

PRESENTING OUR NEWEST INNOVATION

PARALLEL REEL PAYOUT WAGON

The Parallel Reel Payout Wagon (PRW) transports high-volume cable reels with or without additional material handling equipment. This unit features a slim profile to fit easily through 34-inch door openings, but it is sized to carry up to 5,000 pounds of product. The PRW is available with virtually any combination of reels to meet specific applications, from custom paralleling to long-term storage.

The Most Portable Parallel Reel Payout to Date

An ergonomic pivoting handle allows users to maneuver the unit around tight corners manually, while two-way fork pockets provide portability via lift truck. Heavy-duty casters move easily through narrow aisles.

Prevents Product Damage

Smooth payout and steel flanges keep wire and cable safe, even in harsh environments. Store and dispense up to 5,000 pounds of product on a single unit.

Custom Reel Configurations

Choose any combination of multi-compartment reels, or add five independent storage reels. Ideal for on-site custom paralleling, combining multiple pulls into one easy motion.

Ergonomic Features

Even payout limits musculoskeletal strain during pulls. A pivoting push/pull handle assists manual handling.

Fully Mobile

A narrow frame fits through standard doorways and narrow aisles. Position the unit manually on heavy-duty casters or transport via forklift with frame-mounted fork pockets.

PARALLEL REEL PAYOUT WAGON

WIRE & CABLE HANDLING

Heavy-Duty Construction

2" (51 mm) solid steel center shaft equipped with locking pin

Customizable

Custom reel configurations and laser cutting available

Versatile Arbor Holes

0.75", 1", and 1.13" (19 mm, 25 mm, and 29 mm) arbor holes for a variety of wire gauges

Uncomplicated Paralleling

Free-spinning compartments provide an even payout with the option to lock individual hubs when fewer cables are required

Portable Payout

Includes additional pivoting handle for navigating tight corners and narrow aisles

Stabilize Mobile Equipment

Optional floor lock keeps unit stationary when not in use

Travels Anywhere

The PRP wagon models are BHS's most mobile PRP model to date. It features casters as well as a shortened base frame designed to fit 34" (864 mm) minimum door openings with ease.

High Load Capacity

This PRP model is capable of holding up to 5,000 lb of cable

Full Mobility

Two-way fork pocket design enables transporting from the ends of the unit by forklift

Maximum Durability

2" x 4" x 0.25" (51 mm x 102 mm x 6 mm) wall tube base frame design and 0.75" (19 mm) UHMW alignment strips for center shaft prevent wear of components

Multiple Payout Options Available

One 1-position free-spinning reel & one 4-position reel

Two 1-position free-spinning reel & one 3-position reel

Three 1-position free-spinning reel & one 2-position reel

Two 1-position free-spinning reels

Four 1-position free spinning reels

Five 1-position free spinning reels

The PRP wagon is the most portable model, with a pivoting push/pull handle, standard fork pockets, and a narrow, 32" width.
