September 1st 1897 - July 1st 1898.

Kindergarten Program.

Morning Session.

8.15 - 8.30	Chapel.
8.30 - 8.45	March and sing
8.45 - 9.00	Group Work.
9.00 - 9.30	First Reading Class.
9.30 - 10.00	Second Reading Class.
10.00 - 10.30	Recess.
10.30 - 11.30	Tables 1 and 2. Occupations. 3 and 4 Busy work.
11.30 - 11.45	General Exercises.
11.45 - 12.15	Circle Exercises.

Afternoon Session

1.30 - 2.15	Tables 3 and 4 Occupations
2.15 - 2.45	Busy work for all.
2.45 - 3.00	Closing Exercises

Sept. 1897

Becker. August Becker is making greater effort to talk and speaks some words quite plainly. Takes more interest in the busy work than last year and can be kept more quiet. He takes his morning nap, daily, during the second session.

Blasius Nicholas Blasius, with a number of others, is reading from the chart this term and promises to do good work. Reads the first three lessons both in print and script. Builds words and sentences with the Word builder and knows a number of letters. Is gaining control of his hands all the while and succeeds in sewing the simplest pricked sewing cards and the very simple weaving.

Barret Eddie Barret also reads from the chart and is doing good, work but gains little in his speech. Does not articulate well, so that few can understand him. His voice is so very weak; he seems afraid to let it come out. A very frail child yet seldom ill enough to go to the hospital. Looks like a consumptive and often troubled with a bad cough.

Celt Minnie Celt continues about the same as last year. Except for a slight improvement in her speech she has made little progress since the first of the year.

Sept. 1897

Columbus — Christopher has done nothing since the beginning of the year but sit in the window and watch the builders at work putting up the new building. He seems perfectly fascinated and sits by the hours watching them.

Delore. — Adeline Delore entered school again the first of September, but does not attend regularly only about two days out of each week. She is gaining in the use of her hands to the extent that she uses the peg boards and strings beads with little difficulty.

Ellis — Roy Ellis is one of the chart class and takes great interest in his reading exercises. Builds words and sentences and knows the letters a, i, o, s, b, m + y. Reads the script also. Is not as neat in the sewing and weaving as some of the children, but improves all the while

Frohle — Georgie talks incessantly and appears fairly bright, but lacks concentration. Does nothing with color or form. Occupies himself with stringing beads, building blocks or sticking pegs, but does nothing intelligently. Marches in fairly good time and takes great interest in games with the ball. He is quite active and catches and throws a ball very well.

Sept. 1897

Frober. — Ferdinand Frober admitted to the school September 6 - 1897. Age 11 years 9 months. He sees well, but slightly deaf, body well formed and has perfect use of every limb and rather active. Throws and catches a ball with some skill.

Articulation very imperfect, chatters constantly but not intelligibly. Is reported as being restless and excitable, but has shown no such disposition in the school room; in fact is more quiet than the average child coming into the School. Very neat in his dress, quiet and obedient. Not destructive in any way. Shows a very kindly disposition toward younger children, yet takes great delight in teasing, but not in a cruel way. Quite imitative and takes much interest in the songs and games. Marches in good time but does not attempt to sing.

He shows his two years kindergarten training before entering this school, by his neatness and methodical way of doing everything.

Distinguishes some of the colors but does not know them by their names. Knows nothing of forms. Is fond of employment and is said to have shown some skill in handling tools. Knows nothing of numbers or literary work of any kind.

Sept. 1897

Fretten

Emma Fretten is a willing little worker but having a new language to master makes it difficult for her to keep up with the little chart class. The object words, if names of things she is familiar with, she remembers readily, but the other words used in the simplest sentence she makes an impression on her.

She builds the words with the Word Builder and learned the letters a, i, r, s & t.

Writes, reads, and counts number to 10.

Lately she has made a slight effort to sing and if she could only be persuaded to let her voice out it would be very sweet I think. She will overcome this timidity in time.

Fenn.

Rosie began her second term in the school the first of September and succeeds no better in her efforts to talk than when she first entered. She is an energetic little thing and takes an active part in the games and gymnastic songs.

She has a bright quick eye and very imitative. Very quick in motion and rather graceful.

In the occupations she is doing nothing more than last year; the simplest designs only.

Yadsley.

Polly has been in the hospital since the second week of school until last Wednesday afternoon. Consequently nothing to report this month.

Sept 1897

Hoovka.

The first four days of school Eddie cried most of the time from homesickness.

If he forgot himself long enough to become interested in something and someone happened to mention having been home, or was going home or even used the word home in singing he would burst out crying and sob as tho' his heart would break and cry for his mamma. However he soon became quite happy again.

It is almost impossible to gain his attention even for a minute. He strings beads or builds blocks in a sort of mechanical way without giving any thought what ever to it. He has learned tho' to separate the beads into their different forms, but only knows the ball by name. He tries to say the word ball, but does not speak it plainly. He is such a sturdy active little fellow that it seems he might be capable of great improvement but he is very young yet so there is yet great hopes.

Henderson.

In coming into the school little Emma has succeeded in doing the thing every one else has failed in and that is in persuading Isabelle Henderson to "get a move on her". Emma leads the line formerly led by Isabelle and goes through the halls like a young cyclone and Isabelle feels obliged to follow at the same rate of speed and it is such a relief to see her move that it would seem too bad to squelch it, even tho' somewhat disorderly. One thing at least accomplished during the month.

Sept. 1897

Jennings

Earl Jennings one of the hospital children is sent for one session, into the Kindergarten He is not sent regularly at all but when he comes he shows the keenest pleasure in being there. It cannot be the work which attracts him so much, for he is capable of doing so little of it; but it must be being with so many little active children that gives him such delight. He makes such an effort to gain control of his hands, and is gaining a little every day. He now uses the peg-board, bead board, and strings beads very well and quite rapidly considering that a year ago he would work perhaps ten minutes sticking one peg or stringing one small cube. Then he would not string the balls at all for being round they would slip so easily from his fingers. Earl's articulation is very defective.

Jackson Hattie Jackson continues about the same as last year.

Kemna This is Otelia Kemna's second year in the Kindergarten and we hope for much improvement by the end of the year, but can scarcely expect anything worth mentioning in one month; her progress is so slow there can be nothing to report.

Kolhei. Enoch Kolhei steadily improves in his speech learning new words each day His articulation is very poor of course but grows a little better all the while I think. He is now walking without his crutch, much against his will however. He

Sept. 1897

objected most seriously at first, but is now growing accustomed to it; and is surely gaining strength in his paralyzed limb. While carrying the crutch he depended entirely upon it, so that the leg was not used at all.

In the new lessons on the chart, the words black and how he cannot pronounce at all. He knows the words perfectly well but his efforts at speaking them are painful.

Waterny. Wilhelm was admitted into the Institution about a year ago I think, but has never been sent to school until the beginning of this term. He is in school from 8.30 - 10 A.M. each day. He seems very happy but is able to do so little. Uses the large color peg boards with some difficulty, but after sticking them full of pegs seems quite delighted with his efforts. We hope in time he will gain control of his hands but at present there is little he can do. Is inclined to be left handed but has little control of either hand. Can move all his limbs. ~~Resembles other~~ Cannot walk and has been helpless from birth. Is reported as using knife & fork "not quite good", but the hospital nurse reports quite the contrary. Does not feed himself except to hold a piece of bread and butter in his hand

Began talking when about two years old but articulates very slowly and poorly. Understands a command and very obedient

Is as sensitive to pain as other children. Neither excitable or restless

1897
Sept.

Reported as being obstenate and passionate and not trustful or truthful, but he has shown no such disposition in the school-room.
Very affectionate and always wants attention. Fond of children and animals. Not at all distructive or untidy and is always attentive to talk of nature. Power of observation and memory very good. Remembers things he sees and talks intelligently about them afterwards. Has never been to school and does not read but counts to ten. Recognizes colors by sight

Measkern

Eddie Measkern distinguishes all the colors but is not familiar with names of each. Of the forms knows the ball only. Eddie uses his right hand and is an exceptional case. Is sewing the simplest pricked sewing card and doing fairly well. Is very careful and neat with his work making learning or soiling it
Is improving a little in his speech
Understands simple commands and is very obedient. Very affectionate and fond of the little children. Catches and throws a ball well.

O'Donald.

Joseph O'Donald is improving in the use of his hands daily. Uses the left hand little more but makes his right do the work of both hands. He uses the peg boards and bead tiles without the slightest difficulty. Also strings the beads both by color and form.
Knows all the colors

Sept. 1897
Riley

Albert Riley is taking great interest in the Chart Reading Exercises and doing fairly well. Is always ready for work and has to be kept busy all the time. Seems very unhappy when unoccupied. Unlike the average epileptic he is always happy and good natured. Of a very kind loving disposition and very fond of his playmates. He has formed the disgusting habit of sticking his two fingers in his mouth and so far, no one has been able to break him of it. Is very cleanly and not distinctive; asked as far as I have learned always truthful
Takes great interest in all of the Kindergarten work, but the sewing and weaving more especially attract him. Is very neat in all his work, but does the simplest work only.

Smith

Harry Smith, the deaf mute transferred from Skinner Hall last Spring, shows little improvement. A trifle more cleanly in his habits and keeps his seat in the school-room. He has been much interested in the new building and takes great delight in sitting by the window watching the men at work. It is very hard to gain his attention for any length of time

Sept. 1897

Smith

Lillian Smith comes into the Kindergarten every morning at 11.20; remains until 3 P.M. She needs particularly, the occupations, but comes in too late for that period. She enjoys the busy work tho' and is very systematic in everything she does, and uses her hand with greater ease than a year ago, and has gained confidence in herself, one of her greatest drawbacks. Always carrys herself in the most quiet-dignified manner and has a very gentle way of handling the youngest children. Seldom speaks as loud and when she does her voice is so low one can scarcely hear her.

Swanstrom

Howard Swanstrom seems to have wakened a trifle, enough at least to demand a rocking chair instead of a straight backed chair to sit in. One of the same children from the hospital has a rocking chair and Howard demands it every morning. His eyes are defective and he walks as if he could not see where he was stepping. He has the use of all his limbs but his walk is very peculiar. Howard is very indolent and inactive and shows no interest in any of the busy work. Uses his hands in an awkward manner and has not attempted any of the occupations. Hears perfectly but sees imperfectly. Talks and obeys simple commands. Knows nothing of color.

Sept. 1897

Schmidt

Alfred is reading from the chart this year and reads readily from both the print and the script. Has had only the first four or five lessons, learning the words pony, white, black, you, is, dog, cat, large. Makes the figure four. And beginning to do something with the occupations, sews the simplest pricked sewing card, but does it neatly without tearing or soiling.

Thurnx.

There is little improvement in Joseph Thurnx, but some; enough, at least, to entitle him to a place in our School department, rather than in the Custodial. He may never improve a great deal, but he is young and has been here less than a year, so he is not altogether hopeless. He is very excitable and when excited, has a habit of holding one hand above his head, keeping it in constant motion.

If one works with him he will separate the different colors in the sticks but if left alone, he he works without intelligence whatever. Distinguishes the different forms also.

Turner

Alex Turner transferred to Miss Johnson's grade early in September.

Tils.

Agnes Tils has been recommended to be transferred to Skinner Hall.

Sept. 1897
Vold

Clara is now able to do some literary work, I think, but cannot find the time to give to it, owing to the crowded conditions of the school room. Her pricked card sewing is neatly done and her weaving also, all this of the simplest designs. She is very ambitious and wants to be occupied all the time. She helps make the bed in the kindergarten every morning and does it fairly well. Can sing a little and takes great interest in the circle exercises.

Washer.

Emma Washer admitted Sept. 7-1897. Will be four years old the 9th of December. Sees and hears perfectly, and has no peculiarities of walk. She tries to talk but says little intelligable. Can say mamma, papa, broom + boys. Very restless; can scarcely be made to sit still a minute and when excited, has a fashion of clasping her hands together and grating her teeth in the most passionate way. She is perfectly independent in all her actions. Dresses herself and refuses the slightest assistance in going up and down stairs unless a little cross and sleepy, then demands to be carried. Full of affection and soon finds her way into every body's heart. She has a will of her own and likes her own way, but always yields very sweetly. She is certainly perfectly normal in every way and unless something unforseen develops

Sept. 1897

she can never be a proper subject for this school and the sooner she goes the better.

October
Herbert.

Marion Herbert admitted the first of the month and placed in the Kindergarten. For a few days seemed very unhappy crying all the time to go home and see his papa and mamma. And often mentioned other children in the family. But now he seems quite contented, seldom crying, but often asks if "Will mamma come to see me?" or "If me be good boy will mamma take me home."

In the application papers he is reported as not being able to pronounce any words at all, but I find that he talks a great deal, though some sounds he does not give distinctly. He is very observing and nothing goes on in the school room without attracting his attention immediately.

At first he could not distinguish one color from another and only amused himself by putting the pegs in the tiles when some of them were stuck in very tightly he showed a great deal of perseverance when taking them out.

Extremely nervous and excitable and seems to be in constant motion. Very fond of music often trying to sing a little and his voice is not unpleasant. Keeps time in marching; and when allowed to go to the piano will drum away with both hands, and although he does not attempt a tune of any kind, yet he never or seldom makes a discord. There is

October
~~Sept~~ 1897

something rather musical in his drumming.
An unusually active child and very light on his feet and fairly bounds like a ball. Can catch a ball sometimes and throws one very well.
He is not cleanly in his habits and has to be watched constantly. At times he seems sorely distressed about it, too, and I think if he is made to understand that he will be punished, he will soon learn to make his wants known.
Since he came he has learned to distinguish the ~~diffond~~ colors, red, orange and yellow and the different forms; but does not know the names of any of them except the ball.

Colwell.

Patrick Colwell aged thirteen years old, was admitted the early part of October, but has been in school only two days the second day after admittance he was sent to the hospital and has been there since that time except one day.
He is very small, no larger than a child of five or six, but has the oldest, hardest face I ever saw, wearing the most distressed expression. Sees and hears well. Left eye has enlarged pupil which gives his face a peculiar expression. Is left handed. Walks in an uncertain manner and is awkward in going up and down stairs.
Can talk, but some sounds he does not give distinctly. Understands language well. Does no school work at all. Does not know colors or distinguish one from the other. Distinguishes the

October
~~Sept~~ 1897

different forms but knows the name of the ball only. Can throw and catch a ball fairly well. Does not have the slightest idea of time in marching. Cannot recognize the most familiar objects in a picture.
He is reported as being sly and untruthful, and not tidy in his habits requiring constant watching but saw no evidences of anything of the kind the two days he was in school.

Emerson

Elsie Emerson was transferred from Skinner Hall to the main building the early part of this month, entering the kindergarten.
She will be eight years old next January. Sees and hears well. Has a shuffling sort of a walk and neither keeps the step or in line when marching. Is very quiet and inactive and shows great inclination to sleep.
Does not talk at all. Knows nothing of form or color. We know little of the child, having no report of her while at Skinner Hall, and since she is so timid and shrinking it may be that she is capable of doing more than we have discovered. What we know of her we have had to find out just the best way we could.
She shows some inclination to be busy and uses the peg tiles and strings beads but knows nothing of form or color. She requires individual work but owing to the crowded condition of the kindergarten she comes in for a very small

October
~~Sept~~. 1897

share of our teachers time and the greater part of the day has to sit unoccupied.

Miller

Margaret Miller, aged nine years old, was transferred to this building from Skinner Hall the early part of October.

She sees and hears well. Very quick in all her movements. Walks rapidly and does not march in time.

Cannot dress or undress herself, or throw or catch a ball. Is extremely restless and excitable and unable to apply herself. For busy work she uses the peg tiles and strings beads, but cannot work unaidded

Talks very rapidly, using disconnected sentences, but her articulation is good. Knows nothing of color or form.

Sings some.

O'Reilly

Agnes was transferred from Skinner Hall with Margaret Miller and Elsie Emerson. She is eight years old. Sees and hears well, but cannot obey the simplest commands. Cannot talk. Hums the tunes of a number of songs and seems very fond of music

Cannot keep the time in marching

Is right handed. Strings beads and sticks the pegs in the tiles with some aid but cannot work alone

She rocks her body backward and forward almost constantly.

Untidy in her habits.

October
~~Sept~~. 1897

Grout.

Roy Ashton Grout admitted into the school department October Twenty first.

Will be Seven years old next December the Thirty first.

Sees and hears well ordinarily but sometimes is troubled with catarrhal deafness. Eyes are sore and look weak.

He walks in a shambling awkward manner and goes up and down stairs very slowly.

He is reported as being able to say a few words, not using sentences, but I have not been able to induce him to say a word.

Powers of attention very poor. Very quiet, keeping his seat all time unless told to leave it. Busies himself, with sticking the pegs in the tiles or string beads, but knows nothing of form or color. Not at all active. Does not march in time

October twenty ninth sent to the hospital with the measles

Oct. 1897

Becker

August Becker distinguishes all the colors and knows the names of red, orange and yellow, and speaks the name of each, tho' not distinctly

Understands value of numbers to three

Knows names of the ball, cube and cylinder. Sews the simplest designs in the pricked sewing cards.

1897

Neaskern Oct. Eddie has learned the names of red, orange and yellow during the month. Counts and understands values of numbers to three.
Can say almost any word but not in connected sentences.

O'Donald Oct. Joseph has learned the word ball in the script only; and separates the letters o and s in the word builders.

Fenn. Oct. Rosie Fenn has learned the words ball and cube in the script only. Separates the letters o and s in the word builders.
Distinguishes all the colors and forms but does not know the names of either.
The pricked sewing cards she sews very quickly and neatly, but does only the simple designs. Attempts to say the words ball, cube, and the names of the different colors but cannot make them intelligibly

Vold. Oct. Clara Vold has learned the words ball and cube; and in connection with the lessons on the ball uses such sentences as:- this is a ball. The ball rolls. The ball bounds. The ball is round. Separates the letters o and s and knows the names of each

1897

Grober. Oct. Ferdinand is very slow and deliberate in all his work, but steady and accurate
Distinguishes all the colors and knows the names of red, yellow, orange and purple. Can say the words stick, ball, quite plainly. Distinguishes the different forms but knows the names of ball only.

Oct.

Blasius Nicholas Blasius, with a class of eight children, was advanced to Mrs. Tanner's grade the middle of the month for literary work; taking him from the Kindergarten the first session in the morning.

Oct.

Barret. Eddie Barret, also, sent to Mrs. Tanner's grade for literary work. Do not know what progress he is making, but think he will do well.

Oct.

Celt. Mamie Celt is doing about the same.
The latter part of the month she was put into the junior singing class and is reported as doing well.
She has also been transferred to another attendant's grade which is a grave mistake I think. The large girls annoy her, making her very irritable and nervous. While she may cause some disturbances among Miss Belcher's little girls, she is certainly better off with them than where she is now. Mamie has been put in almost every grade of girls at some time or other. To how she was at last put with the little girls, there was a marked change

1897 Oct. Columbus

She was more quiet and so much more easily governed.

Christopher continues about the same.

Oct. Defore

Adeline has missed but one or two days during the month in school. She distinguishes the colors red, orange, yellow & purple, and knows the name of red. Distinguishes the different forms and strings her beads, first selecting all the cubes, (because they are not so apt to slip out of her fingers) then the balls and cylinders

Oct. Ellis

Roy Ellis goes to Mrs Tanner the first 3ds session in the morning, for literary work and is reported as doing well.

The past week he has been learning to fold papers and has succeeded in remembering the different foldings but does not do it very accurately.

He is not accurate in any of his kindergarten work, but is improving all the time

Oct. Frolic

Serge Frolic is a little more quiet in school and has learned to distinguish the colors red, orange and yellow, but cannot work unaided. Some one has to remind him constantly of his work.

Frettim Oct.

Emma Frettim goes to Mrs Tanner now for literary work during the first session in the morning

In the sewing and weaving she is improving in neatness and rapidity.

Has learned during the past week the different steps in the paper folding but does not fold accurately. She will in time tho' for all she needs is practice The folding is one of the most difficult occupations

Oct. Gatsky

Polly has been put into the junior singing class and at first was very enthusiastic over it, but now that the newness has worn off, some days goes down very reluctantly. She is a great addition to the class however.

Since the middle of the month Polly has gone to Mrs. Tanner for literary work during the first session in the morning and is reported as doing well

I find she is overcoming her nervousness to the extent that she controls her hands so well that she can do almost all the occupations. The foldings are a little hard for her, but she is improving all the time

Oct. Hvonka

Eddie Hvonka is doing nothing more than last month.

Oct. Henderson

Isabelle has been in the hospital almost the entire month, but is in school again now.

Jennings Oct. — Earl Jennings has gained a little, perhaps, in the use of his hands otherwise no improvement. Has not been regular in attindance during the month.

Oct. Jackson. — Nathie Jackson has learned the words ball, cube, roll, and bound in the script only. In the Word Builders she separates the letters o and s.

Oct. Kenna — Otellia Kenna has made no improvement

Oct. Kothei — Enoch has his literary work with Mrs. Tanner the first session in the morning. In the sewing and weaving he improves in neatness and rapidety and enjoys his work thoroughly. During the past week he has learned the different steps in the paper folding but does not fold accurately.

Oct. Materny — Wilhelm does not show a great deal of persiverance in gaining control of his hands. The ball gives him more delight than anything else and he never tires watching it roll and bound.

He has learned the word ball, and uses such sintences in connection with that lesson as this is a ball the ball rolls, the ball bounds.

Think he is improving some in his articulation

Riley Oct. — Albert Riley has been going to Mrs. Tanner for one session each day, since the middle of the month, for literary work.

He has had two light spasms during the past month; they were very light scarcely more than a slight faintness

He never falls, but gets up from his chair and staggers a little but then sit down again and invariably drops to sleep for a little while. After one of these attacks he is always a little dull, while ordinarily he is very quick and bright.

Oct. Smith — Harry Smith continues about the same I notice he has stopped gritting his teeth as formerly.

Oct. Smith — Lillian has her literary work with Mrs. Tanner the first session in the morning and is in the Kindergarten the other two sessions; but I can do little more than provide her with busy work and let her work alone; there are so many other children who require my attention

Oct. Swanstrom — Howard was in the hospital a part of the month. Find no improvement

1897

Schmidt. Oct. Alfred Schmidt is improving in the occupations doing his work quite neatly tho' slowly. The Bricked sums cards he serves perfectly independent of any one, except when he wants a new thread, or some marks made But in the weaving he is more helpless and often makes mistakes, he seems so interested in it, tho', that I think he will soon do it all right He says he is sewing a card for his "mudder" for Christmas

Oct. Simons Joseph has slight improvement, if any. If one could devote much time to him alone he might do quite a little. He is nervous and excitable and requires constant attention

Oct. Washer Emma is not required to sit still more than ten minutes at a time while in the school room. And not then, unless she is inclined to do some busy work. She is too young to be much restricted. She has a little broom and dust pan she takes great delight with. She also loves the ball. It seems to her something more alive.

