A STATEMENT OF GUIDING PRINCIPLES OF
THE WAR RELOCATION AUTHORITY

1. The War Relocation Authority recognizes that the foremost task before the people of this country is to win the war. This means concentrating on fighting the enemy -- rather than fighting among ourselves, and using all the available manpower where it can do the most good.
2. We have faith in the American democratic way of life, with equal rights, privileges, and responsibilities for all, regardless of race, creed, or national origin.
3. We assume that the great majority of the people of Japanese ancestry now in this country will stay here during the war and afterward.
4. We have confidence in the ability of the Armed forces to wage the war, and of the authorized intelligence agencies of the government to give proper surveillance to all suspected or potential enemies within our country.
5. We believe that it is possible to distinguish between the loyal and the disloyal people of Japanese ancestry, as well as with other national or racial groups, to a degree which will insure the national security.
6. We believe loyalty grows and sustains itself only when it is given a chance. It cannot flourish in an atmosphere of suspicion and discrimination.
7. Steps which this government takes to suppress or discriminate against the people now in relocation centers give weight to the enemy's argument that the United Nations are waging a race war. This argument is used in propaganda directed at the peoples of the Pacific areas, and others whose collaboration with the United Nations can help to speed up the day of victory.
8. Repressive or discriminatory treatment of people of Japanese ancestry in relocation centers will be used by the Japanese militarists as a pretext for reprisals against American prisoners of war and American civilians held by the Japanese government.

COMMITTEE ON
RESETTLEMENT OF JAPANESE AMERICANS
297 Fourth Avenue
New York, N. Y.

C-0328-NOBU-WP

Colorado River War Relocation Project
Poston, Arizona

CONVERSATION BETWEEN W. WADE HEAD, PROJECT DIRECTOR, AND H. H. TOWNSEND,
SUPPLY AND TRANSPORTATION OFFICER, ON DECEMBER 1, 1942.

COMMITTEE ON
RESETTLEMENT OF JAPANESE AMERICANS

297 Fourth Avenue
New York, N. Y.

- Head - Good morning, Mr. Townsend
- Townsend - Good morning. I just got your memorandum and want to discuss it with you. Please let me apologize for my actions during the strike. I must have been so upset I didn't realize what I was doing. I was afraid that I and the other employees were going to be slaughtered by the Japs.
- Head - Mr. Townsend, if you do not mind, I am going to have notes kept on this conversation, inasmuch as your actions of the last few days have been such that they cause me to doubt your honesty and reliability. Do you object?
- Townsend - I don't blame you for wanting a record of everything I have to say.
- Head - Now, Mr. Townsend, you said you were frightened; did you actually see, personally, any signs of violence on the part of the people or the destruction of any government property.
- Townsend - Since having time to calm down I realize that there was no sign of violence, and now that the trouble has been settled and I have had time to look around, it is easy to see the crowd must have been peaceful all the time and there was no sign of any damage to any government property.
- Head - Do you consider that sufficient reason for leaving the project and failing your duties during the time of trouble?
- Townsend - I don't know what I meant. I lost my head I guess. I would have done more harm here than good (good) in that condition.
- Head - I think you have done more harm than good here ever since you came, and in the past few days it has been reported to me that you have been frightened ever since arriving, and that you have always carried a gun.
- Townsend - I think every employee here should be armed at all times.
- Head - If you think that, you absolutely have no business working here. This is no place for cowards nor unstable people. Besides, every government employee who places more importance on his own safety than his duty to the government is not fit to work for Uncle Sam. You were not only disloyal to your job, you were disloyal to John Evans, and disloyalty was displayed before all the project employees when he was in charge and was working under tremendous pressure. By the way, did you leave Poston in a government car?
- Townsend - Yes, I went to Parker in a government car and from there I caught a ride with a friend to Los Angeles.

Head - I am extremely disappointed to find we have had an employee working here like you. It is easy to understand why you might have become upset, but I cannot understand why you became frightened and fled. You had a responsibility to the government to look after its property. We have employed you in a responsible position and put our confidence in you to carry out that job, then you fail completely; and besides, look at the men here with their families who were not afraid. Ralph's wife was here alone. She had planned to go to Phoenix for the week end but when the sitdown strike started, she immediately saw that her duty was here, and she stayed. She is not a government employee but she is a loyal American. Other men and their wives stayed with their children. To me, just at a time when you were most needed, you absolutely failed.

Townsend - I guess I can't blame you for feeling that way.

Head - I am sorry to say this, but never have I been so disappointed with a fellow employee as I have been with you. You insisted that the Army be called in, not because you thought that was best, but because you were afraid. "Yellow" is a good word for it. That would have been an easy way to settle this thing. Thank God, John Evans was not a coward. He displayed real character when he refused to follow your and a few other crackpots' advice. I want you and everyone else in the country to know that John Evans has my complete confidence and backing in every decision he made while here. If John had thought it was necessary to call the Army into Poston to protect government property or human lives, he would have done so, but at no time did he feel it was necessary. You can see now, from events, that it wasn't. Had the Army come in, no doubt there would have been some people shot. Our government knew what it was doing when it put these people here, and you know yourself that the strike wasn't due to anybody in jail, but due to the fact that we had failed to furnish some of the minimum necessities of life to them such as heating stoves and many other items and we would have been a bunch of cowards in taking advantage of them by marching the Army in and having defenseless people shot. There are many reasons he could not outline to you why the Army should not have been called in; I think it is unnecessary to do it in your case. I want to point out that the Japanese have many thousands of American prisoners and if anything happened here in which the Japanese would be shot or otherwise hurt, retaliation would no doubt have been taken against the various Americans held as Japanese prisoners.

Townsend - I see now that Evans was right; he was level headed.

