Service School Description & Curriculum

The BHS Battery Extractor Service School is a two-day clinic incorporating classroom instruction and hands-on learning. The school is located on-site at BHS Corporate Headquarters in St. Louis, Missouri, USA. Subjects include equipment operation, electrical, hydraulic, and pneumatic systems, troubleshooting procedures, and planned maintenance.

The BHS Battery Extractor Service School demonstrates important techniques to improve efficiency and performance, promote safe operation, and prolong the life of BHS battery extractors. Instructors assist students through every step of the training.

BHS provides the school free of charge. Classes include meals and transportation to and from class each day for the most convenient learning experience possible.

Curriculum:

- Product features and options
- Operation procedures
- Hydraulic theory and troubleshooting
- Flow, pressure, vacuum, force and work
- Schematic symbols and circuit drawings
- Service and parts orientation
- Electrical theory and troubleshooting
- Mechanical assemblies
- Component identification
- Planned Maintenance Program
- Adjustment procedures
- Equipment inspection
- Battery wash equipment maintenance and troubleshooting

Service School Itinerary

Please provide this Itinerary to all attendees. Thank you.
