

PRESENTING OUR NEWEST INNOVATION

ORDER PICKING PLATFORM– KNOCK DOWN FLAT

The Order Picking Platform–Knock Down Flat (OPP-4840-KDF) attaches to an order picker truck for upper-shelf picking to pallets or inventory replenishment directly from pallet loads. This steel platform is sized for the footprint of a standard pallet. Slotted steel panels along three exterior edges safely contain items, improving safety while saving time for operators.

Those panels knock down flat between uses, greatly reducing shipping costs and saving space between uses.* Units are also stackable for compact storage, particularly with panels disassembled. This capability makes the OPP-4840-KDF ideal as a support product for peak season. Options include casters and push handle for manual cart functionality, panel additions that double the height of the enclosure, and a bifolding work surface to store scanners and tools.

Heavy Duty Construction

This steel, powder-coated platform is built for heavy usage, and slotted steel panels limit weight while providing extraordinary durability. This rugged design safely supports up to 1,000 pounds (454 kilograms) per load.

Ultra Compact Storage

Stackable, nestable design takes up less space between uses.* Stack up to six units high in the flat configuration, or up to two levels fully assembled.

Lower Freight Costs

Knocked down flat, each OPP-4840-KDF stands just 15 9/16 inches tall (395 millimeters). Compared to an assembled height of 32 9/16 inches (827 millimeters), that saves considerably on shipping and transportation costs.

Custom Features Available

As an original equipment manufacturer, BHS, Inc. can build OPP-4840-KDF units to match your specifications. Standard options include casters, push handle, bifolding work surfaces, powder coat colors, and laser-cut brand logos.

* Removal of bolts required for disassembly.

ORDER PICKING PLATFORM-KDF

SHIPPING & RECEIVING, ORDER PICKING

Knock It Down, Stack It Up

Ships knocked down flat to save on freight costs.

Collapse to nest up to six units high (two shown).

Stack two assembled units during storage.*

Double the Storage Volume

Optional set of additional panels increases panel height from 24 7/8" to 49 3/4" (632 mm to 1264 mm). *Extended Walls, Caster, and Handle options pictured.*

* A maximum of one unit can be safely attached to an order picker truck. Do not attempt to use stacked units simultaneously on lift truck.

Secure Palletizing

Designed to store standard pallets and full pallet loads, providing safe, high-capacity storage during picking and putaway

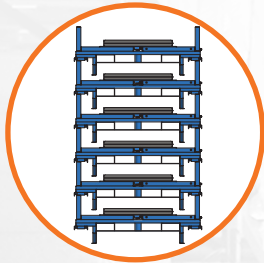

Multi-Purpose Cover

Optional bifolding cover provides a work surface with adjustable dimensions. Hinged cover bifolds to make a 4-sided tray or collapse for storage.

High Load Capacity

Carrying capacity of 1,000 pounds (454 kg)

Ultra Compact Storage

Collapse and nest up to six units to maximize storage space

Heavy Duty Construction

Steel, powder-coated construction for increased durability

Light Weight Design

Slotted steel side panels stand 24" (610 mm) high when assembled

Optional Handles

Add an optional Push Handle for ergonomic manual use

Easy Transport

Integrated fork pockets designed for use with order picker or pallet jack

Maneuverability

Optional casters are available for manual mobility

Customizable

Custom engineering available on request