In the busy work she uses the Busy Work tiles, both with pegs and balls. Distinguishes all the colors in the sticks and beads. Distinguishes the different forms but knows the name of the ball only. She takes her morning nap daily; and shows no reluctance now but crawls up into her little bed as

1897. sweetly, and unless disturbed will be asleep in five minutes.

Nov. Becker Nothing to report for August Becker this month

Blaeins Nicholas improves a little in the use of his hands all the while. He has learned att to fold the simple paper foldings knows each step but does not do it accurately.

Barret. Eddie folds the papers very correctly without tearing or rumpling them the slightest. Eddie begins to make an effort to sing and follows the motions of the songs showing more animation than he ever does in anything else

Belt. Jamie strings the beads and lays sticks by ones, twos, threes + fours. Makes the figure 4 following a copy In the lessons on the ball and cube she uses such sentences as, "I have a ball" "My ball is soft" or "My ball is hard" "See my large cube". "My cube has eight corners" (after counting the corners)

Columbus. No improvement in Christopher

Colwell

Patrick in the hospital during the entire month

De Fore

Adeline has been in school not more than half the time during the month
And no improvement

Emerson.

Elsie Emerson has overcome her timidity to some extent and makes some effort to talk. Can say "Sharpe" "beads", "ball" or "blocks". Articulation very poor.
Out of the twenty two school days in November, Elsie was present but fifteen of them.

Ellis

Roy Ellis works more accurately in the occupations and shows some improvement in neatness. During the month he has learned the simple foldings and has done some simple pricking, but it is not done well. This is partly due to poor eye sight I think.

Frolic.

George Frolic has been in school seventeen days during the month, but shows little improvement. If some one works with him he will seperate all the colors in the sticks, but he will not work intelligently unaided

Frober.

Ferdinand has been in school every day this month. Has learned to fold the simple designs, but not accurately. His pricking is very good and he has sewed one design in the Embroidery cards. He works rapidly and neatly.
Knows the names of ball and cube and stringe the balls & cubes by their colors and by ones, twos, threes & fours from dictation.
He takes a lively interest in the games; but makes little effort to talk.

Frettim

Emma Frettim is in school three hours and fifteen minutes each day for kindergarten work. Shows some improvement in the occupations. Is very quiet and ~~is~~ seldom speaks a word.

Fenn.

Rosie Fenn is in the kindergarten the entire day. In school but twelve days during the month. Is doing the same work as last month with no better results.

Gatzke

Polly has been absent but three days during the month. Is doing about the same work as last month but shows some improvement in neatness.
She certainly is overcoming to some extent her nervousness.

Grant

Roy Ashton Grout has been in school only ten days during November and shows no improvement

Hovorka.

Eddie is learning to apply himself more closely but does not work any more intelligently. Is not so distructive and can be made to keep his work on the table rather than scattered upon the floor.

Henderson

Isabelle has been in school seventeen days during the month but shows no improvement.

Herbert

Marion Herbert has been in School fifteen days this month. Has become more quiet and less excitable and shows more intelligence in his busy work. Distinguishes all the colors and knows the names of orange and purple. Marches in better time and takes an active part in the motion songs.

Jennings

Earl Jennings has one hour and forty five minutes each day in the school room and during November has been attended sixteen days. I find he has gained some strength in his arms by lying on the floor and pulling himself up into a sitting position with the rope It is an excellent exercise for his hands and arms and helps him in the use

1897 Nov.

of the different kinds of busy work. Earl distinguishes the colors red, orange, yellow and purple, and knows the names of red, orange and yellow.

Jackson

Hattie Jackson knows all the colors and strings beads and lays sticks by color and number to five. Counts to five and follows a copy of fours and threes. This month has learned what right & left, above & below is. And to make "standing up" "Laying down" and diagnal lines

Kenna

Otellia Kenna works a little more independently otherwise no improvement.

Kolkei

Enoch Kolkei is in the Kindergarten three hours and fifteen minutes each day.

Is now sewing the Embroidery outline cards, his work being neat and accurate

Maleny

Wilhelm Maleny has been in school but ten days this month. He can do so little that it seems scarcely worth while sending him for the one session, but he is made happier by coming and takes great delight rolling the ball and trying to pull himself up by the rope The exercise is good for him and perhaps will aid him in gaining control of his hands.

Miller

Margaret Miller has made no improvement this month.

Neaskern

Eddie Neaskern is doing little more than last month. Works a little more independently and shows more interest in whatever he does. Missed five days from school owing to the chicken pox.

O'Donald

Joseph O'Donald has learned during the month to lay sticks and string beads by numbers to five; to form "Standing up", "Laying down" and diagonal lines. Also learned right, left, above & below.

O'Reilby

Agnes has been in school twelve days during November and shows not the slightest improvement.

Riley

Albert Riley is in the Kindergarten ~~three~~ two hours & forty five minutes each day and has been regular in attendance during the month. He has had three spasms in the school room and altho' very light, they seem to be growing upon him.

Continues to improve in the occupations, working with accuracy and neatness.

Smith

Harry Smith continues about the same.

Smith

Lillian Smith comes to the Kindergarten each day at 11.20 for busy work, giving her two hours and thirty minutes in this department. During the month she has learned to do the simple paper foldings. In all her work she shows neatness and accuracy.

Swanstrom

Howard Swanstrom has been regular in attendance during the month, missing but two days from school, owing to sickness.

He will distinguish all the different colors in the colored sticks if some one sits by him, urging him on constantly.

If left alone he soon relapses into that dreamy state and seems almost unconscious of anything going on about him. Howard requires strictly individual work, but it is impossible to give him so much time here.

Schmidt

Alfred Schmidt is doing about the same in the occupations as last month, but handles his work with greater care, seldom tearing or soiling it in any way.

Theroux

No improvement in Joseph Theroux.

Vold. In the literary work Clara makes av progress as little. She counts to four and follows a copy of fours, understanding the name and value. Strings beads and lays sticks by color and number to five. Is doing about the same as last month in the recumpatives.

Washer Emma Washer is doing about the same as last month. She has been in the hospital for the past two days; and for some time has not seemed quite well, often complaining of her head hurting. I am sure her complaints were genuine for at three times was extremely nervous and irritable

Becker. August Becker. Regular in attendance during the month. No marked improvement in the school room, altho' his attendant reports him much improved in table manners and genral enduct. Not so willful and in his small way, learning to be useful in the care of the play-room.

Blasius Nicholas Blasius has been regular in attendance but this being a short month having but seventeen school days, together with the preparations for Christmas, little real work has been accomplished. Nicholas took great pleasure in sewing a card and having it converted into a needle book to send away to his another for Christmas

Barret Eddie Barret. Regular in attendance. Nothing special to report of his work in the kindergarten Mrs. Sanner will report his literary work.

Celt. Mamie Celt. has been in school the full seventeen days of this month with no particular improvement. Is doing the same work as last month

Columbus. Christopher continues just the same.

Colwell Patrick Colwell has been in the hospital the entire month.

Before Adeline is in the hospital

Emerson

Elsie Emerson seems less timid and makes greater efforts to talk. Speaks any name plainly and tries to say many other things but her efforts result in only a jumble of words. Shows some interest in the songs and games but does not take an active part.

Ellis.

Roy Ellis, during December has been regular in attendance, but in his kindergarten work, shows no special improvement. He has his literary work with Mrs. Tanner.

Frolic

George Frolic applies himself to the extent that he can string beads or sew the peg holes with out constant attention. While he is able to distinguish most of the colors, he will not do it unaided. He is a heedless aimless sort of a child, but any action on the part of another child does not escape him. He is the first to observe and report.

Frober.

Ferdinand Frober. Regular in attendance
No special improvement

Frettem

Emma Frettem has been regular in attendance during the month and is doing about the same work as last month in the Kindergarten. Mrs. Tanner will report her literary work.

Dec. 1897.

Fenn.

Rosie Fenn has been in school twelve days only, this month. Continues about the same.

Gatzke.

Polly has been regular in attendance having been in school every day during the month. This is unusual for her. She is overcoming her nervous timidity to a large extent, but any undue excitement will bring it on again. She has good control of her hands now and pricks and sews without any difficulty. Can thread a large needle.

Grout

Roy Ashton Grout. Regular in attendance but no marked improvement except that he will march in line.

Hoovrka

Eddie Hoovrka. Attendance regular. More quiet and less destructive but no other improvement.

Henderson

Isabelle Henderson in the hospital the entire month.

Herbert.

Marion Herbert. Attendance regular. Knows the names of four colors, red, orange, purple and yellow. Can do nothing in the occupations. Is too nervous to apply himself or closely. He is in constant motion

Dec. 1897.

Jennings

Earl Jennings. In the hospital the entire month.

Jackson.

Hattie Jackson. Regular in attendance. Makes little progress in the occupations. Is neither accurate or neat. A very disagreeable child and always unhappy. She shows some affection for her attendant and teacher but is always antagonizing the children.

Kimmel

Ottelia Kimmel. During December has been regular in attendance. No improvement.

Kolbei.

Enoch Kolbei. attendance regular. In the Kindergarten continues about the same. Mrs. Sanner will report his literary work.

Matern.

Wilhelm Materns has been in the hospital all month.

Miller

Warant Miller. In school fifteen days this month. Shows some improvement in application. Distinguishes the different colors but does not know their names. Will do nothing unaided.

Dec. 1897.

Measkern

Eddie Measkern. Knows the colors, orange red, yellow, blue, green & purple. Lays sticks, and strings beads from dictation by color and number to five. Knows right and left.

O'Donald

Joseph O'Donald. Doing nothing more than last month.

O'Reilly

Agnes O'Reilly. No improvement

Riley

Albert Riley does not show the life and animation that he did when first entering this department. It must be the effect of his spasms. Some days he is very heedless, and must be told a thing several times before being sufficiently impressed. Continues about the same in the kindergarten work.

Smith

Harry Smith is one of the most annoying children in the school room. Will get out of his chair and cross the room for the express purpose of tipping over a vacant chair. Think he hears the noise. I almost agree with Miss McKibbon in thinking he hears more than we suppose. Often when standing behind him if I speak his name he will turn around, not looking at me, tho', for he never looks at any body.

It is impossible to catch his eye even for the shortest time.

He amuses himself with string beads

Dec. 1897. assorting the colored sticks and using the peg and bead tiles. He works rather industriously and rapidly.

Smith

Lillian Smith comes to me at 11.20 in the morning, but my time is so much occupied that I have little time to give her. Consequently she is not making the progress she might. There is no other place than the kindergarten for industrial work. She is too small and her hands too stiff and clumsy to do any thing in the sewing room. She has learned to thread her needle and to sew the simplest pricked sewing cards. Works with accuracy and neatness.

Swanstrom

Nr improvement in Howard Swanstrom.

Schmidt Alfred Schmidt continues about the same.

Thorup Joseph Thorup. Nr improvement, and requires the constant attention of one person.

Vold. Clara Vold works a little in advance all the while of the class she is in and has to be come to a stand still sometimes, as she is doing now, waiting for the others to work up. and there is no time to give her individual work.

Washer. Emma Washer continues to improve in her speech. Uses such sentences as "Mamie bad girl" "Baby good girl" (Meaning herself) "My ball", "My gum". "Bye Mamma". The words Sharpe, boy broom, beads, she pronounces very distinctly.

Brown. Margaret Brown Returned December 6th and was in school three days when sent to the hospital, not returning again until the day before Christmas. No noticable improvement during her stay at home.

Jan. 1898

Becker. August Becker. Regular in attendance during the month. Distinguishes and knows names of all the colors. Lays sticks and strings beads by color, and number to five working from dictation

Blasius Nicholas Blasius. Regular in attendance Weaving from dictation by ones, twos, + threes. Works with some difficulty owing to his unsteady hands, but this exercise helps him wonderfully in controling his hands.

Barret. Edward Barret. Regular in attendance Weaves by ones, twos + threes, from dictation. Works with ease and neatness.

Broom. Margaret Broom. Regular in attendance since Jan. 1st. Distinguishes all the colors and knows the names of red, orange and purple. Lays sticks and strings beads by number to four working from dictation. Has sewed two of the simple pricked sewing cards Does not sing at all but marches in fairly good time and takes a lively interest in the games and other exercises on the circle.

Birch Annie Birch. Entered the kindergarten the thirteenth of January. She is seven years old. Has brown hair and eyes, and hears and sees well. No peculiarity in eye or shape of head, and no bodily deformity. No peculiarity of walk.

Can understand and speake the Swede language, but speaks little English. Understands and obeys simple commands

Reported as excitable and nervous but has shown no signs of either in school. Is very quiet but shows much interest in her surroundings

She is reported as being passionate and noisy, but so far seems very quiet and has had no outbursts of passion that I know of. Seems very frank and truthful, and not destructive of playthings.

Reported as being fond of children but they rather seem to annoy her.

Power of attention and observation good. Active and fond of play. Cannot read or write and knew nothing of color or form when entering the school. Now distinguishes all the colors but does not know their names.

Attentive to the calls of nature and always very neat.

Jan. 1898.

Celt.

Mamie Celt. Regular in attendance Can now sew the simple pricked sewing cards quite independently, without tearing them. With the bead tiles she has learned to lay them on the right, left, up or down sides, as dictated. She is constantly picking up sayings of other children or people in the house. A short time ago upon entering the schoolroom her voice pealed forth with the command "Children, be still; stop that noise. I am almost crazy".

Columbus.

No improvement in Christopher Columbus.

Colwell.

Patrick Colwell. In the hospital.

Defore

Adeline Defore. In the hospital.

Emerson

Elsie Emerson. No improvement. Has been regular in attendance. The last few days has not seemed quite well.

Ellis

Roy Ellis. Regular in attendance. During the month has been weaving from dictation by ones, twos and threes.

Jan. 1898.

Frolic.

George Frolic. Regular in attendance during the month, but no improvement.

Fro-ber.

Ferdinand Frober. In the hospital fifteen days during the month, from Jan 5th to Jan. 20. Doing about the same as last month

Frettem

Emma Frettem. Regular in attendance Weaving from dictation by ones, twos and threes. Works with neatness and accuracy.

Fenn.

Rosie Fenn. Regular in attendance Lays sticks and strings beads by color and number to five; but she does not do it understanding by. This is in concert work, dictated but she imitates the other children. She is so quick about it and apparently is not watching the work of the others. So There is really no improvement

Grant.

Roy Ashton Grant. In the hospital since Jan. 14th No improvement.

Hoorka

Eddie Hoorka. Regular in attendance but no improvement.

Jan. 1898

Henderson.

Isabelle Henderson. Regular in attendance. Has learned to throw and catch a ball. Strings the beads by form and separates the colored sticks without assistance.

Herbert.

Marion Herbert. Regular in attendance during the month. Recognizes all the colors and knows the names of each. One day he will be able to string beads or lay sticks by ammber to four but more than likely will have forgotten it by the next. Has become quite an expert at throwing and catching the ball.

Jennings.

Earl Jennings. In the hospital.

Jackson.

Hattie Jackson. Continues about the same.

Kenna.

Attelia Kenna. In the hospital the past week. No improvement in school work. Knows Miss Baker when she visited her in the hospital, called her by name and began to cry.

Kolbei.

Enoch Kolbei has been in school nineteen days this month. Is weaving with a class of eight from dictation by rote two + three, but follows their Childrens work rather than from dictation. Extreme deafness accounts for this. He reads lips quite readily but in this work it is hard to do both.

Jan. 1898.

Mahring

Wilhelmina Mahring. In the hospital.

Miller.

Margaret Miller. In school eighteen days No improvement.

Measkern

Eddie Measkern Uses bead tiles, laying beads, right, left, above + below and forming diagonal lines as dictated. Counts to five. Shows some improvement in sewing the pricked cards; working with more care and neatness.

O'Donald

Joseph O'Donald. In school nineteen days but find little change. Does not seem to be able to do anything in the card sewing on account of using but the one hand. His ~~left~~ right hand is altogether helpless.

O'Reilly.

Agnes O'Reilly. Not the least improvement.

Riley.

Albert Riley. Regular in attendance during the month. Has spasms more frequently than when first entering the school and, altho' light, he begins to show the effect of them; he appears to be growing a little careless and absent minded. and displays a slight tendency to antagonize.

In the weaving he is working by rote two and three from dictation.

Jan. 1898.

Smith

Harry Smith. Recognizes all the colors. Can hear and knows his own name when spoken, but apparently does not know the names of the other children and does not understand the simplest command unless given him by signs. We have thought him deaf so long that he knows commands given in ~~our~~ other way.

Smith

Lillian Smith. Some improvement in neatness and accuracy in the card sewing. Threads her needle with difficulty. She has a fashion of looking over the top of her glasses and I have wondered if they did not fit her eyes and needed the a different glass.

Swanstrom

Howard Swanstrom: Doing about the same as last month.

Schmidt

Alfred Schmidt. Doing nothing new, but shows some improvement in neatness and rapidity in the sewing.

One day, when told I was going to a party one of the children asked if it was out to Cannon Lake. Alfred very promptly replied "No, course not, Miss Baker isn't here. We can't go out to the lake without Miss Baker. You children wait till next Summa when Miss Baker comes home, then she'll take us out to the lake for a picnic!"

When Miss Baker came a few days later he grew almost hysterical, he was so glad to see her.

Sherman.

Joseph Sherman. No improvement.

Vold.

Clara Vold. Regular in attendance. Can name all the colors, Say beads in the bead tiles from dictation, right, left, above, below and diagonally. knows her right + left hand. Counts to four. Doing about the same in the occupations.

Washer.

Emma Washer. In school fifteen days during the month. Is doing the simplest pricked card sewing, but works quite independently, without tearing her card. Cannot thread her needle yet.

Catches and throws a ball fairly well.

Yatzke

Polly Yatzke. In school thirteen days. Weaving by ones, twos + threes from dictation. The control she has gained over her hands is quite wonderful I think. And this is such frail work and easily torn.

Feb. 1898

Becker. August forms the figures 1, 3, 4. Knows names and values of each. Counts to five. Tries to sing but his tones are most discordant. However he is encouraged in his efforts and perhaps will learn to sing. Sometimes when humming to himself he will catch just a strain of some familiar song.

Blasius Nicholas has done his first paper cutting and pasting during the past month. This is the most difficult of all the occupations, but the first efforts were not discouraging. He follows each step as dictated in the folding and cutting and is fairly accurate, but, in pasting he is not neat. His hands are so unsteady, that to do this work he has to exert every effort and it sometimes seems too much for him to undertake; but he wants to do it and is so unhappy when not allowed to. Just so in the drawing; he follows each step but his lines are not accurate.

Barrel- Eddie is doing the same work as Nicholas but very much more correct. He is very neat in all the occupations.

Mrs. Tanner has had some trouble with Eddie in tearing his clothes and destroying work, but he is all that could be desired in the kindergarten. He is a very strange child and few understand him. He will never push himself forward in any way and is not an attractive child; but he is jealous of and wants some of the attention given to more fortunate children

Feb. 1898

Brown. Margaret is doing about the same as last month. Owing to trouble with her eyes she is in the hospital now and has been for several days.

Burch Annie has learned the names of red, orange and yellow. Counts to ten but not intelligently and has no idea of the value of numbers above two. Strings beads by color and form. Sews the simple pricked sewing cards and now works rather independently. Is taking up the English quite readily. Speaks the names of all the children in the school room. Also can name the different kinds of busy work and some of the occupations and speaks them very distinctly, but they do not lose the Swedish accent of the Swedish language.

Celt. Mamie continues about the same. She has learned to form the figure four, but is just as apt to call it three or one. Counts to four, inclusive, and understands their values.

Columbus. No improvement in Christopher.

Colwell. Patrick still in the hospital.

DeLoe Adeline, too, in the hospital.

Feb. 1898.

Emerson. Elsie Emerson is about the same. A very disagreeable child and shows so little intelligence that there is little to hope for.

Ellis. Roy is doing a little better in the occupations working with more accuracy and neatness. In the paper cutting, and drawing he does fairly well. Follows the work he dictated, but does not show as much care as could be desired. He is inclined to be careless in everything.

Frolic. George. No improvement.

Frober. Ferdinand forms the figures 1-2-3-4 and understands their values. While his hearing is not perfect, I think he pretends to be more deaf than he really is. Sometimes he seems to hear without any difficulty, and again he apparently hears nothing. In the mat weaving he works from dictation, weaving by mix, two & three. Does fairly well in the paper cutting & pasting. He enjoys the occupations and I should think might do good work in the Sloyd department.

Uses the pencil well, drawing figures with the "laying down" and "standing up" lines; regulating length of lines by the squares on the paper as ~~regulated~~ dictated.

Feb. 1898

Frettem. Emma folds papers for cutting and pasts rather neatly. ~~Forms~~ Draws figures with the "laying down" and "standing up" lines moving to the right, left, up or down as dictated. Length of line regulated by number of squares on the paper.

Very quiet and seldom talks. Understands all commands.

Fenn. Rosie has formed the figures 1-3-4, but does not understand the values. She makes a great effort to sing, but the sounds are rather painful. Always very happy and full of affection.

Gatzke. Polly has just passed her sixth birthday but has such an old manner that she seems much older. Owing to her nervousness she is unable to do the paper cutting and pasting neatly or accurately. But applying herself in this way seems to benefit her rather than harm as was feared by some. She has to be kept busy in some way. Whenever she feels inclined to sleep she is allowed to do so, but seldom wants to. Very talkative and restless. Memory better than a year ago and able to repeat short stories told her.

Feb. 1896

Grout	Roy recognizes the ball, cylinder and cube; also the colors red, orange, yellow and purple. Has learned to catch and throw a ball fairly well. Is not an active child. Does not attend school regularly.
Hovorka	Eddie recognizes the ball cylinder and cube; also the colors red orange and yellow. Is talking more and more distinctly. One day said "Shame! Harry bad boy." Applies himself better and not so distructive.
Henderson	No improvement in Isabelle Henderson
Herbert	Marion recognizes all the colors and can name each. Likes the busy work only. As yet does nothing in the occupations. Still very restless but has gained some control, and does not jump when the slightest thing happens to excite him as he used to. He should be kept as quiet as possible and yet not restrained too much.
Jennings	Earl not in school during the entire month
Jackson	Hattie continues about the same.

Feb. 1898

Kemna	Attelia distinguishes the different colors and forms, but does not know them by their names except the ball. Is beginning to throw and catch a ball. Very awkward in all her movements. Talkes a little more, using short sentences. Last Monday when I was ill and out of school Attelia said in the play room, "Poor Miss Sharpe sick, in the hospita"
Kolbe.	Enoch continues about the same. Has done something in the paper cutting and pasting and does fairly well. Think perhaps there is slight improvement in his speech.
Matzny	Wilhelm in the hospital.
Miller,	Margaret is in the hospital and has been there for the past week. Can see no improvement during the month.
Meskers.	Eddie forms the figures 1 – 3 – 4 and understands the values of each. Can name all the colors. Pricks the dotted paper very accurately and improves gradually in the sewing
O'Donald	Joseph is still unable to do any of the occupations With his one hand he is able to string the beads almost as rapidly as any of the other children but he cannot manage the sewing, weaving, or folding. He is always very happy and well, though he seems so frail Knows the numbers 1 – 3 – 4 and understands their values but cannot make the figures.

Feb. 1898

Riley — Albert's cutting and pasting is quite well done. Works rapidly and neatly. In drawing shows care and accuracy. Draws only the simplest figures using horizontal and perpendicular lines, but he follows the dictation closely. During the month committed to memory a short recitation for Washington's birthday. Spoke clearly and with much expression.

Smith — Harry shows some improvement in application. No longer grits his teeth together or makes that disagreeable sound. Cleanly in his habits now.

Smith — Lillian Smith is developing a voice and takes great pleasure in the Kindergarten songs, joining in the singing. Continues the sewing, but can do nothing in the weaving. Very quiet and gentle.

Swanstrom — Howard is about the same.

Schmidt — Alfred is doing about the same work but shows improvement in neatness and care of his work. Has been regular in attendance and seems always happy and good natured.

Theroux — No improvement in Joseph Theroux.

Feb. 1898

Cold. — Clara forms the figures 1-3-4 but cannot always tell their names and often confuses their values.
It seems a pity that Clara cannot have braces for her legs. She would surely be able to walk straight if she had them.

Washer. — Emma distinguishes all the colors and knows the name of each. Speaks more plainly and says a number of new words; the words cake, cracker, cookie, candy, she has learned from being bribed.
Tuesday night when putting the girls to bed after the reading club, I found little Emma sitting up in her bed wide awake and she had been in bed since 6.30. I think she finds it hard to sleep sometimes.

Langdon — Sarah Langdon returned Feb. 17th.
She is as excitable and nervous as when she went home last Summer but does not seem to have lost anything the training here had done for her.
She remembered many of the children calling them by name. When sent to the Principal's office she looked around and said "Where's Miss Baker, where's Miss Baker".

Feb. 1898

Ernest

Frankie Ernest entered the Kindergarten Jan. 31st and has been regular in attendance since. Too much of a baby to be in the school room all day; grows tired and peevish and is so dependent upon some one to amuse him. Very inactive and does not busy himself intelligently. Will sometimes stick pegs in the peg boards, but seems a great effort. Cannot string beads, but enjoys the blocks. Can distinguish the colors red, orange + yellow. But does not know them by their names.

March. 1898

Becker.

August Becker. Out of school but one day during the month, owing to sickness. Talks more than a month ago but only those who are closely associated with him can understand what he says. Occasionally he will hum the tune to some familiar song, and the latest is "Hot time in Old town." As soon as he becomes conscious of some one listening to him, he stops immediately.

Blasius

Nicholas Blasius. Regular in attendance during the month but nothing to make note of in the way of improvement.

Barret.

Eddie Barret. Has learned to use the scissors neatly, following the outline of pictures carefully, afterwards pasting them in a scrap book. Has made of one Easter card and started another.
Regular in attendance during the month.

Brown

Margaret is not down from the hospital yet where she has been the entire month.

Birch

Annie distinguishes the colors, red, orange yellow + purple, green + blue, but knows the names of the first four only. Blue + green confuse her. Can name such parts of the body as, head, ear, eye, nose, mouth, neck, arm, hand, fingers, leg, foot, toes. Has been regular in attendance during the month.

March 1898

Celt. Maurice Celt applies hirself more closely perhaps and is able to concentrate hirs mind on one thing for a longer time than a month a go, as some of her occupations show. When given a piece of paper 6 x 10 inches, ruled in ½ inch squares she pricked with a needle, the point where each line crossed. After the first two lines she needed no direction, and worked diligently until the entire surface was pricked with holes. It was not all accurately done, but she got the idea.

Columbus. Christopher has been regular in attendance but no improvement.

Colwell Patrick has been transferred to the cripple grade in Miss Stevenson's department, I believe, but do not know if he will be sent to school again or not.

De Fore Adeline is in the hospital.

Emerson Elsie Emerson has been in school fourteen days this month. Can see no improvement.

March 1898

Ellis. Roy Ellis. Regular in attendance. Learning to use the scissors, following the outline of pictures, or figures drawn by himself fairly well. Roy is not accurate in any of his industrial work, owing, no doubt, to defective eye sight.

Ernest Frankie has been regular in attendance, and perhaps shows slight improvement in application. Will sometimes stick pegs in the board, rather than scattering them on the floor. The blocks he enjoys for the noise they make on the table, rather than for building purposes.
He has learned to march in line, but shows no idea of time.

Frolic. Georgie Frolic. Continues about the same. Requires individual work, and a sufficient amount of it cannot be given him owing to the crowded condition of the kindergarten

Frober. Ferdinand will never do much in library work I fear, but in the industrial department he will do well at whatever he undertakes.
This month, for busy work, he has used the scissors much of the time and now follows the outline of pictures taken from seed and other catalogues; afterwards pasting them into a scrap book. Both the cutting and pasting neatly done. Has been regular in attendance during the month. Should think he might do well in the art work

March 1898

Prettem.	Emma has been absent from school two days, due to illness. Some improvement in using the scissors, now cutting out pictures with simple outlines, quite neatly.
Penn.	Rosie Penn absent two days owing to sickness I believe. No improvement this month.
Gatzke	Polly Gatzke has been regular in attendance during the month. Uses the scissors with more skill, cutting out pictures with simple outlines, or figures drawn by herself. Her cutting shows her nervousness more than any of the occupations or busy work. Yet we can see steady improvement this slow. Polly made some activity outside of school hours instead of being so much repressed.
Grout.	Roy Grout was in school the first six days of March, but has been in the hospital since that time.
Hovorka	Eddie Hovorka has been regular in attendance and learned to distinguish the color purple from the other colors.

March 1898

Henderson	Isabelle continues about the same.
Herbert.	Marion has been absent one day from school, due to sickness. Not so excitable I think, yet very restless. Otherwise no improvement.
Jennings.	Earl still in the hospital.
Jackson	Hattie Jackson. Regular in attendance. Reads, writes, and understands the values of the following numbers:- 1-2-3-4.
Kemna.	Otelia Kemna. Regular in attendance. Otelia is of a domestic turn of mind. She aspires to sweeping and washing dishes principally. Will sometimes carry some tin dishes from the play room to the school room, and beg for a cracker or cookie to have a party with. She always generously divides with the other children at her table, and never seems so happy as at such times.
Kolbei.	Enoch Kolbei. Regular in attendance. Has learned to cut out pictures of simple outlines with the scissors, and does it very neatly. He one realizes the necessity of the use of the scissors freely as Miss Mc. Carthy does. She says few children coming into the sewing room can cut on a straight line and many cannot even hold them properly.

March. 1898

Langdon — Sarah Langdon. Regular in attendance No improvement.

Maternay — Wilhelm Maternay in the hospital.

Miller — Margaret Miller continues about the same.

Neaskern — Eddie Neaskern has been regular in attendance during the month, but has not seemed quite well; often complaining of head aches. Doing about the same as last month in the occupations. In the pricking does fairly well, working steadily and quite accurately. Forms the figures 1-2-3-4.

O'Donald — Joseph O'Donald regular in attendance. No improvement in the occupations and can not be induced to make any effort Having the use of but one hand he is at a disadvantage but he seems to have no ambition in that line. He has learned to know the figures 1-2-3-4-5 and their values, but can not form them.

Riley. — Albert Riley has been absent one day during the month. Has been using the scissors freely this month and can now follow the outlines of pictures very neatly, afterward pasting them in his scrap book. Is doing about the same in the other occupations.

March 1898

Smith — Harry Smith has been absent two days owing to sickness. When walking Harry never lifts his feet from the floor but slips them along from one step to the next. Miss McKibbon is attempting to break him of this manner of walking and has partly succeeded, for when urged he will pick up his feet quite nicely. Otherwise no improvement in the school-room.

Smith — Lilian Smith. Regular in attendance. During the month has pricked and sewed her first Outline Embroidery card. It is neatly and accurately done and she seems very proud of her efforts. She is doing so well that I think another year she might be able to do quite a little with her needle in the sewing-room

Swanstrom — Howard Swanstrom has been absent two days from school.
Can see no improvement during the month.

Schmidt. — Alfred Schmidt. Absent from school two days in March. Has pricked his first Outline Embroidery card and is ready to sew it the first day of April. Alfred applies himself so much better than six months ago.

Thernes — Joseph Theraux. No improvement.

March 1898

Vold. Clara Vold. Regular in attendance She took up the pricking this month but ~~dr~~ not dr it correctly. I think if her eyes were examined, that we would find that her sight is not good, and the cause of her poor work in this grade, for she seems capable of better work.

Washer. Emma Washer. Absent two days from school, owing to stomach trouble caused, it was thought, by eating a part of a ~~piece of~~ ginger cookie occasionally in the school-room. It would seem that the gum she swallows might be the real cause, however; it is not believed to be easily digested I believe. Talking more each day and articulates better.

Anderson. Arthur Anderson entered the kindergarten March first. Five years old but rather large for his age. Strong of body and limbs well developed. Well shaped head and no peculiarities of features. Brown hair and eyes and fair skin. Sees and hears well. Understands and speaks the English language. Articulates well. He can mean or disagreeable traits but brimful of mischief, which he conceals the most demure expression.

When his mother left him he expressed not the slightest regret at being left, and displayed no affection toward her whatever. Now he shows the strongest affection for both the children and persons having the care of him.

March. 1898. Seldom speakes of home, but sometimes mentions his "Pa". Says his "Pa" has gone to Klondyke. One day when he slipped and fell down several steps, he looked up in the best natured way and said "Whoop! There I go to Klondyke".

Knew nothing of color or form. Could not distinguish one color from another. Could throw a ball fairly well but not catch one. Could neither march in line or in time.

Has been in school just one month. Now marches and claps in good time, and seems fond of music, but makes no attempt to sing. Distinguishes the colors red, orange, yellow, blue, green, purple, but does not know their names. Strings beads by their forms + colors. Knows the names of the ball only. Sews the simplest pricked sewing cards, but not without some assistance.

Mc. Carney. Milford Mc. Carney entered the Kindergarten the twenty second day of March and has been regular in attendance since that time. Mrs. Tanner has a full report of him so it will be unnecessary to re-write it. Milford has been placed in the kindergarten for one session, from 10.30 to 12.15 A. M.

Being so very deaf makes it impossible for him to work in concert from dictation, but ~~works~~ weaves from copies and folds, cuts and mounts papers as directed individually. Works rapidly and neatly. Sews neatly. Has learned to dance one quadrille and the Two Step with some one to guide him.

April 1898.

Anderson. Arthur Anderson has been absent but one day during the month. No improvement in his school work.

Becker. August Becker in school eleven days in april. In the hospital with measles. No improvement.

Blasius Nicholas Blasius in school sixteen days. Sent to the hospital with measles the twenty fifth of April. No improvement.

Barret Eddie Barret. absent one day during the month. Folds papers accurately for cutting but cannot mark them. Mounts them very neatly

Brown Margaret Brown in the hospital the entire month

Birch Annie Birch in school only six days this month.

Celt. Minnie Celt sent to the hospital April twenty-fifth. Up to that time regular in attendance Has learned to weave the simplest mat, by mee, and works quite independently and shows the greatest patience and perseverence.

April 1898.

Columbus Christopher Columbus has regular in attendance up to april twenty sixth when he was sent to the hospital. No improvement.

Colwell. Patrick is not reported anymore but is in the hospital I presume.

De Tore. I believe Adeline has been transferred.

Emerson Elsie Emerson has been absent the entire month.

Ellis, Roy Ellis in school regularly until April nineteenth when he went to the hospital with the measles.
Folds and cuts papers after being marked and mounts on cardboard fairly well.

Ernest. Frankie Ernest. Regular in attendance until april twenty fifth when he went to the hospital
Has learned to distinguish the colors red. orange yellow purple, green and blue but cannot or will not work independently. Recognizes the forms (cube, cylinder, & balls) and brings them quite independently

April 1898.

Frolic — George Frolic in school. Thirteen days this month. In the hospital at present with the measles. No improvement.

Frober — Ferdinand Frober. Regular in attendance. Folds papers for cutting, and when marked cuts and mounts them neatly. Has had only four of the simplest designs. Works alone independently in the sewing and weaving.

Frettem. — Emma Frettem. Regular in attendance during the month. Has had the first four designs in the paper cuttings but does not fold accurately. Mounts fairly well. It is very difficult for the children to use the mucilage with out getting their fingers stuck up with it, but Emma handles her brush rather daintily

Fenn. — Rosie Fenn. Regular in attendance until April 25th, when she was sent to the hospital with the measles.
~~In~~ During the early part of the month Rosie was given a square mat with strips ½ in. wide and after being shown how to thread the middle and put the first strip in, she worked right along unaided. The second mat the same as the first, but she worked more rapidly

April 1898.

Gatzke — Polly Gatzke. In school fourteen days in April. In the way of new work Polly has undertaken the paper cuttings, cutting and mounting the first four designs. Does not work accurately, neither cutting or pasting just on a line. On a single piece of paper she follows the line very well, but where there are a number of thicknesses, as in the paper cuttings she lets some of them slip making the edges ragged and uneven.

Hoonka — Eddie Hoonka. Sent to hospital April 25th with the measles. Up to that time regular in attendance. Does not show much interest in the ~~no~~ the occupations in the busy work but in the games takes a lively part; particularly the games "Riding the Ball" and "Chasing the Squirrel".

Henderson — Isabelle Henderson. Regular in attendance during the month. No improvement.

Herbert — Marion Herbert. Sent to the hospital April 22nd. No improvement in school work.

April 1898

Jennings — Earl Jennings has not yet returned to the Kindergarten.

Jackson — Hattie Jackson. Regular in attendance Weaving by rows only. Works rapidly and neatly. Has learned to write the figure 5. Knows its name and value. Is growing less annoying to the other children and sometimes shows strong affection for the little ones.

Kemna — Otellia Kemna. Sent to the hospital with the measles April 25th. Up to that time regular in attendance. No improvement

Kolbee — Enoch Kolbee has not been in school since April 12th. No improvement

Langdon — Sarah Langdon. Absent from school since April 22nd. Can see no improvement

Mallery — Wilhelm Mallery has not yet returned to school.

April 1898

Miller — Margaret Miller. Has been in school every day this month. Has learned to distinguish the forms, ball, cube & cylinder, and in stringing the colored beads will seperate them. Recognizes the different colors but not yet know them by their names. Some improvement in application and not so restless

Mc. Carney — Milford Mc. Carney has not been in school since April 18th. The Kindergarten affords only amusement and occupation for him since he is so far in advance of any of the other children. But he enjoys the one session and seems very happy. Takes the liveliest interest in the games and other circle exercises.

Neaskern — Eddie Neaskern. Sent to the hospital april 22nd. Up to that time regular in attendance but for a week or ten days before complained and often cried with headache. Much of the time in school he was allowed to rest on the lounge. Has learned to form the figure five, also its name and value.

Can do the simple weaving, over one & under one, threading his needle and working quite independently.

April 1898.

O'Donald. Joseph O'Donald. In school but seven days this month. No improvement.

Riley. Albert Riley. Absent but one day this month. Has learned to fold the paper for cutting; after being marked he cuts and mounts rather neatly. Has done the first four figures only. Julia has taught Albert, with others, to dance one quadrille. He dances with the same amount of energy that he does every other thing and enjoys it hugely. And aspires to dancing Tuesday nights.

Smith. Harry Smith. Regular in attendance during the month. Can sew the pricked sewing cards in the simplest designs, and weave under one & over one; has some difficulty in threading the needle but weave it through the mat quite independently. Has done but the one mat.

Smith. Lillian Smith. Regular in attendance Has gone from the pricked sewing cards to the outline embroidery cards of the simple designs. Pricks and sews them quite neatly.

Lillian does not work accurately owing to defective sight and as evidently her glasses do not fit her eyes for close work.

April 1898

Swanstrom. Howard Swanstrom. In school but five days No improvement

Schmidt. Alfred Schmidt. Regular in attendance. Has pricked and sewed two outline embroidery cards. Both quite neatly done.

Throop. Joseph Throop. Regular in attendance. No improvement!

Vold. Clara Vold. Absent four days in April owing to measles. During the month has had the simple weaving, over one and under one. Threads the needle and works quite independently. Forms the figures 1-2-3-4-5. Cannot seem to remember their names but if told to pick up sticks any where from one to six, she will count them correctly. Improving in her speech all the while, speaking her words very distinctly now.

Always in a bright and happy mood but fond of teasing other children

April 1898

Wacker. Emma Wacker. Regular in attendance
Sews the simple pricked sewing cards, strings paper and straws, alternating.
The last of the month was given her first weaving; learned to thread the needle and weave over one, under one, through the mat, after some one put the needle through the first - two or three stripe.

May
June 1898

Becker. August Becker recognizes and names the colors red, orange, yellow, purple, green and blue. Also the forms cube, cylinder and ball
Counts and understands the value of numbers to five.
Sews three of the Pricked Sewing Card designs independently. Writes the figures 1-3-4
Strings straws alternating with small paper squares or circles.
Strings beads and lays sticks by color and number to five. Weaves the simple weaving, over one, under one.
Hums the tunes to several Kindergarten songs and some popular March or two-step.
Some improvement in speech. Saying or trying to say almost everything and many words he speaks quite dictinctly
He is very fond of pretty clothes and a new collar or tie makes him happier than any toy or plaything.

Blasius. Nicholas Blasius. In the Kindergarten work he has not improved much. Weaves from dictation by ones, twos, threes + fours.

Sews the Pricked Sewing cards and Arthur Embroidery cards. Folds papers through the first sequences but not accurately. Pastes paper chains, but cannot do the paper cutting.

Mrs. Tanner will report his literary work. Marches in good time and sings a little. Throws and catches a ball well and enjoys the circle games and exercises.

Barret. Eddie Barret. Is in the Kindergarten the second and third sessions.

Weaves from dictation by ones twos, threes and fours. Sews all the designs in the Pricked Sewing Cards. Also the Arthur Emb. Cards. Folds and cuts papers for pasting working accurately and neatly.

Little if any improvement in articulation. Talks very little and then expresses himself in the briefest way.

Shows much interest in the games and makes an effort to sing. Very quiet but inclined to be a little sly. Has overcome the habit of tearing his clothes as he did formerly.

Tett. Mamie Tett. Much improvement in speech, expressing her self in good English, using full sentences. Memory very good; committing words to songs very readily.

Knows all the colors; stringing beads and laying sticks by color and number to five. Counts to ten, but knows the value of numbers to five only. Writes the figures 1 – 3 – 4.

With the bead tiles forms "standing up" "laying down" and laying down lines; also diagonal lines: Knows right and left, up and down, behind, in front, long and short high and low. Knows names of ball, cube and cylinder

Weaves over one, under one, working independently, without having the book

Sews the simple pricked sewing cards working rapidly and quite neatly

Strings papers alternating with the paper squares or circles. Uses scissors in cutting paper but cannot follow the outline of a picture with them

Takes an active part in the games and songs. The ball games especially delight her

Columbus. Christopher Columbus. No improvement during the entire year.

DeFoe. Adeline DeFoe. In school only a short time during the early fall. No report to make.

Ellis. Roy Ellis. In the kindergarten work. Roy has improved in neatness and accuracy. Folds papers through the first sequences, but not accurately In the paper cutting he folds and cuts according to lines but does not measure neatly. In all such work he does not work exactly, but this due to defective eyesight, no doubt.

Weaves by one, two, three and four, from dictation. Uses scissors fairly well, following outlines of pictures and figures drawn by himself. Sews the pricked sewing cards and some of the more simple outline emb. cards.

Pasts paper chains and strings straws and papers.

Mrs Tanner will report the literary work.

Frolic. George Frolic. Distinguishes the ball, cube and cylinder. knows the name of the ball only. and throws, catches, and rolls a ball well. Distinguishes the colors, red, orange, yellow, purple, green and blue, in the colored sticks and beads; but will not match the colors when working independently. knows the names of red and yellow only.

Builds with the blocks and uses the peg boards as busy work, but shows little intelligence in the use of them.

Very talkative and articulation fairly good, but enunciation poor, talking in a low mumbling sort of a way.

Very quick to observe any unusual occurrence in the school room or even a change of dress of either children or teacher.

Frorber.

Ferdinand Frorber. Counts, writes and reads numbers to five.

Recognizes and names, all the colors.

Strings beads, lays sticks both by colors and numbers to five. Weaves mats from dictation by nine, two, three and four. Sews both pricked and outline Emb. Cards, working independently and neatly. Uses scissors nicely, cutting out pictures from seed and other catalogues

Follows the steps in paper folding quite accurately through the first sequence.

Folds papers for cutting and pastes neatly

Is said to be very handy in the use of tools and, I should think, might do good work in the Sloyd.

Would suggest giving him not work another year.

Marches in good time and takes a lively interest in the Kindergarten games, especially any exercises with the ball.

Does not sing at all and no improvement in speech.

Fruttem.

Emma Fruttem. Distinguishes and names all the colors. Weaves from dictation by nine, two, three and four. Folds papers through the first sequence, but not accurately.

Folds papers for cutting and mounts quite neatly. Uses scissors with some skill, following the outlines of pictures, afterward pasting in scrap books. Pricks and sews the more simple outline Emb. Cards. also the Pricked sewing cards.

Pasts the paper chains and strings shapes alternated with square or circular pieces of papers.

Marches in good time and has learned to dance one simple quadrille.

Sings one of the Kindergarten songs, a very simple little tune; And sings snatches of other songs.

Takes a lively interest in all of the circle games and exercises. She is inclined to be left handed, but uses her right hand just as well as the left.

Mrs Fanner will report her Literary work. as she goes to that grade the first session in the morning.

Fenn. Rosie Fenn. Distinguishes the different colors but does not know their names.
Strings beads and lays sticks by color and number to five, in concert work only; and she is so quick to imitate that one would suppose she was working from dictation; but she really has no idea of number. She is familiar with the names of ball, cube and cylinder and knows one from the other. Sews the simple pricked sewing cards; weaves over one, under one; strings straws alternating with small squares or circles of paper. Work neatly and very rapidly.
Has learned to dance one simple quadrille and marches in good time. Takes much delight in the Kindergarten games and exercises, but does not sing.
No improvement in speech.
Very quick in all her movements. Catches and throws a ball well.
Has not been in school since April 22 nd.

Anderson. Arthur Anderson. Distinguishes the different colors, but does not know their names. Also recognizes the ball, cube, and cylinder, and knows the name of the ball.
Strings straws and tapers; sews three of the simple designs in the pricked sewing cards; weaves the first design in weaving over one, under one, but not without some assistance. Can cut paper with the scissors but cannot cut on a line.
Marches in good time and takes an active part in the Kindergarten games and exercises but does not sing at all. Rolls, throws and catches a ball fairly well.

Brown. Margaret Brown. Returned to the Institution December 9th going to the hospital almost immediately for treatment for her eyes; not entering the kindergarten until the day before Christmas and has not attended regularly since.
She distinguishes all the colors and knows the names of red, orange, and purple.
Recognizes the cube, cylinder and cube but knows the name of the ball only.
Weaves over one, under one. Sews the simple designs in the pricked Sewing Cards and strings papers and straws. Uses scissors fairly well in cutting paper strips.
Marches in fairly good time and shows much interest in the circle games and exercises, but does not sing. Throws, rolls and catches a ball fairly well.
No improvement in speech.

