Order of Exercises

A. M.	
8.30 - 9	Class A. in numbers
9 - 9.30	Class B. in numbers
9.30 - 10	Individual work
	Recess
10 - 10.30	
10.30 - 11	Class A. in Word Method
11 - 11.30	Class B. in Word Method
11.30. 12	Individual work with Slates
12 - 12.15	Kindergarten work
P. M.	
1.30 to 3.	Manual Class

Blakesly Lawrence

September 1894

I have Lawrence only in the manual class I find he can do beautiful work if he will, but it is quite difficult to get him to do his best, he is very drowsy in class, his deportment is not at all good.

October 1894

Lawrence has worked very nicely a few days and has improved in deportment by strict watching

November 1894

In the manual class Lawrence has not been a success this month he is so very indolent that it is almost impossible to keep him at work, his deportment is about as last month In the sewing class he hemed three towels and one apron

December 1894

I am quite sure that Lawrence has made some improvement in his deportment So far I have been unable to find out any way in which to get him to work, I know he is capable of doing good work if he would, the fact has been fully demonstrated this month, he made two pillow cases the first he worked on three weeks and a half, the other he finished in two days, He does no school work in my room

January 1895

Lawrence does not seem to improve very much, he works just about as usual. This month he has made several towels one pillow case + one sheet. his deportment is improving he does not seem so dowsy, and has not talked so much.

February 1895

Lawrence has done very nicely this month in the industrial class has made one sheet and hemed a few handkerchiefs, his is improving in his deportment is not so stupid as he is sometimes does not talk so much.

March 1895

The warm day seem to have a bad influence ovd Lawrence in making him more drowsy it seems almost impossible for him to over come this sleepy habit he has not done as good work this month as I had hoped he would, he has made one pillow case and two handkerchies, his deportment is generally quite good,

April 1895

I have very little to report for Lawrence his work this month is not at all satisfactory he seems to be retrograding he has spent the sewing hour this month in making two few small handkerchieves work is a perfect drudge for him, his deportment is quite good of course one must keep reminding him of his duty,

May 1895

Lawrence Blakely, to me is an enigma I am sure I do not know what to think of him, we know that he can work and has done beautiful sewing but now nothing seems to arouse him I have tried praising him, punishing him, and rewarding him and nothing seems to do the least particle of good, this month he has spent in making one pillow case, and I am sorry to say that it is very poorly done, I really think he can not make himself stay awake, his deportment is about as usual.

June 1895

Lawrence has not improved in his sewing this month he has made one pillow case and one or two handkerchieves the warm weather has a tendency to make him more drowsy than usual. his deportment is much improved since the commencement of the school year

Cohen Penny

September 1894

This is a child of whom we may expect very little in actual school work in the manual class he can do the simplest kind of work, and that not at all satisfactory. he is kind does not give any trouble except he is quite restless.

October 1894

About the same report as last month.

November 1894

In the sewing class Penny does the very simplest kind of work such as taking out bastings and helping to fill the hammock needles, he is inclined to be restless yet does not give very much trouble

December 1894

Penny does very little work of any kind in the chart class he seems to take a little interest. he will work quite busily putting the sliced animals together and enjoys it. his deportment is very good

January 1895

Penny seems a little more interested in the chart class I think perhaps he does all he is capable of doing in the sewing class he basts those common handkerchiefs and does it quite well. While he is of a restless disposition, yet he is not a hard child to govern,

February 1895

Penny Cohen. I think tries to learn but it is very hard indeed for him he seems to be more anxious to learn than at the beginning of the year, in the industrial class he has basted several handkerchiefs very well keeps his work clean and really enjoys it, he gives me very little trouble in any way

March 1895

Penny seems to be more interested in all this school work than he was a few months ago of course there is very little that he is capable of accomplishing he can fit the blocks in the form boards and put the sliced animals together i.e. some of them assorts the colored sticks quite nicely with a little help enjoys being errand boy with the exception of his restlessness, he gives very little trouble in school.

April 1895

Penny of course does very little work of any kind but I am sure he is making some progress in what he is doing he likes school work much better than at the commencement of the year he likes to be in the chart class and I think does try to learn, but his imperfect articulation and lack of the power of concentration are two obstacles I am very much afraid he will never overcome he gives very little trouble in school his sewing is of the very simplest kind.

(His next report is on page 77)

Dennison Dell

September 1894

October 1894

Dell is a new boy in the school and has not done much work I feel quite sure that he will be able after a awhile to do quite a little school work he has learned some words in the Word Method, and can make all the numbers to ten. In the sewing class he has learned to thread the needle and to baste a towel. He is inclined to be a little stuborn but does not often display his temper I am very sure he will be easily managed

November 1894

Dell has learned five lessons in the Word Method and recites much better than last month. I can see that he has made some improvement in number work. He writes the word cat, but not good, can write his name better. In the manual class he basted four towels very nicely. His department is always good.

December 1894

I can see quite an improvement in this months work, he is quite anxious to learn he spells the words in his lessons much better than those children who have been in school much longer than he, in number work he is quite slow can write all the digits. In the sewing class he has improved very much he basted

several towels and hemed one the hemming of course was not the best but good enough for the first. His deportment is very good

January 1895

Dell this month has not been feeling well and has felt very little like work when he is well, he is quite industrious and is always busy, he has quite a stubon disposition, but by using a little tact he can be managed without much diffculty

February 1895

Dell is improving a little every day in the Word Method he is doing good work for him in writing he is very slow but is improving some times he can write his name after a copy makes some of the letters quite well. can assort the colored sticks and beads. In the industrial class he does not work so well. he basts the hem in the handkerchief quit well, but his heming is not very good, he tries and I think will succeed in time, he gives very little trouble in school.

March 1895

Dell is doing as good work as one can expect of him, he is naturally very slow in every thing I do not think him lazy his work in the Word Method is very good, he can write his name from a copy so that one not accustom to his writing could read it, he assorts the colors and can name them. in number he does not do much. he can write the digits but I

Johnson John

September 1894

This boy is in the manual class only his work is beautiful and he does it almost independent of the teacher, his deportment is very good

October 1894

I find this boy very industrious and always kind.

November 1894

John is the same industrious kind hearted boy, this month he has made four aprons hemed a half dozen towels and made one wash bag "the hammock stitch" He likes to be busy and does his work almost independently of the teacher

December 1894

This month John has made one dozen wash bags "the hammock stitch" and helped to teach one of the boys to make the wash bags I have nothing but good to report of him.

January 1895

The work John does in the sewing is all that could be wished for this month he has made several sheets and pillow cases besides hemming quite number of towels and handkerchiefs he is always industrious, and never gives any trouble,

February 1895

Johnie work in the industrial class is always the same, very good, this month he made several sheets and pillow cases he is always industrious and quiet & kind hearted, never gives me any trouble

March 1895

Johnie is a boy who is always busy and his work is always the very best this month he has made a half doz. pillow cases an hemed a few handkerchiefs. his deportment is good he likes to know that his work is appreciated.

April 1895

Johnie has been out of school much of the time this month, he always works well and independently when he is in the class.

May 1895

This month Johnie has been in the class all the time has made four wash bags the hammock stitch and two pillow cases and one handkerchief his work is always very good and is kept perfectly clean. he is always busy and never makes any trouble,

June 1895

Johnie is always the same good industrious boy he has made a half doz. pillow cases his work is always all that one could wish it to be, his deportment is very good.

George Johnson

September 1894

George I think will succeed quite well in school he seems willing to try, can write numbers upto ten and knows the value of them, reads in first reader, is in the sewing class Saturday morning does very good work, his deportment is very good

October 1894

I can see quite an improvement in this boy, he writes numbers upto twenty almost without a mistake, spells the words in his reading lesson off the book and can write them quite nicely on the board, does not improve in sewing very much from the fact the he is not in the class but once a week. his deportment is always good

November 1894

There has been quite an improvement in this boy this month he recits his lessons much better and will set up his lesson from single letters for busy work, and can assort the colored stick. He seems to understand the value of numbers much better. In the sewing class he has basted two towels and clipt it very well. He behaves himself very nicely in school.

December 1894

George is not quick to learn, but I see that he is improving he does good work both in the Word method and in numbers in the sewing class he does very nicely for the time She has. just Saturday morning his deportment was not so good this month, yet he has a good disposition.

