Dr. Kuhlmann,

My dear Doctor:

My attention has been called to a monograph written by you on "The Mental Examination of Children". I am unfortunate enough to be Chairman of a Committee appointed by the American Medical Association to draft a standard score card for these Better Baby Contests. Our plan is to prepare two simple forms and one that would go more into detail and be used for more scientific work. The ordinary physician who assists in making the examination is not capable of making detailed tests or examinations. The object of having one score card of a highly technical character is to enable those who have had the necessary training to make such examination.

I am enclosing 25¢ which I believe is the price of this monograph.

Believe me