Birch

Annie Birch. Entered Kindergarten Jan. 13th 1898 Listing wishes all the colors and can name each. Also the ball cylinder and cube.

Strings beads and lays sticks by colors and numbers to five. Counts to five. Sews the first three designs in the Pricked Sewing Cards. Weaves over one under one working independently. Uses scissors and paper but cannot cut me a line.

Strings straws alternating with small paper squares or circles. Marches in fairly good time and takes an active part in the circle games and exercises, but does not sing.

Throws and catches and rolls a ball well. Much improvement in speech, having learned many new words and speaking with better accent.

Ernest.

Frankie Ernest. Transferred from Skinner Hall to the Morris building Jan. 31st. Sent to the hospital April 25th not returning until June 13th giving him less than three months in the school room.

He sticks pegs & lays beads in the tiles also strings beads by their different forms but entirely regardless to color when working alone.

Throws, ~~catches~~ and rolls a ball well, but cannot catch me. Marches in fairly good time.

Emerson

Elsie Emerson. Has not been in school since the last of March. ~~She~~ She has been transferred to Skinner Hall.

Gatzke

Polly Gatzke. In the Kindergarten two hours and forty five minutes each day. Knows all the colors. Weaves from dictation by ones, twos, threes and fours. Sews the Guthrie Embroidery and Pricked Sewing Cards, working independently and neatly. Folds paper through the first sequence and for cutting, but does not do it accurately. Mounts the cuttings fairly well. Uses scissors nicely, following outline of pictures. Pastes paper chains.

Takes an active part in the games and circle exercises singing all the songs accompanying. Marches in good time and has learned to dance the two-step and one simple quadrille.

A very happy bright disposition and very tender and motherly toward the smaller or weaker children.

Mrs. Tanner reports literary progress.

Hoovka

Eddie Hoovka. Distinguishes the colors red, orange yellow and purple, and knows the name of red. Recognizes the cube, cylinder and ball. Strings beads by their forms and the four colors. Green and blue confuse him.

Uses bead and peg tiles and blocks for amusement, but does nothing in the occupations.

Miss McKibbin reports him as talking quite a little in the play-room, but in the school-room he says but few words. Shame, bad boy, ball and mamma are about the only words he uses.

Throws, catches and rolls a ball and enjoys the games on the circle. Marches in fairly good time.

Henderson

Isabelle Henderson. Recognizes all the colors separating the colored sticks and the beads into their different colors and forms without assistance, but does not know their names.

Sews the first design in the Pricked Sewing Cards. Uses peg and bead tiles and blocks for busy work.

No improvement in speech.

Catches and throws a ball fairly well. Marches in good time, but takes no part in the games and circle exercises.

Herbert

Marion Herbert. Distinguishes and names the colors red, orange, yellow, purple and green + blue. Sorts sticks and strings beads by their colors. Knows the forms cube, cylinder and ball.

Uses peg boards and bead tiles for busy work.

Strings straws and paper but not unaided. Marches in good time and enjoys the circle exercises and games and sings a very little. Nine quiet and less excitable.

Jackson

Kattie Jackson. In the early part of the year learned the words ball, cube, roll, and round in the script only. Had to give up literary work in this department so that she made no further progress in that branch. Counts to five. Knows all the colors and strings beads and lays sticks by colors and numbers to five. Writes the figures 1 - 3 - 4 and understands their values.

Weaves over one, under one only. Sews the Pricked Sewing Cards; Strings Jackpots and straws. Does nothing in folding, cutting or pasting. Marches in good time and usually enjoys the games but does not sing.

May + June 1898.

Kenna. Attilia Kenna. Distinguishes all the colors but does not know their names. Recognizes the different forms but knows only the ball by name.

Lays sticks, strings beads and lays balls in the bead tiles, by colors, working independently.

Builds with blocks and sticks pegs in the peg tiles for busy work. Strings straws and papers.

Some improvement in speech, using such sentences as Filga wants some dishes. Filga is sick. Miss Sharpe sick in hospital.

Marches in time with a swinging walk keeping her arms in action keeping time with the music. Does not scream or slap and bump her head when angry as she used to.

Kolbei. Enoch Kolbei. In the Kindergarten three hours and fifteen minutes each day.

Knows all the colors. Weaves by rule, two, three and fours, working from dictation.

Sews the pricked sewing and simple outline Embroidery cards. Folds papers through the first sequence but does not fold accurately.

Also folds for the paper cutting and cuts on the line, but cannot weather accurately or neatly. Pasts the paper chains and uses scissors fairly well in cutting out pictures with simple outlines; afterward mounting in a scrap book.

No improvement in speech. Has not been in school, but six days, since April 12th.

Marches in time and takes an active part in the games and exercises despite his lameness.

May + June 1898.

Langdon. Sarah Langdon. Returned to the School Oct. 17th. Distinguishes all the colors and knows the names of each. Strings beads by color and form. Lays stick by color. Knows nothing of numbers. Strings papers and straws. Marches in fairly good time, but takes little interest in the games and circle exercises except in games with the ball. Throws and catches a ball.

Miller. Margaret Miller. Distinguishes the different colors, but does not know their names. Also recognizes the ball, cube and cylinder and knows the ball by name. Sorts the sticks by colors and strings beads by color + form, but not without aid.

Throws, catches and rolls a ball.

Neither marches in time or takes any part in the circle exercises or games.

Can sing all the Kindergarten songs, but will only sing alone; never with the other children. Is very fond of flowers and often comes to school with a handful of withered ones presenting them to me with "Here Miss Sharpe some flowers."

Talks a great deal often repeating things she has heard other people say.

May + June 1898.

Mc. Carney

Milford Mc. Carney. Entered the school March 22nd. In the kindergarten from 10.30 – 12.15 every morning, and quite regular in attendance. Knows all the colors. Weaves by rule, twos, threes and fours. Sews the pricked sewing and outline embroidery cards, working rapidly and neatly. Folds papers very accurately also folds for the paper cuttings; both folding and cutting precise and surprising neatly done. Uses scissors nicely in cutting out pictures with intricate outlines difficult to follow. Cuts narrow strips of paper into equal, short lengths, and pastes into paper chains.

Marches in perfect time and dances the simple quadrille and the two-step.

Takes a lively interest in the kindergarten games + circle exercises and sometimes tries to sing.

Mrs. Tanner reports literary progress.

Mackern

Eddie Mackern. Knows all the colors. Strings beads, lays sticks by colors and numbers to five. Counts to five and understands their values. Builds with bead and peg tiles he forms "standing up" lines, "laying down" lines and diagonals. Knows right and left, up and down high and low, long and short.

Sews three of the first designs in the pricked sewing cards. Weaves over one, under one. working independently and neatly.

Strings papers and straws. Catches, throws and rolls a ball. Enjoys all ball games.

Marches in good time but cannot sing.

May + June 1898.

O'Donald

Joseph O'Donald. Knows all the colors and forms and lays sticks and strings beads by color and from number to five. Counts to five and knows their values. Knows the figures 1–2–3–4 but cannot write them. Can do some of the occupations having the use of one hand only.

Tho' he cannot join the children in their games and exercises except to sing, he enjoys watching them in their play. Sings most of the Kindergarten Songs.

Riley

Albert Riley. In the kindergarten two hours and forty five minutes each day.

Weaves from dictation by rule, twos, threes + fours. Sews the Pricked Sewing and Outline Embroidery Cards with neatness seldom leaving so much as a finger print on the card.

Folds quite accurately through the first Sequence in the paper foldings; also for the cuttings; cutting on the line and mounting quite neatly.

Cuts narrow strips of paper into short equal lengths and pastes together making chains.

Marches in perfect time and dances several simple quadrilles. Sings and takes an active part in all the games and circle exercises.

Smith. Harry Smith. Distinguishes all the colors but does not know their names. Sorts sticks and strings beads by color and form.
Builds with the blocks, sticks pegs in peg board and uses paper and scissors for busy work. Sews the first design on the Pricked Sewing Cards.
Some improvement in walking. Does not drag his feet so much. Takes no part in the games + exercises.

Smith Lillian Smith. Knows all the colors. Sorts sticks and strings beads by color and form. Weaves the simplest design over one, under one. Sews a number of the Pricked sewing cards and only the simplest Outline Embroidery Cards. Strings shapes and papers.
Does nothing in the folding or cutting. Neither does she do any pasting.
Marches in good time and dances one simple quadrille. Takes an active part in the Kindergarten games and is learning to sing. Throws and catches a ball very well; quick in all her movements but very quiet.
Gentle and affectionate in her manner toward smaller children

Swanstrom Howard Swanstrom. Recognizes the colors red orange, yellow, purple, green and blue, but does not know their names. Lays sticks by color and strings beads by color and forms if some one works with him all the while When left alone he soon drops his work and sits half asleep until aroused again
Sometimes enjoys building with the blocks for a short time.
A promise to let him play on the piano is the only way he can be induced to do the work given him.
Very fond of music and sings many of the Kindergarten Songs. Marches and claps in good time, but takes no active part in the games and exercises.
Has not been in school since April 7th.
Throws and catches a ball fairly well.

Schmidt. Alfred Schmidt. Distinguishes and knows names of all the colors and the ball, cube and cylinder.
Weaves the simple weaving over one under one. Sews the Pricked Sewing and simple Outline Embroidery cards. Strings shapes and papers. Knows the folding through the first Sequence, but does not fold at all accurately. Does nothing in the cutting or pasting. Marches in good time and dances one simple quadrille. Takes an active part in all circle exercises but does not sing.
Mrs. Tanner reports literary work.

Thereux. Joseph Thereux. Distinguishes the ball, cube and cylinder, and knows the name of the ball. Builds with blocks and uses peg and bead tiles for busy work, but does nothing intelligently

Throws, catches and rolls a ball, but takes no part in the games and other exercises. Does not march in time or sing.

Vold. Clara Vold. Knows all the colors and the forms ball, cube, and cylinder.

Strings beads and lays sticks by color and number to five. Counts to five and understands the values. Forms "standing up", "laying down" and diagonal lines with the bead and peg tiles, working right and left, up and down as dictated.

Weaves by ones only. Sews the pricked sewing cards working with neatness and independently. Strings straws and papers. Sees nothing in folding, cutting or pasting.

Owing to lameness cannot always take an active part in the games and other exercises, but always enjoys watching the other children. Does not sing. Throws and catches a ball fairly well.

Walker. Emma Walker. Knows all the colors. Lays sticks and strings beads by color and number to four. Knows the ball, cube and cylinder. Sews the two first designs in the pricked sewing cards. Weaves only by ones, but works independently and neatly. Strings papers and straws. Builds with blocks and uses peg and bead tiles to amuse herself.

Much improvement in speech. In September could say only the words, mama, papa, bow, bye. Now she attempts saying everything and many words are plainly spoken.

Very active and quick in all her movements and graceful. Marches in time and enjoys the games always trying to sing. Throws and catches a ball.

Anderson. Arthur has been in kindergarten only one week since I have had the class, but from the "time book" he has been present from the beginning of the year. From what I have observed he articulates fairly well knows the colors and can distinguish the three forms, sphere, cube, and cylinder. Can sew simple cards. I have not tried him in any other occupation work.

Becker August knows the colors and forms of the beads and can name them. He talks quite a good deal and quite intelligibly, but does not sing much. He marches well & keeps good time in clapping joins in all of the games and does well any occupation work that I give him. So far he has had only sewing pasting and stringing with straws and circles. He has a very stubborn disposition and seems more easily won by kindness and persuasion than by coercion.

Barrett Edward. Trans[illegible] Period.

Brick Annie. knows the colors, and forms of the beads can string them according to form or color as I dictate but not by number. She can march & keeps good time. She tries to sing but does not carry a tune well. She can sew simple cards. Is rather nervous, and restless and has a habit of crying if things do not please her. She talks a great deal but not very plainly. Can use the scissors and is very neat in all of her work.

Colwell Patrick. He was born in the hospital the past week, so he has been in kindergarten but one week since I have had the class.

Earnest Frankie is also in the Hospital.

Frelic George. Can string beads- use the peg board & sticks but does not do much with the occupations. Talks a little but not very intelligibly. Marches quite well and enjoys playing in the games.

Frober Ferdinand. Seems to be a very bright boy in some ways but will probably never do much in literary work because he is so backward in talking. He has a good disposition, is very accurate and neat in all of his work. Can sew quite difficult patterns. Marches well, He seems to love to hum to himself as he works.

Oct. 1898

he sings mostly the songs that he has learned in chapel.

Fenn — Rosa. Is a bright, interesting, child but she also is backward in talking. In building she works almost entirely by imitation. She sews cuts and pastes, strung beads according to color, form, or number as far as Jows. marches well and tries to sing. She has a very brotherly way with the little children and loves to help them.

Henderson — Isabelle. does not use much but the busy work. I tried to have her sew but it seemed too hard on her eyes and she needed constant help. She is very quiet and happy in kindergarten.

Harorka — Eddie.

Herbert — Marion is a nervious little fellow and does not seem able to apply himself long to one thing. He can distinguish the different colors but does not know them all by name. He will imitate in building but does not follow dictation well. I tried him on the first sewing card but he could not do it without constant help. He marches quite well, and sings quite well. he also talks quite plainly.

Oct 1898

Jackson — Hattie, is in kindergarten only one period and a part of another. She does very well in the occupation work so far as I have observed knows the colors, can sew, cut and paste. She joins in the games and marches

Kenna — Otellia, can do very little without constant individual attention.

Langdon. — Sarah is in kindergarten one period and a part of another. She sews simple cards but needs a good deal of help is very nervious and excitable. knows the colors. and forms of the beads. Tries to sing.

Larson — Myrtle, is an interesting child is quite bright but has not a very good disposition. She strings beads according to color or form as dictated, sews pastes, marches, and sings quite well.

Ludford — May. is an exceptionally bright child but is very deaf. She does her work well and neatly. Can write her name. She does not talk at all probably because she is so deaf. She is kind and helpful with the other children.

Miller — Maggie. can do very little without constant individual attention.

Oct. 1898.

Reasken Eddie. Can string beads, knows the colors, and forms, sews, is very neat and accurate in his work. He seems to have rather a discontented nature, would always rather have something else than what I give him.

Peterson Alfred. Can not distinguish the colors but can the form of the beads, can sew, use the peg board and tiles. He does not talk much He is a very good boy and is so anxious to do his work well.

Powers. Mary No report.

Paulson Easther. The only thing Easther seems to be able to do is to amuse her self with blocks.

O'Donald Joseph. Can String beads, use the peg boards and tiles and build with the blocks, Cannot do any of the occupation work because he has the use of only one hand. He knows the colors, & can name them, & can Count & combine numbers as high as eight.

Vold Clara is in kindergarten only one year and a half. She can do almost every thing in the gift work Can sew, cut and paste. Does not sing and cannot march well because she doesn't use her feet well.

Washer Emma. Distinguishes the colors, but cannot name them, she distinguishes the forms also. Can sew, cut and paste. Follows dictation quite well. She can talk quite plainly. Tries to sing marches well. It is very hard for Emma to give up her own way. but she is quite easily won by persuasion.

Wahlstrom Clara. Cannot do anything alone but has learned to sit quietly in her seat.

Hanson Clara. Has not done anything but play with the blocks she puts the beads in her mouth.

Kocher Annie No report. Entered Kindergarten Oct 26 1898.

Nov. 1898.

Anderson — Arthur. has been at home all of the month.

Becker — August has improved a little during the last of the month in his behavior in kindergarten. He has sewed several cards in the straight line sewing and a few embroidery cards, has woven one mat with a great deal of help from me. he is not at all independent in his work, and dosn't try unless he has a great deal of individual attention. He knows all of the colors and can name them, can String by ones and Two's but is confused if any higher number is given him.

Birch — Annie. Has improved in her sewing keeps her work neater and tries to make the wrong side look as well as the ~~wr~~right She has woven two mats, helped make a scrap-book for the Hospital children. Can do a few simple folds from dictation. I think she talks ~~plaisen~~, she dosnt put in so many Norwegian words.

Earnest — Frankie - Does very little beside String brads and play with the blocks - Hee joins in the games and marching

Fredie — Georgie - Strings brads, plays with blocks - has tried to sew the last work and is doing very well.

Frober — Ferdinand Goes to the Sloyd Class in the after noon. Has woven four mats one quite complicated pattern (the box pattern). He is very neat in all of his work, in pasting he keeps the paper very clean. he made a very neat & pretty page for the Hospital Scrap-book.

Fenn — Rosie, has woven three mats, and Sewed Several cards both of the Straight line & Embroidery cards. Is very independent. Can thread her needle but does not make a knot yet. She made her page in the Scrap book without any help arranging the pictures & pasting them in very neatly.

Haroka — Eddie Has improved very much in the last two weeks in his deportment in kindergarten, He uses the gifts but not the occupations, He strings brads according to form but not Color.

Henderson — Isabelle has made very little improvement. She strings brads according to form - & builds with the blocks and uses the peg boars & tiles but cannot do any of the occupation work.

Herbert — Marion does very little of the occupation work, He has improved a little in Sewing but it is very discouraging he Sews all over the card.

Hanson — Clara Has made no improvement.

Nov. 1898

Kenna — Otillia Has made no improvement in kindergarten work but does not slap herself as she used to do when angry. She does it once in a while but not often.

Korher — Annie Keeps in her chair a little better than she did but usually has to be tied in or she wanders all about. The only thing she can do is to build with the blocks If I let her have the braids she puts them in her mouth.

Langdon — Sarah distinguishes the colors & forms of the brads - marches quite well tries to sing. Cannot sew unless she has some one to show her each time where to put the needle.

Larson — Brylle. Has improved a great deal this month in many ways - she has joined the junior singing class and has improved very much in singing Has woven two mats both under one & over one and Sewed several cards very neatly

Ludford — Mary is improving in all of her work Has woven three mats, over one & under one & over two and under two Sews very neatly and nicely. and very independently Can thread her needle and fasten her thread. She marches well and joins in all of the games.

Nov. 1898.

Miller — Maggie does not show much improvement. She uses the gifts but not the occupations. Is more quiet in kindergarten. Joins in the games and marches and sings some.

Neasken — Eddie Has woven three mats this month, Sewed several cards. both in the straight line sewing and embroidery cards, folded several simple forms, & pasted a page for the Hospital Scrap-book. If he would only apply himself he would accomplish much more, He sews very independently very seldom making a mistake and is very neat about his work.

Peterson — Alfred. Has been in kindergarten only a short time He has learned to sew the first three simple patterns in straight line sewing, has woven one mat. He knows the forms and colors of the brads but cannot name them He marches well sings some; His articulation is very poor. He has a good idea of time

Pippy — Flossie. Has been in kindergarten only a short time. Has sewed Several cards and woven one mat. She talks quite well. Knows the colors & can distinguish the forms of the brads. Joins in all of the games, She tries to sing, marches well.

Nov. 1898.

Powers — Mary Has been in the hospital the entire month.

Paulson — Esther, Has made no improvement. unless it be to sit a little more quietly in her seat.

McDonald — Joseph- His report is about the same as last month, he has been very regular ~~but~~ his paralized hand makes it hard for him to do many things

Vold — Clara Has sewed several cards and woven one mat. She went home about the middle of the month.

Washer — Emma Has sewed four of the pricked sewing cards and three embroidery cards, has woven one mat but seems to have forgotten how so I have to start each strip for her. She goes to the junior singing class and has improved some in singing. She sang twice on Thanksgiving day once in a nation song with the Kindergarten children and once with the Junior singing class.

Wahlstrom — Clara is improving in many ways. Joins in the games with the other children marches better, Sings quite well and seems to get the words as well as the tunes.

Nov. 1898.

Pifling — Clara Is making some improvement has been in school only a little over one week but shows signs of being capable of improving.

Sauer — Georgie About all I can say about George is that he is learning to sit more quietly at the table and does not throw things about as he did.

Dec 1898.

Anderson — Arthur has been at home all of the month.

Becker — August has been regular in attendance, he has sewed several cards - woven one mat. He has learned the value of three so that when I ask him to give me three things he does it without any hesitation, he still demands a great deal of individual attention

Birch — Annie has been regular in her attendance, is improving in sewing and in weaving. Annie cries if she is not allowed to have her own way and is a very stubborn child and hard to manage, she does not follow dictation very well is improving some in her speech.

Ernest — Frankie. has been regular in attendance has tried to sew the first card in the straight line sewing but cannot do it alone. Otherwise she has not taken up any new work.

Frelie — George. has been regular in attendance has sewed about four lines on the first card in the straight line sewing but has to have almost constant help but he knows not to sew all over the card and will wait for you to tell him where to go. He also made a chain with the circles + straws

Dec 1898 — and did it very independently

Frober — Ferdinand is still in the sloyd class in the afternoon, He has not taken up any new work this month. He is neat and careful in all of this work. Does not improve any in his speech.

Fenn. — Roy - has been at home most of the month no report.

Henderson — Isabelle has been regular in attendance sewed two lines on the first card of the straight line sewing cards. but can not sew without constant individual help.

Havorka — Eddie. has been regular in attendance this month has made very little improvement.

Herbert — Marion. has been regular in attendance, has learned to string circles and straws has tried to sew and to weave but cannot do either Is improving in speech.

Hanson — Clara has been regular in attendance does not show any improvement.

Dec 1898.

Jackson Hattie has been regular in attendance has sewed one large embroidery pattern and woven one mat. Hattie is improving in her behavior is not so sullen as she used to be. She can write the figures up to five but does distinguish their values.

Kenna Otellia has been regular in attendance but has made no improvement.

Langdon Sarah has been regular in attendance. She still wants to sew and tries but cant seem to follow the lines, she sews all over the card unless watched constantly. She can string the beads according to form & color but does not know the names of either the forms or the colors.

Larson Myrtle is improving in every way it has done her so much good to go into the singing class. she tries so much harder now to do all of her work well. I think she will soon be ready to take up some literary work as she talks well and intelligibly and commits to memory quite readily.

Dec 1898.

Ludford Mary was transferred to the school for the Deaf early in the month.

Miller Maggie has been quite regular in attendance. has made no improvement during the month.

Meaker Eddie has been regular in attendance. Has sewed only one card this month but it was a large and hard one and he became discouraged so did not work as well as he would have done if it had been less difficult. He does nicely in weaving, and is usually quite neat about all of his work.

Peterson Alfred. Has been regular in attendance. has improved in sewing and weaving and is learning to distinguish the colors - and forms of the beads more readily and to string them according to dictation. He does not improve much in talking.

Dec 1898.

Powers Mary. has been regular in attendance Has tried to sew but cannot without some one to show her each time where to put the needle She does not talk any. Is a very stubborn child. She can distinguish the colors and forms of the brads and imitates in stringing and in building but does not follow dictation

Paulson Esther. has been regular in attendance. Shows no improvement.

O'Donald Joseph. Has been regular in attendance. He has sewed three rows on a straight-line sewing card and shade a chain of straws and papers. but had to have help because of his lame hand Jo is a nice little singer and commits to memory quite readily.

