

GUIDE TO THE USE OF THIS MICROFILM

The Minnesota federal nonpopulation census schedules for 1860, 1870, and 1880 each consist of agriculture, manufacturing, mortality, and social statistics schedules. These schedules are contained on seventeen rolls of microfilm. The rolls are numbered consecutively and correspond to the census schedules in the following manner:

Agriculture Schedules:	Rolls 1-6, 6A-6B, 7-10
Manufacturing Schedules:	Rolls 11-12
Mortality Schedules:	Rolls 13-14
Social Statistics Schedules:	Roll 15

Four aids to the reader precede the census schedules on this microfilm roll:

- a Roll Summary for the entire microfilm edition lists the inclusive contents of each microfilm roll;
- an Introduction provides information about the arrangement and the contents of the agriculture census schedules, 1860-1880;
- a Roll List lists the counties contained on Rolls 1-6, 6A-6B, 7-10 in the order in which they appear on the film, together with the *frame number at which the schedules for each county begin;
- a Roll Contents List lists the subdivisions (townships, municipalities) enumerated within each county in the order in which they appear on the film; the *frame number at which the schedules for each county begin is also indicated.

*The frame numbers listed are generally accurate to within a few frames. Frame numbers appear on a running target beneath each film frame, along with the roll number and the title and publisher of the microfilm.

Agriculture Schedules

INTRODUCTION

The Minnesota federal agriculture census schedules for 1860, 1870, and 1880 enumerate agricultural investment and production, by county and by subdivision (township, municipality) within each county. Most, but not all, of the counties are in alphabetical order in all three censuses. In the schedules for 1860, the subdivisions within some counties are in alphabetical order, while those within others are not; in the schedules for 1870, the subdivisions are in alphabetical order; in the schedules for 1880, the subdivisions are arranged in numerical order by enumeration district and are not in alphabetical order.

For each farm unit enumerated, information is given on the name of the owner, agent, or manager; amount and/or value of land, implements and machinery, livestock, homemade manufactures, slaughtered animals, and forest products; wages paid, and total value of the farm. Informational categories are more numerous and more specific in each successive census.

There are no schedules for the following counties in each census, either because the county was not yet formally organized or because the schedules are missing:

Manufacturing Schedules

INTRODUCTION

The Minnesota federal manufacturing census schedules for 1860, 1870, and 1880 enumerate the industrial operations of companies and individuals whose annual production valued \$500 or more, by county and by subdivision (township, municipality) within each county. Most, but not all, of the counties are in alphabetical order in all three censuses. In the schedules for 1860 and 1870, the subdivisions within some counties are in alphabetical order while those within others are not; in the schedules for 1880, the subdivisions are in alphabetical order.

The schedules for 1860 and 1870 give information on the name of each corporation, company, or individual; name of business, manufacture, or product; amount of real and personal capital invested in the business; nature of the power source used; kind, quantity, and value of machinery, raw materials, and products; average number of employees; and wages paid.

The schedules for 1880 are quite different in format and contain more information. There are separate schedules for twelve major types of manufacturing, plus a general schedule for industries not covered by the other schedules, as follows:

1. Agricultural Implements
2. Paper Mills
- 3 and 4. Boots and Shoes - Leather (Tanned and Curried)
- 5 and 6. Lumber Mills and Saw Mills - Brick Yards and Tile Works
- 7 and 8. Flouring and Grist Mills - Cheese and Butter Factories
- 9 and 10. Slaughtering and Meat Packing - Salt Works
- 11 and 12. Small Coal Mines - Quarries
- [Other.] [General schedule enumerating industries not covered by any of the above schedules]

Each numbered schedule listed above contains general categories of information similar to those in the schedules for 1860 and 1870, plus additional categories

specifically applicable to the industry being enumerated. The last schedule contains only the general informational categories. The schedules are arranged within the subdivisions in the order listed above; the schedules that appear in each subdivision are given in the Roll Contents List.

There are no schedules for the following counties in each census, either because the county was not yet formally organized or because the schedules are missing:

Mortality Schedules

INTRODUCTION

The Minnesota federal mortality census schedules for 1860, 1870, and 1880 enumerate the deaths that occurred during the census year, by county and by subdivision (township, municipality) within each county. Deaths are recorded by family (household) in the order in which they were enumerated. Most, but not all, of the counties are in alphabetical order in all three censuses. In the schedules for 1860 and 1870, the subdivisions within some counties are in alphabetical order, while those within others are not. In the schedules for 1880, the subdivisions are in numerical order by enumeration district and are not in alphabetical order.

The following information is given for each person who died during the census year:

- 1860: name; age; sex; color (white, black, mulatto); whether free or slave; marital status; place of birth (state, territory, country); month of death; occupation; cause of death; number of days ill.
- 1870: number of family as given in the population schedule; name; sex; color (white, black, mulatto, Chinese, Indian); marital status; place of birth (state, territory, country); whether parents of foreign birth; month of death; occupation; cause of death.
- 1880: number of family as given in the population schedule; name; sex; color (white, black, mulatto, Chinese, Indian); marital status; place of birth (state, territory, country); parents place of birth; occupation; month of death; length of residence in the county; where disease contracted, if not at place of death; name of attending physician; family's place of residence, if death occurred in the enumeration district but family resided elsewhere; place where death occurred, if death occurred out of

the enumeration district but family resided in the enumeration district.

There are no schedules for the following counties in each census, either because the county was not yet formally organized or because the schedules are missing:

Social Statistics Schedules

INTRODUCTION

The Minnesota federal social statistics census schedules for 1860, 1870, and 1880 enumerate statistics relative to certain societal conditions, institutions, and groups, by county and by subdivision (township, municipality) within each county. Most, but not all, of the counties are in alphabetical order in all three censuses. In the schedules for 1860 and 1870, the subdivisions within some counties are in alphabetical order, while those within others are not; in the schedules for 1880, the subdivisions are arranged in numerical order by enumeration district and are not in alphabetical order.

The schedules for 1860 and 1870 give data on the value of real and personal estates; taxes; the public debt (1870 only); average wages, seasons and crops (1860 only); educational facilities; libraries; newspapers and periodicals; churches; criminals; and paupers. The schedules for 1880 are quite different in that they provide information only about "Defective, Dependent, and Delinquent Classes," *i.e.*, the insane, idiots, deaf-mutes; the blind; homeless children; inhabitants in prison; and paupers and indigents.

There are no schedules for the following counties in each census, either because the county was not yet formally organized or because the schedules are missing:
