

PRESENTING OUR NEWEST INNOVATION **ANGLED SHELF CART**

Keep bins and packages firmly in place with the Angled Shelf Cart from BHS, Inc. Shelves feature a gentle rearward slant, which keeps contents away from the only exposed edge. Expanded metal caging on the other three sides eliminates the risk of roll-off.

Designed to work for you

This design simplifies order picking, especially in pick-to-bin or pick-to-carton applications. High-capacity shelving handles more orders per trip, while smooth-rolling casters and a comfortable push bar improve ergonomics.

No-Spill Design

Shelves tilt two degrees toward the back of the unit. The frame's rear and sides are lined with expanded metal caging. Together, these features keep contents securely in place.

Built for Ease of Use

A combination of swivel and fixed casters tracks straight and handles tight turns. An ergonomic push bar improves comfort during use.

High Capacity Shelving

Three shelves offer nearly 20 ft² (1.85 m²) of storage each. Upper shelves support up to 500 lb (227 kg) each, with a bottom-shelf capacity of 1,500 lb (690 kg).

Custom Modifications Available

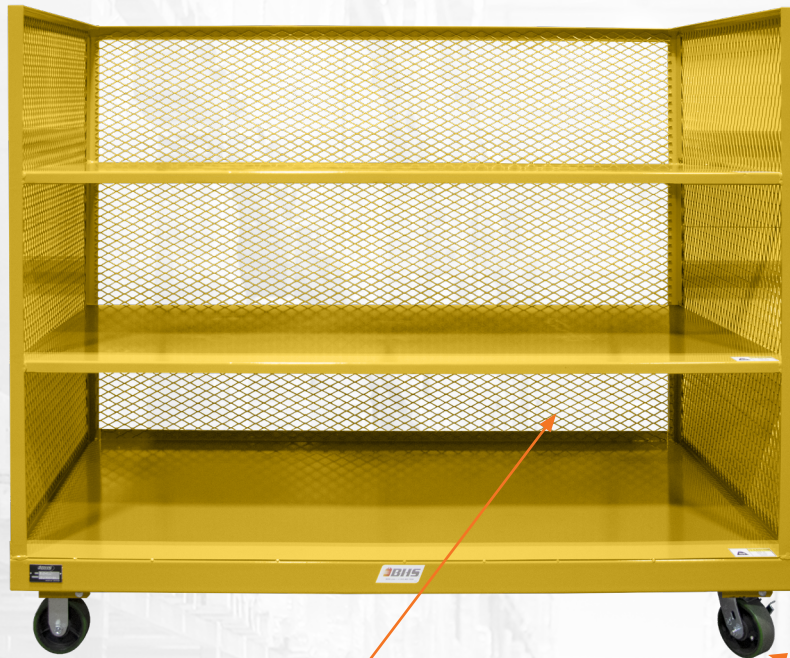

Get specialty shelf sizes, capacities, and arrangements. Customize units with your brand colors and logo. BHS, Inc. manufactures custom material handling equipment on request.

ANGLED SHELF CART

INDUSTRIAL CARTS

Increased Maneuverability

Ergonomic push bar for comfortable, single-user operation

Large Volume Shelves

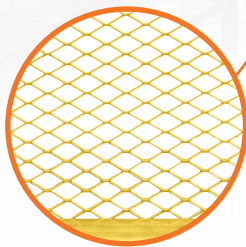

Standard models include two top shelves that carry up to 500 lb (227 kg) each. While the bottom shelf supports up to 1,500 lb (690 kg).

Mobility

Travels on 5" (127 mm) poly casters — 2 rigid, 2 swivel. Caster arrangement improves steering and tracking.

3 Side Containment

Expanded metal on three sides improves containment.

Customizable

Custom sizes, capacities, and engineered models available on request. Contact BHS at 1.800.BHS.9500 for more information.

Secure Shelving

Angled shelving with a 2-degree rearward grade keeps contents secure.

Durable Construction

Heavy-duty steel construction and durable powder coat finish resists rust and scratches.
