HELP IN CASE OF ACCIDENT

KEEP COOL—SEND FOR A PHYSICIAN

WOUNDS—Remove patient to a quiet, airy place. Have hot and cold water, several basins, clean towels, cloth and soap. Apply antiseptic treatment as follows:

Thoroughly cleanse your own hands and nails; then cleanse the wounds with some antiseptic. The most easily procured is salt and water. Put a handful of salt in a quart of water and use freely. After the wound is cleansed, it must then be protected from new germs by some covering made germ free by baking, boiling, or ironing. After the salt solution has been carefully used, apply strips of gauze soaked in warm water which has been boiled. This will leave the wound in good condition.

If a more active antiseptic than salt, such as Carbolic Acid (1 per cent) or Bichloride of Mercury (1 part to 2000 of water), is available, it should be used.

ARTIFICIAL RESPIRATION—When the patient is removed from the water, gas, smoke, or electric contact, get to work at once with your own hands. Lay the patient on his stomach. Extend one arm directly over head. Bend the other arm at elbow, and rest patient's cheek on hand, to keep the nose and mouth off the ground and free for breathing.

Kneel facing forward, and straddling patient's legs just above the knees. Place the palm of the right hand of back, just above the belt line, and about four inches apart, thumbs and fingers together, the little fingers over and following the line of the lowest ribs, and the tips of fingers just out of sight.

With arms straight lean gradually forward, pressing downward and forward and counting slowly, one, two, three. Snap your hands sideways, off patient's back. Swing your body back, counting slowly, four, five. Rest. Straighten arms and repeat pressure.

Three movements straight arm pressure (shoulder behind hands to exert forward pressure), quick release and swing back. Keep up work steadily until breathing begins and continues naturally.

When helpers arrive put them to work; send for physician; clean patient's mouth of obstructions; stimulate reflexes; loosen tight clothing; rub legs and body toward heart; supply clothing; and other bodily articles and relieve operator when tired. Place aromatic spirits of ammonia near patient's nose at frequent intervals. When patient begins to breathe naturally, and can swallow, give a teaspoonful of aromatic spirits of ammonia in half glass of water, or some hot coffee or tea.

Don't get discouraged. Stick to it for two even three hours if necessary.

APOPLEXY—STROKE OF PARALYSIS—Loosen the clothing. Apply cold cloths to the head which should be elevated. Keep the body and feet warm. GIVE NO STIMULANTS. Never attempt to give anyone who is unconscious anything to drink.

FOREIGN BODIES IN EYE—Pull the upper lid downward away from the eyeball over lower lid and release.

BURNS AND SCALDS—Cover with Cooking Soda and lay wet cloths over it. Whites of Eggs and Olive Oil. Olive or Linseed Oil, plain or mixed with chalk.

LIGHTNING—Dash cold water over person struck. Artificial respiration as above.

VENOMOUS INSECT'S STINGS, ETC.—Apply weak Ammonia, Oil, Salt Water or Iodine.

FAINTING—Place flat on back; allow fresh air and sprinkle with water.

IN CASE OF POISON

First. Send for a physician.

Second. Empty the stomach by an emetic—a teaspoonful of mustard or two teaspoonfuls of common salt in tepid water; teaspoonful of alum in water. Tickle the throat with a feather or finger. Apply antidotes as follows:

Rule—Multiply the principal by as many one-hundredths as there are days, and then divide as follows:

Per cent. 4 5 6 7 8 9 10 12
Divide by.....90 72 60 52 45 40 36 30

Examples.—Interest on \$100, for 90 days at 5 per cent: $100 \times 90 = 9,000$ divided by 72 = 1.25 (one dollar and 25 cents); on \$1, for 30 days at 6 per cent: $1 \times 30 = .300$, divided by 60 = .005 (5 mills).

Table.—Showing the number of days from any date in one month to the same date in any other month.