Washer Emma has been regular in attendance He has sewed several Embroidery cards and worsen part of a mat. She has not taken up any new work. But continues to improve in all of her work.

Wahlstrom Clara. has been regular in attendance. She is improving in many ways. Builds more intelligently with the blocks, strings

Dec. 1898. brads according to form but not color. Marches better than she did. She cannot use any of the occupations yet, but uses her hands better so I hope she will soon be able to.

Rifling Clara has been regular in attendance she shows much improvement strings brads according to form or color. Sorts the sticks according to color. She has sewed on few lines on the first sewing card but can not sew independently yet. Marches well throws and catches a ball.

Sayer George has been regular in attendance. George marches with the children much better than he did. can throw a ball but cannot catch it. He does not throw the chains down as much as he used to, and plays more intelligently with the blocks.

Pippy Flossy Has been absent a great deal on account of the tooth-ache She is improving in sewing and weaving. Has made several long chains with the circles and straws keeping the colors in proper order.

Jan. 1899. Becker

August Becker has bin regular in attendance this month. He has improved in deportment, and is doing much better in the occupation work. has sewed several embroidery cards worm two mats, cut some pictures for a scrap-book and pasted them in and followed quite well a dictation for folding. He can count and recognise figures to five

Birch

Annie has bin regular in attendance she is improving some in her speech is more careful about her work she has sewed several embroidery cards pricking them herself can thread her needle but cannot make a neat knot, has woven several ~~mats~~, folds from dictation the very simple folds. uses the scissors some but not well.

Barrett

Eddie was in kindergarten in the afternoon for about three weeks. He did his work very carefully and neatly and also very independently He has gone back to Mrs Tanners room for the whole day.

Blassies

Nicholas is in kindergarten the last period in the morning and all of the afternoon session. He knows the colors and ~~forms~~ of the beads and strings according to dictation can sew, weave, fold, and use his scissors some.

Jan. 1899. Earnest

Earnest Frankie has bin quite regular in attendance. He begins to distinguish the colors but can not name them will string them according to color & some one stays by him and keeps him interested. He builds with the blocks uses the peg-boards and tiles, joins some in the games marches quite well but does not have much idea of time. He does not improve any in articulation.

Frelic

George is regular in attendance, distinguishes the colors but can not name all of them. will string them according to form or color if he has some one beside him to keep his interest up. He builds with the blocks uses the peg boards and tiles marches well, joins in the games throws and catches the ball well. Cannot articulate well at all.

Frober

Ferdinand is regular in attendance sews, weaves, cuts very neatly and accurately, pastes neatly and according to dictation folds from imitation. He still has a passion for arranging the beads and blocks in rows and squares and circles.

Fenn

Rosy. Came back the second week in January. She was very much interested in the

Jan 1899. new school rooms - noticed every-thing the pictures, black-boards - plants, and circle - she remembered the pianos & having been in the old kinder-garten. She sews - weaves - one pattern, cuts and pastes, strings beads according to dictation but does not know the numbers above three.

Fittem Emma has been regular in attendance she is in the Sewing class the first period after recess and in the Calesthenics class the last period in the afternoon. She sews very well keeps her card clean and the wrong side looks almost as well as the right. Weaves ones, twos and threes. cuts and pastes, folds the first pattern she marches quite well, joins in all of the games, but does not sing much.

Henderson. Isabella - has been regular in attendance she does not show any improvement, can distinguish the colors - but does not do it unless she has constant help. She has a good idea of time and marches well.

Havorka Alois has been in the hospital most of the month. There is very little that he can do. Strings the beads and plays with the blocks but

Jan. 1899. does not do either intelligently at all.

Havorka Eddie - is making some improvement in his articulation, also in his work. he joins in the games and marches better. Can string beads, use the peg-board & play with the blocks but does not do any of the occupation work.

Hanson Clara. has been regular in attendance but does not improve much. She strings beads, and plays with the blocks - but does not join in the games will not even try to catch the ball - or play with it at the table.

Herbert Marion. has been regular in attendance. uses the gifts but not the occupations Can distinguish the colors but cannot name them. joins with the Children in the games, is one of the children most interested in the games. Marches quite well throws and catches a ball.

Hanson Lelara- Has been regular in attendance, she can string beads, and build with the blocks, she marches quite well but does not join in the games nor try to sing. She has a good disposition but I dont think she will ever improve very much in any kind g school work.

Mch 1899. Huson

Gunhild Huson. has been regular in attendance she continues to improve though she has not done any new work this month; She sews, weaves over one under one, Cuts & pastes, strings beads, uses the pegs & bead tiles builds with the blocks - marches and joins in all of the games.

Koeler

Annie has been regular in attendance but makes no improvement, she always takes a nap in the afternoon and will run to the couch as soon as she comes in after dinner and say "good-night"

Kemna

Attilia has been regular in attendance, she strings beads and uses the pegs & bead tiles. She builds with the blocks - marches & keeps time but does not join in the games.

Langdon

Sarah has been regular in attendance. Is in the sewing class one period and the ironing class another so is in kindergarten two and one half hours. She - Strings beads according to color or form but does not know all of the colors by name. Uses the peg-board and bead-tile and builds

Mch 1899.

with the blocks. She does not do any of the occupation work except make chains with the circles and straws and use the scissors a little in cutting out very simple outlines. She marches in line and keeps pretty good time but does not sing any.

Larson

Myrtle, has been in school every day this month; she has been trying very hard this month to master the names of the colors she has learned orange, yellow and purple so that she does not often make a mistake in those three, but the others she is not at all sure of. She sews, Weaves O' ft' and O² ft² and O² U'. She cuts quite well with the scissors Marches well and is very helpful with the younger children. She enjoys helping. Myrtle is in the Sewing room & ironing class.

Ludford

May has been present every day this month, She tries hard to talk and will try to repeat after me almost any word I give her. She does very nice work in kindergarten is so neat and careful about all of her work. She sews, weaves, Cuts and pastes, folds, makes daisy-chains and strings circles and stars. She can distinguish the colors but can not name them. She marches

Mch. 1899.

well and joins in all of the games. She is in Kinder garten three and one half hours. Is in the sewing room one period and takes Calesthenics.

Miller

Maggie has been regular in attendance, She strings beads, sorts out the sticks uses the peg boards and bead-tiles but does not show any improvement.

Jrchson

Hattie has been regular in attendance She wove a mat over three under three a new pattern to her, sews she pricked sewing cards and also the embroidery cards. cuts out pictures, pastes the daisy chains and strings circles & straws marches & joins in the games does not sing.

Pippy

Flossy has been regular in attendance. Is in kinder garten five hrs. a day. Is improving a little in her sewing on the embroidery cards She weaves over one under one, and can fold from dictation the first three folds of the first sequence she tries to sing but cannot carry a tune. Flossy is much happier in kinder garten than she used to be does not seem to be home-sick as she did the first part of the year. She enjoys the games. Can throw and catch the ball. Talks a little plainer than she did.

Mch 1899.

Riffling Clara has been regular in attendance. She is beginning to try to talk when some one pays especial attention to it and will repeat after one a few common and easy words- like "mamma" "papa" "ball" block, etc. but does not talk unless one asks her to repeat the word after her. She uses the bead tile & peg-board & can separate the sticks into their different colors. but does not know the colors. She marches & joins in the games.

Reynolds

Vivian has been absent five days this month is in the hospital now. She is improving in many ways has sewed four cards this month- and woven a mat - she makes daisy chains & strings circles & straws. Marches and joins in the games but does not sing.

Smith

Lillian has been present every day this month. She is improving some in the outline sewing. has woven four mats, uses the scissors better than she did, knows all of the colors and can string them in the order of the prismatic colors. Makes daisy chains - uses peg-board builds with the blocks. She does not talk much although she can talk quite well.

Mch 1899

Wahlstrom Clara, has been regular in attendance. She is trying to talk some, says separated words but does not put them into sentences. She has tried hard to sew this month but cannot do it without constant attention and help from some one. She carries a tune very nicely and if she could only learn the words would make a sweet little singer. She marches well & joins in all g the games.

Hazel

Lena. Has been regular in attendance. Heas learned to sew the first pricked sewing card and - has sewed his simple outline embroidery cards and has learned to thread the weaving needle and has put several strips in a mat. She shows so much more interest in every thing than she did at first. Will repeat the names g things after me so I have hopes that she may learn to talk. She joins in some g the games & enjoys watching the others play.

Harding

Gladys has been absent four days this month. She does not make much improvement - her work is always so carelessly done.

Mch. 1899

She has sewed several cards but a good many g them were not done well enough to keep. She has made two mats but cannot do any pattern but over one under one. She tries to sings some Joins in all g the game is in Sewing Class and the ironing Class - each one period ad is in Kindergarten two hours and a half.

Washer

Emma has been absent six days this month. She has sewed several cards - both the pricked & embroidery outline cards - has made two mats over one under one and is now making one 2-2. She is in the Junior singing Class and is improving much in singing. She has forgotten some g the color - I find and is now trying to learn them by name dg due. she knows red and blue but is not always sure g the others.

Powers. Mary. In Hospital No. Report.

April 1899.

not very well because g her lameness. Joins in all g the games and circle exercises.

Smith Lillian has been regular in attendance. Is improving some in her sewing but g is not neat or careful about her work but it may be on account g her eyesight which is probably not good. She has woven several mats and two of them were new patterns C 2 U 1 C 3 U 2. She is very helpful about the little ones and is always very kind & gentle with all g the children.

Wahlstrom Delara has been absent one week this month. she is improving some in her kindergarten work is learning to sew but very slowly. Strings the beads but does not distinguish dark colors. She knows the ball marches & takes an interest in the games.

Washer Emma has been regular in attendance was absent one day she is improving in all g her work. has learned to weave so that she can weave C 1 U 1 independently cuts with the scissors simple outlines strings paper & sews, pastes dainy

April 1899. Chains. marches well and is improving in singing and in talking takes a great deal of interest in the games.

April. 1899. Becker. August has been regular in attendance, sews and weaves much better, weaves over one under one, knows the colors, also cube, cylinder ball, triangle. makes the daisy chains, strings beads, works with peg-board, bead tile, places the pegs in the peg board then a bead of the same color over each one, builds with blocks, is learning to talk more every day. cuts out pictures but not very accurately, throws and catches the ball, does not take very much interest in the games and marching.

April 1899. Classies. Nicholas has been regular in attendance, strings the beads, knows the colors. works with peg board weaves over one under one, over two under two strings the colored squares and straws correctly.

sews the pricked cards, also the outline cards, is very neat about this work. takes great interest in the games, pastes the daisy chains. cuts out pictures. knows cube cylinder, ball and square, separates the colored sticks into the different colors.

Ernest April 1899. Frankie has been regular in attendance. strings the beads. works with pegs boards, strings colored circles or squares and straws alternately. separates colored sticks. is trying to learn to sew but it is very hard for him. builds with blocks he is very selfish and will take the works away from the children sitting near him if he is not watched, takes more interest in the games especially rolling the ball.

Frelic. April 1899. George has been regular in attendance, knows the colors can name them. strings the beads correctly if some one is near him works with peg boards, pastes daisy chains. strings colored circles

and straws correctly. proves
one mat. served three
pricked cards, takes more
interest in all his work
and in the games, builds
with blocks, can count to six.

Tiber.
April
1899.

Ferdinand has been regular
in attendance, is in school
first in the morning, knows
the colors strings beads
separates the colored straws.
sews both pricked and
perforated cards, is very
neat, pastes daisy chains.
strings colored straws, circles
or squares, weaves over
one under one, over two
under two, over three under
three and over three under
one. builds with blocks.
can draw an engine
and cars on the black board
very nicely. marches well
plays games. when the
children sing he will
make the motions but
cannot talk.
Ferdinand wove two
new patterns this
month.

Havoka
April
1899.

Eddie strings beads works
with peg board but cannot
see any improvement unless
it is in playing the
games with the ball.

Havoka
April
1899.

Alois strings the beads, works
with peg board. builds with
blocks, has been regular
in attendance but no
improvement.

Herbert
April
1899.

Marion has been regular
in attendance, improves
all the time, strings the
beads, works well peg
board according to direction.
pastes daisy chains.
Strings colored straws
and circles or squares
alternately. wove one little
mat. sewed three pricked
sewing cards. builds
with blocks. sings a little
but cannot keep the
words very fast keeps
good time, plays all
the games. builds with
blocks, counts to four.

Kohly
April
1899.

Enoch has been regular in
attendance in my school
two hours and a half
knows the colors, strings
beads. works with peg-
board. sews pricked and
outline cards, weaves
over one under one, builds
with blocks, pastes daisy
chains. strings colored
straws and circles.
builds with blocks.

separates the colored sticks
draphes well and plays
all the games.

Anaskew
April
1899.

Eddie has been regular in
attendance, knows the
colors, strings beads, works
with peg board, separates
the colored sticks, pastes
daisy chains, strings
colored straws and circles,
weaves over one, under
one, over two, under two,
sings a little, sews both
pricked and on string
cards, works more
independently, marches
well, and takes great
interest in the games.

O'Donald
April 99.

Joe is in school two hours
and half every day. has
been regular in attendance.
can do very little works
with his hands because
they are crippled, but can
string beads, work with
peg board, learns the
words to the songs
very readily, takes great
interest in the games
because he can sit on
the side and roll the
ball and sing, he likes
to beat his little drum
when the children march.

Ormberg
April
1899.

Annie has been regular in
attendance, strings beads
works well, peg board
but not intelligently.
marches quite well
takes more interest in
the games.

Peterson
April
1899.

Alfred has been regular
in attendance, improves
all the times, strings
the beads in form or as
dictated, works with
peg board, strings colored
straws and circles, pastes
daisy chains, weaves
over one, under one,
sews both pricked and
on string cards, picks the
cards for himself, folds
through first sequence,
has learned to say
"mamma" "papa" marches
well, plays all the
games, cuts out pictures,
builds with blocks.

Sayer.
April 1899.

George has been in school
all but two days, strings
the beads but not in form
or color, works with the
peg board with help.
is a very noisy boy but
does not throw the
chairs over as much as
he used to.

Schmidt
April
1899.

Alfred is in school five hours each day, has been regular in attendance the past month, distinguishes and knows the names of the colors, cube, cylinder, ball, cone, strings the beads, works with the peg board, sorts the colored sticks, sews both pricked and outline cards, pricks his own cards, weaves over one under one, strings the colored straws, circles or squares, pastes daisy chains, builds with blocks.

We have a new set of cards with vertebralis on, twenty five in the package, we showed them to Alfred and he knew all but the boat, tiger and fox. He sings better and can do well and takes great interest in all the games.

Stranstrom
April.
1899.

Howard has been regular in attendance strings beads works with pegboard, learns most all the words of the songs, does not take any interest in the games, he would rather tear paper than do anything else.

Roney
April
1899.

In the hospital all month.

Cross.
April
1899.

Jimmie has been regular in attendance knows the colors names them, strings beads according to form or as dictated, works with the peg boards, builds with blocks, pastes daisy chains strings the colored straws, and circles alternately, sewed four pricked cards and one outline cards this month works one mat over one under one with a little help, knows ball cylinder, cube, marches well and enjoys all the games.

Miller
April
1899.

Eddie Miller has been regular in attendance, knows the colors, names them, strings the beads in form or color, sewed four pricked cards and one outline card weaves over one under one, works with pegboard builds with blocks, can make form with the tablets when he can see the pattern, marches well, takes a

great deal of interest in the games.

Jones. April 1899. Johnnie has been regular in attendance. strings beads works with pegboard, builds with blocks and enjoys the games.

Spaisberg. April 1899. Doris has been in kindergarten about three weeks, can put the pegs in the peg board correctly if I first start each row for him. strings the beads. enjoys music very much.

May 1899. Birch Annie Birch has been regular in attendance, In improving in many ways is not nearly so nervous nor fretful as she used to be and is much more careful about her work and more patient has not had to do over a card this month on account of carelessness. She sews, draws, cuts, & pastes, Strings circles & straws knows the colors, & the forms round- square- triangular, oblong- sphere cylinder and cube. the directions up- down, front back, over, under, right hand left hand- top bottom, middle and corner and can follow a dictation fairly well when she concentrates her

May mind on what she is doing. She sings some, marches and joins in all of the games, is quite imaginative.

Fritten Emma has been regular in attendance, Her deportment has been much better for this month than for some time past. She is improving in her work. Is a very neat sewer and takes up a new pattern in weaving quite readily. She is neat in all of her work and likes to help with the other children She sings a little and joins in all of the games.

Henderson Isabell has been regular in attendance. Does not do any occupation work- as sewing weaving etc. but strings the beads and can distinguish the colors and forms. She likes music very much & keeps good time She joins in the simple games.

Hanson Clara- Does not make any marked improvement, She uses the busy work, but does not show an interest for any particular thing. Marches in quite good time & joins in some of the games. She can throw a ball but will not attempt to catch one.

May 1899.

Harding — Gladys Harding has been regular in attendance. She has improved in her sewing is much more neat and careful about her work than she used to be, she can sew a O' K but has to have each row started for her. Is very helpful about taking care of the little ones. but does not seem to have good use of her hands does every thing so awkwardly. She tries to sing & marches & plays.

Huson — Gunhilde has been regular in attendance, has improved in all of her work. Sews very neatly both the straight line and out-line embroidery cards. Weaves over one, under, one. cuts simple out lines but not accurately. Strings bead according to form or color, & according to number as far as three. She tries so hard to keep her lips closed and has improved very much in that way does not drawl as she used to She marches in time & plays all of the games, even tries to dance.

Jackson — Hattie has been regular in attendance. She has helped with the other children a good deal this month, threads needles

May 1899.

for the little ones, & takes out the mistakes in the straight-line sewing cards & starts them right again, she helps too in teaching some of the little ones to weave. starting the needle in for one who does not know how, and passes the work around If Hattie were not so noisy she would make very good help. and as a punishment the last week we have not allowed her to help any.

Korler — Annie has been regular in attendance but has made no improvement, she is more restless than ever & can only be kept in her chair by tying her in.

Kemna — Otilia has been regular in attendance does not make any improvement. Strings beads, uses peg boards and plays with the blocks. is very restless and troublesome in kindergarten because she can not apply herself to anything.

Langdon — Sarah has been regular in attendance has been put into the next class the third period in the morning so is in kindergarten only one hour and a half. Does not improve any.

May-1899. Larson — Myrtle Larson has been regular in attendance. She is improving in her kinder garten work. Weaves sews, cuts but not accurately pastes & strings circles & straws Marches well, joins in all of the games and sings quite well. She had learned the colors but has not been drilled on them during the past month and has forgotten most of them.

Miller — Maggie has been regular in attendance, had not done any new work does not show any improvement.

Ludford — Mary has been regular in attendance Is improving in all of her work does not make any improvement in talking She has learned a new pattern in weaving, has sewed several cards - and made a little scrap book cutting out the pictures and pasting them in herself. Strings circles and straws, pastes Daisy Chains She is in the sewing Class the second period.

Pippey — Flossy has been regular in attendance, Improves in all of her work, sews, weaves, cuts and pastes, strings circles and straws uses the peg boards, & bead tiles

May-1899. — Strings beads according to form or color. Flossy is improving in her deportment as well as in work.

Ruffling — Clara has been regular in attendance. Does not make much improvement. Does just the same work that she did last month.

Reynolds — Vivian has been regular in attendance. Is improving in the use of her hands. Can sew, string circles & straws uses the scissors some, pastes daisy-chains. Marches and joins in the games Can throw and catch a ball.

Smith — Lillian has been regular in attendance, she tries very hard to do whatever is given to her to do but is not accurate in any of the work, she is able to work much better when she wears her glasses, Lillian has a very sweet disposition and is very helpful with the little children. Leads the little boys in the march when Julia is not in. She is in Kindergarten all day.

Wahlstrom — Clara has been regular in attendance is improving in some ways. Has a very sweet voice

May 1899

and has been put into the singing class. but she is very slow in learning to talk although she uses a great many words. She does not put them into sentences. She separates sticks into their colors. Strings beads, builds with blocks. and can string circles and straws.

Washer

Emma has been regular in attendance. Has sewed several cards, and wove four mats O^1U^1 O^2U^2 O^1U^2 and O^3U^3. She is improving in Articulation Sings nicely. Cuts and pastes, Strings beads, builds with blocks uses peg-boards and bead tiles.

Nagel

Lena. has been regular in attendance She is taking a great deal of interest in the Kindergarten work. Sorts Sticks Strings beads, makes daisy chains, folds, uses the peg-boards and bead tiles She can distinguish all 7 the colors but cannot name all 7 them. She sews and is learning to weave, She keeps good time in marching & joins most of the games.

May 1899.

Powers.

Ellen Powers has been more regular in attendance than any month this year. She has improved both in deportment and in the kindergarten work. Has sewed several outline embroidery cards and several straight line sewing cards. Weaves O^1U^1 strings circles and straws, separates Sticks into the six colors. distinguishes the colors but cannot name them Marches well and joins in all 7 the Games.

May 1899.

Becker.

August was absent three days this month, has improved in sewing and weaving will work more independently. but has not improved in deportment. cutout pictures a little better. weaves over one under one. pastes daisy chains. strings the colored straws and squares or circles. has not improved in folding.

May. 1899

Blassis

Nicholas has been regular in attendance. weaves over one under one, over two under two. makes daisy chains. can throw and catch the ball much better.

strings beads works with peg board, bead tile forms the colors plays all the games sews both pricked and perforated cards.

Ernest
1899
May.

Frank strings the beads correctly. works with peg board builds with blocks.
I never saw a more selfish child he takes the work arrangements from the children sitting by him then he cries if they want it back again.

May
1899

Frelic.

George was absent the last three days of this month.
He has improved in his sewing more than any child but the weaving is very hard for him. forms the colors. strings beads works with peg board. bead tile strings the colored papers and strays. is learning to paste the daisy chains. It is very hard for him to join the ends and the circle at the same time. He is a very good boy in school.

May.
1899.

Froebel

Ferdinand was absent two weeks this month. He is very neat about all his work, weaves over one under one over two under two. over three under three. weaves the steps and boxes. sews any pricked, perforated or outlined cards. Works with peg board, bead tile strings beads, cuts pictures pastes daisy chains, strings colored straws and papers. folds very nicely. sorts sticks.
Ferdinand has a very peculiar way of building with blocks or sorting the beads and arranging them in squares or circles.
I saw him sitting by a window in the hospital the other day he had torn pieces of paper up into tiny squares and placed them by on the window as he does the blocks in the kindergarten.

Algie.
Can not see the slightest improvement.

May.
1899.
Havorka.

May.
1899
Havorka

Eddie. No improvement.

Robert. May. 1899.

Marion has been regular in attendance. sews much better until the last two or three days he has been very careless. he has sewed several cards with circles squares and straight lines. on. works with peg board. bead tile strings beads. but has to be told every few minutes to do his work. counts to four. is learning to weave but it is very hard for him.

May. 1899.

Enoch has been regular in attendance is in the kindergarten two hours and a half. sews the pricked and outline cards weaves new one under one over two under two but he is very slow and inclined to be lazy. cuts pictures. strings beads. works with peg board bead tile. writes a few words.