January 1895

George Johnson does very good school work always knows his lesson and can write the spelling on the board he reads quite well but it seems almost impossible for him to give any expression he is learning to express himself much more intelligently when talking. he is improving in number work understands the value of them much better and writes all to one hundred with very little help his deportment is usually very good, in the sewing class he does very little work as he is only in the class Saturday morning. he basts very well and knows how to hold the needle.

February 1895

George improves every day, his work in school is very good I think however he is inclined to be inattentive, if I had more time to devote to him I am sure I would do much better work, he does all such work as assorting the colored sticks and beads putting the sliced animals togeth. His number work is much better. In the industrial class he does very little work as he is only in the class Saturday morning. His deportment is usualy good

March 1895

George is improving both physically and mentally, he seems to be a much stronger boy than at the beginning of the year walks much more erect and has a better color, his regular school work is very good, he writes his lesson very nicely & improves in his reading, remembers quite well

With all of Georges good qualities I think he is inclined to be a little indolent yet if I could give him more of my time he would do much better work. he writes number up to twenty and knows the value of them can add the very simplest numbers assorts and knows all the colors. he is in the sewing class only on Saturday so of course does not accomplish much in that line, yet he basters quite well and keeps his work neat, his deportment is usually quite good,

April 1895

George has done good work this month in school he has finished the first part of the Word Method and also reads in the first reade he is much the brightest boy in any class he can write all the numbers to one hundred with a little help and knows the value of them, adds very nicely, writes his lesson and can spell the words off the book. does all his work well;. He is in the sewing class Saturday moining. he of cowrse does not accomplish much, but what he does do he does it nicely. he is quite good in in school makes a good errant boy and know just how to do the work.

Page 79

Johnson Bennie

September 1894

It seems hard to make any kind of a report for this boy from the very fact that he is so very indiffernt to any thing one tries to teach him he seems to have no fear of any one, and is quite hard to manage in school

October

Bennie seems at times to take a little interest in school work and in the sewing class has learned to thread a needle and use it a very little. is improving in deportment

November 1894

The school work that this boy has done this month is quite limited indeed yet he seems sometimes to take some interest in learning a word, he counts a little. He is quite restless and hard to keep quit, very often he will busy himself with the colored sticks or the peg boards. In the sewing class he has basted the hem in four towels and did it very nicely I think he still improves in his deportment

December 1894

The report for Bennie this month is just about as last month his school work is limited I am not sure he will ever take much interest in books. In the sewing class he does better work he basted the hem in three towels and kept his work clean helped to wind the hammock needles, his deportment is very good.

January 1895

Bennie Johnson in many ways has made much improvement he knows now what it is to be in the school room and that he is expected to do something else besides play. he is nervous but not difficult to manage his school work is quite limited, in the sewing class he basts very nicely and likes to sew which he likes to be busy.

February 1895

I have about the same report to make for Bennie as last month, he is in many ways improved, is much more easily managed in school, does very little work in the chart class, in the sewing class he has learned quite a little this month he basted 4 handkerchiefs very nicely threads the needle himself and can tie the knot if he will try, his deportment is much improved.

March 1895

I really cannot report much more for Bennie than last month, his real school work does not amount to a great deal, in the sewing class he does much better work he has basted three handkerchiefs and could do more if I could get the work ready for him, he is quite neat with his work and like to know that you appreciate his efforts. his deportment is improving he really tries to learn from the chart but forget from day to day.

Next report on page 91

Murphy Orla

September 1894

This seems to be Orla's first year in school I think he will work very nicely when he becomes acquainted he reads in the Word Method, can spell a few simple word with out looking on the book can nearly all the numbers up to ten and can count ten. His deportment is not the best he is a very nervous. he is only in the sewing class on Saturday morning and of course does not accomplish very much.

October 1894

I can see that he improves a little each week he is learning to distinguish the primary colors. I can see that he is progressing slowly in his Word Method and number work, his deportment is better than last month.

November 1894

Orla is improving a little each month in the Word Method he knows all the words in the first part both on the book and in script and can spell them all when looking at them and some of them when the book is closed and while the class is reading in turn he can keep the place. He writes his name Orla and the word cat, but not good. he will work very busily with the colored sticks and pegs. He has been a much better boy in school. He is only in the sewing class on Saturday morning so does not do much sewing, he can thread his needle & baste a very little

December 1895-

Orla Murphy is one of the brightest boys in my room. he improves every month a little likes to be busy at something all the time remembers what he has learned form one day to the nexte has been a very good boy he is only in the sewing class Saturday mornings and of course does very little sewing

January 1895-

Orla has been removed to Mrs Tanner class

Mundt Willie

September 1894

This is the most obstinate child I have ever had any thing to do with. in the school work he just simply will not try, will try to sew and can thread his own needle and use it a very little he does not seem to have the least idea what it means to be disciplined.

October 1894

I feel a little more hopeful for this boy yet he tries me almost beyond endurance, yet I hope before many months to see him improve in his deportment.

November 1894

It seems almost impossible to get this boy interested in any thing pertaining to school work and it does seem that he could learn if he would. He will put the sliced animals together and assort the colored sticks and string beads. In the sewing class he can use the needle a little can thread it and has basted one towel. His deportment is not at all good he does not seem to want to be mean it seems more like thaughtlessness

December 1894

I have about the same report to make for Willie as last month with the exception that he does seem to take a little more interest in the chart class I hope in time to be able to get him to learn to read a little. His deportment is not the best.

January 1895

Willie is not in school but a short time each day in the chart class he seems quite a little interested will try to repeat the words after me and some times will say one or two words himself, he is not in the sewing class except on Saturday, he basts very well threads his needle, his deportment is not all that I could wish for, but he does not seem realize that he is expected to mind. I can't think that he means to be bad.

February 1895

I begin to have some hopes of willie his work in the chart class is much improved he will repeat after me almost any word on the chart. ie. as far as the class has gone he can assort the colored stick all alone and is always pleased to think he can do so much, his deportment is much better and may be all that can be expected of him he is so very heedless in the industrial class he does not do much from the fact that he is only in the class on Saturday.

March 1895

Willie has not spent as much time in school as usual, he does fairly good work for a boy of his disposition, he will put some of the sliced animals together and assort the colors and will repeat after me almost any word that I pronounce to him, in that respect he has improved very much, his deportment is not the best.

Mundt Eddie

September 1894

October 1894

Can make no report for this boy as he has only been in my room a day or two.

November 1894

Eddie like his brother does not seem at all inclined to want to do any thing in school will not try to express himself in english but understands every word that is said to him. He will amuse himself by assorting the colored sticks, pegs and beads. In the manual class he has learned to thread the needle and can use it very nicely has basted several towels. the work is good. He likes to have his own way. and is sometimes very hard to control

December 1894

The report for Eddie is about as last month

January 1895

Eddie does not improve in regular school work as I had hoped he would he simply will not try to express himself in english, he will assort the colored sticks and string beads and put the sliced animals together, in the sewing class he does better work, can thread his own needle and baste a handkerchief nicely his deportment is improving.

February 1895

Eddie seems to try to talk he will say quite a number of words after me

I am more encouraged in regard to him than at any time in the past he assorts the colored stick and pegs put some of the sliced animals together and likes to work as long as I sit by him had I more time to give to him I think I would have good results, he is very stuborn and will do all in his power to have his own way.

March 1895

Eddie is one of those children of whom, to see one would expect so much and yet he does so little I am inclined to think he could do more if he was not so very stuborn he will do such work as assorting the colored sticks and beads and pegs and putting the sliced animals together, know the domestic animals he is in the chart class but will not try to say the words, in the sewing class he can hunt the handkerchief very nicely I can't say that his deportment is good in fact at times he is the most exasperating child I have in my school

April 1895

Eddie is still about the same sometimes he seems a little interested then again he does not seem as if he had the least particle of interest in any thing he likes to be in the chart class but I think it just because he see the other children there, he does just about the same work as last month, he will work at busy work if it pleases him but any thing I want him to on the board he will not do at all. his deportment is about so so. (Page 85)

Medicke Carl

September 1894

Carl is the most persevering boy in my class it is very difficul for him to learn, but it is a pleasure to help him just because he tries and seems so anxious to improve and when he has accomplished his task he is perfectly happy, his articulation is very bad and does not form sentences very easily. in numbers he can count ten and write all the number to ten and understands the value of them. in the Word Method he generally has his lesson. In the sewing class he has learned to thread his needle and use very well he is always good.

