Colonel 28th Infantry, Commanding.

Capt. & Q.M. 28th Infantry Quartermaster

Station: Fort Snelling, Minnesota.

Date: July 31, 1905.

FORM No. 60.

Estimate of Quartermaster's Supplies

Required for the Service of the Post of

FORT SNELLING, MINN.

During the Quarter ending on the 31st day of December, 1905,
by Capt. H. B. Fiske, Q. M. 28th Infy. Quartermaster, U. S. Army.

NO. OF OFFICERS AND RANK.

1 Colonel.
1 Lt. Colonel.
5 Majors.
23 Captains
47 Lieutenants
2 Cont. Surg.
79.

No. of Men, 1218; No. of Horses, 258; No. of Mules, 91;

No. of Oxen, —; No. of Wagons, 38.

This Form should be used for periodical and special estimates of Quartermaster's Supplies, and should be made and forwarded to the Quartermaster General in duplicate. In making an estimate of fuel, forage, and straw, the kind procurable in the immediate vicinity of the Post should be stated.

Post Quartermasters should endeavor, as far as practicable, to include in these estimates all the articles that will be required during the period estimated for, to avoid the necessity of special requisitions.

In case of articles of variable size, quality, etc., such as doors, sashes, windows, glass, files, iron, nails, stovepipe, stoves, etc., such full description should be given as will enable the officer supplying the stores to determine exactly what is required. When any portion of machinery is required, a drawing, giving the size and other specifications, should accompany the estimates.

Estimates for building material should be made separately from the estimates for other stores, and if any portion of the material has been previously estimated for, it should be so stated.

The application to be made of each article and the necessity for its issue should be stated.

In making estimates for supplies, it is sometimes preferable to make separate estimates for all the separate classes of stores required. This is to be regulated by the Chief Quartermaster.

The last column is to be filled up by the Chief Quartermaster when he forwards the estimates to higher authority for action.

Extra leaves should be inserted when the space herein is insufficient, and will be furnished when required.

A press copy of this Form, and of the extra sheets, should be retained by the officer making the estimate.

No. of Men 1218; No. of Horses 562; No. of Mules 58;

No. of Oxen _____; No. of Wagons 37

This Form should be used for periodical and special estimates of Quartermaster's Supplies, and should be made and forwarded to the Quartermaster General in duplicate. In making an estimate of fuel, forage, and straw, the kind procurable in the immediate vicinity of the Post should be stated.

Post Quartermasters should endeavor, as far as practicable, to include in these estimates all the articles that will be required during the period estimated for, to avoid the necessity of special requisitions.

In case of articles of variable size, quality, etc., such as doors, sashes, windows, glass, files, iron, nails, stovepipe, stoves, etc., such full description should be given as will enable the officer supplying the stores to determine exactly what is required. When any portion of machinery is required, a drawing, giving the size and other specifications, should accompany the estimates.

Estimates for building material should be made separately from the estimates for other stores, and if any portion of the material has been previously estimated for, it should be so stated.

The application to be made of each article and the necessity for its issue should be stated.

In making estimates for supplies, it is sometimes preferable to make separate estimates for all the separate classes of stores required. This is to be regulated by the Chief Quartermaster.

The last column is to be filled up by the Chief Quartermaster when he forwards the estimates to higher authority for action.

Extra leaves should be inserted when the space herein is insufficient, and will be furnished when required.

A press copy of this Form, and of the extra sheets, should be retained by the officer making the estimate.

Estimate of Quartermaster's Supplies

Required for the Service of the Post of

Fort Snelling, Minn.

During the Quarter ending on the 30th day of June, 1905,

by Capt. H. B. Fiske, Q. M. 28th. Infy. Quartermaster, U. S. Army.

NO. OF OFFICERS, AND RANK.

1 Colonel
1 Lt. Colonel
5 Majors
20 Captains
37 Lieutenants
2 Cont. Surgeons
66

No. of Men 1218; No. of Horses 562; No. of Mules 58;

No. of Oxen; No. of Wagons 37

This Form should be used for periodical and special estimates of Quartermaster's Supplies, and should be made and forwarded to the Quartermaster General in duplicate. In making an estimate of fuel, forage, and straw, the kind procurable in the immediate vicinity of the Post should be stated.

