

PRESENTING OUR NEWEST INNOVATION

STOCK PICKING CART

Stock Picking Carts (SPC) are ideal for all order-picking and stock putaway tasks in warehousing, retail, and industrial applications. They include an integrated step ladder for access to higher shelves, with multiple safety features, including locking casters, floor brakes, and cutouts in the steps for greater grip.

Stock Room Solution

Three lipped shelves support heavy loads for high-capacity picking. Carts roll easily on two fixed and two swiveling casters that improve maneuverability, while the slim frame allows access to narrow aisles. These units are constructed of steel and powder-coated for durability, resistance to damage, and long service lives. Heavy-duty construction also makes the SPC suitable for use with heavy components in manufacturing and other industrial operations.

Improves Efficiency

Improves order picking and stock put away with high load limits. The three-shelved unit has lipped edges to hold products safely and provides a 1,000 capacity.

All-in-One Unit

Integrated, spring loaded step ladder contacts the ground when workers step on the non-slip steps, immobilizing the unit allowing safe access to higher shelves.

Small Footprint

Ideal for all material-handling applications, especially in warehousing and retail. The narrow frame allows the SPC to fit through all standard doorways and store in small areas.

Custom Designs Available

For unique applications, the BHS team can modify the shelving and custom-build to meet your specifications.

STOCK PICKING CART

SHIPPING & RECEIVING, ORDER PICKING

Durable Design

Durable steel construction
Rugged powder-coat finish
protects the unit from scratches,
rust, and chemicals

Slim Profile

Narrow profile allows access
through doors and tight aisles

Ergonomic Handles

Ergonomically curved push
handles with comfortable
molded grips

Non-Slip Steps

Steel steps feature grip cutouts
for enhanced traction

High Capacity

Three high-capacity shelves
with lips to secure items

Integrated Ladder

Integrated step ladder immobilizes
unit when stepped on allowing
safe access to higher levels.

Heavy Duty Casters

Two swivel and two rigid casters
for precise maneuverability

Powerful Locks

Swivel casters equipped
with brakes to secure
unit when not in use

Custom Options Available

Custom-built units available
including modified shelves,
casters, handles and more

Model	Overall Depth	Overall Width	Overall Height	Load Capacity	Unit Weight