October 1894

This boy naturally improves a little every day because of his never failing perseverance yet I am sorry to say he finds it very hard to express himself on the account of his imperfect articulation. he does good work in the Word Method, can write a simple sentence after a copy and read his lesson if written in script on the board, writes numbers up to twenty and knows the value of them has learned the primary colors from using the colored stick and beads In the manual class he has learned to hunt very nicely the handkerchief and towel. his deportment is always good

November 1894

Carl still works hard and of course improves a little, has finished the first part of the Word Method does not read well because of his poor articulation, he reads his lesson as well when written on the board as from the book. I think he understand numbers better than last month, can build his lesson from words, can write a simple sentence quite well, makes his figures very good. In the sewing class he does quite good basting has basted three towels but is not very neat about his work, there is nothing lazy about him. His deportment is very good yet I have seen some things that were not commendable in him

December 1894

Carl remembers very nicely what he learns from month to month he is doing as well as I can expect, he is learning to write, which pleases him very much. He did not accomplish much in the sewing class this month from the fact that I could not help him, his deportment was better than last month.

January 1895

Carls deport for this month is quite similar to last month I think he understands number much better and seem quite interested in the work. he is improving in reading and is quite anxious to learn to write he makes some of the letters very well. he is industrious and I think will derive much good from the school, he

In the sewing class he does not succeed so well yet he is improving a little, his deportment is always very good,

February 1895

Carl is the most industrious boy in school works hard at any thing he has to do in the Word Method he does very good work builds his lesson nicely from single letters, his work is quite good but of course very simple, he assorts the colored sticks, beads, and pegs, he writes some words very nicely, has been a very good boy in school this month, in the industrial class he finds the work very hard but never gives up,

March 1895

Carl has done as good work this month as at any time in the year he remembers better than many in my room he knows the greater majority of the words in the first and second part of the Word Method writes from a copy quite well, in his number work he does well if nothing happens to disconcert him, like strangers coming into the room, he writes numbers up to twenty and knows the value of them In the sewing class he does not progress very rapidly his deportment is good.

{Next report on page 87}

Muller Willie

September 1894

I have this boy only in my industrial class he can knit and hem towels. handkerchiefs and aprons nicely is industrous. good and kind.

October 1894

Willie improves in his sewing keeps his work much cleaner and is always ready for his work. his deportment in the schoolroom is always good

November 1894

This report is very much the same as last month, he is always ready for his work and is quite industrous, Never gives any trouble, this month he has made one apron and hemed four towels

December 1894

This is one of the most industrous boy in my room always willing and will try to do any thing I require of him, he made a half doz. towels all himself. He is a good boy never makes any trouble in the least.

January 1895

Willie does good work in the sewing class keeps his work neat, and is not slow about it this month he hemed one dozen towels and part of sheet. his department is always good in school.

February 1895

I can only make the same report for Willie this month as last his work in the industrial class is quite good he has knitted and hemed several handkerchiefs is always busy never gives any trouble

March 1895

For this boy I can only report as usual in the industrial class. he does quite good work he hems handkerchiefs very well but does not sew well enough to make the pillowcase or sheet. he is always busy take nice care of his work, his deportment is always good.

April 1895

The report for this boy is very similar to the one of last month he is always industrious never causes any trouble in the least his work is very good.

May 1895

Willie work is much improved he keeps his work nicely and works diligently this month he has been finishing up a number of handkerchiefs that the other boys have failed on so that his work does not really show what he can do.

June 1895

Willie has worked well this month he is never idle one minute he has improved in his sewing very much he is always good.

Messlin Theadore

September 1894

Theadore does not have much school work being a deafmute he works nicely in the sewing class if kept busy he gives very little trouble when marching in line he is inclined to want to tease the boy in front of him

October

The report for this month as much the same as last except he marches better.

November 1894

Theadore writes his lesson on the slate of course he does not do much school work In the manual class he does very nice work and is quite neat with it this month he made two aprons and one pillow case, His deportment is good

December 1894

The report for Theadores school work is about as last month in the sewing class he hemed several towels and made two aprons, He is always a good boy in the school rooms

January 1895

Theadores work in the sewing class is very good this month he has hemed two sheets and several handkerchiefs he writes his lesson on paper with lead pencil. Deportment always good

February 1895

Theador does very little school work. can assort the colors, put the sliced animals together writes very nicely, In the sewing class he does splendid work does not work as fast as some of the other boys but does his work good and keeps it clean his deportment is very good.

March 1895.

I cannot see any improvement in Theador this month he likes to be busy and never makes any trouble in school

April 1895

Theador I think is becoming a little tired of sewing he like to work with the words and letters so I have allowed him ted for a change. I knows many words and is anxious to learn new ones. he has been sick too this month so that he did not care to work. his deportment is good.

May 1895

Theador has worked better this month yet his work has not been just what he likes, he has been helping to finish some work that the other boys could not do, he usually sews very nicely and seems to like the work. his deportment is very good

June 1895

Theador knows a great many words and learns a new one quite often if I have any way of making him understand me he writes beautifully and is always busy when in school his sewing is good, deportment good

Morinville Edmond

September 1894

Edmond does very little school work always wants to do something you don't want him to do and is quite sure he can do every thing does not know the value of numbers and it really seems that he never will, he knows a few words in the Word Method. In the manual class he works better has learned to turn & baste the sheet, towel & handkerchief his deportment is not the best he seems to be always wanting to talk to himself or the one nearest to him.

October 1894

The improvement in Edmonds school work was not very noticeable awhile in the sewing class this improvement is quite decided his deportement is better but the best yet.

November 1894

Edmond does not improve very fast in school, he can assort the colored sticks & knows the colors. does very little in number work if any thing. His work in the manual class is much better this month he has hemed five towels. If he was not such an incessant talker he could do more work he does not cause a great deal of trouble.

December 1894

Edmonds report is not much improved from last month he does not seem to get along very satisfactory with school work In the sewing class he does much better work he basted and hems towels very nicely, is not as neat with his work as I would like to him, He is not a hard boy to manage and gives very little trouble except he is such a talker

January 1895

Edmond is improving in a great many ways, but in regular school work he is very slow, the work he does in the sewing class is much more satisfactory he hemed at least a dozen towels. His deportment is improving all the time

February 1895

Edmond I hardly know how to report him he is in school only a part of the day & is naturally very slow, he learns a little does not go back he can do all such work as assorting the colors and putting the sheep animals together. In the sewing class he is doing very good work, he basticked and hemed one sheet and one or two handkerchiefs his deportment is quite good for him he is such a talker that he hardly knows when he is talking

March 1895

For Edmond I can not see much improvement in the school work he is in only a short time in the morning he is one of those boys who always wants to do some thing he can not do, he does the same work that he did last month. he is usually quite

good in school with the exception that he is such a talker at time it seems almost impossible to stop him.

April 1895

The time that Edmond is in school is so limited that he does not do much school work, and he is very slow, he does not work as well as he might in the sewing class he seems to think that he must beg an unlimited amount of talking.

May 1895

The report for this boy is very much the same as last month some times he is in school in time for his lesson and other times he is not, he assort the colors and put the sliced animals together, and is a good errand boy I think he will like to work in the garden in the sewing class he has not worked as well as usual, his deportment is quite good.

June 1895

Edmond has been in school so little this month that I have very little to report for him, his work is not at all satisfactory, he is a great grumbler and taker, does very little school work and in the sewing class he works very little better than in school.

Mc Grand Hugh

September 1894

I only have Hugh on Saturday morning does not do any work of any kind in my room. does not give me the least trouble.

October 1894

The same report as last month

November

Hugh is a good boy always kind and obedient.

December 1894

From the fact that Hugh is not in my room only on Saturday morning I have very little to report for him he seems to be a good hearted honest boy

January 1895

Hugh will busy himself with colored beads, and sticks, or the sliced animals he does no other work in my room he is kind hearted and makes no trouble whatever.

February 1895

I can only report for Hugh the same as last month.

March 1895

Hugh is a Saturday morning boy and of course does not do anything except amuse himself with, the pegs, sticks or any thing I give him. he never makes any trouble

{Report on Page 90}

Parker Adolph

September 1894

Adolph seems anxious to learn and I think we can hope to see quite an improvement in time, but it will require much patience on the part of the teacher, he is a very kind hearted child, but at times he is extreamly obstinate. In numbers he counts up to ten, can make the figures and understands the value of some of them, does not seem to have forgotten what he learned last year.

