

## REEL RACK SYSTEM

Enhance wire and cable storage with a Reel Rack System optimized for wholesalers. These reel holders secure to standard pallet racking, with your choice of system depth. They feature three axle pockets — front, middle, and rear — which can be lined with slide blocks for smooth payout.

### Durable Construction, Versatile Cable Storage

Three storage positions support diverse use cases, from parallel pulls to high storage density to convenient access for an oversized cable reel. Thick steel spanners support all three shaft cavities, offering some of the industry's most dependable storage solutions for cable and wire.

#### Built for Bulk

Steel-bar construction provides greater capacities than sheet-steel alternatives.

#### Versatile Cable Storage

Three axle positions support reels of any size, and allow you to control the point of access.

#### Converts Existing Racks

Transform pallet racking into high-density cable storage. Choose rack depths of 42", 48", or 60". Custom sizes are also available.

#### Custom Models Available

Need higher capacities? More axle pockets? Different sizes or colors? We'll customize your Reel Rack System to meet any specifications.
