

PRESENTING OUR NEWEST INNOVATION

ORDER PICKING PLATFORM

Convert your order picker trucks to OSHA-compliant elevated platforms for selecting orders by attaching Order Picking Platforms (OPP) from BHS. These safe and dependable platforms provide access to top rows of shelving for order picking, pallet loading, stock putaway, inventory, and other aerial tasks.

Improve Safety During Elevated Order Picking

The OPP is designed for safety first. The deck features an anti-skid surface with toe guards to keep tools from falling. Tall steel barriers keep users safely within the unit, and a hook-and-chain mast restraint provides another layer of protection. Integrated fork pockets keep Order Picking Platforms securely attached to lift trucks.

Full Safety Features

Includes guard rails, toe guards, anti-skid flooring, and hook-and-chain mast restraints for greater safety. Attach a safety harness at multiple mounting points.

Strong Visibility

Users retain full visibility while within the unit, thanks to slatted guard rails. A bright safety-yellow powder coating makes the platform hard to miss for those on the ground.

Heavy-Duty Construction

Made entirely from steel for maximum durability. A powder-coat finish resists corrosion and chemical damage, protecting the steel beneath.

OSHA-Compliant Worker Lift

Order Picking Platforms comply with OSHA standards applicable to lifting workers with lift trucks, including 29 CFR 1910.178, for general industry, and 29 CFR 1926.451, for the construction industry.

ORDER PICKING PLATFORM

SHIPPING / RECEIVING, ORDER PICKING

Safe Solution

Meets all safety standards and regulations for vehicle-mounted elevated platforms

Elevated Access

Provides access to high shelving for order picking, inventory, or elevated tasks

Secure Attachment

Attaches securely to forks, converting lift trucks into an OSHA-compliant personnel lift

Platform Containment

High guard railing with a toe kick to contain operator and products on the platform

Fall Restraint

Multiple safety harness attachment points

Safety Gate

Hook and Chain in lieu of gate can be attached to left or right

High Visibility

Powder coated "Safety Yellow" for high visibility

Mobility

Fork pockets designed for dependable attachment to forks

Heavy Duty

Heavy-duty steel construction with a durable powder-coat finish

Detachable Barriers

Removable Steel Barriers allows for storage in a small space

OPP-4860

Slip-Prevention

Platform Deck features anti-skid surfacing

Hook & Chain

Hook and Chain mast restraint adds additional layer of safety when connected to mast

Heavy Duty Casters

Optional casters with wheel brakes improve maneuverability

Custom Builds Available

Custom designs available