October 1894

When Adolph shall have learned to to express himself in the english language, I think he will do good work in school, he tries and that is much in his favor. In the Word Method he reads his lesson both from the book and when written on the board and can spell the simple words off the book he improves a little in his number work. In the sewing class he has improved quite a little.

November 1894

Adolph is getting along nicely he has finished the first part of the word method and knows every word in script as well as on the book, he is the brightest boy in the class can keep the place and knows when his, and all the other boys turn comes, to spell or read He writes, "a cat runs" quite well and can set his lesson up single letters with very little help. assorts the colored bego

and knows each color does not do so well in numbers but will try. In the sewing class he does quite good work has improved very much has hemed i.e. basted the hems in a half dozen towels and is learning to hem he likes to be busy His deportment is very much better than last month

December 1894

There has been so much to do and say about Xmas this month that Adolph has found it quite difficult to do his best in school, he is a bright boy for this class and is nice to have in school, he remembers well what he learns, he makes his numbers quite well on the sewing class he does only the very simplest work can baste very good and hems a very little. He is improving very much in his deportment

January 1895

Adolph I am sorry to say has left my school and gone to Mrs. Tanner

Isaac Henry

September 1894

Henry has the appearance of being a bright child, but he will not apply himself, he will amuse himself with blocks and beads and colored sticks but does not want to do any thing in order has a mind of his own is very inquisitive is never ready to do any thing when he should. Does very little work in the Word Method and counts ten when he wants to and makes number very nicely. He is in the sewing class only Saturday morning and of course does very little of that kind of work

October 1894

Henry is improving in many ways he will put together the lesson of the Cat and Barn from words that have been arraigned for that purpose he makes his numbers very well when he wants to, but would rather make the picture of a train of cars than than to do any thing else I think in his deportment he is improving

November 1894

I am sure that Henry is improving a little every day while he will not apply himself he learns from hearing the other children recite, he reads his lesson from the board quite as well as from the book, he improves in number work but very slowly, his deportment is much better. He does not new enough to make much progress

Dec. 1894 Henry improves so slowly that it is difficult to write a very long report he is not lazy but wants to have his own way about what he does he will amuse himself for hours drawing the picture of a train of cars, if permited to his deportment is much improved

January 1895

Henry is one of those deceiving children one day he makes you think he is going to do so well and the next day you wonder if you ever can do any thing for him, this month he is quite interested in setting up his lesson from single letters and does it very nicely sometimes, it is almost impossible to get him to try to write, he is doing much better in the word method, his work in numbers is not at all flattering. I think he is rather inclined to be lazy, He gives me very little trouble in managing him.

February 1895

Henry this month has succeeded in building his lesson from single letter does not know all the letters by name but sometimes can read his lesson good, he has devoted more time to his school work, than at any time since I have had him, he can assort all the colors and does it quicly in. writing and numbers he is not good does not like either, In the sewing class he is doing good work can hem and hem a handkerchief very

nicely this month he has basted three and hemed two. His deportment is much improved,

March 1895

Henry is simply to indolent to work when he wishes he can work well but one must be continually reminding him of his task and urging to keep busy, he does all such work as assorting colored stick, heads + pegs at time will name the colors, he can assort the alphabet and put each letter in just the right box, builds his lesson, and if he will can write several words, he likes to have his own time and own way for any thing he does. his deportment is not the best, but in that he is improving

April 1895

Henry surprises me often there are days that he will do very good work then again he will simply do nothing all the busy work he does very well he does not loose from day to day what he has learned, but he seems to be thinking of something else. his deportment is usually very good.

May 1895

The report for Henry is very much like last month, when he will he can write his name on two or three short sentences and make all the numbers and can count twelve. his work in the sewing class is not very good, he basts, and can hem quit well i.e. his stitches are made well.

{Next report on page 92}

Stewart Harry

September 1894

Harry's articulation is so very imperfect that it is impossibe for him to make one understand what he really does know. he makes some of the numbes but I am sure he does not know their value, can assort the colored sticks and heads. In the sewing class he is very slow to learn, can thread the needle that is about all. He is not very hard to control in school.

October 1894

Harry improves so slowly that it is difficult to make any satisfactory report of him this month

November 1894

I think Harry is taking some interest in the chart class and he tries to write and makes some of the letters very well, he will assort the colored sticks and pegs. his deportment is very good In the sewing class he is very slow can do only a very little work

December 1894

Harry I am sure tries to learn but it is so very difficult for him to make one understand him, that it seems to me he feels discouraged, he enjoys being in the chart class, he tries to write and makes a few letter very well and some of the numbes he does not give much trouble in school

January 1895

Harry Stewart I feel sure could do quite good work in school if he could make himself be understood he is learning to build his lesson from letter and seems quite interested in the chart class he makes quite good numbers and a few letters assorts the colored sticks nicely and can put the sliced animals together he is improving in his sewing. His deportment is very good.

February 1895

Harry surely tries, in the chart class he does his best will try to say any word, has learned to build two short sentences from simple letters assorts all the colors put the sliced animals togethe and acts as chore boy in the school room in his turn. He is does not do much with sewing seem to be some thing about it that he cannot learn. His deportment in school is very good i.s. for him

March 1895

The report for this boy is just about the same as last month, there is so little that he can do, he tries so hard to make himself understood, which quite impossible he never gives any trouble if left to himself,

April 1895

Harry does not improve very fast in any thing he will work at any thing he likes, In the chart class he seem to want to learn but it is impossible for him to make himself understood,

May 1895

Harry has worked very well this month he will assort the alphabet putting each letter in the right box and can build several words and makes all the numbers except 8 makes the letter A. puts all the sliced animals together and know all the domestic assorts the colors, with the heads, sticks, and pegs. his work in the sewing class is not good it seems almost impossible for him to learn his deportment is usually good

June 1895

Harry work is very much the same as last month, he likes to be busy enjoys being in the chart class and tries to read but it is almost impossible for him to make himself understood he does his work well, he gives very little trouble in school.

Stapleton Walter

September 1894

This is another boy that looks as if he might be capable of doing good work and yet when you try to help him he seems perfectly indifferent he likes to be busy but wants to have his own way about his work. In the sewing class he does good work. His deportment is good.

October 1894

Walter has made some advancement this month but of course it is very little he puts all the sliced animals together and takes a little interest, learning a few words. In the manual class he does very nice work, his deportment is improving

November 1894

This month Walter has learned to read the sentence "A man runs" from the chart and tries to write makes a few letters. Assorts the colors nicely. In the sewing class he can hem and hem the towel this month he has made four towels. His deportment is very good.

December 1894

Walter seems more interested in learning to read this month than at any time since school began, he really enjoys having me help him learn the words in his book as well as from the chart. he puts the sliced animals together, tries to write, in his deportment he is improving. he sews nicely can hem and hem a towel, or handkerchief without very little help.

January 1895

Walter Stapleton is doing better, real school work all the time yet he is another one of those children you can not depend on, for when you want him to do his best he is sure to disappoint you, in the chart many time he will know his lesson very well, he has learned to talk much better that at the commencement of school. He assorts the colored sticks and put the sliced animals together. in the sewing class he does splendid work, & can hunt and hem a handkerchief in three after noons. His deportment is usually good

February 1895

Walter does not spend nearly as much time making pictures on his slate as he did at the beginning of the year and gives more time to his school work in the chart class he will learn in a few days all the words in the lesson and seems to remember them, he assorts all the colors and put the sliced animes together, talks much better, will repeats any short sentence after me, in the sewing class he does excellent work & could not wish for better keeps his work neat and clean, his deportment is quite good, Walter is a very nice boy

March 1895

Walter this month has learned to read the story of the Ox from the chart knows all the words, he recites quite well and is improving a little every day, does

all such work as assorting the colors and with the sticks he builds the pig pen perfectly in fact he has quite a mechanical taste in folding the papers every one is perfect and neatly done, In the sewing class his work is good and he does it quickly and cleanly, if not disturbed by others he is a well behaved child in school.

April 1895

Walter has learned to read the story of the girl from the chart he remembers quite well, makes his numbers nicely, all kinds of busy work he excells in, his sewing is done neatly and very well indeed, he is very careful with any kind of work his deportment is very good.

May 1895

This month Walter has learned the story of the Cat some days he will read it well, then again he seems to loose his interest in it, he has been very much interested in making the numbers this month and has improved in writing them, in the sewing he has made several handkerchiefs and one pillow case of which he is very proud he as a usual thing is very good in school.