May. 1899.

Kohler.

Eddie Measkern has been regular in attendance weaves one over one under one. sews the pricked and outline cards. he does not grumble in school as much as he used to. works much better. strings beads works with peg board, bead tile.

Measkern.

can fold a little. pastes, daisy chains, strings colored straws and papers. takes great interest in the games can throw and catch the ball very nicely.

May. 1899.

McCormick.

William entered school May 22nd. does not know his colors. can string the beads but not in color or form does not keep in line very well when marching. puts the pegs in peg board but not according to color.

May. 1899.

O'Donald.

Joe was absent three days this month is in kindergarten two two and one half hours each day. he goes two hours Tapped two hours and half every morning.

Joe talks well sings all the songs. cleans the works. sings several songs alone.

Knows the colors but cannot do very much work with his hands because they are crippled.

May. 1899.

Amburg.

Onie was absent all but two. No improvement.

May. 1899.

Peterson.

Alfred has been regular in attendance, he improves all the time has learned to say a few words. strings the beads. works with peg board and bead tile pastes daisy chains. strings colored straws. weaves one row one under one, one two under two. sews pricked and outline cards.

He takes great interest in all his work in the kindergarten. When his mother visited he wouldnt let her convey the kindergarten for fear she would take him home and he wouldnt stay out of school in the afternoon to visit with her.

May. 1899.

Sayer.

George has been absent all this month.

No report.

May. 1899.

Schmidt.

Alfred has been regular in attendance. knows the colors strings beads works with peg board and bead tile according to dictation builds with blocks, weaves one row one under one, one two under two. sews pricked and outline cards. pastes daisy chains. strings the colored straws and tapes. knows the words to several songs. marches well. takes great interest in all the games.

May. 1899.

Swanston.

Howard has been regular in attendance likes to look at pictures better than do any thing else. Sings very well.

No improvement.

May. 1899.

Cross.

Jimmie Cross has been regular in attendance. strings the beads according to color or form. works with peg board and bead tile according to dictation. weaves the small mats with five or six strips over one under one. sewed several pricked cards and outline cards with circles stars and bees on them. this month. He is very quiet

and has improved.

May 1899. Johnnie has been regular in attendance. served two pricked cards with a little help. strings beads, works with peg board, bead tile and builds with blocks.
He takes great interest in the games.

Jones

Millie

May 1899. Eddie was absent the last three days of this month served several pricked and outline cards. weaves over one, under one; over two under two, strings beads, works with peg board and bead tile.
Eddie made two little scrap books this month, each page is as neat as it can be and he asks almost every day to paste pictures.
He pastes daisy chains strings colored straws and pegs, sorts sticks and builds with blocks.

May 1899. Lewis has been in school one month and half, has been regular in attendance.
Has served one pricked cards with help and string beads according to

Kaisberg

color if some sits beside him and tells him every few minutes.
He delights in teasing the boys.
Builds with blocks and works with the peg board.

May 1899. William entered Kindergarten May 18. has been regular in attendance since they. strings the beads but not according to color or form; puts the peg board and tile to build with blocks.
Does not know the colors calls all colors white.

Smallhouse

June 1899. Annie Birch has been regular in attendance this month. She is a very active and energetic child and loves to work. She was very careless for a long time and would slight the work she was doing because she was in such a hurry to have a new piece but she is ~~trying~~ to be more careful and neat about her work. She talks almost incessantly but there is not much sense to what she says. She flies from one subject to another and in committing to memory she only gets parts of the words. She sews, weaves, folds, cuts & pastes. makes daisy chains & strings straws and circles. sorts sticks puts pegs in peg board in the order- red, orange yellow green blue violet- builds with blocks. marches & joins in all of the games.

Birch

Fittem Emma has been regular in attendance. She was put back into the kindergarten from Mrs Sawyers room the first of the year. She sews very neatly cannot fasten her thread & knot it so is not entirely independent in sewing She weaves O¹U¹, O²U², O³U³, O¹U² O¹U³ O²U³, and has worn one box of pattern and one

June 1899. mat with slanting lines she weaves independently, she cuts & pastes, strings circles and strans, pastes daisy chains. Knows the forms sphere, cylinder & cube- circle square & triangle- builds with the blocks. Sorts the colors & knows them by names and in the prysmatic order. Does not sing or talk very much- marches well and joins in all of the games.

Henderson Isabelle has been regular in attendance, I cannot see that she has made much improvement, She tried for a long time to learn to sew but failed partly I think on account of her eyesight which is very poor. She strings beads, can distinguish both the color and form. plays with blocks uses peg boards, marches & plays a few of the games principally the ones with the ball.

Hanson Clara, has been regular in attendance, She has made no marked improvement during the year. Plays with blocks but not intelligently, strings beads, and sorts out the colors. but takes no interest in any of the work.

Becker.

June 1899.

August recognizes and names the colors red, orange, yellow green, blue and violet knows the forms ball, cube, cylinder triangle, cone, egg and pyramid.

Sews any of the pricked perforated or embroidery cards, weaves a mat any size, over one, under one, forty two under two.

Counts to five and understands the value of numbers to five.

Works the peg board and bead tile correctly putting the beads and pegs in order, red, orange yellow, green, blue and violet.

Strings the beads according to form or color or as dictated, strings colored straws squares and circles alternately.

Cuts out pictures very nicely and pastes well, sorts sticks by color, pastes daisy chains.

He is learning to talk very rapidly, saying sentences the first of the year only said words, did not form a sentence. Can throw and catch a ball

very nicely. does not like to broach. if he can not be the first one in all the games he does not like it.

Has been regular in attendance the past month. August, in in school five hours each day.

Nicholas has been irregular in attendance the past month. he is in school two hours and half every day.

Nicholas.

Recognizes and names the colors red, orange, yellow, green, blue and violet. knows the forms, cube, cylinder, ball triangle, cone, pyramid and egg. Weaves over one under one, over two under two.

sews any of the pricked perforated or outline embroidery cards.

Pastes daisy chains strings colored straws, circles or squares all neatly. can do a little in paper cutting folds through the first sequence. throws and catches a ball very well

anarchus well and takes great interest in the games.

Ernest. Frankie has been regular in attendance the past month recognizes the colors but cannot name them sorts sticks and lays them according to color strings beads in form or color or as dictated. works with the peg board and bead tile correctly. strings colored straws, circles or squares alternately. builds with block very well. I guess one will build for him so he can see it then he can build it almost correctly.

Does not take very much interest in the games.

Duffield. Ray entered the kindergarten the first of June has been regular in attendance he enjoys the kindergarten and all the work.

Strings beads works with peg board and bead tile builds with blocks. throws and catches ball very well, talks a

great deal enjoys the marching and takes great interest in the games. sewed two cards with a little help.

He goes to the sloyd room in the afternoon.

Fuelic. George has been regular in attendance the past month knows the forms cube cylinder ball triangle fairly names them.

Distinguishes the colors red, orange, yellow, green blue and violet and names them.

Counts to five and understands the value of numbers to five.

During the past four month he has learned to sew the first four cards and we are a fourinch mat with five rows six plus one row one. pastes daisy chains and strings the colored straws circles or squares alternately and has pasted two small scrap books.

He strings beads according to color or form or as dictated. works with peg board and bead tile correctly.

He separates the parquetry into the different forms, does not sing very much with the other children but will sing to himself and he has a very sweet voice.

Thora catches and drops a ball very nicely, marches well and enjoys the games.

Probst

Ferdinand has not been to school but one week in the past month and a half.

He recognizes all the colors, separates the colored sticks, strings the beads according to color and form of dictation, works with peg board and bead tile correctly. Throws and catches and rolls a ball well.

Opens and closes one, two, three or four weaves the steps and boxes. Sews any pricked perforated or outline cards cuts pictures out of catalogue or paper very nicely and is very neat when he pastes these for a book.

Pastes daisy chains, strings colored straws, fancies or separates alternately.

He takes a great delight in

drawing a train of cars on the blackboard. Draws it very well.

Cannot sing but he enjoys all the games.

Ferdinand is very neat and quiet when he is working.

Havorka.

Eddie was absent one week this month. strings the beads, works with peg board and bead tile, builds with blocks.

Can say ball, mamma, and called me "Roberts" one day.

Enjoys the games and matches well.

Havorka. Alois. No improvement.

Herbert.

Marion has been regular in attendance the past month. strings the beads according to color, form or as dictated.

Recognizes and names the colors, red, orange, yellow, green, blue violet.

Works with the peg board bead tile correctly putting the peg and beads in the, order, red, orange, yellow

June.

grey, blue, violet,
Knows the forms, cube
cylinder, and ball and
names them.
Separates the parquetry
tablets into the different
forms. separates the colored
sticks.
During the past four
he has learned to sew
the first three punched
cards and we are over
one under one. the mats
that are four inches square
and have only five or six
slits.
Pastes daisy chains and
strings the colored straws
circle or squares alternately.
talks all the time, throws
catches and rolls a ball
very nicely. is learning to
sing very well.
Does not seem quite
as nervous as he did last
fall.
Marches well and
takes great interest in
the games. he is in school
five hours every day.

Adohler. Enoch is in the kindergarten two
and one half hours each day,
he has been regular in
attendance the past month.

June.

Enoch does not like to work. he
recognizes the colors and names
them. red orange. yellow, green
blue, violet. strings the beads
according to form, color, or
as dictated. works with
key board and bead tube
correctly. knows the forms
cube. cylinder ball, cone
pyramid, egg and triangle.
knows sorts one grade
one, over two, under two,
sees any of the punched
perforated or outline
embroidery cards. throws
catches and rolls a ball
very well. makes the different
motions in the songs but
cannot not sing.
marches well and
enjoys all the games.

McCormick. Gilliam entered the kindergarten
May 22 has been regular in
attendance since then.
Can work with bead and
key the strings beads but
not very intelligently.
Builds with blocks.
Does not keep good time
when marching but, he
enjoys the games especially
the ball games.

Gaultharp. William entered the kindergarten May 18. he has been regular in attendance.

He does not know his colors. calls all white.

Strings the beads but not according to form or color, works with peg tile and bead tile.

Separate the parquetry tablets into the different forms. he is very quiet. likes to play with the ball. and enjoys all the games.

Miller. Edgar entered kindergarten March first and has been quite regular in attendance since then.

He recognizes and names the colors red, orange, yellow green, blue, violet. knows the form cube cylinder and ball, strings the beads in color form or as dictated.

works with the peg and bead tile correctly. strings the colored straws, circles or squares alternately. pastes daisy chains.

Sews pricked and

perforated and outline cards, weaves over one under one, over two, under two.

Separates the parquetry tablets into the different forms makes stays out of them.

Marches well, talks well enjoys the games, throws, catches and rolls a ball, very nicely

Meacham. Eddie has been regular in attendance the past month.

He recognizes and names the colors red, orange, yellow, green, blue and violet, knows the forms, cube, cylinder, ball pyramid, cone rectangle and egg.

Sews any pricked, perforated or outline embroidery cards, weaves over one, under one, over two, under two.

strings colored straws alternating with circles or squares. strings the beads according to color or form or as dictated, works with the peg tile parquetry the colors in order, red, orange, yellow, green, blue, violet, also the bead tile.

Pastes daisy chains folds through the first sequence can do a little paper cutting, cuts pictures

out of catalogues or papers and pastes them rhymically in a little scrap book.

Separates the parquetry tablets into the different forms, counts to seven, separates and lays the sticks in order, sings a little marches well and takes a great interest in the games. Throws catches and rolls the ball.

Eddie is in school five hours each day.

O'Donald. Joe is in the kindergarten two and one half hours each day has been regular in attendance.

Recognizes and names the colors red, orange, yellow, green, blue, violet, and lays sticks, strings beads according to colors & form. works with the peg board and bead tile correctly. Counts to ten.

He cannot do the occupation work because he can only use one hand. sings all the kindergarten songs and sings several all alone.

Joe sits on the circle and joins in the games rolling or hiding the ball and sings in the other games.

Amburg Marie has been absent all but one week this month.

She strings beads, works with the peg board and builds with blocks but not intelligently. Cannot see any improvement.

Peterson. Alfred has been regular in attendance recognizes and names the colors red, blue purple and green. strings the beads according to form or color or as dictated. knows the forms and names cube and ball.

Works with the peg and bead tile putting them in order, red orange, yellow green, blue violet, builds with blocks. pastes, daisy chains, strings the colored straws alternating with colored paper circles or squares.

Sews any pricked perforated or outline embroidery cards. weaves over one, under one, over two, under two, over three under three.

Separates the parquetry tablets into the different forms.

Alfred is learning to talk can say mamma papa brother, sister, ball red, blue purple, green. doll, dog and cube. Makes the motions

while the other children sing, separates the colored sticks, builds with blocks, marches well, throws catches and rolls the ball very well and joins in all the games.

When we go into the circle he always thinks of Joe and helps him in.

Sayer. George is very noisy, wants to push the empty chair over and make as much noise as possible with his blocks and beads.

He will string the beads but not according to form or color. is learning to talk

Marches much better

Schmidt. Alfred has been regular in attendance receives added names all the colors, red, orange, yellow, green, blue and purple knows the form cube, ball, cylinder, cone, triangle, and egg, separates the parquetry tablets into the different forms, strings the beads by color or form or as dictated, works with peg board beads fully correctly.

Sews any of the pricked perforated or outlined

embroidery cards, weaves over one, under one, over two, under two, over three, under three.

Separates and lays the colored sticks, strings the colored straws, alternating with the colored paper circles or squares. pastes daisy charts, can fold and cut a little.

Can read and spell a number of words can count, sings very well and goes through all the movements in the songs. plays all the games, throws, catches and rolls the ball

Marches well.

Swanstrom. Howard sings better but cannot see any improvement in any other way

Jones. Johnnie has been regular in attendance entered the kindergarten in January.

Strings the beads but not according to form or color, builds with blocks.

Sewed several cards, the first pricked card.

Enjoys the games

June.

ayer she will go to the circle he always brings a chair for Joe O'Donald to sit on.

Cross. Jinnie entered the kindergarten the last week in February has been quite regular in attendance since then.

Recognizes and names the colors red, orange, yellow green, blue violet. Knows the boys cube cylinder and ball.

Strings the beads according to form or color or as dictated sorts. copy lays sticks, separates the parquetry tablets. works with the pegs and bead tile correctly builds with blocks.

Gives the first two pricked cards and several perforated cards, presses over boys under eye. pastes daisy chains, strings colored straws. cuts and squares alternately.

Talks well marches well and joins in all the games.

June.

Meisberg Louise entered school the first of May has been regular in attendance.

With a little help began string the bead and work with the peg-board correctly.

Builds with blocks has tried to paste picture in a little scrap book but is not very neat.

Served two of the first perforated cards.

He is very mischievous, always teasing the boys that sit near him unless he is carefully watched.

Throws, catches and rolls a ball.

Hixson Gunhild Entered Kindergarten in January. She has made a great deal of improvement when she entered school she kept her mouth open all of the time & drooled constantly so that she had to wear a bib she has learned to keep her lips closed and has learned to say several words. She can sew, weave, strings circles & straws, makes daisy chains, cuts with the scissors, marches & takes a lively interest in all of the games.

June 1899.

Harding — Gladys has been regular in attendance ever since she entered the kindergarten in Jan. She has shown some improvement the last two months has been much more independent in all of her work. She sews quite nicely now weaves over one under one strings circles & strans, knows the colors & the forms cube cylinder & sphere. She is quite helpful with the younger children She takes an interest in all of the games.

Kreder — Annie has been in kinder garten for almost a year and has made very little improvement. She cannot even amuse her self with the blocks & beads, and will not stay in her chair with out being tied in. She has to be watched Constantly. She has improved in her habits somewhat being much more cleanly and neat than when she entered.

Kemna — Atilia has been regular in attendance but has made no improvement She simply amuses her self but does not do any work. She strings beads but without any order. And when

June 1899

she builds with the blocks it is in the same way.

Langdon — Sarah is in kinder garten just one period, she does not make any particular improvement Can string beads and build with blocks. Enjoys some of the games.

Larson — Myrtle has been in Kindergarten the entire year. She has been very regular in attendance. Had learned to sew, weave cut and paste, string circles and strans, fold, knows the colors, & the forms cube cylinder & sphere. She sings well, commits to memory readily. marches well, joins in all of the games. Her articulation is as good as any child in kindergarten.

Miller — Maggie has been in Kinder garten all of the year. She has made very little improvement. Strings beads, plays with blocks, separates the sticks into their colors. She knows the colors red blue, & green. She can march and joins in some of the games.

June

Nagel — Lena went home the first of the month.

Lindford — Mary has been regular in attendance, She sews, outline embroidery cards and pricked sewing cards, weaves O^1U^1 O^2U^2 O^3U^3 O^1U^2 O^3U^1 O^3U^2, and has made the box pattern and the slanting lines, She uses the scissors very well. Knows the colors + forms of the beads but cannot name them, She can speak only a few words is so delighted to find any one who can talk the sign language with her.
She marches well, and takes a lively interest in all of the games.

Jackson — Hattie knows all of the colors and plays sticks by color or number to five, strings beads according to dictation, sews both pricked and outline embroidery cards, cuts pictures, strings circles and straws, weaves over one under one, pastes daisy chains She is in the ironing class two periods and in the sewing class one period. She is interested in all of the games and loves to

June 1899. — take care of the little children would be quite a help in kindergarten if she were more quiet.

Pippey — flossy entered kindergarten the beginning of the year has made a great deal of improvment in many ways. Her deportment has been so much better the last part of the year that during the first part. She sews both pricked and out-line sewing cards but has to be very carefully watched + given a good deal of help in the outline sewing. She weaves over one + under one also over two under two independently strings circles + straws, pastes daisy chains, separates the stick into their colors. She does not know all of the colors by name, but she distinguishes all of them. She talks but does not sing. Takes a great deal of interest in the games. marches well,

Rufflin — Elara has been in kindergarten since the middle of January. She has learned to sit quietly in her chair, to string beads according to color or form has learned the colors but cannot name them, she can say a few words but does not talk intelligently, she has sewed the first pricked sewing card

June. but cannot do it without a great deal of help. She marches. can throw and catch a ball, uses the peg board and bead tiles separates sticks into their colors, strings circles and straws. Takes an interest in the games.

Reynolds Vivian has learned to sew both the outline embroidery and pricked sewing cards and to weave over one under one, with some help in starting the strips. She knew the colors when she came, she can ~~sewing~~ string straws and circles strings beads, uses bead tiles and peg boards. Marches in line & joins in all of the games.

Smith Lillian has been very regular in Kindergarten since the beginning of the year. She is very slow in doing any kind of work and is not at all careful. She sews but not neatly. Weaves several patterns is more independent in weaving than in sewing although she has made great improvement in the neatness of her work. She can count to five strings beads according to number and form. knows the colors & their names. and the forms cube, cylinder sphere, square

June. circle triangle. She can talk but does not sing Takes a lively interest in all of the games.

Wahlstrom Selma has been in Kindergarten all of the year. Has learned to distinguish the colors & forms of the beads - Can sew the felt pricked sewing card with help. separate the sticks into their colors. use the peg-boards and bead tiles. she has a very sweet voice & if she could talk would make a nice little singer. She has learned a few words like ball, block, doll, papa, mama. She marches well and joins in all of the games.

Washer Emma has been quite regular in attendance all of the year. She has worked much more independently the last half of the year. Sews both the outline Embroidery and the pricked sewing cards, weaves under one over one, under two over two Under three over three $U2O1$ U^3O^2. cuts out pictures not very accurately, pastes daisy chains strings circles and straws, uses peg-boards & bead tiles. Emma knows the colors, & the forms cube, cylinder & sphere & circle

June. square and triangle. She talks almost constantly, sings some can catch a time very readily and has learned the words of a few of the songs.
She takes a great interest in all of the games and is very imaginative.

Powers Ellen has not been regular in attendence until the last two months, during that time she has been present every day. She has improved very much since she began to come regularly to kindergarten. Has learned to sew, the pricked sewing cards has sewed Nos. 1, 2, 3, 4, 5, 6, also simple outline Embroidery cards. Weaves Over one Under one. strings circles and straws & pastes daisy chains, uses the scissors in cutting out pictures. Knows the colors & forms of the beads but does not call them by name, She makes no improvement in speech. She joins in all of the games & marches well.

Becker. August has been regular in attendance his deportment is not as good as it was the latter part of the year.
He strings beads, weaves mats, sews perforated and pricked cards. Knows the six colors, lays the sticks and builds with blocks.

Becker. Hubert sorts sticks, sorts beads and strings them, sews the simplest cards with a little help. builds with blocks. works with the tablets He is very restless and has the same disposition as August, he is very stubborn.

Cross. Jimmie seems to have forgotten during the vacation especially the sewing and weaving, he had to commence at the very first with both. He remembered his colors and sorts, thus sorts the beads and strings them, builds with blocks. and pasted

September.

paqquetry squares on a sheet of paper very nicely.

Duffield. Ray has improved during the vacation. he takes more interest in his work and trys very hard to do his work first right. He served two cards this month sorts sticks, strings beads and lays the sticks, he matches better than he dis last year.

He has been regular in attendance.

Ernest. Frank is more restless than ever before, unless carefully watched he will take all the work away from the other children, especially the beads and blocks. Sorts sticks and beads and strings the beads.

Felix. George takes more interest in his weaving and can weave much better but cannot sew so well but think he will do better. He takes

more interest in the games than ever before but he does not start and lay the sticks as nicely as he used to.

Trobey. Ferdinand takes more effort to talk than ever before when he is asked what he is building with his blocks he tries very hard to explain and some times will make a motion with his hands to explain.

He weaves and sews very nicely and takes great intrest in all his work.

Herbert. Marion does not seem as nervous and excitable as he used to be.

He cannot weave as nicely as he did last year but he tries very hard and will improve all the time.

Marion works more independently, served two outline cards this month.

September Havorka 1899.

Alois has been present every day but has made no improvement.

Havorka

Eddie has been regular in attendance and seems to take more interest in his work than ever before, strings beads and builds with blocks, can say ball and block.

Jones

Johnnie has improved more than any other child. He is more active sorts sticks and strings the beads correctly. builds with blocks.

Smallhoup.

Orilly has been regular in attendance. he can sort the sticks and beads and can name the red and blue ones. He can name the other colors after me. except yellow he always calls white and cannot say yellow.

September. Orilliann 1899.

Orilliann has been present every day she strings beads and builds with blocks.

Miller

Eddie has been regular in attendance. he talks more than he did last year. he has improved in weaving and sewing and has woven two of the largest mats. this month one, one under one. pasted priquetry on a sheet of paper. getting the corners together very nicely.

Measkew.

Eddie takes an interest in his work has sewed several cards and woven three mats. when given a box of blocks he always builds a train using spools for the wheels. pasted a nice daisy chain and strings the colored circles, squares and straws.

Septembu. Eagle. Ralph entered kindergarten September sixth. he is very much interested in every thing. he picked one card and served four during the month he is trying very hard to learn to sew. are has sewen two mats with help. Enjoys the games very much.

Ambeg. Arie has been present every day but does not make any improvement.

Isaisberg. Louis has been in the kindergarten every day this month but first transfered to Miss Johnston the twenty ninth of Septemba. He would string the beads and build with blocks if Miss Harris or I would sit beside him all the times to help him from teasing the other children but as soony as we turned around to help some one else. he would touch some one or take their work.

September 1899

Birch Annie entered kinder garten the first day of school and has been present every day this month. She seemed less nervous the first of the month The vacation seemed to have done her good. She takes an active interest in all of the work and remembered just where she left off in June. She remembered all of the children by name and knew all from her class who had gone home She remembered Miss McRoberts and I and could tell us of the picnic excursions she had taken through the summer. She has sewed several cards - worn six mats, made a chain of circles and straws pasted squares, getting them quite straight in the corners. She joins in all of the games and tries to sing.

Johnson Gunhilda. Entered Kindergarten the first day of school and has been present every day this month. She had improved very much during the vacation is being able to hold her lips together She drules scarcely any now and tries very hard to talk she is very much interested in all of the work, and shows quite a good deal of

Sep. 1899. in her play and in the work with the gifts. She sews neatly waves - over one under one and A^2 U^2.

Harding Gladys was in kinder garten the first week but was transferred to Mrs Tanner's room.

Hanson Clara Entered kinder garten the first day of school and has been present every day. She is in the ironing class one period and the wet class another so that she is in kinder garten just one hour and a half. She does no occupation work - plays aimlessly with the blocks and beads -

Korler Annie Entered kindergarten the first day has been absent - days this month. She seems more restless and nervous than ever, is never quiet unless asleep and cannot be kept in her chair with out being tied. She takes no interest in any kind of work nor in the games.

Kemna Otilia Entered kinder garten during the first week of school. She seemed very glad to be back and remembered all of the children and teachers. Has made very little improvement

Sep. 1899. Miller Maggie Miller Entered kinder garten the first day of school and has been present every day. She makes very little improvement is in kinder garten 3½ hours being in the ironing class 1½ hrs.

Larson Myrtle Entered kindergarten the first day of school but was transferred to Mrs. Tanners room during the first week.

Nagel Lena Entered during the first week and has been present every day. She takes a great deal more interest in things going on about her, talks more than she did. She has sewed three cards and is sewing a mat her hands are very helpless but are becoming more useful as she uses them more.

Pippey Flossy. Entered kinder garten the first day of school has been absent two days. She remembered the teachers and the names of many of the children, had not forgotten how to weave or sew but did not remember the names of many of the colors. She has sewed several cards and woven

Sep 1899.

four mats this month. Takes a lively interest in the work and games.

Powers. Mary entered Kinder garten the ~~fourth~~ day of the month and has been present every day. She is very much interested and seems much stronger than she did last year. She will not try to talk but is ambitious to do all of the occupations She sews nicely & weaves over one under one independently. She is one of the most independent & little workers we have.

Riffling Clara. Entered kinder garten the first day of school and has been present every day. She is beginning to brighten up a great deal has learned to sew the pricked cards and can sew a circle, can not weave but tries so I think she will soon learn. she separates the sticks into their colors & strings the beads according to form or color.

Reynolds. Vivian entered Kinder garten the first day of school and has been present every day this month. She begins to work more independently, and is less

1899 Sep. perish in school than she was last year. She does all of the busy work, knows the colors, can count to five, sews & weaves.

Schmidt Alfred was transferred to Mrs Sanners room the first day of the month.

Swanston Howard has been present fourteen days this month. he makes no improvement.

Smith Lillian was transferred to Mrs. Sanners room but came back to the kinder garten. She is a great help in the kinder garten because she is so good to the little children and so helpful with them.

Sayer George. Entered kinder garten the first day of school but has not been at all regular in attendance. He is trying to talk more than he did during the Spring. the words he does say he says very plainly

Warker Emma Entered kinder garten the first day of school and has been present every day this month.

Sep- 1899.

She remembered nearly all of the children by name- could tell us about the Summer vacation. She picnics to the lake, and the walks she had taken. She is very much interested in her clothes and likes to talk about them. She has sewed several cards and woven three mats this month- made a daisy chain and a chain of circles and straws. She talks much plainer and is becoming more independent in all of her work.

October August. Oct 3 1899.

August has been absent five days this month, he is more restless than ever but when he works he is more independent more form into this month one of them is as difficult a pattern as we have. he has not been very careful with his sewing this month when he makes one or two mistakes he grows very irritable and says "I can't sew" but when the mistakes are taken out he is all right for a little while.

When I put the red orange, yellow, green, blue and purple balls on the table, I then ask him to close his eyes while I take one away he can tell whether I take one or two and the color of both, can do this with the cube cylinder and ball also. August sorts and lays sticks much better does not take any interest in these games unless he can sit in the middle.

He can show me one two, three or four colored any color that I mention.

October 1899. Bickev.

Hubert does not like to work very many minutes at a time. he sorts sticks very nicely names the colors, strings the beads according to color or as dictated, carry sort the different forms of parquetry tablets, made a little chain of plain straws and the colored circles, wove three mats five strips each with a little help, can thread his weaving needle, served two cards this month.

Cross. Jimmie Cross has been regular in attendance, served two cards with circles on them two with straight lines and one on the nine cards this month, wove five mats with five or six strips each, can thread his weaving needle, sorts and plays sticks names the colors counts to six, strings the beads according to form or color.

Talks much better than he did last year.

October. 1899. Duffield

Ray was absent the first week of this month. he articulation is much better than last year and he tries very hard to learn.

He sorts and lays the sticks and names the colors, strings the beads according to form or color, wove four mats with five strips each, threads his weaving needle, builds with blocks and take great interest in the games.

Ernest. Frankie has been regular in attendance he is in the kindergarten five hours each day. he seems to have a passion for blocks and will cry if he can't have them and build several forms from copy. when ever we give him beads to string he sorts out the different forms and builds with them instead of stringing them.

Frelie. George was absent one day he is in school five hours each day. He improves all

October 1899.

the time. served six cards this month. The weaving is very hard for him but with a little help he has woven three small mats. sorts the sticks and names the colors. when the colored balls are placed on the table, and he shuts his eyes while I take one away he can generally tell which one is gone also the cube cylinder and ball.

Ferber. Ferdinand is only in school one hour and a half each day. he has been regular in attendance, he can weave any mat or any card that we have in the kindergarten, can weave the most difficult patterns, builds very nicely with blocks, sorts the parquetry forms and he takes great interest in the games.

Havorka. Alois has been regular in attendance. he goes to the shop the first period and is very anxious to go; I believe he will do better in the industrial work than in the kindergarten.

October Havorka. Eddie has been regular in attendance. he takes no interest in the games but has not insisted in any thing else.

Jones. Johnnie served two of the first kindergarten cards this month. he is learning to weave but cannot do work independently yet. he takes great interest in all his work never sits in his chair with his arms folded and dreaming as he used to.

Johnston. Ernest entered kindergarten the twenty third of the month. Report next month.

Jones. Johnnie entered kindergarten the twenty third. Report next month.

Caulthamp. Willie has been regular in attendance, he takes more interest in his work, sorts his sticks very quickly and string his beads according

October. to color, builds very well with blocks.

McCormick. William has been regular in attendance but cannot see any improvement.

Miller. Edward has been regular in attendance. sorts his sticks and lays them as dictated, can show me one, two, three, four five or six red yellow orange green blue or violet sticks and count them.
When the colored balls are placed on the table. I can take one or two away while he closes his eyes and he can tell very quickly which ones I take away. can also do this with the cube cylinder and ball sorts the parquetry tablets and makes several forms with them copy patterns, & drawings folds very nicely from dictation builds with blocks.

Measberry. Eddie has been regular in attendance. he weaves

October. over one under one, over two under two $O^3 A^3$ and one with the narrowest strips three very narrow ones then one large. he sees any outlined or pricked pierced cards sticks his cards, can show one two, three four, or five colored sticks, says color and counts them. when the colored balls are placed on the table and he closes his eyes while one or two are taken away he can tell very quickly which color has been taken away, strings beads according to dictation, color forms. sorts colored sticks and lays them as dictated, sorts the parquetry tablets, takes great interest in the games especially the trees where they emulate the animals.

Nagle. Ralph has been present every day the past month he is inclined to be lazy he would rather play with his work. he can prick a card

October. but it takes a long time to learn to see the simplest pricked and outline cards. can weave a mat with a little help over one under one five or six stripes each. Dots and rays sticks can count to five and name the colors. string the beads according to form or color. studys the plain straws and colored circles. takes great interest in the games.

Amberg. Iris has been absent all but four days this month. No report.

Peterson. Alfred has been regular in attendance is in school five hours each day. He sews pricked and perforated cards weaves over one under one $O^2 U^2$. $O^3 U^3$. then he makes patterns for himself as over one under five over three under one and will finish the mat in that way. he is very nice about helping little

October. children sitting near him if he sees a mistake in their sewing or weaving he takes it out for them. He sorts sticks very nicely and says they are dictated build with blocks, sorts the parquetry tablets, makes daisy chains and strings the colored straws and circles or squares.

Swanstrom. Howard has been present every day this month but can not see any improvement.

Sawyer. George was absent two days this month. he strings beads but not according to form or color independently. He talks more and has not been quite as noisy the past month.

Waldmo. Peter entered kindergarten October twenty fourth 1899. Report next month.

Herbert. Marion has been regular in attendance. he is not as nervous as he was last year and he works

Octobe

much better, Ue strings beads according to form, color or as dictated. Sorts the colored sticks and names the colors, can show me one two three or four colored sticks, any color, sorts purple, grey, tablets, builds with blocks, sees the simplest pricked or outline cards, prick cards, weaves mats with four or five strips each over one, under one but not independently.

Enjoys the games very much especially the musical games.

Birch

Anna has been regular in attendance she works more independently than last year, we are sorry one ripped one ① 2 ½ sews any perforated or outline cards, sticks her cards, sorts the colored sticks very nicely, names the colors, strings the plain straws and colored circles or squares, pastes chain chains very neatly, lays sticks nicely, strings the beads according to form, color or as dictated. She talks always all the time.

October Hanson

Clara has been regular in attendance but is only in school in the afternoon, she has made no improvement.

Hanson.

Winifilde has been present every day and she improves all the time. She is learning to talk can say "mamma papa. boy, ball, sing, all done" When she has finished a great weaving a card. Sorts the sticks and lays them as dictated, builds with blocks. strings the beads according to form, color or as dictated. She loves to play "Little Chickadees" or the bird games.

Broley.

Anna has been regular in attendance but she does not improve, perhaps we give her the blocks or beads she throws them all on the floor, she seems to enjoy having someone pick them up, she always laughs and throws them down again.

Hemma.

Otelia was absent four days, she will not work independently. she does not like to do any thing

October. but stringg the colored beads.
She does not improve.

Miller. Onyag gie goes to the laundry
after recess and seems
to enjoy it. I think she will
make more improvement
in the industrial dept.
than in the kindergarten.

Eagle. Lena has been regular in
Lena attendance. she is learning
to sew and weave but
is very slow because she
cannot use her hands
very well. she sorts
sticks and stringgs the
beads according to form
color, or as dictated.

Apply. Flossie is in school three
hours each day. She
goes to the laundry
after recess.
She takes more interest
in her work, she served
several cards and
wove three mats
this month. she is
more contented this
year than last, does
not cry to go home.
She keys very hard
to sing, sorts sticks

October. and names the colors, and
stringgs the beads according
to form, color or as dictated.
She enjoys the games
very much.

Powers. Onyay has been regular in
attendance she improves
all the time, she has
woven four mats the
past month, two under
one and sews the punched
or perforated cards very
much. sorts the sticks,
stringgs the beads in
color, form, or as dictated.
She tries very hard to
do her work just right.
Onyay loves the games.

Rifling Blanche is learning to weave
and sew but makes
very little improvement.
She stringgs the beads
according to form or
color.

Reynolds Viviany has been present
every day this month. she
weaves two mats
one under
one and sews the
punched cards independently.
She knows the colors
and names them, sorts

Odotea

the sticks and can lays them in piles of two, three or four each. strings the beads according to color form or as dictated. Pastes daisy chains and strings the colored straws and circles or squares. Enjoys the games.

Smith

Lillie Smith has been regular in attendance, She reviews any of the mats upon any printed or perforated cards. strings the beads according to color form or as dictated. She is very nice to the little children, always willing to help them. She strings the plain straws and colored circles or squares, takes great interest in the games.

Crashen

Emma was absent one half day this month. She talks much better and can say the words when singing much better.

Emma pastes daisy chains and strings the colored straws and circles or squares, weaves one one underone, over two under

two. sticks her cards and can name any printed or pricked cards. She loves the games. strings the beads according to some color or as dictated. folds very well from dictation sorts her sticks and names the colors. counts to six.

Arhlstrom

Clara has been regular in attendance but she has not improved.

November.
Becker.
1899.

August was absent one day. his deportment is about the same. He is improved in his weaving this month takes great pride in finishing his mat first. But his sewing was very poor because he has been trying to sew too fast.

He enjoys cutting pictures and working in the clay more than any other work.

August pricks his cards very nicely and strings the colored straws and circles much nicer.

Becker. Hubert has been regular in attendance and has improved.

He weaves mats and sews the pricked cards but not independently. sorts sticks very nicely and names the colors. pasted a short daisy chain this month. pricked one card. he builds nicely with blocks and always says he is building a hospital.

He works with the peg board and strings the beads correctly.

Cross. Jimmie has been regular in attendance. he has improved quite a little in his sewing and weaving, especially his weaving. he can weave one of the smallest mats without help. can sew three different patterns of the pricked cards but the outline cards are much harder for him.

He sorts his sticks and builds with blocks.

Duffield Ray has been regular in attendance and improves all the time. He can sew a pricked card with a circle on it and also the first pricked card. can weave the smallest mat with a little help. Sorts sticks and names the colors builds with blocks strings the beads by some one as dictated but has to be told to string them every few minutes or he will have his mind on something else. Takes more interest in the games especially the ball games.

Crowfoot Ernest 1899.

Frankie has been regular in attendance. He can sort the sticks and string the beads but will not work independently. He is the most selfish child I ever saw. If the other children at his table are playing with blocks. he will take them away unless carefully watched. and the beads also.

Fredie.

George has been regular in attendance can weave the little mats with help. weaved four cards this month and pricked two outline cards. strings the beads according to form or color as was dictated. strings the colored straws and circles or squares. names the colors and counts to six. Takes great interest in all the games and is a very good boy in school.

Frobes.

Ferdinand is only in school one hour and half each day. He can do any of the kindergarten work but enjoys building with the blocks most.

Herbert Crowfoot 1899.

Marion has been regular in attendance and he is not as nervous as he was last year. He sewed four cards this month wove three mats with a little help. pasted a daisy chain. works with the peg board and strings the beads according to form or color as dictated strings the colored straws and circles. Marion enjoys the games more than any thing else especially the one where they have to imitate the animals.

Harris.

Alois has been regular in attendance. he goes to the shop one hour and half each day. He is more restless this year and does not make any improvement.

Harris.

Eddie can sort the colors with help but will not do any thing independently. he has been regular in attendance.

Jones.

John has been regular in attendance he sorts the sticks and beads and strings them according to form builds with blocks and can sew [illegible] card with a circle

work and the first picked card.

November. Johnston. Ernest has been regular in attendance this month and improves all the time. He sorts the sticks, names the colors and lays them as dictated stringy the beads according to form or color as dictated. can sew the picked work on the cards, pick the cards, weave any of the mats

Jones Johnny has been regular in attendance, during this month he has sewed four cards, two stroked and two outline embroidery cards- has woven two mats over one under one, can sort the colors but does not know the names of all of them. Stringe beads according to form- but not number. can count to ten.

Koeler Annie has been in Kindergarten every day this month she does not improve in any way.

Kemna Otilia has been regular in attendance makes no improvement.

Miller Maggie has been regular in attendance, she makes very little

Nov. improvement. can string beads according to form or color. builds with blocks, sorts colors. but shows no signs of improving.

Nagel Lena has been regular in attendance, she sorts the colors stringe beads according to form- color or number as high as three, sorts the form tablets, knows the square circle & triangle pastes daisy chain, & stringe straws and circles, Sews, very neatly but does not weave she joins in all of the games not taking a very active part but shows much interest in them.

Arnburg Ulrich has been regular in attendance, when he has a good deal of attention will show an interest in his work and can string beads according to form or color & sort colors- with the sticks. likes best- to build with the blocks-

Pippy Flossy has been regular in attendance Flossy has mastered the outline during this month it has troubled her for over a year but she has no trouble now in filling in the stitches properly. In every way she is improving

November

Powers. Ellary has been regular in attendance, she is improving in many ways, but does not try any to talk She sews very cared very neatly, weaves several patterns, uses the scissors quite well. Strings circles & Straws does parqueting work - folds - by imitation Joins very heartily in all of the games-

Riffling Clara has been regular in attendance, She is beginning to show some improvement; can sew a circle and the first pricked card, strings beads according to form sorts the colors - but does not name them sorts the forms - tablets, squares circles & triangles builds with the blocks but she takes one interest in all of the work and wants to try to do what the others are doing.

Reynolds. Vivian has been regular in attendance, Sews, weaves, pastes daisy chains, knows the colors - & can arrange them in prismatic order, Can count to ten & knows the combinations 2 and 1. and two and two, and recognizes four objects as four.
She is very observing and commits easily and remembers - well - what she has learned.

Nov-1899 Howard has been regular in
Swanston attendance. He makes no improvement, and takes up a great deal of the Teachers time because he is so helpless to amuse himself and so restless.

Smith Lillian has been regular in attendance. She doesn't make any marked improvement Is very helpful with the little ones-

Sayer George has been regular in attendance he takes a nap after recess. and is much happier and better, He amuses himself with the blocks & beads.

Washer Emma has been regular in attendance. she is improving in Articulation. She can name almost all of the objects in the room and knows the name of parts of the body as head, hand foot knee wrist, elbow eye ear. etc, Is very neat and accurate about her work.

Wohlstrom, Clara - shows no improvement is very restless and needs a great deal of individual attention. She has more talent for swinging than any thing else.

November Waldrum	Peter has been regular in attendance. He does no occupation work yet; can string the beads but does not pay much attention to the form although he knows the ball and likes to pick them out. Plays with the blocks and uses the peg boards.
Birch	Annie has been regular in attendance. She does just about the same work she did last month but is improving in neatness and accuracy.
Fittem	Emma has been present every day this month; she is in the sloyd class in the afternoon. She does very good work in the kindergarten, is neat and accurate and takes an interest in every thing.
Hanson	Elma has been regular in attendance, she makes no improvement, is in kindergarten just one hour and a half.
Huson	Gunhilda has been present every day this month. Shows improvement in many ways. This month has taken a good deal of interest in using the scissors and has succeeded in using them very well. She knows the colors & the forms - cube, cylinder

Nov. 1899	and sphere, circle & ovoid and triangle. She does all of her work very neatly. Takes a great interest in the games.
Sinn	August, has been in kindergarten two months. When he entered he could talk very little English, spoke in German almost entirely, he begins to speak English some now, in fact talks so well I have little difficulty in understanding him. He has learned to sort colors but knows only red by name. Has sewed two cards. The circle and first pricked sewing card. has woven one five strip mat. Takes an interest in all of the work and in the games.
Sinn	Henry. Entered kindergarten a bit the same time his brother did, Doesn't pick up the English quite so fast but is quicker to take up kindergarten work. He sorts colors. Stringing beads - according to color also form, uses the peg boards. Builds with blocks. Sews - the circle and first pricked card and has woven a mat with help. Can count to ten and recognizes as many as five things.

Jewett. Raymond entered kindergarten the latter part of October and has been in school every day. He knows the colors red, blue, yellow and green can sort the colored sticks string beads according to form or color. strings the colored straws and circles and sewed two cards the mouth with the outline of a circle on them.

Moulthrop. Williams can sort the colored sticks and strings the beads according to form or color and can sort the parquetry forms. He has been in school every day this month.

Holmes. Williams can build a little with blocks, strings the beads but not according to form or color. he has been regular in attendance.

Miller. Eddie improves very rapidly sorts the colored sticks and names the colors. strings the beads according to form color, number or size dictated. sews any punched or perforated outline cards. he sews better than any other

child. can wear a coat of any size or one under. Sorts colored strings and circles, pastes the daisy chains and builds with blocks.

Measkem. Eddie is more careful about his sewing and progress sewed two large outline cards this month. strings the beads according to form or color. names the colors, sorts the sticks and lays them as dictated takes great interest in the games.

Nagle. Ralph sorts the colored sticks, names the colors. can wear a little mat or one under. strings the beads according to form or color. sewed four cards this month. he enjoys the games very much.

Peterson Alfred has improved much in his sewing this month. he sewed two very hard outline cards besides several small ones. weaves O' & D' & sorts the colored sticks strings the beads according to form, color or as dictated. He has been regular in attendance.

Dec-
1899.

Birch

Annie Birch has been regular in attendance, she has sewed several large Embroidery Cards - very nicely for Christmas. Has woven five mats, made a long daisy chain pasted a little scrap book for her-self and helpped to paste one for the Hospital Children. She usually does her work very neatly but just for naughtiness will sometime, tear her Cards. When she does the greatest punishment that can be given her is to put her sewing away and not let her have any for a day or two for she loves dearly to sew.

Hanson Velara is regular in attendance is in kindergarten only. One hour and a half. She does not do any ~~thing~~ in school -, cannot do any of the occupation work and will not even amuse her self with the beads or blocks.

Huson Sunhilda has been in school every day this month She has sewed two large Embroidery cards - and has done them very nicely. Has woven several mats, made a long daisy chain, & pasted a little scrap book for her-self & helped make one for the Hospital children Sunhilde is neat and careful and quite independent. She tries now to say a great many words - but only a few of them I can understand.

Korler Annie Has been regular in attendence makes no improvement what-ever, She has seemed to me to have gotten worse than better.

Kemna Otillie has been regular in attendence, she can sort the colors - & storing them & sorts the sticks but make no ~~makes no~~ improvement

Miller Maggie is regular in attendance. has made no improvement

Nagel Lena has been regular in attendence. can sort colors - & will string beads according to form or color from dictation builds with blocks - sorts the sticks & lays simple figures the square, & triangle, & can lay them in two's or three's she sews - but does not weave. Her hands are quite helpless. Is interested in

Dec 1899. the games. Can talk but does not sing.

Pippy Flossy has been regular in attendance. She has sewed two large embroidery cards for Christmas. Made a reversal mats, & pasted a long daisy-chain. She made herself a little scrap book and helped paste one for the Hospital children. She does not cry nor get angry nearly as often as she used to. Is very neat about everything she does and likes to straighten up disordered boxes & clean the cupboard.

Powers. Ellen has been regular in attendance has not been absent a day this month she is improving every month with her hand work is one of the best workers in the kindergarten. She makes no attempt to talk. Has sewed three large embroidery cards and woven three large mats this month.

