V - The Fire Marshal will have general supervision over the apparatus, and the measures taken for the protection of the post from fire. He will have at least one fire drill a month at such times as may be decided upon in each case after conference with the Commanding Officer.

The senior assistant in each district will have charge at any fire within his district, subject to the orders of the Fire Marshal and the Commanding Officer.

Near the end of each month the Fire Marshal will cause his assistants to inspect all fire apparatus within their districts, and to make a written and detailed report as to the condition thereof. These reports will be laid before the Post Commander by the Fire Marshal with such recommendations as he may deem fit.

The senior officer present will assume charge at any fire until the arrival of the Fire Marshal or of one of his assistants.

On an alarm of fire, all organizations will proceed to the scene thereof taking with them all fire-buckets and axes and such special apparatus as is assigned to them by section I of this order, (except Company C, 28th Infantry, which will join its cart at the fire.)

Organizations having charge of hose carts will detail by name two spanner men and two wrench men, and two substitutes for each of these, and will see that they understand the use of the spanner and wrench,

Salvage companies will detail by name six special ax-men and six substitutes.

Organization commanders will be held responsible that after any fire or drill all apparatus assigned to them is put in perfect order—hose dried, and any damage repaired.

Company officers upon an alarm of fire will join their commands at the earliest practicable moment, either at their barracks, or at the scene of the fire.

Officers will keep their men in hand at fires and

avoid confusion. To this end organizations upon arrival thereat will be reported to the Fire Marshal or to the assistant in charge, and will then be held in ranks, accompanied by their officers, until told to do some specific thing.

One relief of the guard will proceed to every fire and be reported by the officer of the day to the Fire Marshal or to the assistant fire marshal in charge.

In case of fire, the commander of the guard will have the reveille gun fired three times, will unlock the engine house, and will cause the musician of the guard to sound fire call. Musicians of organizations will take up and repeat the fire call until it is apparent that the garrison has been aroused, but they will not confuse matters by continuing to sound the calls after that has been done.

Any one discovering a fire will immediately give the alarm, arouse the occupants of the building, and call up the central operator from the nearest telephone. Sentinels may quit their posts to carry this regulation into effect.

A prolonged ring on the telephone will be used when sending in an alarm of fire and will receive immediate attention by the operator on duty. Anyone so reporting a fire will give the operator the location of the same and any other information considered necessary. It will be the duty of the corporal of the guard, whose relief is on post, at the sounding of the alarm to give notice to the telephone operator. The operator will stay at the switch board and notify the Commanding Officer and all of the fire marshals that have telephone connection, also the lower guard house and the stable guards, as to the location of the fire. One man

connected with the telephone office will sound the alarm by the bell in tower; if none is in the vicinity, the operator on duty will call anyone in sight to do so.

The following signals will be used to indicate the locality of the fire:

One stroke—repeated at short intervals—First District.

Two strokes—repeated at short intervals—Second District.

Three strokes—repeated at short intervals—Third District.

The Quartermaster will give such orders to the engineer at the pumping station, with respect to increased pressure, as the emergency requires.

One surgeon and three hospital corps men will proceed to the scene of every fire prepared to give medical aid, taking a hand litter with them.

#### WATER SIGNALS.

One long blast of the trumpet---Turn off water at hydrant.

Two short blasts of trumpet---Turn on water at hydrants that have hose in readiness.

#### VI. GENERAL INSTRUCTIONS.

1. The first duty of those first at the fire is to enter the building and remove every living thing, people and animals.

2. Clear the house of smoke by opening windows at the top or at the hatch door leading to the roof; this may increase the fire at first, but a fire cannot be fought in smoke.

3. Locate the fire. Never follow a fire up but try to head it off.

4. Don't talk and shout, keep quiet so that you can hear commands; your chiefs are responsible for your conduct and efficiency.

5. To open a fire plug, place the wrench on the plug, place left hand on top of the plug over the wrench, take hold with the right hand and pull toward you.