June 1895

Walter has learned to read his lesson from the chart, writes the numbers quite well and write, The cat runs, he is not very successful in school work but with the busy work his work could

not he better, in the sewing class his work is good he has made two pillow cases this month, keeps his work very clean, his deportment is good.

Winther Lewie

September 1894

Lewie is only in the sewing class does good work is a good boy does not make any trouble.

October 1894

I am glad to say that Lewie is one boy that never makes any trouble and is always busy and does his work nicely.

November 1894

Lewie Winther is in school and also in the sewing class on Saturday, he has finished the first part of the Word Method and reads his lesson in script as well as from the book does not seem to get along very well with his num- bers is learning to write a little smarts colors nicely, in the sewing class he does good work but is not in long enough to accomplish very much. he gives very little trouble in school

December 1894

Lewie is doing as well as can be expected in school, he likes to be busy, will not his lesson up from single letter and likes to do it, in writing he formes some of the letter quit well, he does not improve very much in figures, his deportment is not always the best at times he takes quit a notion to talk but upon the whole he is a very good boy.

January 1895

Lewis Winther is doing much better school work, always knows his lesson in the Word Method and sets it up nicely from letters and without a mistake, his work in numbers is not so good. he is learning to write, makes some of the letters very well assort the colored sticks and put the sliced animals togeter, does quite good work in the sewing class. His deportment is usually quite good

Febuary 1895

Lewis is by no means going back he is industrous and does very good work in school will spend half the morning building his lesson from letter and does it very nicely. I think he will never do much with numbers, reads his lesson as well from a slip as print does quit good work in the industrial class, is learning to hem and does very well he is inclined to talk to much and only for that I would very little trouble with him

March 1895

Lewis is keeping up the class in the Word Method build all of his lesson each day and does it without being reminded of it each time he does very good work in the sewing class, I think he is improving in his deportment at times he takes a notion to talk and it seem almost impossible to get him quieted I am quite sure he is overcoming that to some extent

April 1895

Lewis has done the very best he could he is not at all lazy and is always busy with some kind of work he has kept up nicely with his lessons in the Word Method. always builds them on his slate, his work is always very nicely done he does not like number work and does not do as well as he could if he liked it better, his work in the sewing class is not very good but he is improving, his deportment is good,

May 1895

The report for Lewis is very much the same as last month he works well and likes to do nearly all kinds of school work, in school he is kind and gives very little trouble. his work in the sewing class is I think as good as he can do, but that is not very good.

June 1895

Lewis is industrous is not contented unless he has something to do keeps up nicely with his class in the Word Method, builds his lesson perfectly form letters and does it quickly, he writes the numbers but does not like the work counts ten knows the colors and does good work with all kind of busy work. sews very well. his deportment is good usually.

Olson Sebert

September 1894

October 1894

November 1894

This boy is only in my class on Saturday morning does no work, but is quiet and will amuse himself with the sliced animals or the colored sticks

December 1894

The report for this boy is about as last month.

January 1895

Sebert is a good boy I know nothing of his work he is only in my room on Saturday morning, he will try to dos any thing I give him.

February 1895

This report is about the same as last month, he is quiet, kind hearted and always glad to do any thing I ask of him;

March 1895.

Sebert is another boy who is in school only Saturday mornings of course does nothing except amuse himself he is kind never makes any trouble;

{ Report on page 91 }

Papke Lewis

September 1894

October 1894

Lewis is a new boy in school and with getting over being homesick and becoming acquainted with the ways of the institution is has been a hard month for him. I am afraid he is not capable of learning very much. he does not behave badly in school. In the sewing class he has learned to thred a needle and use it very well

November 1894

Lewis seems to take some interest in the chart class, can count a little and tries to write, makes some of the numerals assorts the colors and can name nearly all of them, sometimes he counts ten without any help. this month he has basted the hem in three towels usually he like to be busy, his deportment is not the very best yet I think he does mean to be ugly

December 1894

Lewis is always awake when in school and likes to be busy, will assort the colored sticks and beads, he puts some of the sliced animals together, tries to write & make the numbers he has improved much in every way since he came in school does not laugh nearly as much and is a much better boy. his sewing is about the same as last month.

January 1895

Lewis Papke has been sick much of the time this month some of the time not able to be in school and when he did come was not able to do much work

February 1895

Lewis is improving in many ways he does not laugh nearly so much as when he first came in school does not do much school work but can assort the colored sticks, pegs & beads. He seems to understand now what you want him to do, is a little willful but I hope to help him over come that in time he likes to be the errand boy in the schoolroom and does that work well, he threads the needle and can bast a handkerchief very good, keeps his work clean, but does not like to sew,

March 1895

Lewis Works well in school he is only in a part of the morning, he can take the letters of the alphabet, or rather of several alphabets and put all the letters of the same name in one box and does is quite independently, he assorts all the colors, can count ten, and knows several words on the chart, he works quite well in the sewing class, but he does not like the work, he is improving in his deportment.

April 1895

Lewis Papke has been working quite well for him this month he seems more interested than at any other time he is learning to assort the letter and put them in the right box, and can do it quite alone. in the chart class he does a very little work, in number work he counts ten and can write all the number up to ten after a copy, in the sewing class he does the very simplest work such as basting. His deportment is usually quite good at times he is very stubborn

May 1895

Lewis I think improves every day but so slowly that his report seems only a repetition of last month I am in hopes he will be able soon to do quite a little school work, the busy work he does nicely when he tires such as assorting the colors and keeping them in order. He will very often make all the colors, he put all the six form boards together, he likes being the errand boy and does that work well I think he will like to work in the Garden he seem quite interested in it now. His deportment is very good

June 1895

Lewis has spent much of his time out of school this month, he does very much the same work as last month he is quite changeable, one day he will be too good natured another day too sullen, and at other times he will

do very good work he will assort the colors and name them, string the beads from dictation put the sliced animals together and knows the domestic animals makes a good errand boy his deportment is not always good. he counts ten,

Kernen Daniel.

January 1895

Daniel has only been in my room a day or two I have not found out yet what he can do.

February 1895

Dannie has done very good work in school this month. he learns all the words in the lesson on the chart in a few days & likes that part of his school work. he assorts the colorse and can name them all except yellow he know that from the others but can not recall the name he likes to work with the sticks, beads & pegs. In the sewing class he is doing good work, can baste the handkerchief quit well. his deportment is good.

March 1895

Dannie does very good work as far as he knows, has learned to read the read the story of the Ox from the chart, he know it well. he does not like to write and it is quite an effort for him to even try, he know not the first principl, he makes some of the numbers he can assort all the colors and name them. In the sewing he is doing quite good work hemed one handkerchief and did it quit nicely, his deportment is good.

April 1895

Dannie improves a little every day he likes to be busy and is doing very good work, he has a lesson in the

Word Method and on the chart while he is quite slow he does better work than some who look as much brighter, he will learn the chart lesson and read it nicely in three day he can count ten and make all the numbers to ten. does not write very well that seems to be one of the things he dislikes to do, his work in the sewing class is good he can hem and sew a handkerchief nicely, He likes to be the errant boy and that kind of work he does well, he is usually quiet in school

May 1895

This month Dannie has been quite industrious his work in the Word Method and on the chart is much improved he reads the script quit a readily as the majority of the class and gives good attention, assorts the colors in order and names them put the sliced animals together and know all the domestic animals, his number sometimes are made very nicely, in the sewing class his work is very good he is quite ambitious with his sewing. his deportment in school is usually good,

June 1895.

Dannie has been out of school nearly all of this month, he did good work while he was here,

Martin Ford.

March 1895

Martin has been in school only a few days, he is a bright looking boy, but judging from his behavior in school he has never been taught anything at home his language is very bad, he evidently has been allowed to have his own way in every thing. he knows nothing of school work seems to have very little idea of form, can distinguish the different colors but can not name them can not count five and does not know one word, he is fond of music,

April 1895

Martin has improved very much since the first, he came in school, he has learned several words, can put the blocks in some of the form boards is learning the colors he assorts the colors and know them but cannot name them, but will put objects of the same color together likes to look at pictures and will recognize all the domestic animals, in the sewing class he has learned to thread the needle & tries to sew a little but is not at all successful yet, His deportment is much improved but is far from being good yet,

May 1895

Martin is doing good work for a boy of his disposition, he can put the blocks in all (sic) the form boards and do it quickly assorts all the colors and names them builds the pig pen nicely keeping all the colors togethe

assorts the heads and strings them in any way I tell him, alternating the cube and ball or the ball and cylinder, and will also alternate with different colors, puts many of the sliced animals together and names them he is, at times very stubborn and must be handled with gloves, yes and sometimes with out gloves, in order to get along with him, he likes to act as errand boy and does his work very well, his work is not as good in the chart class, as when taken alone. I should have mention that Mart is an epileptic which I think accounts for much of his stubborness. he still improves in his deportment.