Head - After your actions during this disturbance, as far as I'm concerned, it is too late in the day for you to change. To be perfectly fair and frank with you, I want you to know you would not have been allowed to return to this project had not John Evans recommended it to me, but I am convinced in my own mind that it was a mistake.

Townsend - Would you like to have me hand in my resignation?

Head - Personally, I think you should, but probably it will be better inasmuch as you are working with Empie, that you discuss the matter with him. My personal feeling in this is that although you might do a good job in some other position, you are too emotionally unstable to work on a project like this. Anyone who will carry a gun and who will go around trying to frighten the employees by telling them they are not safe, has no business working here.

Townsend - I wish you could have seen how upset and disturbed I was and I think you could see my side.

Head - I have no more to say to you except this; you became emotionally upset and unstable at the time your services were most needed, so you have no business here. Mr. Townsend, in all the years I have worked, you are the first employee I have felt it was necessary to call a stenographer in to take notes on the conversation, and you realize as well as I, why I feel this is necessary.

This is an exact copy of the conversation
between Mr. W. Wade Head and Mr. H. H.
Townsend.

S/ Henriette S. Johnson
Henriette S. Johnson
Secretary to Project Director

WAR RELOCATION AUTHORITY
Washington

January 11, 1943

To: Staff of Employment Division, War Relocation Authority

Subject: Employment Division Organization and Procedure for Placement of Evacuees in Jobs Outside Relocation Centers on Basis of Indefinite Leave.

1. Organization

- (a) At the relocation center the Employment Officer has been designated by the Director of the War Relocation Authority as the Leave Officer. He is assisted in this work by members of the staff who give full time to the leave work. The Leave Section at a center takes all applications for leave clearance and leave; does the processing of each application; advises with evacuees on leave questions; through the Project Director keeps closely in touch with the Washington office of the Employment Division and with the relocation field offices, as well as with prospective employers who communicate directly with the relocation center. The Leave Section works closely in connection with the Placement Section of the employment office at the relocation center.
- (b) The headquarters of the relocation program outside the centers is located in Washington. The machinery for accomplishing the outside relocation program is in the Employment Division of the War Relocation Authority. Under the supervision of the Director of the Division, there is one Assistant Director whose primary responsibility is the functioning of the Employment Division work at the relocation centers including the operation of the Leave Section at the centers. Another Assistant Director is primarily responsible for the relocation work in agricultural communities and a third Assistant Director gives attention to urban relocation and also supervises the operation of the Leave Section in the Washington office.
- The Leave Section in the Washington office processes all applications for leave clearance and for indefinite leave.
- (c) The War Relocation Authority has opened five relocation field offices. These offices are located in Salt Lake City, Denver, Kansas City, Chicago and Cleveland. Each office is in charge of a supervisor and attached to the office is a staff of people who will be covering the adjoining territory. The

relocation field staff will find job opportunities for the evacuees and will work closely with agencies and individuals also working on the placement of evacuees; the staff will investigate the matter of community sentiment and will assist in educating a community on the relocation program; problems arising out of the adjustment of evacuees in a community will be handled by the field staff as the necessity arises.

- (d) It is obvious from the brief sketch of organization given above that there is a necessity for the closest kind of cooperation between all members of the staff working on the program to relocate the evacuees outside the centers. We need to think in terms of a unified effort. The Leave Section at the relocation center, the relocation staff in the field, and the Washington office must of necessity work as a single mechanism. If one part of the mechanism fails to operate satisfactorily, the whole program will break down.

2. Remarks on Procedure

- (a) For the guidance of the staff there is set forth below several procedural steps which it is believed will facilitate the bringing together of a prospective employer and an evacuee. The objective is to make the process as simple and expeditious as possible. It should be remembered, however, that the nature of the problem gives rise to a certain amount of complexity and delay. We may not be able to eliminate all of this but we should constantly work toward that end. The procedure outlined below has been developed out of our experience to date. It is quite possible that further experience will show the desirability of alterations or even indicate the necessity for a new procedure. If this is so, we will change the procedure. In the meantime follow the procedure below as closely as possible.
- (b) It should be emphasized that the procedure outlined here is designed only to channel the mutual activities of the staff of the War Relocation Authority. It is not feasible nor desirable to attempt to channel through the relocation field staff all the job-finding activity being made on behalf of the evacuees. Employers and agencies now communicate directly about jobs with the relocation centers and there is no reason why this should not continue. In fact, it is very likely that a good part of the job-finding activity for evacuees will not be carried on at all through the relocation field staff or the employment offices on the projects. Evacuees are locating jobs through their own efforts and through the assistance of acquaintances. These efforts should be encouraged. Various agencies and individuals know of certain evacuees and are

working to get them placed. It is hoped that these activities will be continued. There is a big job to be done and there is room for a variety of methods. We are not trying to set a pattern which everybody must follow. It is necessary, however, that the mutual relations between the relocation field staff, the employment offices at the centers, and the Washington office proceed on the basis of an established and well understood procedure. It is our hope that the procedure outlined below for the guidance of the staff of the Division will work as simply, directly, and as speedily as is possible under the circumstances.

- (c) The United States Employment Service offices will cooperate in the program of employment for evacuees. Instructions are now being prepared in Washington by the United States Employment Service in cooperation with our office. These instructions, outlining the procedure which the United States Employment Service offices will follow in placement work for the evacuees, will soon be available for your information.

3. Outside Employment Register

- (a) The name of each evacuee who has indicated a desire to have the War Relocation Authority assist him in finding a job outside the relocation center will be placed on an outside employment register as soon as he has been given leave clearance. The evacuee makes this request at the time he files his application for leave clearance.
- (b) At each relocation center the leave officer will prepare and maintain a register of evacuees at the project who have been given leave clearance and have indicated a desire to have War Relocation Authority assistance in finding a job outside the center.
- (c) The Leave Section in the Washington office will prepare and maintain an outside employment register which will include all evacuees who have been given leave clearance and have indicated a desire to have War Relocation Authority assistance in finding jobs outside the centers.

