MINNESOTA ZOOLOGICAL GARDEN

September 22, 1976

Dr. Devra Kleiman  
Reproductive Zoologist  
National Zoological Park  
Washington, D.C. 20009

Dear Devra:

I received your note of 9 September, 1976.

Your original note of 21 July, 1976 did arrive here. I had difficulty finding it. It seems that it got lost when we made the move from our offices to the zoo site. At any rate, it was faithfully filed and I found it so I am sure that all those unresponsive members must also have received it.

It distresses me greatly that such a little amount of interest is being proposed. Without consulting you I have sent out a note to those eleven owners based on the studbook records and am attaching a copy.

In the mean time, I am asking Brad House to be present at the Tuesday, October 5, meeting at the Baltimore conference to participate and be helpful in whatever way is possible. As you recall, Brad was an original member of the group which met back in 1972 in Washington and is familiar with the Lion Tamarin problem.

Unfortunately, I will not be able to attend the conference except for Saturday, Sunday and Monday so will not be able to join you on Tuesday.

Hope the attached letter has met with your approval. It seems to me that it can't hurt.

Best regards,

Donald D. Bridgwater

DDB/je

September 22, 1976

Dear Colleague:

Just received a note from Dr. Devra Kleiman relative to an invitation to attend a meeting on the future of the Lion Tamarin propagation program in this country. It has been scheduled for Tuesday, October 5, between 4:00 and 6:00 PM in the D'Alesandro Room at the conference center.

It is my understanding that of the eleven current owners of Lion Tamarins in the nation, only two replies indicating some participation in this session have been received to date. Although at this time I have no longer any direct connection with the ongoing Lion Tamarin program, I feel very close to it. As back in 1969 and 1970 we instituted a start through the old WAPT which finally culminated in a conference in 1972. As a result of continued efforts on the part of Devra Kleiman and others, the program continues to work as one of those mutual cooperative efforts which has in my opinion at least staved off the demise of the Lion Tamarin in captivity and had a broad ranging effect on programs in Brazil.

We have all looked at this particular program as exemplary of the kinds of professional approaches to the breeding of captive animals, and particularly endangered species; and I would hope that you would give close attention to the possibility of attending the discussions in Baltimore and continuing to keep this program moving.

Best regards,

Donald D. Bridgwater, Chairman  
AAZPA ISIS Studbook Committee

DDB/je

LETTERS SENT TO:

*For your information*

Dear Colleague:

Since you have received the latest Studbook, I am sure you are aware that the numbers of Lion Tamarins are not increasing significantly. Moreover, there are unpaired specimens in some zoos, and a certain amount of inbreeding is occurring. I think that it is time for all U.S. institutions having Leontopithecus in their collection to begin to discuss and plan, as a group, how we are going to manage the long-term propagation of the species. Such a meeting was recently concluded in Munich for owners of the Prezewalski Horse and was apparently very successful.

I propose that representatives from each U.S. Zoo maintaining Leontopithecus meet together informally at the annual AAZPA conference in Baltimore. I have tentatively asked that a room be set aside on the evening of October 5 between 8 and 10 p.m.

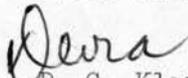

Topics of discussion would include the following:

- (a) The maximum number of specimens your zoo can maintain.
- (b) Post-mortem results from recent deaths.
- (c) An over-all plan for pairing up young animals to maximize their reproductive success and reduce inbreeding.
- (d) Where and how surplus animals will be sent when (and if) the current owners have exceeded their capacity.

You have all shown considerable cooperation in providing me with updates on your collections for the Studbook; for this I am very grateful. However, it is time that we owners sat down as a group to plan the future of captive Leontopithecus. Except for the Pretoria Zoo, the vast majority of Lion Tamarins are in U.S. Zoos, and it is ultimately up to us to develop a sound approach to the long-term management and propagation of the species.

I would be grateful if you would inform me whether you or a representative of your zoo with knowledge of your Lion Tamarin collection will be able to attend this meeting. I look forward to hearing from you soon. If you have other suggestions for topics of discussion, please let me know.

Yours sincerely,

  
D. G. Kleiman

FOR YOUR INFORMATION

September 9, 1976

Dear Colleague:

On 21 July, I sent a letter to representatives from all U.S. institutions owning Lion Tamarins (Leontopithecus rosalia), as well as to individuals within the AAZPA who might have an interest in Lion Tamarin propagation. The purpose of the letter was to propose that a meeting be held during the October AAZPA meetings in Baltimore to discuss the future of Lion Tamarin propagation in this country and to try to develop a sound approach for long-term breeding.