June 1895

I can only report for Mart this month about the same as last month he he retains what he learns, his work in the chart class is not as good as I had expected when first came in school yet he seems interested and sometimes will read one or two short sentences he does better work when taken alone he has learned to hold the pencil and chalk and sometimes will try to write if I stand by him, he assorts the colors and always has them in order can name them all, he improves every day while he has very much the same dwork. he does it very much better, his deportment is much better

Demison Dell

think he does not know the value of them all, he make a good errand boy in the school room, in the sewing class his work is not very good, he can knit very nicely, but he finds hemming very hard his department is good,

April 1895

Dell is a boys who does very good school work and would make a bright boy for this grade is he was not an epileptic he is industrious and is doing very good work he has with the class finished the first part of the Word Method, will read his lesson both in print and script and writes his name sometimes quite well, assorts the colors, makes the pigeon keeping all the color, all together, he does not sew very well but tries very hard, he is always good in school and kind to the children.

May 1895

Dell works so slowly that it is not always easy to see just how much he has improved in a month he works well and if he does not make much progress it is because he cannot he keeps up in his class and in fact is in advance of some who knew more than he did at the beginning of school in class he keeps the place himself and will follow the lesson through so that when his time comes to recite he can do so with out me having to show him the place he assorts the colors and knows them all

will put many of the sliced
animals together and name them
makes all the numbers but does not
know the value of them all, writes
several short sentences, and sometimes
writes his name very well, he makes a
good use and boy I think he will like
working in the garden he seems quite
interested in it now, his deportment
is good

June 1895

Dell is an industrious boy but very slow
he knows how to learn better than the
majority of the class and if he was
not troubled with epilepsy I could
hope that in time he would be able
to do good work, he reads 58 pages in
the Word Method can follow the lesson as
each one of the class recites, knows all
the letters he has had in his lessons
can spell on the book reads script as
well as print, writes his name quite well
and a few short sentences, in number
work he is not very good sometimes he
can count twenty and can write the
numbers up to ten, he does all such
work as stringing beads assorting the
colored sticks, putting the sliced animals
together, he likes to work in the garden
his work in the sewing class is not good
yet he does his best to learn, he is a
good kind boy in school

Hiller Gussie

April 1895

Gussie is a good boy and seems to want to work but he is so very nervous that he can not hold a pencil so is to be able to write, he has been in school such a short time that I hardly know what he can do,

May 1895

Gussie so far has done no school real school work he will put the blocks in some of the farm boards, assort all the colors and name them, will interest himself with a picture book he can not use the needle from the fact that he's very nervous he makes not the least trouble in school,

June 1895

Gussie does not do much school work he likes to be busy and will try to do any thing I give him to do he can name all the colors and assorts the sticks nicely counts ten, will put some of the sliced animals together, his deportment is always good in school.

Remington Guy

April 1895

Guy is one of those bright looking children who so often deceive one he is quiet and good but he does not show the least inclination to learn any thing will not even try, the only way in which he has shown the slightest ambition is depending himself when some of the other children were imposing upon him.

May 1895

Guy is the same listless little boy does not seem to notice any thing I have him in the chart class he will say the words over after me but does not show any interest in the work, a few days ago I helped him in assorting the colored sticks as I had often done before but this time he would select the right color as long as I would work with him he does not count and in fact he will not apply himself in any way.

June 1895

Guy work is very little better than last month he is quiet in school and will work as long as I work with him he is a child that seems not to have any thought, will never try to do any thing alone,

Cohen Penny.

May 1895

Penny is working quite well he is not lazy if he does not accomplish much it is because he cannot I am sure he tries; he can assort the colors with the sticks and beads and will work quite busily building the little pig pen and is quite delighted to know he can do it successfully and keep all the colors together, he puts many of the sliced animals together and can name them, his sewing is very good he basts only handkerchiefs his deportment is usually very good.

June 1895

Penny has worked quite dilligently this month, has learned to name the colors, red, yellow, blue, orange, green & purple quite readily and his work is done much more neatly; in the chart class he does the best he can but he is not capable of doing much school work, it is also very hard for him to make himself understood on the account of his poor articulation. his deportment in school is good.

Johnson George

May 1895

George is getting along as well as I can expect he has his lesson in the first reader good always has his spelling and writes his lesson on his plate nicely has also finished the first part of the Word Method in this class he is the most advanced of any of the boys and understands his lesson much better. in numbers he can add any numbers below ten but does not know how to carry ten yet, he does all such work as assorting colors and naming them, putting the shed animals together, the furniture from boards and make a splendid errand boy I think he will be interested in the garden and seeing the plants grow His deportment is usually good.

June 1895.

George reads in Webbs Word Method + Harpers first reader, in Harpers he has read 80 pages spell his lesson of the book and writes it on his slate in the Word method he leads the class he knows how to learn and if he would apply himself could be a much brighter boy, if he will try. he can write numbers up to one hundred, can add a column of figures as 9+8+7+2=, showing that he knows their value, I know he is capable of doing good work in school. in the sewing class he does very good work for the time he is in the class, his deportment is good,

Johnson Bennie

April 1895

Bennie is not in school all day and when he is in is not capable of doing much work his power of consentration is quite limited he will string beads, assort colored stick put the sliced animals together and act an errant boy. in the sewing class he does better work. he keeps his work nice & ~~soots~~ the handkerchief nicely, he is usually quiet in school,

May 1895

The report for Bennie is about as last month he does very much the same work, in the chart class he tries to learn but it is hard work he will not give his attention long enough at one time to be able to remember any thing he does very little work in numbers, but but will amuse himself with a picture book, and will work at any thing in the way of busy work, such as assorting the colors either with the pegs beads or sticks, he has a restless disposition and of course is not always quiet in school,

June 1895

Bennie has done his best this month but I has not accomplished much he has such a restless disposition it seems almost impossible for him to give the least attention, he works well with the busy work such as assorting colors, stringing the beads, or putting the sliced animals together, sometimes he will count fine

he does nothing in the chart class I think he tries but cannot learn in the sewing class his work is much better he bastes nicely and keeps his work neat, he makes a good errand boy in school, his department is as good as could be expected from a boy of his disposition,

Willie Mundt

April 1895

Willie is not a lazy child he likes to be busy but is restless and wishes to change his work every few minutes, he has been in school more than usual this month and is taking much more interest, he is learning to assort the colors in order and many other things that he never seemed to take any interest in before He is sometimes a little troublesom in school, but he does not do it to be mean but just seems to be thoughtless.

May 1895.

This month I can see quite a change in Willie for the better, he is much more interested in school work, in the chart class he will repeat the words over after me and occasionly say a word alone he likes to assort the letters and the words and will build three or four word from single letters and seems to enjoy the work, he will assort the colors, put many of the sliced animals together & is learning to make 1 & 0 on the board he make a good errand boy, he is delighted to help in the garden and there he works much better than any of the other boys in the class, His deportment is as good as one could expect with his heedless disposition,

June 1895

Willie is learning quite a little he will try to say any word I pronounce to him and can make himself understood when he wants any thing

he is much more interested in school work than at any time during the year, he is much interested in building his lesson from letters & takes a pride in doing all the busy work just as I wish him, in the chart class he read this alone. "I can see a cat." I am quit sure that with much patients he can be taught quite a little has learned to hold the pencil and chalk very nicely his work in the sewing class is not very good, but he is only in the class Saturday morning his deportment is very good,

Eddie Mundt.

May 1895

This month I really think Eddie has tried in many ways, he will try to say some words after me and will try independently to make the figure 1 to 5 and will assort the colors in order and will try to name some of them he sorts the colored beads & pegs well and does that kind of work good, he makes quite a good errand boy in the sewing class he can baste the handkerchief very nicely his deportment has not been very good this month, but I am in hopes that after all we will be able to do something with this child.

