X. SODDING

- A. All areas to be regraded for drainage, swales shall be sodded. In these areas to be sodded, the subgrade shall be prepared to allow for at least four inches of topsoil plus the sod thickness.
- B. After the subgrade has been prepared to the proper level, it shall be smoothed and raked evenly. After the two inches of topsoil has been spread and graded to the specified grade, it shall be smoothed and raked evenly.
- C. Sod shall be installed on the topsoil and shall conform to existing finished grades after tamping or rolling.
 1. All soft spots and inequalities in line of grade shall be corrected before sodding is done.
 2. Sod shall be laid so that no voids occur between strips. Sod shall be tamped or rolled immediately after it is laid and shall be smooth and equally firm at all points.
 3. Wheeling of sod over prepared sod bed shall be only over boards or planks.
