Near the end of each month these Assistant Fire Marshals will inspect all fire apparatus within their respective districts and make a written report as to its condition, which report will be laid before the Post Commander by the Fire Marshal with any recommendations that may be necessary.

The general fire apparatus, exclusive of that in buildings consists of:

- One (1) gasoline pumping engine, horse,
- One (1) chemical engine, hand,
- One (1) truck with extension ladder, hand,
- Five (5) hose reel carts, (1 horse, 4 hand,)
- Ten (10) extension ladders, hand.

The gasoline engine, the chemical engine, the truck and extension ladder and one hose cart, hand, will be kept in the engine house. The hose cart, horse, will be kept at the Quartermaster's corral. One hose cart, hand, will be kept at the Cavalry barracks, and one at the Artillery barracks, and one at the Infantry barracks.

The senior officer present will assume charge at any fire until the arrival of the Fire Marshal or one of his assistants.

One Surgeon and one Hospital Corps man will proceed to the scene of every fire prepared to give medical aid.

One relief of the guard will proceed to every fire and be reported by the Officer of the Day to the Fire Marshal or to the Assistant Fire Marshal in charge.

The Quartermaster will see that an engineer, teamster and substitute teamsters are detailed to take the gasoline engine and the horse cart to the scene of every fire,—endeavoring to have at all times men responsible for these duties.

Officers will keep their men in hand at fires and avoid confusion. To this end organizations upon arrival at a fire will be reported to the Fire Marshal in charge and will then be held in ranks, accompanied by their officers, until told to do some specific thing.

Anyone discovering a fire will immediately give the alarm, notify the occupants of the building, awakening them if it is night, and then notify from the nearest telephone the central telephone operator, being careful to give the exact location of the fire so far as possible. Sentinels are allowed to quit their posts to carry out this order.

The central telephone operator will notify in turn as per schedule in telephone office, taking time to give them intelligently the location of the fire.