June 1895

Eddies report is necessarily very much like last month he does the same work but has improved very much assorts the colors and knows them but can not say the word, sometimes he will try to repete a word after me, in the chart class his work is not very good, but I think in time he will do better, I have not had him try to sew this month his deportment is never very good,

Carl Medicke

April 1895

Carl has one thing in his favor he likes to be busy, he will, as soon as he takes his take his slate and book and begin work without being told, he has kept up with his class and ~~usually~~ usually gives good attention his work is not as good in numbers as I had hoped but yet I think he does his best he can write all the numbers to 50. with a little help and writes the numbers to 30 sometimes he adds very nicely, he builds his lesson nicely, reads the script quite as well as the print, he writes very well. His work in the sewing class is not very good he tries but can not learn. His deportment this month ever not as good as I would like to report.

May

The months come around so quickly that it seem difficult to able to write a very lengthly report, Carl does not retrograde in the least it is unfortunate for this boy that he can not remember better for he really tries, yet I feel sure that what he once get fixed in his mind he retains, he can follow this lesson through and be able to his words when it comes around to him, which shows that he is giving attention I was in hopes to be able to have him write a short letter before he went home, but hardly think now that he will be able to do it. his number work is as good as last month, he does all such work

as assorting colors and naming them and putting the sliced animals together he makes a good errand boy and I think he will like the work in the garden His department is much better this month I have not been obliged to correct him once

June 1895

Carl improves a little each month keeps up in his class has learned thirty five lesson in the Word method usually keeps his place, spells very well on the book reads script as well as print, will write his lesson from a copy very well, can count one hundred with a little help and writes all the numbers up to 100, he seems to retain what he learns, but he finds it quite difficult to get his lessons fixed in his mind, he would rather work with his lessons than the busy work. yet he will do any kind of work I require of him and usually does it well, I have not asked him to sew any this month he does not sew very well, his department has been quite good this month

Hugh McGrand

April 1895

Hugh spends his time in various ways sometimes he will look at a pretuel book then again use the colored beads or sticks I have never tried to teach him any thing as he is only in my school Saturday morning. he is a nice quiet boy

May 1895

Hugh is alway the same good kind boy never troubles any one spends his time in any way he chooses.

June 1895

Hugh has been in school very little this month, he is a good kind hearted boy never makes any trouble.

Sebert Olson

April 1895

Sebert is one of the boys who only comes in school on Saturday morning. then he assorts the colored beads or sticks or looks at a picture book he is a nice quiet boy.

May 1895

This report is the same as last month,

June 1895

Sebert Olson is a pleasant good natured boy never gives any trouble

Saner Henry

Henry is too lazy for any earthly good ie, when you want him to learn from books he just simply just will not try, he does quite good work with the colored beads & sticks and would spend days trying to draw the picture of a train of cars, he never improves on the picture they all look the same. he did very little work in the sewing class his deportment is usually quite good.

Order of Exercises

9.15-30	Opening Exercises in the Hall

Blakeslee Lawrence

Sept. Lawrence has not been in the sewing class only a few days this month in consequence of which I have very little to report for him. he has partly made one pillowcase and hemed one towel. his deportment has been quite good

Oct. Lawrence is still working on the pillow case he had not finished last month his work looks very well, he is in the class such a little time during the month that he does not accomplish a great deal. His deportment is usually very good.

Nov. Lawrence has worked better this month has improved very much and I am in hopes he will continue for I know he is capable of doing good work, he has finished his pillowcase and has worked quite a little on another. his deportment is very good

Dec. Lawrence has worked very well this month much better than at any time this year, he made two pillow cases and did his work very much better and kept it much neater than usual I do hope he will keep up his courage the rest of the year, his deportment is very good, I have no fault to find with Lawrence this month.

1896

Blakeslee Lawrence

Jan. Lawrence has not been as energetic this month as last, he has made one pillow case and one handkerchief his deportment has been quite good for him.

Feb. Lawrence I am inclined to think is just a little too lazy ever to ever do very much good at any kind of work he has spent the entire month making one pillow case and it is not finished yet, it is impossible for me to keep him busy, he will sleep in spite of anything I can do, his sewing is very good, and he is capable of doing as much if he only had a little ambition, his deportment is very good

Mar. Lawrence worked very nicely the first of the month, but just as soon as he rec'd the writing tablet he was to have if he finished a piece of work in a given time, he fell back into his old sleepy way of working, his work is very good but he is so slow that by the time he has finished his work it ready to be sent to the laundry, his deportment is usually very good in school.

April Lawrence has not worked as fast as he might but his work is done well, he is so very slow that when he has finished a piece of work it is not clean as I would like to have it, but there seems no other way for him, his department is usually very good and when one takes into consideration what a task it is for him to be quiet, they feel like giving him an extra good report in conduct

May Lawrence has been too slow this month for any use, it seems impossible to get him to work as well as he can, he has not put the hem in one sheet this month his department has been good,

1896

June Lawrence has not accomplished as much work this year as he might have but what he has done has been very good he can turn the hems in the towels handkerchiefs & sheets, but he does not like that part of the work. He has improved very much in his department this year, I am sure he has made an effort in that respect He do no kind of school work in my room,

Burkshier Bell

1895.

Sept. Bell is a girl I think who does her best but she lacks energy does no know how to study, she will try and I think in time she will do better work she is reading in the Word Method and does I think well enough for the first month What she knows of numbers is very limited, her deportment is good

Oct. Bell has worked quite well this month she reads fine lessons in the Word Method the words, this and is, she does not feel very sure of, sometimes she can call them, then at another time she will not know them, she can write the word cat. very well holds the chalk easily, in writing and is improving, in number she is very slow only counts fine, if asked to pick up five, sticks she will do it, she puts the sliced animals togeter and knows the cow, dog, rat, deer, bear, & horse, Marches in good time and does not drag her feet in walking in school her deportment is always good, Her work in the sewing class is not good she does not seem to know how to get along with it in threading the needle it takes her the longest time and if she can get any one to do it for her she will not try.

Nov. Bell has been removed to the industial class in the morning. she does very little sewing this month she has had sore fingers so she could not sew, but at her best she does very little sewing. her deportment is good

Bell Burkshier

1896

Jan. Bell has done very good work this month for her she usually is not at all careful whether she works or not but I am glad I can say that she is improving, she has kept her work much nicer and seems much more interested than ever before. her deportment is very good

Feb. Bell is improving in her sewing, some days she does quite good work, she is quite easily discouraged; and need to think one has confidence in her, she is a good girle and is easily managed if one has learned her peculiarities she never makes any trouble in school and seems to enjoy her work

Mar. Bell is very slow she sews only a very little, she has been in school, that is, in the sewing class every day this month, she basted the hems in several towels and usually did it well, she is easily managed and is always quite good in school.

April Bell's work in the sewing class is improving but slowly. she has done better work this month than at any time during the year. She usually is a very good girl in school, she has a very irritable temper but if one will keep cool themselves they can manage her without any trouble.

May Bell is improving in her sewing but very slowly she has done her work much better this month, her deportment has been much better

1896

June Bell has improved in her sewing very much, she has not grown tired of her work and always seems to enjoy coming to the sewing class. She has not done much school work since Christmas, She writes very well from a copy. In school her deportment has been very good

1895 Buck Kattie

Sept. Kattie is industrious in school, she will try to do any kind of work require of her such as building her lesson from single letters and assorting the colored sticks & beads, in Word Method she reads four lessons, she does very little number work sometime, can count to ten does not write the numbers, she does not write, In the sewing class she can baste very nicely, her department is very good. she is quiet and easily controled.

Oct. Kattie works well in school reads from the chart, and in the Word Method can read the first two lessons, in numbers she counts fine and knows the value of fine, does not write, holds the pencil well. she is learning to build her lessons with the single letters does not know the letter by name yet, she assorts the colors. Marches in good time and lifts her feet from the floor. in the sewing class she does good work keeps her work neatly this month she hemed four handkerchiefs and one towel. Her department in school is excellent.

