Fergus Falls, Minn. July 3 1893

S. Breed Esq  
St Paul Minn

Dear Sir. You will remember when we last saw you of speaking about the flume where the water wheel sets of having a number of men work to fix it one Sunday. It appears to be settling we have had to put the gear on water wheel shaft deeper in gear. &c. And as there was a question between us last year about rental at time of stoppage for repairs. we want this clause inserted in the lease before signing "In case of settling of Flume or water wheel & Mill is shut down for repairs. all rents shall Cease until said repairs are completed" This will obviate any discussion between us hereafter. shall we have this inserted & then execute the Lease & forward to you How about the water why don't you get the matter fixed instead of dallying along.