A summary of the outside employment register will be made by the Washington Leave Section and this will be revised and kept up to date at regular intervals. The summary will show the name, address, occupational classification, training, experience and other pertinent information for each evacuee on the register.

The summary of the register will be mimeographed and will be made available to the War Relocation Authority staff,

the United States Employment Service offices, and to other agencies and individuals concerned with the placement of evacuees in jobs outside the relocation centers. A sample copy of the summary is enclosed herewith.

- (d) The evacuees whose names appear on the outside employment register are presumably the most available candidates for outside jobs. They have been given leave clearance by the War Relocation Authority and should be ready to leave the center promptly when a job has been secured. In view of the availability of the people on the register, it is desirable that they be given preference in negotiations with or referrals to prospective employers.

4. Placement Procedure

- (a) In making contacts with prospective employers and with agencies and individuals who have leads to employment opportunities, the relocation field staff should make use of the summary of the employment register. If the contact results in an offer for or in an interest in a specific evacuee, the field representative will communicate with the Project Director, attention Employment Division, at the place where the evacuee is located. In this communication the name and address of the prospective employer should be given and also all possible information about the job opening. The field representative should advise the prospective employer that in the event the evacuee selected is not available another evacuee will be referred to.
- (b) Upon receipt of a job offer or inquiry with respect to a specific evacuee, the Leave Officer at the center will promptly notify the evacuee of the offer or inquiry and will transmit to him the information received. If the evacuee is interested in the opening and is available, he will be requested to communicate at once with the prospective employer. The Leave Officer will render the evacuee any necessary assistance in making the reply and will see to it that a reply is made promptly.

Should the evacuee in whom the prospective employer is interested not be interested or available, the Leave Officer should pass the job offer or inquiry on to another evacuee who is qualified, interested, and available. The Leave Officer will see to it that the substitute replies promptly to the prospective employer.

In the event that there is no one at the center qualified, interested, or available as a substitute the field representative who sent in the offer or inquiry should be promptly notified by the Project Director.

- (c) It is to be expected that in many instances there will be no one on the outside register qualified for the type of employment available. In that case the field representative should forward to one of the relocation centers the full details on the job opening together with the name and address of the prospective employer. The Leave Officer will select a qualified, interested, and available evacuee and have him communicate with the prospective employer as indicated above. Should there be no candidates for the job at the relocation center, the field representative who sent in the job opening should be promptly notified.
- (d) Upon request of the field representative, the Leave Officer will send the field representative or the prospective employer the names and pertinent data on one or more qualified, interested, and available evacuees. The procedure thereafter is the same as if the evacuees were selected from the summary of the outside employment register.
- (e) Numerous committees and individuals, not themselves employers, are opening up employment opportunities. The field representatives should cooperate closely with these committees and individuals and should facilitate the placement of evacuees through such channels in the same manner as is indicated for handling job openings with employers.
- (f) No job offer should be forwarded to a relocation center by any War Relocation Authority field representative unless he is reasonably certain that the offer is at a wage corresponding with or above the prevailing wage in the community for similar work and that the other terms and conditions of employment are in no way below the prevailing standards. The field representative should not forward a job offer in an organized field or occupation until he has made reasonably certain that acceptance by an evacuee would not precipitate action which would interfere with the satisfactory relocation of the evacuee. If the job is on war work, the field representative should ascertain prior to forwarding the offer to a center that all special clearances, if any are necessary, have been taken care of satisfactorily.
- (g) Nothing will be said here about the details of the process for securing leave clearance or indefinite leave. This subject has been adequately covered in other releases put out by the War Relocation Authority. It should be pointed out, however, that the placement process will be greatly expedited if and when the evacuees secure leave clearance in advance of the time when they wish to go out to take a job. The leave clearance is just what the name suggests, namely, that after considering evidence obtained from several sources the War Relocation Authority makes a judgment on the person.

If the evidence does not show that the evacuee has had un-American connections or engaged in un-American activities he will be given a clearance. This means that he is free to leave the relocation center as soon as a job or other means of support are secured in a place where community sentiment is not unfavorable.

The evacuees should not wait until the job negotiations are in process before filing an application for leave clearance. This should be done at once. It takes about four weeks for the application for leave clearance to be processed.

When the negotiations for a job are completed and the evacuee has accepted an offer, he files his application for indefinite leave with the leave officer. This application, together with the letter or other evidence that the job has been offered, goes to Washington by airmail and is acted on there immediately. The relocation center is advised by wire on the action taken in Washington with respect to the application. At this stage in the leave process, the Washington office is primarily concerned with the question of community sentiment in the place where the job is to be taken. It is estimated that not more than one week should elapse between the filing of the applications for indefinite leave at the center and the telegraphic communication to the project from Washington with respect to it.

It will be evident from the foregoing that an essential part of the placement work is the development of the outside employment register. We hope that by early spring several thousand persons eligible to take outside jobs will be listed on the register.

COMMITTEE ON RESETTLEMENT OF JAPANESE AMERICANS
297 Fourth Avenue, New York.

IMMEDIATE RELEASE. WAR RELOCATION AUTHORITY.

March 24, 1943.

ADMINISTRATIVE INSTRUCTION NO. 45 (Revised)

Subject: Assistance to evacuees granted indefinite leave for the purpose of accepting employment.

