

Website Pro

Technical Specifications

Unlimited Pageviews

Website Pro doesn't penalize high performing websites, therefore the product allows for unlimited visitors to your websites.

Unmetered SSD Storage

ZFS file server running on Google infrastructure.

Unmetered Database Storage

Hosted on Google's CloudSQL fully managed service with databases isolated for each site.

Unmetered Server Bandwidth

Website Pro is equipped to handle sites of all shapes and sizes. With unmetered capacity, we cover 99.9% of a typical small businesses storage/bandwidth needs.

Unlimited Free Migrations

Import your existing sites with any migration plugin or let us import it for you.

Automatic Daily Backups

Most hosting providers make you pay for monthly backups. With Website Pro, your website is backed up every day so you're able to restore anytime in one-click.

Google-Fast Speed

With Website Pro, you can expect world-class speed as the product leverages Google and other infrastructure, including:

- **HTTP/2 support**
- **PHP 7** – the most recent version of PHP and PHP packages
- **NGINX** – It's designed to be faster and more scalable than, the traditionally used, Apache.

Free SSL With Let's Encrypt

With other hosting providers, you're paying extra to protect your websites each month with SSL certificates. Website Pro offers free SSL for all websites hosted.

Docker Containers

Website Pro hosts your websites in Docker Containers built with the most recent version of Alpine Linux and system tools – together, this makes one awesome container that is hyper-secure, simple, and efficient.

- **Kubernetes** – Manages, deploys, and scales the Docker Containers.
- **Google Container Engine** – manages Kubernetes to keeps the servers secure and automatically scales, repairs, and upgrades the server.

Strong Firewall

Only open the exact ports we need, only allow HTTPS traffic to our sites, Google blocks bot-net IP addresses.

Free Subdomain

A free URL to show your customers live progress of their site.

phpMyAdmin Access

Advanced user capabilities to easily manage your database without depending on WordPress. Free for all websites hosted within Website Pro.

SFTP Access

Manage your website file system directly within Website Pro.

Automatic Core Updates

Website Pro handles all minor WordPress core updates for you.

Backup Tools

Website Pro highlights all changes since your last backup, making it easier than ever to identify what was updated, added, or removed.

Malware Scanning

Powered by Sucuri, the leader in website security, Website Pro monitors every site around the clock for malicious hackers and security breaches.
