

PRESENTING OUR NEWEST INNOVATION

MODULAR LOADING DOCK PLATFORM

Modular Loading Dock Platforms (MLDP) provide forklift access to and from trailers anywhere — without the need for construction or permanent alterations to your facility — as long as a concrete surface is available for support. BHS custom-builds these free-standing steel structures to meet your unique docking needs. Choose one or more dock positions, as well as custom sizes, configurations, heights, and weight capacities.

Custom Engineering and Manufacturing

The BHS engineering team works with you to identify key dock requirements. Once you approve the design, we manufacture your MLDP at our cutting-edge facility in St. Louis, MO.

Integrated Dock Equipment

Modular Loading Dock Platforms can be integrated with your choice of dock levelers, dock locks, enclosures, safety equipment, and more.

Quick, Cost Effective Installation

Bolt-together assembly allows you to install a permanent dock as quickly as possible, while saving on shipping costs. Adjustable supports allow for level installation on rough or uneven concrete slabs.*

Heavy-Duty Construction

Welded steel construction and weather-resistant powder coatings ensure long service life in high-throughput scenarios. Modular Loading Dock Platforms are quick to install, but slow to wear.

MODULAR LOADING DOCK PLATFORM

RAMPS & PLATFORMS

Adjustable Supports

Adjustable supports enable installation on uneven concrete.

Maximum Traction

Heavy-duty serrated bar grating on ramp and platform deck provides maximum traction in all weather condition and allows dirt and debris to pass through.

Asset Protection

High steel ramp curbs guard edges to provide maximum run-off protection

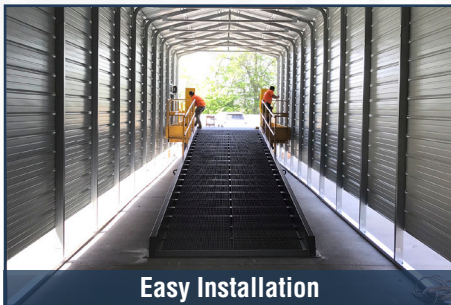

Impact Resistant

Designed to withstand impact from loaded trucks while docking.

Enhanced Safety

Curbs, railing, and signage can be integrated for added safety.

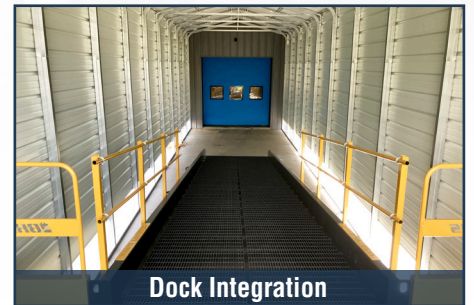

Easy Installation

When permanent dock construction is not an option, the MLDP adds dock positions so you can expand loading zone access quickly with bolt-together assembly.

Fully Customizable

Further customize your loading zone solution by integrating an optional enclosure, dock equipment, ladder/stairs, added safety features, and more.

Dock Integration

Simplify forklift access to trailers by creating a standard height loading dock where only ground-level building access exists.

Customize the MLDP to Meet Your Needs

The MLDP is custom-built and can support multiple dock positions, platform sizes, capacities, and heights. Contact the BHS sales team at **1.800.BHS.9500** to discuss your requirements.

* MLDP must be installed on concrete surface in order to support the weight and load of the unit.