Administrative Instruction No. 45, issued September 18, 1942, and later cancelled, is hereby reissued as follows:

I. Purpose

It is the policy of the War Relocation Authority to assist evacuees in meeting costs of transportation and initial subsistence expenses, where this is necessary in order to enable the evacuee to accept an employment opportunity for which an indefinite leave has been granted under the terms of Administrative Instruction No. 22 (Revised)

II. Conditions of Assistance

- A. Assistance will be given, where needed, only to evacuees who have been granted indefinite leave after the date of this Instruction for the purpose of accepting employment. Assistance will be given only when indefinite leave is first issued; an evacuee who has been granted indefinite leave, who returns to the Center, and who leaves a second time will be given no assistance under this Instruction when he leaves the second time.
- B. Assistance will be given for a wage earner and for members of his family as defined in Administrative Instruction No. 27, Supplement III, Section XII, Paragraph A.
- C. The total cash resources of the family at the time the wage earner is granted leave should be sufficient to cover coach fare for each member of the family, \$3.00 per person per day of travel for meals en route, and cash to meet initial subsistence expenses at the place of employment, calculated as follows: \$50.00 for the wage earner plus \$25.00 for one dependent or plus a total of \$50.00 for two or more dependents that will accompany or follow him on indefinite leave. If the family's cash resources do not equal this amount, assistance will be given to the extent needed to raise their cash resources to this total.

III. Procedure

- A. If, after receiving an indefinite leave for the purpose of accepting employment, the wage earner does not possess the minimum cash resources indicated in II-C, above, he may apply in writing to the project director for assistance. He should certify in writing his total cash resources and his total cash income for the preceding six

months. His certification will be accepted by the project director as sufficient evidence of his financial condition.

- B. If the family's cash resources are less than the total prescribed in II-C, a grant to make up the difference may be made by the project director. If any of the wage earner's dependents do not intend to accompany him when he leaves the project, but intend to follow him later, that part of the grant attributable to them shall be deferred until they leave the project. The amount of the grant should be computed at the time the wage-earner leaves, however, and should not be recomputed at the time the dependents follow him.
- C. The wage-earner subsistence allowance of \$50.00 shall be made only to one wage-earner in the same family.
- D. The grant may be paid in cash by the agent cashier or by check issued by the Treasury Disbursing Officer.

WAR RELOCATION AUTHORITY

Washington

June 2, 1943

Hon. Martin Dies
Chairman, Special Committee to
Investigate Un-American Activities
Washington, D. C.

Dear Mr. Dies:

I have noted in the press recently a number of statements by representatives of the Committee on Un-American Activities which have a direct bearing on the work of the War Relocation Authority, and have the effect of seriously interfering with the program which this agency has been instructed by the President and the Congress to carry out. The statements have been so misleading to the public, and so fraught with errors and half-truths that I am impelled to record my comments for your information.

Several of the statements have dwelt upon the presence of organized and dangerous pro-Japanese elements in the West Coast population prior to the outbreak of war. No mention is made of the fact that the federal intelligence agencies apprehended several thousand suspects immediately after Pearl Harbor, and that those found guilty upon hearings have been incarcerated in internment camps. Instead the implication is strongly made that all such subversive individuals are to be found in the population of the relocation centers.

On May 29, Mr. Robert E. Stripling, identified as Chief Investigator of your Committee, was quoted in the press as saying that spies and saboteurs are being released from the relocation centers. The charges were not supported, but nevertheless they unquestionably would have the effect of arousing mistrust of all persons of Japanese ancestry who are seeking to relocate. Since the War Relocation Authority grants leave from its centers with the provision that an individual may be called back at any time for sufficient reason, I am only discharging my responsibilities when I request that I be supplied with the names of any persons released from relocation centers who are spies or saboteurs or who have been trained in saboteur schools. I suggest also that the names and evidence be made available immediately to the Federal Bureau of Investigation.

In a statement to the press on May 31, which I understand also was made by Mr. Stripling, it was charged that evacuees in relocation centers are provided with foods of kinds and quantities not available to the general public. Except for the amounts of food on hand at the Manzanar Relocation Center which presumably were accurately reported, the statement was erroneous and consequently misleading. The statement was made that "prime" beef was provided for the evacuees. The beef ordered for relocation centers is third grade. The Committee spokesman completely ignored the fact that

all food rationing restrictions of the OPA are in force at relocation centers, that the actual cost of food is approximately 40 cents a day per person, and the WRA has deliberately refrained from purchasing certain kinds of food known to be scarce. These facts were made known to the committee's investigators who visited the Manzanar Relocation Center, and could have been quickly and readily confirmed by a telephone call to this office.

The Office of the President has just referred to me the telegram of May 19 from Representative J. Parnell Thomas, a member of your committee, urging Presidential action in stopping further release of people of Japanese ancestry until section II of your committee's report on Axis activities can be issued, and the Committee's investigation of the relocation centers can be completed. In the absence of any supporting facts, we must regard Mr. Thomas' request as purely personal, and insufficient to warrant a change in the policies of this agency.

We have our own records on all persons above 17 years of age in the relocation centers, and we also have available to us information from the records of the federal investigative agencies. In the interest of national security we do not release any evacuee if his record indicates any reason why it would not be advisable for him to live outside a relocation center. On the other hand, the manpower situation plus the constitutional guarantees demand that loyal American citizens and law-abiding aliens be given every opportunity to contribute to the war effort by productive work in normal communities.

Investigators for your Committee have visited a number of the relocation centers, and have received complete collaboration of the staff there. We in the national office will be glad to cooperate fully in providing facts which your committee may desire concerning the policies and procedures of this agency. To date no member or representative of the Committee has asked me for any information or has been in touch with any member of the Washington staff.

