

St. Paul, Minnesota, May 3, 1926.

L. W. Hill, Esq.:

I send you herewith the following:

1. Memorandum of Association of Canadian Rockies Hotel Company, Limited.
2. Articles of Association of Canadian Rockies Hotel Company, Limited.

If satisfactory to you, will you please sign both copies as subscriber.

I thought that if possible we should have the same directors as we have for the Glacier Park Hotel Company. Please let me know if this is satisfactory to you. The present list is as follows:

L. W. Hill  
R. Budd  
G. R. Martin  
W. P. Kenney  
F. L. Paetzold

My idea is to make the capitalization \$500,000 if we can easily change it; but that if a change cannot be easily made, we should make the capitalization \$1,000,000 now.

Ralph Budd.

St. Paul, Minnesota, May 3, 1926.

Mr. H. A. Noble:

Herewith I hand you A.P.E. Chief Engineer's #36162, covering improvements and repairs to buildings, etc. owned by the Glacier Park Hotel Company.

I would like to see you about this, and go over the various items, but before doing so, I will be glad to know how much of it has been done, and how much you think we should undertake this year.

Louis W. Hill.

15-1 E

Mr. Tills:

Returned by Mr. McMahon's office.

St. Paul, Minnesota, May 4, 1926.

Mr. Ralph Budd:

Referring to your letter May 3, with which you sent me memorandum of Association and Articles of Association of Canadian Rockies Hotel Company Limited:

I have signed and return herewith both of the documents mentioned above, as requested by you.

Louis W. Hill.

May 4, 1926.

Dear Mr. Cook:

I have just received your letter of April 30, enclosing copy of one dated March 8. The original of the last mentioned letter must have gone astray, as I have been West for a few months, and this probably accounts for my not having received it.

It is rather difficult to outline just what would be best for your young son and his friend to undertake in the way of a Western outdoor trip. I would suggest that the young men do not commit themselves to any particular guides or country, or any definite number of days to be out, as they might get started and wish to change or vary their trip. I think it might be a mistake to send a young boy - or even a young man - too far into a remote country. In case of illness or a sprained ankle or any other little matter, it is well to be not too far from civilization.

First as to when to start West: I think his vacation date will be almost controlling on this. Assuming he gets out of school the end of June; with a few days at home it would put him in the West about the middle of July or before, and that, of course, would be an excellent time. July and August are a good time in the mountains, as one is away from the heat prevailing in other sections.

I would suggest that if your son and his companion go to Glacier Park I will be glad to give them a letter to Mr. G. W. Hoffinger of the Park Saddle Horse Company, who has something like seven hundred saddle and pack horses, and furnishes guides and outfits for camping trips.

There is also a ranch a few miles South of Glacier Park station which belongs to George Jennings, where my children have spent a great deal of time in the past. Your son could start out by spending a few days with George Jennings (or stay as long as he likes) making such side trips as he may desire. Formerly there was good fishing - and there probably still is - near Jennings' ranch.

In the mean time they could ride up to Glacier Park in a day, as the distance is only six or seven miles, and be planning or arranging for their camping trip in the Park. They probably would want to take a motor trip up to Many Glaciers, make some saddle horse side trips there without going to the inconvenience and trouble and expense of a camping outfit, and then, finally having seen the principal accessible features of the Park, they could outfit at Many Glaciers for a pack horse camping trip into the North country - Belly River, over the Indian Pass to Satersten Lake, and possibly as far West as the Kintla lakes - all depending upon how much they are interested in fishing.

I am mailing you some Glacier Park literature, and particularly sending you a government quadrangle contour map, duplicates of which you can obtain from

Mr. Alfred A. Cook

#2.

5/4/28.

the government at Washington, D. C. These quadrangles are very useful, and it would be helpful for your son to learn how to find his way through the country by the use of such a map.

I would suggest that the young men:

Try Jennings' ranch, South of the Park, for a few days.  
Then take Saddle horses from Mount Henry to Two Medicine.  
Two Medicine over Dry Fork to Cutbank.  
From Cutbank to St. Marys by way of triple Divide, and camp at Red Eagle if the trail is open.  
From Red Eagle to St. Marys, and on to Sun Camp.  
From Sun Camp over Logan Pass to Granite Park.  
Granite Park to Many Glacier.

