Mr. Lee, on behalf of CARE I am delighted to present this plaque to the National Association of Broadcasters. It indicates the great appreciation of the CARE organization for the contribution of time made available to it by the radio and television industry during the 20 years of CARE's existence.

This service has allowed CARE to tell the story of what people can do in the less fortunate areas of the world. I have long believed in this and I am sure my friends at CARE remember the space that was made available to them in city hall in Minneapolis when I was that city's mayor nearly 20 years ago. I have known CARE that long and I commend the radio and television industry for what it has done to make the name CARE synonymous with the humanitarian concern of the people of this country.

In its 20 years as a non-profit voluntary agency CARE has distributed over three quarters of a billion dollars in goods and services in more than 62 countries. This is an astounding figure when one considers that its support is voluntary support from people and organizations such as the National Association of Broadcasters.

So, on behalf of the CARE organization I present this plaque to you, Mr. Lee, representing the National Association of Broadcasters, as a token of CARE's appreciation to the radio and television industry.