In the meantime, I hope it will be possible for representatives of your Committee to refrain from making public statements concerning the War Relocation Authority on the basis of incomplete information. Continuance of this practice of issuing irresponsible statements can only lead to the conclusion that the Committee has abandoned its assignment of fact-finding and in this instance is devoting itself to the oppression of a minority. Such a course can contribute only to national disunity and hinder the war effort.

Sincerely yours,

COMMITTEE ON
RESETTLEMENT OF JAPANESE AMERICANS
287 Fourth Avenue
New York, N. Y.

H. L. Myer
Director

Comments by the War Relocation Authority
On Statements Reported in the Press
Allegedly Made by Witnesses
Before the Committee on Un-American Activities
During Hearings in Los Angeles Between
June 2 and June 17.

COMMITTEE ON
RESETTLEMENT OF JAPANESE AMERICANS
297 Fourth Avenue
New York, N. Y.

1.

Statements reported by the United Press in a dispatch from Los Angeles dated June 16 and allegedly made before the subcommittee hearings by Mayor Fletcher Bowron of Los Angeles.

Statement: "...the nation's most dangerous Japanese, according to a Los Angeles police report, was released from the Poston Relocation Center without ever having been confined there and now is working in a boys' camp in the middle West. The Japanese, Kiyoshi Okura, former member of the Los Angeles Civil Service Commission, belonged to numerous Japanese organizations, and, although he professed to be a Presbyterian, was married in a Shinto Temple."

Comment: Our records show that Mr. Okura was released by the War-time Civil Control Administration from the Santa Anita Assembly Center on November 1, 1942 to go to Boys' Town Nebraska. He has never resided at Poston or any other relocation center and has never been under the jurisdiction of the War Relocation Authority at any time.

Statement: Another Japanese released under questionable circumstances was Miya S. Kikuchi, taken from Manzanar Relocation Center for a lecture tour under the auspices of the National YMCA.

Comment: Mrs. Kikuchi was released from the Manzanar Relocation Center on short-term leave in October 1942. She was absent from the center only two weeks and is still residing there at the present time.

2.

Statements allegedly made at hearings by Earl A. Best, the former Assistant Steward at the Heart Mountain and Poston Relocation Centers, and reported by the Los Angeles Times on June 17.

Statement: At Poston fresh milk was ordered for all, even though it cost an estimated \$2,000 a day and the evacuees seemed satisfied with evaporated milk. Project Director Head ordered the fresh milk as "we do not need money to win the war."

Comment: In a teletype message dated June 22, Project Director Head has the following comment to make regarding the statement allegedly made by Mr. Best:

"Only conversation with Best regarding fresh milk was on purchase of same. He said that canned milk could be used and my answer to that was that canned milk could be shipped to our troops, where fresh milk could not and that the small additional cost of fresh milk did not hinder the war effort. It was also pointed out that fresh milk would be purchased on government contract only and would come from surplus of Imperial Valley and other nearby areas in California. The amount to be ordered was 3600 quarts per day at 46 cents per gallon or a total of \$414.00 per day. This milk was to be given only to children up to 12 years of age, expectant and nursing mothers, and invalids."

Statement: During an inventory conducted at the Heart Mountain Relocation center, it was discovered that evacuee mess hall workers were hoarding large quantities of food in attics and secret store-rooms.

Comment: During September, October and November of 1942, when much of the initial supplies and equipment were being received at Heart Mountain Center, the Center was short of storage space. As a temporary expedient, staple foods were issued to the mess halls in excess of current needs in order to utilize mess hall space for storage purposes. In a large number of mess halls attic space was used for this purpose. In two mess halls, supplementary store rooms were constructed. These are the so-called secret store-rooms to which Mr. Best refers. Since they were so constructed as to occupy ground floor space in the middle of the mess halls, they were in no way concealed.

Shortly before Mr. Best reported to Heart Mountain as Assistant Steward, a new Chief Steward was employed. He ordered the general inventory to which Mr. Best refers in his statements. He concluded that the storage of food in mess halls should be discontinued but decided to reduce the stocks in the mess halls not by moving them back to the warehouses but by reducing future issues so that in the course of a few weeks the stocks would be reduced by normal consumption. His decision in this matter was carried out. By the time our investigation was made early in April, in only two mess halls were substantial quantities of food still stored in attics. In four others, small amounts were on hand. These food stuffs were removed to the warehouses following the investigation.

This was in no sense a secret hoarding of food by the Japanese. All foods issued to the mess halls were charged to them at the time of issuance and all came within the cash ration allowance of 45 cents per day -- except in September when the initial stocks were issued. In September the ration cost averaged 46½ cents per person per day. During the first three months in 1943, the reduction of mess hall stocks by the method adopted by the Project Steward was reflected in ration costs which averaged from 35 to 37 cents per person per day.

Statement: An evacuee mess hall worker at the Heart Mountain Center traded liquor for ham and other food.

Comment: Mr. Best has no actual evidence that transactions involving exchange of food for whiskey have ever been carried out. We have checked as completely as possible all the information supplied us by Mr. Best in a signed statement on this subject and have found little specifically supporting his charges.

One local farmer who had a contract to remove garbage from a few of the mess halls acknowledges that at Christmas time he purchased small quantities of liquor for a few of the chefs. He insists he used money supplied by them and made no profit on the transaction. Although we have no other evidence contradicting his statements, he has been ordered not to conduct such transaction in the future.

It is the policy of the Authority to enforce those liquor regulations which under State and Federal law are generally applicable to the territory in which a specific center is located. An evacuee given leave for other purposes might buy liquor and bring it into the Heart Mountain Center or any evacuee might order liquor by mail. We have, however, had surprisingly little difficulty with the liquor problem on any center. There has been so little evident drinking that we think the present policy has demonstrated its soundness.

3.