Post Quartermasters should endeavor, as far as practicable, to include in these estimates all the articles that will be required during the period estimated for, to avoid the necessity of special requisitions.

In case of articles of variable size, quality, etc., such as doors, sashes, windows, glass, files, iron, nails, stovepipe, stoves, etc., such full description should be given as will enable the officer supplying the stores to determine exactly what is required. When any portion of machinery is required, a drawing, giving the size and other specifications, should accompany the estimates.

Estimates for building material should be made separately from the estimates for other stores, and if any portion of the material has been previously estimated for, it should be so stated.

The application to be made of each article and the necessity for its issue should be stated.

In making estimates for supplies, it is sometimes preferable to make separate estimates for all the separate classes of stores required. This is to be regulated by the Chief Quartermaster.

The last column is to be filled up by the Chief Quartermaster when he forwards the estimates to higher authority for action.

Extra leaves should be inserted when the space herein is insufficient, and will be furnished when required.

A press copy of this Form, and of the extra sheets, should be retained by the officer making the estimate.

WAR DEPARTMENT.

General Depot of the Quartermaster's Department.

JEFFERSONVILLE, INDIANA, October 2nd, 1905.

The Chief Quartermaster,
Department of Dakota,
Saint Paul, Minn.

Sir:-

Referring to your endorsement of August 30th, 1905, #13511, V.S.#4, upon estimate of the Quartermaster, Fort Snelling Minn., dated July 31st, 1905, quarter ending December 31st, 1905, I have the honor to report that the articles recommended supplied on said estimate were shipped from this Depot on the 23rd, ultimo.

Respectfully,

Captain and Quartermaster, U. S. Army,
Assistant Depot Quartermaster.

Quartermaster,
Fort Snelling, Minn.
(Thro' Commanding Officer.)

(218367)

December 5, 1905.

Sir:

Enclosed herewith please find literature concerning the "American Stock Food" which this Department has been requested to test with a view to its use by the Army. Your attention is invited to the claims of the manufacturers as to its value. It is understood that "Stock Food" is a misnomer to some extent, the product being really a condiment to be fed in connection with a grain ration and that it has the effect of giving a relish thereto and also of assisting digestion, so that animals fed this preparation assimilate more completely the nutritive elements of food taken into the stomach.

Test of the food has already been made at Fort Sheridan with good results and a saving of oats as appears from the letter of Capt Frank Thorp, A.C. published on page 17 of the inclosure.

Should you deem this matter of sufficient interest and promise to warrant further investigation and desire to test the food by feeding the same to the animals of your command, requisition for a supply will be approved and a report of your experience ~~xxx~~ and conclusions appreciated.

Very respectfully,

C. F. HUMPHREY,

Quartermaster General, U.S. Army.

During the _____ ending on the _____ day of _____, 190 _____,
 by _____ Capt. H. B. Fiske, Q. M. 28th Infy. _____ Quartermaster _____, U. S. Army.

NO. OF OFFICERS AND RANK.

No. of Men, _____; No. of Horses, _____; No. of Mules, _____;

No. of Oxen, _____; No. of Wagons, _____

This Form should be used for periodical and special estimates of Quartermaster's Supplies, and should be made and forwarded to the Quartermaster General in duplicate. In making an estimate of fuel, forage, and straw, the kind procurable in the immediate vicinity of the Post should be stated.

Post Quartermasters should endeavor, as far as practicable, to include in these estimates all the articles that will be required during the period estimated for, to avoid the necessity of special requisitions.

In case of articles of variable size, quality, etc., such as doors, sashes, windows, glass, files, iron, nails, stovepipe, stoves, etc., such full description should be given as will enable the officer supplying the stores to determine exactly what is required. When any portion of machinery is required, a drawing, giving the size and other specifications, should accompany the estimates.

Estimates for building material should be made separately from the estimates for other stores, and if any portion of the material has been previously estimated for, it should be so stated.

The application to be made of each article and the necessity for its issue should be stated.

In making estimates for supplies, it is sometimes preferable to make separate estimates for all the separate classes of stores required. This is to be regulated by the Chief Quartermaster.

The last column is to be filled up by the Chief Quartermaster when he forwards the estimates to higher authority for action.

Extra leaves should be inserted when the space herein is insufficient, and will be furnished when required.

A press copy of this Form, and of the extra sheets, should be retained by the officer making the estimate.
