

Fusion Builder Gel Removal

- Use a 100/180 file break the seal at the free edge and then file to remove the Gel Polish colour exposing the Fusion Builder until just a thin layer remains. Always switch to a 240 grit file near the natural nail.
- Perform nail prep using Lecenté cuticle tools
- Saturate your Lecenté Removal Wrap cotton pad well with acetone, wrap the nail, rubbing the soaked pad into the nail before folding the foil over and on top of the nail.
- Set a timer for 15 minutes, squeezing every 5 minutes to reinforce the acetone onto the nail.
- After 15 minutes, beginning with the first nail you wrapped. Twist and pull the nail wraps off.
- Remove any excess with a birchwood stick.
- With your 240 grit file, file and shape the nails to the desired length and shape. Cleanse thoroughly with Lecenté Prep & Dehydrator.