Statements reported by the Associated Press in a dispatch from Los Angeles dated June 12 and allegedly made before hearings of the Subcommittee by Norris E. James, former Reports Officer at the Poston Relocation Center.

Statement: Boulder and Parker dams are in constant danger of sabotage from residents of the Poston Relocation Center.

Comment: Parker Dam is situated approximately 30 miles up the Colorado River from the Poston Relocation Center and Boulder Dam lies nearly 75 miles farther up stream. No evacuee at Poston or any other relocation center is permitted to leave the outside boundaries without a permit at any time. After dark, no evacuee is permitted even to leave the confines of the community proper without a permit. The exterior boundaries of the center are guarded by a company of military police and have been ever since the center was first established.

Statement: Trouble began at camp last fall after Poston had received 365 Japanese regarded by the Federal Bureau of Investigation as potentially dangerous from internment camps in North Dakota and New Mexico.

Comment: Any person of Japanese ancestry who is transferred from an internment camp to a relocation center has appeared before a hearing board in the internment camp and has been paroled under the regular procedures of the Department of Justice.

Statement: ".....the leaders of the strike emerged as leaders of Poston Camp No. 1.

Comment: All the evidence we have available indicates that present leaders of Poston Camp No. 1 were among those most active in trying to prevent the strike.

4.

Statement reported by the AP in the dispatch from Los Angeles dated June 10 and allegedly made before Committee hearing by Harold H. Townsend, former Chief Supply and Transportation Officer at the Poston Relocation Center.

Statement: "They (i.e. the evacuees at Poston) stated that they were hoarding food, bread and other supplies for parachute troops and for invasion forces....they had large caches of food throughout the desert buried that could be used for similar purposes.

"....that camp (i.e. Poston Relocation Center) is 100 percent of the idea that Japan will have the United States in a few months. There are over 1,000 Japanese soldiers and Japanese officers in that camp. They tell you right off that they were going to win the war and that is the type of man who is drilling almost daily in military tactics right under our noses in that camp. They drill them in various ways, but still drill them, and they are making soldiers out of them and they are not kidding about it. They don't even presume to hide it."

Comment: We have no evidence to support these charges beyond the statements attributed to Mr. Townsend who was discharged from the Poston Center for incompetence and whose entire testimony before the subcommittee is shot through with inaccuracies, distortions, and downright mis-statements of fact. The charges were never brought to the attention of project authorities while Mr. Townsend was on duty at Poston but were made for the first time at the subcommittee hearings in Los Angeles -- nearly six months after Mr. Townsend had left the center.

Statement: During a riot at the Poston Center last November, the Japanese flag was hoisted on a pole in front of the jail. Loud speakers stolen from the warehouse, were installed and the Japanese National anthem was heard throughout the camp, "with loud cheers and demonstrations toward setting fire to the whole camp". Meanwhile "the poor simpleton cowering Caucasian employees stood around like whipped children lucky to be spared and allowed to live from hour to hour." The ambulances were filled with disguised soldiers with machine guns guarding their sleep so they would not be slaughtered or burned, as was threatened."

Comment: This statement is almost completely without foundation. There was no riot at the Poston Center. In November, there was a strike and demonstration which involved no violence or destruction of government property. Sworn affidavits from 61 people (members of the project staff and their families) indicate that these people, who were in residence at the project throughout the entire period of the demonstration, were at no time in fear of bodily injury or any act of violence. Other affidavits from the Internal Security Officer at the Project and a Catholic missionary priest who was present during the demonstration categorically deny that any Japanese flag was raised or that Japanese marshal music was played over the public address system

at any time. The demonstration was on the whole, an orderly one and never involved the disruption of vital community services such as hospitalization and mess operations.

Statement: "Cases of milk were dumped and cartons of milk thrown at anyone on the highway and around the camp.... The milk came in every night during this riot and the rioters took the trucks and ice cream and other supplies that came into the camp, took them right over to their lines."

Comment: This statement is wholly untrue.

Statement: The food served to the Japanese at Poston is "superior in every way....about 25 percent better"than they give the United States Army.

Comment: From the standpoint of quality, the food served at Poston Relocation Center is and always has been equal or inferior to that served in the U. S. Army. It has never been superior. From the standpoint of quantity, the food served at Poston is probably about 25 percent less than that served at Army training camps and cantonment throughout the United States.

Further Comments by the War Relocation Authority
on Newspaper Statements Allegedly Made By
Representatives of the House Committee on Un-American Activities
COMMITTEE ON
RESETTLEMENT OF JAPANESE AMERICANS
287 Fourth Avenue
New York, N. Y.

1.

"They (i.e. WRA personnel) have refused to call the Army when They've had strikes and riots."

(Direct quotation attributed to Representative John M. Costello by the San Francisco Examiner in a story from Los Angeles dated June 3)

Comment: There have been two major disturbances at relocation centers -- one at Poston in November 1942 and the other at Manzanar in December of the same year. The disturbance at Poston was in the nature of a strike and demonstration against the project administration. At no time was there any violence, any destruction of government property, or any justification for calling in the military police. During the Manzanar disturbance -- which did involve a certain amount of disorder -- troops were called in at the request of WRA and remained in the center until after order had been completely restored.

2.

An American born Japanese who proclaimed that Japanese-Americans should kill the President of the United States was permitted for at least five months to deliver virulent pro-Japan speeches in the Japanese language before meetings in the WRA center at Manzanar. The remark about the assassination of the Chief Executive was reported to War Relocation Authority officials at once by Japanese Americans loyal to the United States but no action was taken.

(Information allegedly obtained by Committee investigators in a raid on headquarters of the Japanese-American Citizens League and reported by the San Francisco Examiner in a story from Washington dated June 19.)

