STATE OF MINNESOTA

DEPARTMENT HIGHWAY - Priorities and Needs
Room 613 - Ext. 3147

Office Memorandum

DATE: February 9, 1973

TO : B. L. Warzala, Chief
Federal Aid Programming Section
Room 815

FROM : W. B. Sorum, Chief
Highway Priorities and Needs Section
Room 613

SUBJECT: Cost Improvement Program

In reply to your memo of January 22nd, with reference to Item 6 on the list of "Top Priority Programs", the Priorities and Needs Section will provide the requested information on the "Construction Project Log Record" as suggested.

The Federal project number will be added to the "Construction Project Log Record" as indicated on the attached sample. It will not be necessary, however, to add another column to the form. We will record the federal project number on the next line under the state project number.

There are some minor projects that are not significant enough to the general road status to be recorded on the "Construction Project Log Record". A list of these projects and their federal project numbers will be kept on the RL-7 Supplemental Sheet. (Sample attached)

The above additions to our records will begin with the work-up of the 1973 construction. When your "project history maps & logs" contain all of the 1972 construction accomplishments, you may discontinue your operation and retain the maps & logs for historical purposes.

We do not envision any additional cost insofar as adding this data to our procedure. Any savings or benefits would be in your Section and should, therefore, be estimated by you and reported in your Cost Improvement reporting.

W. B. Sorum

W. B. Sorum, Chief
Highway Priorities and Needs Section

STATE OF MINNESOTA

DEPARTMENT HIGHWAY - Priorities and Needs
Room 813 - Ext. 3147

Office Memorandum

DATE: February 9, 1973

TO : B. L. Warzala, Chief
Federal Aid Programming Section
Room 815

FROM : W. B. Sorum, Chief
Highway Priorities and Needs Section
Room 813

SUBJECT: Cost Improvement Program

In reply to your memo of January 22nd, with reference to Item 6 on the list of "Top Priority Programs", the Priorities and Needs Section will provide the requested information on the "Construction Project Log Record" as suggested.

The Federal project number will be added to the "Construction Project Log Record" as indicated on the attached sample. It will not be necessary, however, to add another column to the form. We will record the federal project number on the next line under the state project number.

There are some minor projects that are not significant enough to the general road status to be recorded on the "Construction Project Log Record". A list of these projects and their federal project numbers will be kept on the RL-7 Supplemental Sheet. (Sample attached)

The above additions to our records will begin with the work-up of the 1973 construction. When your "project history maps & logs" contain all of the 1972 construction accomplishments, you may discontinue your operation and retain the maps & logs for historical purposes.

We do not envision any additional cost insofar as adding this data to our procedure. Any savings or benefits would be in your Section and should, therefore, be estimated by you and reported in your Cost Improvement reporting.

W. B. Sorum

W. B. Sorum, Chief
