

PRESENTING OUR NEWEST INNOVATION

MATERIAL HANDLING CAGE

The BHS line of Material Handling Cages (MHC) is designed for construction sites and other applications that require lifting heavy loads to upper stories. They're built for extreme durability and long service in harsh conditions, with all-steel construction and a powder coat that resists damage from impact, scratches, chemical exposure, and the elements.

Versatile Transport Solution

The Material Handling Cage is designed for both lifting and horizontal transport. It features heavy duty casters, integrated fork pockets, single or four-point lifting eyes, and an expanded steel cage to keep materials safely within the unit's footprint.

Secure Vertical Lifting

Choose between single-point and four-point lift attachments; either option allows users to lift fully loaded cages with cranes or other lifting equipment.

Full Mobility

The Material Handling Cage rolls smoothly on heavy-duty, non-marking casters and is easily transported with 4 way fork pockets. Once hoisted to the level (or story) of use, the unit can be easily maneuvered or repositioned via the casters.

Protects Contents

Expanded steel caging on all four sides of the unit keeps building materials, tools, and other construction loads safely contained.

Fully Customizable

Standard designs include a single bin design with a 3,000 lb capacity. For unique applications, the BHS team can change dimensions, load capacities and include personalized features.

MATERIAL HANDLING CAGE

MATERIAL CARTS & WAREHOUSE TRAILERS

Overhead Lifting

Designed for overhead lifting and transport via crane with one or four Lifting Point(s) depending on the model*

Loading Gate

Drop down side gate to load bulky items effortlessly

Handles

Easily accessible handles to raise and lower the side/loading gate

Customizable

Custom colors, features, dimensions, and load capacities available on request

High Load Capacity

3,000 lb capacity for lifting heavy materials where an elevator may not be present

Easily Maneuverable

Two swivel and two rigid lockable casters for smooth travel

MHC-6048-1PT

Custom Lasered Logo

Add your logo to the exterior plate, optional

Expanded Steel

Expanded steel caging on all four sides of the unit keep contents safely contained

Durable Construction

Heavy-duty steel construction with an abrasion-resistant powder-coat finish

Increased Maneuverability

Ideal for transporting construction materials from ground-level to upper stories

Fork Pockets

Four-way fork pockets allow travel via forklift from any side

MHC-6060-4PT

Note: loads must be centered and/or evenly distributed on single-point lift units to ensure stable and even lifting.

Model	Capacity	Width	Length	Height
MHC-6048-1PT	3000 lb / 1360 kg	48" / 1219 mm	60" / 1524 mm	76" / 1930 mm
MHC-6060-4PT	3000 lb / 1360 kg	60" / 1524 mm	60" / 1524 mm	84" / 2133 mm
