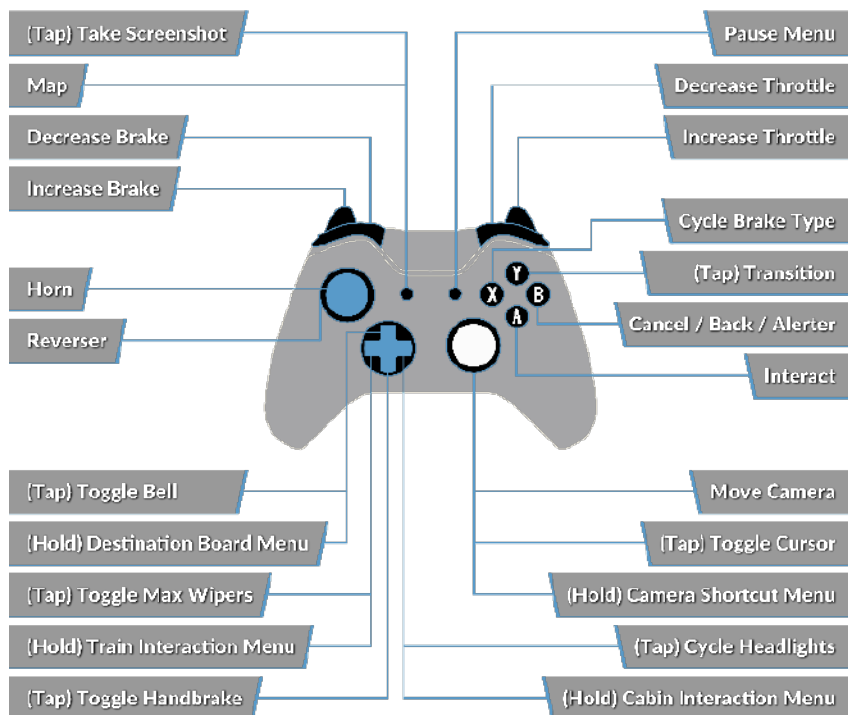

Provides a host of activities throughout an entire 24-hour time period, Service Mode is a new way to play. There's always something to do with a large variety of services to take control of or ride along with. Sit back and enjoy the action and capture amazing screenshots, hop on or off and ride along with the various services as they go about their duties or take control and carry out the duties yourself. Featuring over 300 individual services, you'll always find something going on.

Controls

Controller - First Person Mode

Controller - Locomotive Mode

Controlling the Camera & Camera Modes

Train Sim World: Founders Edition includes a number of cameras for you to control.

To access the camera list, press and hold the right stick until a menu pops up in the middle of the screen. The first level of this menu allows you to select internal or external cameras.

Use the d-pad to move the selector, press the A button to select an option and the B button to go back up a level.

The exact set of cameras listed may differ depending on the train, but will always include a Driver view which is your normal view looking ahead at the track from the perspective of the driver. Simply select the view you want to move to it.

External cameras allow a view from outside the train. In order to facilitate easy camera control as well as allowing you to still drive the train fully you can use the Y button to toggle between Camera mode and Driver mode. An icon on the hud indicates which camera control mode you are in. You must be in Driver mode to change the camera you're using.

In Camera mode - Your controller will primarily control the camera movement and you will lose access to most driving functions except the alerter/dsd response on the B button.

In Driver mode - Your controller will primarily control the train and you will have limited movement of the camera.

Front and Rear Boom Camera - Your camera extends outward on an invisible pole and you can rotate it around your focussed vehicle. Use the right stick to rotate the camera and the left stick to move it in and out.

Front and Rear Camera - A camera that allows you to freely look in all directions while remaining connected to your train, useful for coupling and changing switches as well as great views as you drive. The right stick rotates and angles the camera, the left stick is used to move it forwards, backwards, left and right. Use the right trigger to raise the camera height and the left trigger to lower it. You can also lock the current camera height by holding the right bumper, so that even if you move forwards while looking down, you will stay at the same height.

Free Camera - Freely move around without limits using this camera. Use this camera to navigate your way around a busy yard, change switches or position it to get the perfect screenshot. Controls for this mode are the same as the Front/Rear camera.

Dovetail Live

Dovetail Live is your one-stop destination for everything Train Sim World® related, including features, interviews, competitions and all the latest news. We have an ever-growing and vibrant community of train enthusiasts from all over the world, ranging from experienced railroad veterans to new players getting into the world of train simulation. So, if you haven't already, why not sign up for an account today and join our community – we'd love to have you on board!

Dovetail Live will evolve to become central to Train Sim World®, enriching the player experience in every way from offering rewards, building a community of like-minded players and helping every player find the right content to create their own perfect personal experience. Signing up for Dovetail Live is completely voluntary. However, users that do sign up for it will receive exclusive benefits in the future.
