

SINGLE POST LIFT

Single Post Lifts provide dependable access to the undersides of light industrial vehicles like AGVs, AMRs, and small tuggers. They're also ideal for lifting small vehicles like motorcycles, ATVs, and lawn mowers. These compact lifts are essential for maintenance and service providers for a variety of light vehicles across industries.

Safe Lifting in a Compact Footprint

Single post design provides powerful lifting capabilities, while bolt-down floor mounts keep the footprint limited. This design allows Single Post Lifts to fit into virtually any space, from the largest fleet depot to the smallest garage.

Safer, More Comfortable Service

Single Post Lifts raise vehicles to an ergonomic height, providing access without awkward postures.

Premium Hydraulics

Top-quality components include braided wire lines, hardened chrome pistons, and honed cylinders.

Heavy Duty Construction

The lift track is contained entirely within a formed steel frame, with a durable powder coating to stand up to industrial environments.

Customizable Carriages

Tailor lift platforms to match your vehicles, including custom shapes, sizes, and restraint mechanisms.

LIFT TABLES & PALLET POSITIONERS

SINGLE POST LIFT

Overload Protection

Thermal overload protection and velocity fuses enhance safety

Effortless Controls

Raise the carriage with a simple press-and-hold of the panel button, and lower it smoothly using the lever below. Intuitive, user-friendly controls make operation quick and seamless.

Space Efficient

Compact design fits into spaces small or large

Controlled Operation

The integrated foot pedal activates mechanical locks that automatically engage as the platform rises, securing the load even in the event of failure. Simply depress the pedal before lowering for safe, controlled operation.

Quality Hydraulics

Premium hydraulics: braided wire lines, hardened chrome pistons, and honed cylinders

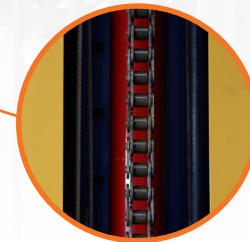

Versatile Carriages

Custom carriages provide support for different vehicle types and/or engines

Service Access

Safe access to the underside of light vehicles for maintenance or service

Safer Lifting

Enclosed lift track reduces hazards for operators

Industrial Strength

Heavy duty steel construction with a chemical-resistant powder coating