Excluding the National Zoo, I received 2 replies out of 11 owners of Lion Tamarins (9 have animals in their collections). The response was poor to say the least.

I have now confirmed that we can meet on Tuesday, October 5 between 4:00 and 6:00 p.m. in D'Alesandro Room and would be grateful if you would let me know whether you or a member of your institution with knowledge of or interest in your Lion Tamarins will be able to attend this meeting. If such an individual can make commitments for their animals, it would be useful.

I look forward to hearing from you.

Sincerely yours,

D. G. Kleiman

P. S. Please let me know whether you failed to receive my first letter.

GOLDEN LION TAMARIN WORKSHOP

14 September 1980

Chicago, Illinois

I would  would not  be able to attend the workshop.

I would like the following colleagues and/or staff members to attend:

---

---

---

I would be especially interested in panel discussions on the following topics:

---

---

---

---

I would be willing to participate in  or chair  a panel discussion on the following topics:

---

---

---

---

Other Comments:

---

---

---

---

Please return to: Dr. D. G. Kleiman  
Department of Zoological Research  
National Zoological Park  
Smithsonian Institution  
Washington, D.C. 20008

BEFORE 31 MARCH 1980.

## WORKSHOP ON GOLDEN LION TAMARINS

It has been several years since the holders of golden lion tamarins met to discuss long-range strategies for the propagation and management of this species. The recent increase in numbers of specimens and the finding of a genetic defect in the captive population suggest that it would now be opportune to convene a workshop.

I propose that we meet prior to the Annual AAZPA meeting to be held in Chicago, September 14-19, 1980. The organizers of the AAZPA conference have agreed to provide us with facilities for such a workshop on Sunday, 14 September. The length of the workshop (half or a whole day) will depend upon the number of topics to be covered.

I would prefer to keep the workshop small and informal, to provide the greatest possible interchange of information. Thus, I do not think we should have a formal series of presentations. Rather, we could have several panel discussions devoted to important topic areas.

Topics could include:

- (1) Medical problems and major causes of mortality
- (2) Genetic management and the carrying capacity of zoos
- (3) Hand-rearing and re-introduction techniques
- (4) Recent improvements in housing and diets
- (5) The relevance of research findings

I would appreciate your discussing the proposed workshop with staff and colleagues, and returning the enclosed form to me before 31 March 1980.

1979 INTERNATIONAL STUDBOOK

GOLDEN LION TAMARIN  
Leontopithecus rosalia rosalia

D. G. KLEIMAN  
CHIEF, DEPARTMENT OF ZOOLOGICAL RESEARCH  
NATIONAL ZOOLOGICAL PARK  
WASHINGTON, D. C. 20008

15 April 1980

1979 INTERNATIONAL STUDBOOK

GOLDEN LION TAMARIN  
*Leontopithecus rosalia rosalia*

D. G. KLEIMAN  
CHIEF, DEPARTMENT OF ZOOLOGICAL RESEARCH  
NATIONAL ZOOLOGICAL PARK  
WASHINGTON, D.C. 20008

Enclosed is an update for 1979 of the International Studbook for *L. r. rosalia*. Included are:

a) A list of all registered specimens living in collections as of or after 1 January 1960 when sufficient information concerning arrival, birth, and death is available. Fewer than 50 animals have been excluded due to uncertainty about vital statistics.

b) a list of all specimens alive as of 31 December 1979,

c) a list of all births, deaths, and transfers during 1979, and

d) a summary of the major changes from 1 January 1979 to 31 December 1979.

Also included are the specimens of *L. rosalia chrysopygus* and *L. rosalia chrysomelas* being maintained at the Biological Bank, Tijuca Park, Rio de Janeiro, Brazil.

In 1979, the *L. r. rosalia* population increased by 9 specimens from 153 to 162 animals, compared with an increase of 16 specimens in 1978. The number of collections increased from 18 to 20 due to the establishment of new breeding colonies in Frankfurt, West Germany; Omaha, Nebraska; and King's Island, Ohio. Monell no longer maintains Golden Lion Tamarins. It is anticipated that additional zoos will establish colonies in 1980. By April 1980, zoos in New Orleans, Louisiana (Audobon Park), Memphis, Tennessee, and Wichita, Kansas (Sedgewick County Zoological Society) had already received Golden Lion Tamarins. This Studbook includes new information on specimens, not previously reported, such as parental care experience, abortions, and evidence for diaphragmatic hernias. Future Studbooks will include inbreeding coefficients for living specimens. No replies to correspondence were received from Botha, Roos, and the Japan Monkey Center regarding changes in their lion tamarin populations in 1979.