At Many Glacier they could either keep their camp or give up the pack horses and stop at the Hotel a few days, so as to take in Iceberg Lake, Cracker Lake, Grinnell Glacier, etc. Then when they are ready, take a new outfit, changing guides or cooks or horses if they wish, or obtaining such as they wish, and start North over the Red Gap to Belly River country, etc.

I am sorry if I have caused you any delay, and hope you will let me hear from you if there is anything further we can do, as no doubt there may be.

Very truly yours,

(Signed) LOUIS W. HALL

Mr. Alfred A. Cook,  
Trinity Building,  
New York, N. Y.

P.S. I have marked in pencil on the quadrangle map the saddle horse trips outlined in the letter - Glacier Park to Two Medicine, Cut Bank, Red Eagle, St. Marys, Sun Camp, over Logan Pass (with a side trip to Hidden Lake - about a mile), then back and on the Garden Wall to Granite Park; from there east over Swift Current Pass, to Many Glacier. From there you will see the side trips marked in red. Then I have marked the route over Red Gap Pass (a new pass) from Many Glacier north to Belly River country, which is a very beautiful country; then from Belly River up Glen Lakes, over the Indian Pass, either to Flat Top or down the Little Kootenai to Waterton Lakes. Indian Pass is very wonderful, and then south of it is an ice-berg lake called Sue Lake, which I do not believe has yet been photographed, and is well worth while for the boys to see. It would be a good idea for them to put in a day camping below the Indian Pass so as to explore Sue Lake, etc. Beyond that I have not marked, but there is a lot of country to explore.

Ed Hoffmeyer, Kalispell, Montana*

St. Paul, Minn., May 4, 1926.

Mr. W. R. Mills:

I understand we are about out of copies of topographic map of Glacier National Park, and believe it would be well to order about two hundred of them for mounting and to be available for sale in the Park.

These maps are very good from an advertising standpoint and particularly useful when mounted on linen.

When supply is received I should like to have about six copies.

Louis W. Hill.

Copy to Mr. H. A. Noble.

DAY LETTER

BE BRIEF

SAINT PAUL, May 5th, 1926.

Geo. W. Dishmaker - On Line.

1) Mr. Hill is sending three barrels of gladiolus for Glacier Park out on train three tonight, addressed to the agent that point. Please arrange to assist the gardener in putting them out promptly on arrival.  
B-19.

C O Jenks.

cy - Mr. Louis W. Hill.

St. Paul, Minnesota, May 5, 1926.

Mr. H. A. Noble:

Referring to conversation we had a short time ago regarding planting of Gladiolus bulbs at Glacier Park:

Mr. Jenks has wired Mr. Dishmaker as follows:

"Mr. Hill is sending three barrels of gladiolus for Glacier Park out on train three tonight, addressed to the agent that point. Please arrange to assist the gardener in putting them out promptly on arrival".

As indicated in the above quoted message the three barrels of bulbs go forward on Train No. 3 leaving St. Paul tonight, May 5, and will arrive at Glacier Park Friday morning, May 7. I presume you will want to wire or write your gardener at Glacier Park to be on the lookout for them, and see that they receive proper attention on arrival.

As a matter of information, there is enclosed herewith a memorandum indicating the number of bulbs of each variety, and their description as to color, except that there is one lot of 340 we have no information available, as the tag giving description is lost. There is also enclosed a memorandum giving instructions as to planting and care.

Simply as a matter of information, I will be glad to be advised when they have been planted, and will be interested to know, what, if any, success is the result of their planting.

Louis W. Hill.

Copy to Mr. C. O. Jenks.

GLACIER PARK HOTEL COMPANY

St. Paul, Minn., May 5, 1926

Mr. Louis W. Hill: ✓

This will acknowledge receipt of your letter of May 5th in which you submitted a detail of the three barrels of Gladiolus bulbs you are shipping to Glacier Park on May 5th.

I have today instructed our gardener at Glacier Park to be on the lookout for these, and have also sent him the instructions in planting and culture.

At a later date I will advise you what success and results we are getting from the planting of these bulbs.