Comment: This report is correct in stating that remarks attributed to Juichi Uyemoto were reported to E. R. Fryer, Regional Director of the War Relocation Authority, by Carl Yoneda, but it is incorrect in asserting that the War Relocation Authority took no action. A copy of Yoneda's letter which was dated July 11, was received in the Washington office of the War Relocation Authority and was immediately transmitted to the Department of Justice under a covering letter dated July 24, from the Director to the Attorney General.

Uyemoto remained in the Manzanar Center until October 23, 1942, at which time he was admitted to the Los Angeles County Hospital, Psychopathic Ward for diagnosis and treatment. On October 29, 1942, he was transferred from the Los Angeles County Hospital, after court commitment, to the Camarillo (Calif.) State Hospital. He is still in the Camarillo State Hospital and is suffering from a severe condition described as dementia praecox catatonic. It appears clear from the records that Uyemoto was having mild disturbances as early as March 1942. These became progressively more serious until they reached the point of danger to those about him.

Statement by Dillon S. Myer, Director of the War Relocation Authority, before the Costello Committee of the House Committee on Un-American Activities, July 6, 1943.

The manner in which the War Relocation Authority conducts its program is of concern to all the people in the United States, and it has a significance which goes far beyond the geographic boundaries of this country. Undoubtedly, the WRA program is being watched in Japan, where thousands of American soldiers and civilians are held as prisoners or internees; in China, India, Thailand, Burma, and many other countries whose collaboration we need if we are to defeat our enemies with a minimum loss of life.

The manner in which the problem is treated has a direct bearing on relations with our allies in winning the war, and on the position of this nation in establishing the terms of peace.

The grave international implications of this program demand that it be approached thoughtfully, soberly, and with maturity, and that public statements concerning it be made only after thorough understanding of the facts.

The program of the War Relocation Authority has been under investigation for the past eight weeks in such a manner as to achieve maximum publicity of sensational statements based on half-truths, exaggerations, and falsehood; statements of witnesses have been released to the public without verification of their accuracy, thus giving nationwide currency to many distortions and downright untruths.

This practice has fostered a public feeling of mistrust, suspicion, and hatred that has had the effect of

Providing the enemy with material which can be used to convince the peoples of the Orient that the United States is undemocratic and is fighting a racial war.

Undermining the unity of the American people.

Betraying the democratic objectives which this nation and its allies are fighting to preserve.

It may lead to further mal-treatment of our citizens who are prisoners or who are interned.

Constitutional Principles Involved in the Relocation Program

The evacuation and relocation program raise important questions of constitutionality. This is so because two-thirds of the persons of Japanese ancestry evacuated from West Coast military areas are citizens of the United States, and the great majority of the remainder are law-abiding aliens.

It is the position of the War Relocation Authority that its Leave Regulations are essential to the legal validity of the evacuation and relocation program. These Leave Regulations establish a procedure under which the loyal citizens and law-abiding aliens may leave a relocation center to become reestablished in normal life.

We believe, in the first place, that the evacuation was within the constitutional power of the National Government. The concentration of the Japanese-Americans along the West Coast, the danger of invasion of that Coast by Japan, the possibility that an unknown and unrecognizable minority of them might have greater allegiance to Japan than to the United States, the fact that the Japanese-Americans were not wholly assimilated in the general life of communities on the West Coast, and the danger of civil disturbance due to fear and misunderstanding--all these facts, and related facts, created a situation which the National Government could, we believe, deal with by extraordinary measures in the interest of military security. The need for speed created the unfortunate necessity for evacuating the whole group instead of attempting to determine who were dangerous among them, so that only those might be evacuated. That same need made it impossible to hold adequate investigations or to grant hearings to the evacuees before evacuation.

When the evacuation was originally determined upon, it was contemplated that the evacuees would be free immediately to go anywhere they wanted within the United States so long as they remained outside of the evacuated area. Approximately 8,000 evacuees left the evacuated area voluntarily at that time and 5,000 of these have never lived in relocation centers. The decision to provide relocation centers for the evacuees was not made until some six weeks after evacuation was decided upon, and was made largely because of a recognition of the danger that the hasty and unplanned resettlement of 112,000 people might create civil disorder.

Detention within a relocation center is not, therefore, a necessary part of the evacuation process. It is not intended to be more than a temporary stage in the process of relocating the evacuees into new homes and jobs.

COMMITTEE ON
RESETTLEMENT OF JAPANESE AMERICANS
207 Fourth Avenue
New York, N. Y.

The detention or internment of citizens of the United States against whom no charges of disloyalty or subversiveness have been made, or can be made, for longer than the minimum period necessary to screen the loyal from the disloyal, and to provide the necessary guidance for relocation, is beyond the power of the War Relocation Authority. In the first place, neither the Congress, in our Appropriation Acts or any other legislation, nor the President, in the basic Executive Order No. 9102 under which we are operating, has directed the War Relocation Authority to carry out such detention or internment. Secondly, lawyers will readily agree that an attempt to authorize such confinement would be very hard to reconcile with the constitutional rights of citizens.

The Leave Regulations of the War Relocation Authority, instead of providing for such internment of loyal citizens or law-abiding aliens, set up a procedure under which any evacuee may secure indefinite leave from a relocation center if he can meet the following four conditions --

1. WRA must be satisfied from its investigation -- that there is no reason to believe issuance of leave to the particular evacuee will interfere with the war program or endanger the public peace and security;
2. The individual must have a job or means of support;
3. The community to which the individual wishes to go must be one in which evacuees can relocate without public disturbance;
4. The evacuee must agree to keep WRA notified of any change of address.

