

PRESENTING OUR NEWEST INNOVATION

SHIPPING & RECEIVING DESK

The Shipping/Receiving Desk (SRD) is a fully adjustable packing station, available in flush or left- or right-hand oriented models with a variety of modular features for optimized ergonomic use. The SRD improves access to essential order-filling supplies, such as barcode scanners, shipping labels, and computer monitor. By matching the specifications of a packing desk to the workforce, facility managers can realize powerful ergonomic benefits, with associated productivity increases.

Optimized Shipping Workstation

A poorly designed shipping/receiving desk slows productivity and causes unnecessary repetitive motions, leading to fatigue and strain. BHS Shipping/Receiving Desks avoid these pitfalls by improving access to order-filling supplies, like barcode scanners, shipping labels, and computer monitors. The SRD is also fully adjustable with a variety of modular features for optimized ergonomics.

Ergonomic Design

Shipping & Receiving Desks are available with left or right cutouts to keep work within worker's ergonomic power zone. Adjustable elements allow users to modify the workstation to match tasks and physiology.

Custom Features

Most elements are adjustable, including the supply caddy, paper roll bar, label roll bar, scanner holster, and shelves. Custom sizes, load capacities, and laser-cut logos are available on request.

Formed Steel Construction

Shipping & Receiving Desks are made from 12-gauge steel for extreme durability. Steel shelves offer high load capacities on standard models.

Integrated Power & Lighting

Overhead light fixtures meet all OSHA workplace lighting requirements, eliminating eye strain. Removable power modules include eight receptacles, resettable circuit breakers, and sturdy aluminum housing.
