

To Put an End to Unemployment...

We face an emergency – we need an emergency measure to ban layoffs.

- **Let the companies take from their profits to maintain jobs that exist today.**

The work that does exist should be shared out among everyone, with no loss in pay to anyone.

- **Why should some of us be forced to work 60 hours a week, while others go without a job?**
- **Why should those of us with a job be losing our health in the vicious push for more productivity, while others have no job?**
- **We could all be working half as many hours as we do today – yet each of us could be earning a decent wage every week.**

If the companies say they can't do it, then let's look at their accounts. We will see they have the money to do it.

Today, the big companies are sitting on a hoard of accumulated profits, amounting to almost eight trillion dollars.

- **That money was stolen from what workers' labor produced.**
- **The capitalists' hoard is harmful for society – it feeds speculation.**

Use that wealth to protect the lives of the working class and all ordinary people, to protect our jobs and our wages.

If any companies refuse, then their whole business should be taken away from them, without them getting one penny back.

**We Need a Working Class Policy,
A Working Class Fight!**