Rifflin Clara has been regular in attendance. Is improving some in her sewing, has not learned to weave a mat but is not satisfied if she does not have a mat

Dec 1899. to weave when the rest do. She sorts the sticks, strings beads according to form and color. She helped to make the scrap book for the Hospital children. In arranging the pictures she laid them always right side up.

Reynolds Vivian has been regular in attendance. She has been very lazy this month has sewed just two cards and has not made even one mat. She helped to make the picture book for the hospital children. She does not like stick to one thing very long is always wanting a change.

Smith Lillian has been regular in attendance. She is improving some in her sewing but is not as neat as I would like to have her. She tries hard but it may be it is on account of her eye-sight that she makes so many mistakes. She is very helpful always. helps the little boys put their blocks in the boxes and is very gentle.

Dec 1899. Wahlstrom

Edna has been regular in attendance. Strings beads according to form but not color. Is learning to say a good many words. Knows the names of almost all of the children & calls me by name.

Washer

Emma has been regular in attendance, has done some very nice work this month Sewed three large embroidery cards and wove four large mats. She made a daisy chain this month of two colors - white and pink five of each color and a long chain not making a single mistake, and not seeming to stop and count each one for she made it in a very short time. She made herself a scrap-book & helped make the one for the Hospital.

Ernest

Frankie has been regular in attendance Frankie is not willing to do anything but play with blocks, but he will sort sticks & string beads when he knows that he can't have the blocks although he always cries for them & will run for any table when he sees them brought out.

Dec 1899.

Havorka Alois has been regular in attendance this month. He still works in the shop the first hour & a half in the morning. He makes no improvement in his kindergarten work.

Havorka

Eddie has been regular in attendance He is improving in his habits is much more cleanly and is more quiet in his seat and takes more interest in his building also in the games. He can sort the colors.

Ivers

Johnny has been regular in attendance. Has sewed three cards and woven three mats this month, can sort sticks string beads according to form or color Counts to ten without making a mistake. Strings straws & circles & pastes daisy chains, knows the colors orange, red, & purple. He is in sloyd the last half hour of the day.

Arnbury

Ure has been regular in attendance. He sorts sticks & builds with blocks & strings beads but does not make much improvement.

Dec Howard has been in school
every day this month.

Swanston He won't do any thing
lately but look at pictures
and tear paper. He is
so fond of a picture of
Soldiers and want Teacher
a book that has soldiers
in it. He loves music
Does not do any of the
Kindergarten occupation
and has gotten tired of
blocks & beads. once in a
while he will pick out all
of the balls he can find from
the big box of beads.

Sayer. George has been in school
every day this month
He takes a nap always after
ten, so is not in after
recess. He loves to build
with the blocks and this
month has learned to pack
them neatly away in the box
so she spends much of his
time in tipping them out
& packing them in again.
He is learning to talk fast
says almost every thing now.

Waldmun Peter. Has been in
Hospital all month.
No report.

Dec
Sins August has been regular
in attendance. He has earned
four cards this month all
easy ones the first two
pricked cards & two outline
cards doing the perforating
himself. He has woven three
mats and can string circles
and sloans, Corks sticks
& strings beads according
to form or Color. Joins in
all of the games. Can throw
and catch a ball. He marches
but soon gets tired. Tries to
sing and is learning to talk
English very fast.

Sins Henry does just the same
work that August does
but is neater & more
careful about it. He loves
pictures, and talks very
intelligently about them.
He is a great mischief and
likes to tease. Will tease me
by holding his card behind
him when I ask him to give
it to me - and laugh so very
heartily over a joke.

Dec. 1899. Becker. August has been in the hospital all this month.

Becker. Hubert has been present every day. He served two cards with a circle outlined on them and one with a house outlined. Drove three little mats with help and picked two cards. Hubert pasted a daisy chain and made a short chain of colored straws and circles.

He has heard some one talking about the new hospital and when he builds with blocks he always wants to build a hospital and make the beds to put in it and calls two or three of the blocks sick children.

Hubert sorts the sticks and lays them very nicely, strings the beads according to form or color as dictated places the pegs in the board and if given a box of beads he can put a bead over each peg of the same color.

Dec. Cross. Jimmie has been present every day.

He sewed three pricked cards, two cards with a circle outlined on them and one with a cup on, drove three little mats, six stripes each card one a size larger.

Jimmie pasted a daisy chain much better than ever before, pasted the one light green then the dark green etc.

He sorts the sticks and strings the beads correctly and pasted one page of a scrap book very nicely.

Duffield. Ray has been regular in attendance.

He takes more interest in his work, sewed four cards and drove three mats with a little help. Pasted a daisy chain very nicely, sorts the sticks but the works very slowly and strings the beads according to form or color.

Dec. 1899 Frelic.

George has been present every day he pasted a short daisy chain served five cards this month and wore three little medals my stripes each. one card that he served had a cup outlined on it.

Froben.

Ferdinand has been regular in attendance but his in the kindergarten only in the afternoon.

He served three large embroidery cards and wore four large mats. and pasted a daisy chain two of each color at the time.

Herbert.

Marion has been regular in attendance.

He served two pricked cards. two outline cards with a circle on them and one with a hat on.

Wore two mats with six stripes each. pasted a very nice daisy chain pricked one card and pasted two pages of a scrap book for the hospital children.

Dec. 1899 Jones.

Johnnie has been regular in attendance he served three pricked cards and wore one mat. he can sort the sticks correctly and string the beads according to color as dictated. and sort the parquetry tablets.

Johnston

Ernest has been regular in attendance served three large embroidery cards and two or three cards. wore four large mats and two small ones pasted a daisy chain two pink and green alternately. pasted two pages in a scrap book for the hospital. can print all the letters of the alphabet from a copy and can write his name. pricked four cards. knows the colors. sorts the sticks and names the colors. strings the beads according to color. form or as dictated. sorts the sticks he can lay them in piles of two three or four.

Dec. 1899. Jewett.

Raymond has been regular in attendance this month and has been more interested in his work this month.

He has picked three cards and served four cards. one with a cyclamen one. one a house, a flower and one picked card. pasted a very nice daisy chain. pasted one page in the picture book for the hospital, sorts his sticks and lays them in piles of two or three. wore two little mats.

Hoops. Albion entered the kindergarten the fifth day of December and has been regular in attendance.

He knows the colors names them. sorts the sticks and lays them as dictated, strings the beads according to color form or as dictated.

pasted a very nice daisy chain. pasting two of each color at a time. works with the peg board correctly. builds with blocks very nicely. builds houses merry go rounds. chairs

Dec. 1899

tables and beds. can draw a very good house, tree and train of cars. served four outline cards. and wore three little mats and two of the largest O'K.

Coulthamp. Willie has been regular in attendance. sorts the sticks independently and strings the beads according to form or color. served half of one card

McComids. Orellana has been regular in attendance. he strings the beads but not according to form or color. and puts the pegs in the peg board.

Miller. Eddie has been regular in attendance. he served three large embroidery cards and pricked three, wore four large mats and three small ones. pasted two pages of the picture book for the hospital pasted a daisy chain. two red and two pink alternately. sorts the sticks and lays them in piles of two, three and four.

Eddie has been regular in attendance. he served two large embroidery cards and four pricked cards. wove three large mats. pasted a daisy chain. pink and green strips of each color and did it correctly. and pasted two pages of a scrap book.

Ragle.

Ralph has been regular in attendance. served three outline cards and wove four little mats. pasted a daisy chain and pasted two pages of a scrap book very nicely. cut out pictures and pricked three cards.

Peterson

Alfred Peterson has been regular in attendance and has served three large embroidery cards pricked them and served two small cards. wove four large mats and pasted a long daisy chain. reads simple and lavender two of each without making one mistake. and pasted two pages of a scrap book.

January. Becker. August. 1900.

August has been regular in attendance. he served five cards and wove four mats three of them 2×2, 2×3, 2×2. he wove these without any help or pattern. pasted a long daisy chain two dark green then two light green.

Becker.

Herbert has been regular in attendance. he served four cards with two circles on each one and wove three little mats. When working with the colored sticks he will sort them quicker than any of the boy at the table. then he always wants to build a pen. he builds much better with the blocks. makes beds. chairs. tables horses and sleds. pasted a short daisy chain. puts the colored pegs in the peg board then places a bed of the same color over each one. sorts his sticks in piles of two or three each.

Jan. 1900. Cass.

Jennie was absent one day. She takes more interest in her work and works more independently. She sorts her sticks very nicely and quickly, and lays them as dictated. sewed five cards this month. Laid two new patterns wove three of the smallest mats & about half of the a size larger. pasted a very nice daisy chain.

Duffield

Ray has been regular in attendance his work this month shows more improvement than ever before. he wove two mats. and sewed two cards.

Ernest

Frank has been regular in attendance. he does not care to do anything but build with blocks. He seems to want something that he can make a noise with.

Frelic.

George has improved more in his sewing this month than in any thing else. sewed four cards two sheep patterns. wove three

Jan. 1900. Forbes.

mats O. O. six stripes each. he has been regular in attendance. Ferdinand comes to the kindergarten only in the afternoon but he can do all the work very nicely.

Jan. Faubet.

Grafton has improved in his sewing. he sewed two cards this month without making one mistake. and sorts his sticks much better. wove three mats with a little help.

Birch

Annie has not been absent this month. She improves every month in her deportment, and is much less nervous than she used to be. She is more careful and neat too in the way that she does her work. Has sewed several cards woven 4 mats made daisy chains & has learned to recognize four objects.

Tritten

Emma has been present every day this month. She is very much better natured this year than last handly ever gets sulky. She does very nice work in the Kinder garten and is quite helpful both the other children She did not improve any in Sloyd so was dropped out of the class.

Jan. She is in Calesthinics from 2:30 to 3:00 oclock.

Hanson Velma has been regular in Attendence but makes no improvment whatever. Does not do any occupation work and will not keep in her seat even unless constantly watched.

Huson Gunhilde has been regular in attendence. She attempts every thing we do in kindergarten and usually succeeds very well She can not use her hands in cutting very well but is improving. She tries to talk well but has hard to repeat words after us. She has attempted to sing the other day but did not succeed very well.

Henderson Isabella came back the first of the year. Seemed to remember all of the little girls and had not forgotten how to match the colors. She plays with blocks and strings beads.

Hawks Albert has been present every day this month. He makes no improvment.

Hawkins Eddie has been regular in attendence, He is improving some in deportment and has made

several attempts at sorting the colors this month- Will string two colors or two forms qit the beads without making a mistake, for instance a red cube and a green ball, like this □○□○□ or the cubes together & the balls together so □□□○○○. He sings carrying the tune but cannot say the words.

Jones Johnnie has been present every day this month. Has sewed four cards and woven three mats o'l. He pastes daisy chains, cuts outline pictures- sorts & knows the colors- also knows the forms- cube cylinder & sphere. He is in the little singing class and in the Sloyd class.

Korber Annie has been present twelve days this month. Is in the hospital now. She makes no improvment-

Kenna Atillia has been present every day this month- She makes no improvment.

Sims August has been present every day this month. He can sort the Colors. and tries to arrange them in prismatic order will ask me what comes after red- etc- uses the peg board, sews, weaves, strings

Jan — circles and straws. Joins in the games. Is somewhat trouble some about teasing but does it to be mischevious.

Sims — Henry has been regular in attendence. Improves faster than August, Lens letter, can weave, paste daisy chains, sort the colors. use the peg-boards. and can build very nicely with the blocks.

Miller — Maggie has been regular in attendence makes no improvement.

Nagel — Lena has been regular in attendence she has sewed two cards, and weaven one mat with help. She can not use her hands well so is slow in making much improvement.

Armburg — Ulric has been regular in attendence showed more improvement this month than ever before has learned to string the beads according to form. + also color. builds more intilligently with the blocks and talks some. Loves to look at pictures.

Pippig — Flossy has been regular in attendance except during the first week when she was present only

Jan. — one day so that she has been in school just fourteen days this month. She has sewed six cards worn Jans mats made a long daisy chain for the play room. Is in drawing class one period a the day. She joins in all a the games & tries to sing but cannot carry a tune.

Cowan — Ellen has been present seventeen out a the twenty school days this month. She does very nice work in the kinder garten is very neat and accurate about all a her work. Sews, weaves, sorts colors & pastes daisy chains, uses the blocks in building or laying forms & in number work combining ones and two's Joins in all a the games and takes a great interest in them.

Pippig — Clara has been regular in attendence she has sewed two cards but is not very independent about her work can use the scissors sorts the colors and strings the beads according to color & form, but not from dictation she imitates and will do it after I have given her a copy to follow.

January.

Reynolds Vivian has been regular in attendence. she is inclined to be lazy, she can sew & weave and do almost any of the occupation when she wants to but she would much rather play - as she is not so very strong I do not keep her for long at any close work. She is quite imagnative and loves the games.

Swanstrom Howard has been regular in attendence but makes no improvment He is somewhat a problem in kindergarten there are so few things he will do and he is so restless and destructive. He still lingers over the waste paper basket when ever he has a chance.

Smith Lillian has been regular in attendence. She does just the same work as last month is getting to be a great help in the kindergarten, can thread needles and helps the little ones in many ways. She has improved in her sewing is more careful and makes less mistakes.

Sayer Geo. Has been regular in attendence is making great improvment in his talking says every thing

January. now. Will ask for what he wants. Is improving in deportment also. He strings the beads can pick out the balls now and the red cubes, but unless he has a teacher beside him to guide him usually puts them on miscellaneously.

Washer Emma has been regular in attendence She has sewed five cards, woven four mats, Is beginning to have quite an idea of number, can count to six and recognize any number of objects from one to six. She improves right along in talking and in all of her work.

Wahlstrom Edward has been regular in attendence. She strings beads and plays with the blocks will put pegs into the peg-board but cant with any intelligence.

Waldron Peter has been regular in attendence. He sorts colors. Strings beads uses peg-boards. has sewed one card with help. Does not show much interest in the games, Is very quiet

Campbell LaVeda Entered about the middle of the month and has been absent the hospital the

Jan. last week. She can sort the colors - use the peg-boards & string beads, builds with blocks, ~~She~~ mind is much more active than her body.

Peterson Henry Entered the first of the month. He sorts colors strings beads & plays with blocks.

Schneider Sherman Entered the first of the month, He strings beads and builds with blocks. Is very much interested in the games. and loves to march

Jones John has been present every day he served three packed cards and wove two little mats. He sorts the sticks very quickly.

Johnston Ernest surprises all the time he served three new patterns this month and wove five mats. He loves to build with blocks makes houses engines, beds. tables and chairs. can cut out pictures very nicely.

Jewett Raymond has been present every day. he takes great interest in all his work served five cards this month found very seldom makes a mistake. wove two mats without help. He is very proud when he learns to do his work independently.

Work. Albin improves all the time he can weave the largest mats 6" x 6", 6" x 12" can serve any of the packed cards and has served four entire cards. He can cut out pictures very nicely. pasted along daisy chain alternating dark and light green. builds very nicely with blocks. always builds an engine. depot and a school house.

Smalltrack Addie has been regular in attendance served two cards. and wove two mats with a little help. can sort the sticks readily and string the beads. pasted a short daisy chain without help.

1900.

LaBonnick — Willie has been present every day but cannot see any improvement.

Carlin. — Eddie has been regular in attendance served five punched cards and one outline card wove four mats. sorts the sponge tables and sticks very nicely.

Cruikshank. — Eddie has been present every day he has been quite lazy this month only served three cards. one pattern he did not like so would not work fast. wove four mats.

Peterson. — Alfud has been in the hospital all but one week this month. No report.

Nagle — Ralph has improved in his sewing has served three new patterns this month and can weave the smallest mat independently. pasted a short daisy chain.

Becker 1900. — August has been present every day this month. He served seven cards this month one was an envelope and one a flag. wove three mats one large one and two small ones. pasted one star made of diamond shape colored papers, folded three little picture frames and folded one wagon and pasted it on card board using the colored circles for wheeles. made a long daisy chain and made a chain of colored squares and colored strips. builds very nicely with blocks always builds an engine and a train of cars.

Ralph has been present every day. served three cards with two circles on each one and one with an envelope outlined on it. wove eight little mats. pasted a very nice daisy chain and folded two little picture frames. folded the box for a wagon and pasted it on a piece of card board with the colored circles for wheels. also pasted diamond shaped colored pieces in the shape of a star.

Swansbrow Howard continues about the same.

Overhew. Frank has been regular in attendance he loves to serv and would serv all the time if we would let him. he pricks the cards

Feb 1900.

very nicely served five cards this month wove four mats pasted a very nicely daisy chain alternating with light and dark purple folded a little picture frame this morning for the first time and folded and pasted a wagon on a piece of card board. He goes to Lloyd in the afternoon.

Birch — Annie has been present every day this month. Grows less pedish and nervous, every month, has served 8 cards, woven five mats made several daisy chains helped to make a scrap book for the hospital and tried to learn to speak a piece for Washingtons birthday but failed. She was not able to concentrate her mind on one thing long enough to accomplish any thing. She could not even repeat the words after me but would be a word or two either behind or a head of me.

Fiftieth — Emma has been present every day this month. She does very brick hand work. Her sewing couldn't be neater or nicer. She weaves very well too but not many patterns. She likes best to do the occupation work and would

Feb. 1900.

perfer sewing all of the time to doing any thing else. She enters into all of the games & talks some but does not make long sentences.

Hanson — Celesta is in Kindergarten only half an hour now. is in the laundry one period the net class another and is out doors in the afternoon for 3/4 of an hour.

Huson — Gunhilda has been present every day this month. She is improving very much in the use of her hands. Does all of the Kinder garten work with out any difficulty. Tries to talk & can say the names of several of the girls in her class.

Henderson — Isabella has been present every day this month. She can sort the colors & string the beads knows the different forms not by name but can string according to the form, picking out the heads cylinders & cubes separately

Jarvis — Johnny was present the first nine days of the month but has been the rest of the month in the hospital.

Korler — Annie. Transferred to Skinner Hall.

Feb. 1900

the first of the month.

Kemna — Otillia has been present every day this month. She is very restless in school is not satisfied to do the work given her for any length of time. Makes no improvement.

Linn — August has been present every day this month. Has sewed four cards worsted two mats, Sorts the colors & distinguishes the different forms of the beads. Knows how to count to ten. He sings quite a good deal while he is at his work carrying the tunes very well. Is learning fast to talk English

Linn — Henry. Has been present every day this month. Does almost exactly the same work that August does. He enjoys the games very much loves to throw and catch the ball. Is very roguish and a great tease, not so much with the children as with older folk liking to torment them by keeping them waiting when he knows they are in a hurry. For the same reason does not mind very well.

Feb. 1900

Miller — Maggie has been present every day this month. Does not make any improvement.

Nagel — Lena. Distinguishes and names all of the colors - Pastes the paper chains and strings circles and strans.

Lena very neatly. Cannot weave because she has not good use of her hands but tries hard. She uses her hands much better than she did at first. Marches in time and forms in the games.

Does not talk much - and does not try to sing.

Arnburg — Ure has been present every day this month. He distinguishes the forms of the beads and strings them according to form but not color. When he has the personal attention of the teacher to keep him interested he will separate the colors. He made a chain of circles & strans but had to have the circles & strans given to him one at a time alternately. Otherwise he put them on the string at random. without any order.

Peterson — Henry has learned to distinguish the forms of the beads & can string them according to form

Feb. 1900.

will separate the red ones but - not unless watched + helped. She builds with the blocks - loves to play with the ball makes a chain of circles and strains. Cannot sew yet; nor weave. Uses the peg boards some. Joins in all of the games and marches in time.

Pippy

Flossy - Has been in Hospital All but three days of the month.

Powers

Mary. has been present every day this month. Sews very neatly and nicely and quite independently Weaves by one's two's + three's, + O'U's O'Ll's. Knows the colors + forms, uses - peg - boards - pastes circles + strangs + strains + circles. Cannot talk any. but understands every thing. Is very fond of working.

Piffling

Clara has been present every day this month. She sews but not accurately or neatly, weaves over one under one. Distinguishes the colors + forms of the beads - strings them from dictation. Tryes to sing. Does not talk much. Marches in time + joins heartily in the games and general exercises.

Reynolds

Vivian Has been present every day this month. She distinguishes all of the colors and can name each Also the ball, cylinder and cube. Strings beads and lays sticks by color + number to five. counts to ten, Sews any embroidery card. Weaves Over one under one - Over two under two, over three Under three. working independently Uses scissors quite well. Strings strains + circles alternately Marches in fairly good times. And takes an active part in all of the games. Can talk very intelligently Learned three verses to speak for Washingtons birthday + spoke them with - Emma + Polly with out a mistake.

Smith

Lillian has been regular in attendence. She does just about the same work but helps very much with the little ones often taking charge of a table of children who are stringing beads. She is very gentle and kind with them.

Sayer

George has been absent - three days this month. He is improving very much in talking makes long sentences now. Uses the peg - boards Strings beads. separates the sticks into the different Colors. builds with the blocks - Marches in good time Joins in all of the games.

Feb.
1900.

Washer Emma has been present every day this month.
She distinguishes and names all the colors and strings beads according to color or form as dictated sometimes stringing 6 cubes + 6 beads alternately without a mistake.
Wears- A¹U¹ A²U² A³U³. A²U¹, A³U² A³U¹.
Sews any outline card, is very neat and independent about her work. Has a good memory learned three verses to speak on Washingtons birthday in a very short time.
Marches in good time, Can toe-step + waltz + has learned the [illegible] March + dance.

Wahlstrom Clara has been present every day this month but makes no improvement.

Waldron Peter has been regular in attendance. He begins to brighten up a good deal. Distinguishes the colors + forms of the balls but does not name them. Uses the peg boards separating the colors very nicely. Has sewed one circle and Woven one mat. Marches in line. Joins in the ball games but no others.

Feb
1900

Schindler Sherman has been in school for two months. During that time he has learned to sit in his chair quietly during school time to string the beads and to pick out the balls and put them on the string separately. He uses the peg boards but not intelligently. Marches + keeps time to music by clapping. Enjoys the games.

Campbell La Veda has been present every day this month. She sews weaves; strings beads, uses peg boards, pastes daisy chains, builds with the blocks. Does not sing. Cannot walk very well with out some support.

Bean Bronnie entered Kindergarten the second week of February.
She has sewed six cardboard mats, made one chain of circles + straws, and one daisy chain.
She distinguishes the colors + forms of the beads and names them. Can say every thing. Loves to play with her doll + often brings it to Kindergarten and has it sit by her.
She marches in line + Joins in all of the games and exercises

March 1900.

Burch — Annie has been regular in attendance She has learned to fold the new sequence, has learned the dictation front - back. right - left. Has sewed four large embroidery cards. wears three mats. Is out doors ~~for a half~~ an hour the first period in the morning.

Fritlem — Emma has been regular in attendance. Is out doors the first half hour in the morning. She is becoming more independent about her work. Sews very nicely, weaves several patterns, uses her scissors well in cutting out outlines. Is interested in all of the work. Is beginning to comprehend something of number.

Hanson — Selma — Regular in attendance makes no improvement.

Huson — Gunhilda has been regular in attendance She is out doors for half an hour during the first period. Is improving in all of her work. Has learned to fold a new sequence. She tries very hard to talk.