AAA:EMO

*James*  
*Baker*  
*L. W. Hill*  
GLACIER PARK HOTEL COMPANY

St. Paul, Minn., May 5th, 1926

Mr. Louis W. Hill:

Referring to yours of May 3rd and returning attached A.F.E. No. 36162. The only items that are done ~~or under way~~ are:

- ITEM 1; The twelve (12) reading lamps recommended for each hotel. These we purchased a few weeks ago; a simple wrought iron bridge lamp, complete with shade, cord and everything for \$2.94 on special sale at Field, Schlick & Co.
- ITEM 2; GLACIER PARK HOTEL, provides for roller window shades in convention hall. Instead of roller shades I recommend cloth shades of dark material, such as blue denim. It is simply for darkening the room on occasions. I can do this with cloth material for a cost of \$20.00.
- ITEM 3; Renew steam line from Power house to Hotel. This work is under way. When the pipe was exposed it was found to be still in good shape so that we are simply replacing the rotted wooden conduit and putting in new pipe covering, and making some repairs to the man-holes. The cost will be very materially less than that estimate, probably not half.

TWO MEDICINE CHALETS:

9  
1  
THE additions to the Two Medicine 18x18 chalets at a cost of \$3,000.00 could, if you wish, be postponed. I am in hopes we will be able to build Two Medicine up, now that we have what I think will be a popular horseback trip operating through there as a result of Mr. Noffsinger establishing a tent camp in the Red Eagle. We never have had Two Medicine filled to capacity. I would not feel like urging this improvement until I show you we can develop the business for it.

GOING-TO-THE-SUN CHALETS:

7  
1  
Item marked 1, provides for use of varnish. I think we should be very careful where we put varnish. Once a piece of wood is varnished nothing else can be done with it except put on more varnish. I think, where necessary the use of boiled oil, Cedar oil or stain will be preferable.

Louis W. Hill, #2.

ITEMS 4,5 & 6: In view of the Government's letter intimating that a hotel be built on Logan Pass, I would not feel justified in urging this \$65,000.00 expenditure, which would run to \$75,000.00 by the time the place was furnished, until the question is definitely determined as to whether or not a hotel is built on Logan Pass, either by us or other interests. A hotel on Logan Pass would surely cause a great decline in business at Sun Camp. Much as we need additional facilities at Sun Camp, under present conditions I think the matter should be fully considered in connection with the possibility of a new hotel as close as Logan Pass.

I do favor the installation of a hydro electric plant. This will enable us to put more lights into Going-to-the-Sun Camp, which are needed, and operate more economically.

15-1 E

St. Paul, Minn., May 7, 1926

Mr. L. W. Hill:-

Concerning wind velocities at Waterton Lakes Park hotel site and at the Glacier Park Hotel:

Anemometers were set up so that readings began at Glacier Park March 8th and at Waterton Lakes Park March 12th.

At Waterton Lakes Park during the month of March the period from the 16th to 23rd was very windy, the highest average velocity for a twelve hour period being  $46\frac{1}{2}$  miles per hour. They did not report the maximum velocity, but to produce an average of  $46\frac{1}{2}$  miles for a twelve hour period there must have been short gusts of a maximum velocity of from 60 to 75 miles per hour. General direction of the wind was S.S.W. which the Park Authorities advise is the prevailing direction of the high winds there.

During April the period from the 19th to the 22nd was quite windy, maximum of 50 miles per hour being reached. General direction of the wind S.S.W.

At Glacier Park Hotel the period from March 17th to 23rd was very windy, maximum of 55 miles per hour being reached on the 17th and 21st, and 70 miles per hour on the 23rd.

During April the only high wind period was from the 16th to 22nd, when maximum velocities of 40 miles per hour were recorded.

Please note that the dates and maximum velocities of the highest wind in March and April were practically the same for both Waterton Lakes Park and Glacier Park Hotel.

Mr. James C. Younglove,  
Assistant General Manager,  
Railroad and Government Department,  
Johns-Manville Company,  
Chicago, Illinois.

Dear Mr. Younglove:

Referring to my letter of the 6th, quoting wire from our Superintendent at Whitefish relative to Miss Manville and her party.

We have another wire from our Superintendent dated today, stating that the party went into the South Fork country from Kalispell yesterday, May 6th, and if we have anything further to advise, will write you again.

Our Mr. T. J. Hileman of Kalispell, our official photographer, at our suggestion, got in touch with Miss Manville and we asked him to see if he could not furnish her with some photographs which she might desire. I have a note from him this morning stating that Miss Manville was to be at his studio at Kalispell on May 5, so I expect her family will have some photographs showing just how she really looks while in the West.

Yours very truly,

(Signed) W. P. Kenney

cc Mr. Louis W. Hill.