The War Relocation Authority is denying indefinite leave to those evacuees who request repatriation or expatriation to Japan or who have answered in the negative, or refused to answer at all, a direct question as to their loyalty to the United States, or against whom the Intelligence agencies or WRA records supply direct evidence of disloyalty or subversiveness. The great majority of the evacuees fall into none of these classes, and are thus eligible to leave under the Authority's Regulations.

On June 21, 1943, the Supreme Court of the United States handed down its decision in the case of Gordon Hirabayashi v. United States. Hirabayashi had been convicted of violating both the curfew orders and the evacuation orders applicable to Japanese-Americans. The court held that the curfew was a valid exercise of the War Power. Although the question of the validity of the evacuation orders was directly presented to the Court in that case, the Court did not decide that question. There is evidence in the majority and concurring opinions of the Court in the Hirabayashi case that, although it found the curfew to be valid, it believed the evacuation orders present difficult questions of constitutional power, and detention within a relocation center even more difficult questions. Mr. Justice Murphy, in his concurring opinion said concerning the curfew orders: "In my opinion this goes to the very brink of constitutional power."

Mr. Justice Douglas, in his concurring opinion said: "Detention for reasonable cause is one thing. Detention on account of ancestry is another...Obedience to the military orders is one thing. Whether an individual member of a group must be afforded at some stage an opportunity to show that, being loyal, he should be reclassified is a wholly different question...But if it were plain that no machinery was available whereby the individual could demonstrate his loyalty as a citizen in order to be reclassified, questions of a more serious character would be presented. The United States, however, takes no such position." The Chief Justice, in the majority opinion, was careful to point out that the Court was limiting its decision to the curfew orders and was not considering the evacuation orders or confinement in a relocation center.

More than a year has passed since evacuation was begun. During this year we have, of course, had time to make necessary investigations and to begin the process of considering the evacuees on an individual basis. The Leave Regulations are intended to provide the due process and hearing which fair dealing, democratic procedures, and the American Constitution all require.

Committee on Un-American Activities. July 7, 1943

[July 7, 1943]

EVIDENCES OF AMERICANISM AMONG JAPANESE-AMERICANS

Statement by Dillon S. Myer, Director of the War Relocation Authority.

In view of the fact that the Japanese side of Japanese-American life has been so strongly emphasized during recent weeks, I believe that, in the interest of fairness and accuracy, some attention should be drawn to evidences of Americanism among the Japanese-American people.

Of the 110,000 people of Japanese descent who were evacuated last year from the Pacific Coast military area, approximately 70,000 were born in the United States and are American citizens. Roughly 72 percent of this group have never even seen Japan. They have attended American public schools and have been subjected to all the other Americanizing influences that operate constantly in any American community.

More than 8,000 American citizens of Japanese ancestry--approximately half of them volunteers--are now serving in the United States Army. Some are in service overseas and three have already been cited for bravery in action. One is serving as a turret gunner in Liberator engaged in bombing operations over the Continent of Europe.

Over 1,200 of these soldiers volunteered for service from behind the wire enclosures of relocation centers. As a result, the centers today contain large numbers of service flags and other evidences of ties with the Army. Men in uniform are frequent visitors at the centers and arrangements for entertaining them are part of the regular community activities program.

There are many other evidences of Americanism among these people both in the relocation centers and in normal communities throughout the country. At all centers, training in American ideals and American institutions is part of the regular school program just as it is in public schools outside. Formal flag raising and the pledge of allegiance are a regular ceremony in most of the center schools. Practically all national organizations for young people -- such as the Boy Scouts, Girl Scouts, 4-H Clubs, YMCA, YWCA, and Junior Red Cross--have active programs at the centers and many thousands of members. Boy Scouts alone number several thousand.

Outside the relocation centers, the thousands of Japanese-Americans--including both those who have left the centers on leave and those who were never evacuated--are displaying their patriotism in the same ways as other civilian Americans. They are buying war bonds and stamps, donating money and blood to the Red Cross, and participating in salvage campaigns. Several hundred are serving effectively in the intelligence branch of the United States Army. Others are serving as language instructors, helping to train intelligence officers for the Army and Navy. Still others are working as translators with the Overseas Branch of the Office of War Information. Many are employed as carpenters, machinists, welders, and in other jobs essential to war production.

Presented before Costello Subcommittee of House Committee on Un-American Activities, on July 7, 1943.

CIO Backs Relocation

Project Press Release No. 29

June 15, 1943

The Washington Industrial Union Council, representing all CIO unions in the District of Columbia, went on record last week in favor of the relocation program and condemned the recent activities of the Dies Committee on Un-American Activities as "irresponsible, hindering the prosecution of the war, and--by pitting one group of people against another--deliberately promoting the false Nazi doctrines of race," according to a copy of a resolution received by Director Myer.

The position taken by the union in its resolution was this: The employment of evacuees outside relocation centers helps to utilize more fully the nation's manpower during the war against fascism and "sustains the democratic rights of residents of this land." The resolution also welcomed into membership evacuees who are working in the District of Columbia.

The resolution states that copies will be sent to Senator Chandler and Senator Reynolds, Chairman of the Senate Military Affairs Committee, and to Congressmen Dies and Tolan.

According to a report in the Gary, Indiana POST-TRIBUNE, the Lake County Industrial Union Council of the CIO is also backing the resolution program. It recently voted to give evacuees "the chance to work in Lake County industries." The POST-TRIBUNE article

quotes the secretary of the CIO council as saying, "Since we allow patriotic German and Italian citizens to work, why should there be discrimination against the Japanese, simply because their skin is yellow."

These resolutions by CIO bodies implement a statement made by CIO President Philip Murray in his report to the Fourth Constitutional Convention of the CIO, "The CIO is not blind to the historical fact that the political persecution of certain minority groups is the invariable prelude to the infringement of the rights of other broader groups."