## STUDBOOK FORMAT

### (1) Order of Listing:

In the Complete Register, specimens are listed chronologically, with imported animals being listed first, followed by captive-born specimens. Births for 1979 are listed in the Complete Register. The order for the Register of Animals Living as of 31 December 1979 and the listing of Deaths for 1979 is alphabetically, by site. Transfers for 1979 are listed chronologically.

### (2) Studbook Number:

All individuals are given both a Studbook name and number. In the number listings, the letter I and O have been eliminated to avoid confusion with the numbers 1 and 0. A new system is offered with this Studbook, in that the year of import or birth is the key Studbook number, followed by letters for imported specimens and numbers for zoo bred animals. To separate littermates, where twins and triplets were born, a lower case letter a, b, or c is used following the second set of numbers. When the number is shown alone, this indicates it was a singleton birth; i.e., 67-11 indicates the animal was born in 1967 and was a single birth, while 72-3c indicates a birth in 1972 and that this was the third animal in a set of triplets. A number such as 63-A refers to an animal imported in 1963. This new number system is felt to be of better use to all concerned with the species.

House names and/or numbers or other means of identification are shown only when they have been indicated by owners. However, Studbook numbers should be used as the primary means of identification.

### (3) Dating:

Arabic numerals are used for the months of the year; dates follow the order day.month.year. Normally, only the last two digits of the year are given, inasmuch as all specimens are from the 20th century.

(4) Abbreviations and Terminology:

Abbreviations and terms used are as follows:

M=male  
F=female  
WB=wild bred (or presumed wild bred)  
B=successful breeder. Gave birth to or sired offspring that lived at least 30 days. It can be assumed that the animal exhibited parental care, unless otherwise noted.  
X(Y)=animal is known to have experienced at least 4 weeks of infant experience as a juvenile or subadult. X is the number of litters experienced. Y is the total number of infants in all litters.  
NOX=no infant experience, or assuming no experience.  
HR=Hand reared  
NR=not recorded  
NA=not accessioned  
+=checked for diaphragmatic hernia  
HERNIA=found to have diaphragmatic hernia  
STILLBORN?=reported as stillborn but no necropsy evidence to support it  
STILLBORNX=necropsy revealed lungs were never inflated  
CHECK STILLBORN!=Institution reports an animal's having been born and died on the same day but does not indicate whether or not it was a live birth.  
ABORTED FETUS=Considered a fetus if furless and obviously premature.  
ABORTION-NO FETUS=no evidence of a fetus found, but abortion is indicated by placental remains, urinalysis, swollen red genital area of female, or excessive blood in cage. Further support for an abortion can be provided by analysis of changes in the female's weight or behavior, and/or expected birth dates which have been estimated from periods of estrus.  
?=data unknown.  
#=house number never assigned or further stillborn information is nonexistent.

(5) Institutions:

Institutions are shown primarily by the city where the institution is located; private individuals are shown by name. When the city is listed alone, it is the zoo for that city. If a second establishment is noted, it will bear additional means of identification. The following is the list of institutions in alphabetical order.

ANTWERP (AN)- National Zoological Gardens, Antwerp, Belgium  
BOTHAS (BO)- Mr. A. J. Botha, Victoria, West Capetown, South Africa

#### ACKNOWLEDGEMENTS

Major thanks must go to Marvin Jones who initiated the compilation of data for the first Golden Lion Tamarin Studbook and has continued to provide information and help since I took over the task. Ms. Laura Grady provided considerable assistance on recent years' updates and current owners of animals have been most cooperative in rapidly providing information of births and deaths. I am especially grateful to Mr. Ron Evans for his efforts which have improved immeasurably the usefulness and timeliness of the Studbook.

# It is believed that Roos transferred 1.1 specimens to Botha and that 1.2.1 of Roos' specimens may have died in 1979, leaving Botha with 2.2 (assuming no mortality) and Roos with 1.1.1. This has not yet been confirmed.