Nov. Kattie keeps up with her class and is improving, she seems to take more interest in the number work and is learning to read the script, she works well in the sewing class, she turns the hem and bastes and hems handkerchiefs nicely and keeps her work neatly she is a good girl in school always kind and good

Dec. Kattie Buck is industious child she works well, but she does not seem to comprehend and it is very diffienlt for her get any thing fixed in her mind so as to retain it, and yet with all her hinderances she leams quite well and manages to keep up with her classes in the sewing class she has improved a great deal, her deportment is good

1896

Jan. Kattie has worked well this month has got accomplished as much as I had hoped she would, yet I think she has done all she could, she works hard building her lesson and some words she get all right, she assorts the colors and counts ten, in the sewing class she does very good work she can baste and hem the handkerchief very well, she improves in her manual work more than in her other school work her deportment is always good.

Feb. Kattie is working well she is improving slowly, she has finished the first part of the Word Method I think know all the words, and can spell quite a few of them, she can keep her place while the others in the class are reciting we are now learning to spell all the words in script and she do quite as well as any in the class, In the sewing class she does very good work and is improving a little each

day, she makes a good errand girl is very quiet never gives any trouble.

Mar. Kattie is improving a little every day she has learned several lessons in the second part of the Word Method and does not forget what she learnes from day to day she is very slow, she has improved in building her lessons some days she works quite intelligently, then at other times she seems to have to work much harder, she has improved in her sewing if she must do her work over she will try much harder to have the work look better the next time. her deport. ment is very good,

Apr. Katties improvement is becoming quite marked she seems to understand what is expected of her and is much more interested in her work than at any time this year, she reads in the first reader, spells her lesson on the book and is more interested than at any time this year, she is improving in her word building, in the sewing class she works well. this month she hemmed several towels and turned the hems herself. Her deportment is very good,

May Kattie is improving every day she is working much more intelligetly than at any time during the year she build a part of her lesson every day know nearly all the letter by name and spells her lesson on the

1896 book and reads very well for her, can read ten letters on the chart and several in the first reader she works well in the sewing class her deportment is always good.

June Kattie Bineh has been a very industrious child while in school and has kept up her interest all through the year She can place the forms in the boards can assort the colors with either the heads, sticks or the pegs. and name them, She assorts the letters and knows all she has used by name builds her lesson from the letters and enjoys the work She reads fourteen stories in the First Bader, and twelve on the chart, and can spell her lesson on the book, In writing she has not improved very much, she can write cat quite well, She counts twelve, She put the Speed Animals and the Cut up Birds together nicely and can name the domestic, In the drill she marches in good time never is out of step, Her deportment is very She has improved very much in her sewing.

1895 Cohen Penny

Sept. Penny does very little school work he is in the chart class because he likes it and he may learn from hearing the other children recite, he works well at the busy work such as assorting the colors stringing beads in the sewing class he can use the needle well basts the towel nicely his deportment is good. This month he has been in the hospital nearly half the time

Oct. Pennie has been out of school nearly all of this month in the hospital, he does very little school work read in the chart class can read two lessons, he assorts the colors and names four of them, puts some of the sliced animals together works well with any kind of busy work. In the sewing class this month he basted two towels and two handkerchiefs and did it very well his deportment is usually good

Nov. Penny likes to be busy and tries to do what ever he see the other children do he work in the chart class is as good as I can expect of him he learn some new words each month, he make a good errand boy and usually likes to work this month he has basted the hem in five handkerchiefs and does it very nicely, his deportment is good.

Dec. Penny Cohen I think is doing all he is able to do he works well at any kind of busy work assorts the colors and names them and puts the sliced animals together and can name many of them, he reads in the 4. chart class and can read several lessons, like many of the children in my room he is much brighter some day than others, he makes a first rate errand boy & is never better pleased than doing something to help me. his department is usually very good

1896
Jan. Penny is doing very much the same work as last month, he does as well as he can in the chart class and with one or two exceptions he is as good as any in the class and like all the children is much brighter some days than others, he assorts the colors and names them, counts ten. his work in the manual class is much better than his other school work, he is usually very good in school,

Feb. Pennie makes very little progress in regular school work, he is endeavoring to build his lesson, from the letters but has not succeeded very well when left to work it out alone, he does almost all busy work well, he make a good errand boy, he has a very stubborn disposition and unless one knows just how to manage him he will give them

quite a little trouble, he marches well and lifts his feet from the floor stands quite erect, usually he is quite a good boy and gives very little trouble in school

Mar. Penny has done very much the same work this month as last he learns a little but his articulation is so poor that he finds it quite difficult to express himself so that he can be understood, he likes to be in the chart class and he can read a few lessons very nicely, he assorts the colors and names them, he is usually quite industrious, he works well at any kind of busy work, he thinks there is nothing he can not do, he is usually very good in school

April Peny makes so little improvement in his regular school work that I find it more than difficult to write up any kind of a satisfactory report he assorts the colors strings the beads after a copy, puts all the sliced animals together also the birds in the sewing class he does quite good work he likes the kindergarten work can name the colors, makes a good errand boy is very quick about his work, his deportment is usually very good,

May Pinny has his lesson every day on the chart some days, he will read very nicely and then maybe he will not do as well again for a week, he works well at all kinds of busy work, his department has been very good

1896
June Pinny I think has done all that I could be expected of him He places the forms in the boards, assorts the colors in either the pegs, sticks or beads and names them all, can assort the letter putting all of the same kind together, knows only a very few of them, reads four lessons on the Chart, He puts all the sliced Animals and Cut up Birds, together and names the ones he has seen In the drill he marches well and is always in step, His work in the sewing class has been very good, he can hem and sew a towel very nicely While he has a very stubborn disposition, I am glad to say that he has been a good boy in school,

Christopherson Kern

1895

Sept. Kern has not been in school any this month I can't report what she can do in school, in the sewing class she works well and is a very industrious girl she hems towels nicely, she is a very affectionate. kind good child always good and trusty,

Oct. Kern is only in the school room during the sewing class, she works well this month she has made four towels and two handkerchiefs, she is affectionate and very kind never gives any trouble at any time.

Nov. Kern works well in the sewing class she does not accomplish a great deal but her work is very good and she is always busy she has hemed three handkerchiefs this month and kept them nicely, her department is always good

Dec. Kern is a very kind and agreeable child and works because she likes to please her teacher and does her work well she has hemed several handkerchiefs this month. her department is always good

1896

Jan. Kern has had a sore finger all this month which unfit her for sewing she is quiet and never gives any trouble in school.

1896
Feb. Kern Christopherson,
this month as last Kern has not
been able to sew from having sore finger
in the sewing class she makes herself
busy in many way she is never idle
she writes very nicely and can read
well in the Ward Method. she is a very
good girl never gives any trouble in
school,

March Kern has done well in the sewing
class she has hemed several towels
and did her work well, she is a
very industrious girl always wants
to be busy at something she is a very
affectionate girl and likes to work to
please any one she thinks is her
superior, she never makes any
trouble in school,

April Kern is an industrious good girl if at
any time in the sewing class she does
not have work she will take a book and
slate from the desk and copy the
story, she sews well turns the hems and
finishes her work with out any help
from the teacher, this month she has
hemed several towels and would have
hemed more if I could have given them
to her, her deportment is always good

May Kern Works well in the sewing
class, likes to be busy all the time
and usually does her work well,
her deportment is always good

1896
June Kern is an industrious girl and
has worked well all the year
and has made a decided
improvement, she hems towels
Sheets and Handkerchiefs, She
has a kind disposition and
is very affectionate child and
of course has never given me
the least trouble in school

1895

Ford Martin

Sept. Martin seems more interested in school work than last year in the chart class he does quite good work. his great trouble is the lack of power to concentrate his thoughts sometimes he will read his lesson very well then again he seems to know but very little about it. He will assort the colors and can name them, does not count, in the sewing class he does very little work, he threads the needle and can baste a very little I think in time he will learn to use the needle very well, he is very nervous and irritable and of course quite quarrelsome.

Oct. Martin works well with the busy work assorts the colors sticks and beads with the sticks he has learned to build the little square pen and does it very well can put some of the pictured animals together and know the domestic animals in reading he is not a very great success he can always help some other boy better than he can help himself in the chart class he reads three lessons. in attempting to write he holds the pencil very well and I think with much patients I may be able to teach him to write a little. In the sewing class he does not improve very fast he can thread the needle and does try to sew His deportment in school is very good for a child like him

Nov. Martin is improving his work in the chart class is better this month he seems to retain what he learns from day to day

of course he is very slow and does not accomplish a great deal; he does very much the same work as last month, in the sewing class he always tries but does not succeed very well, he has improved very much in his deportment,

Dec. Martin Ford is improving very much he reads several lessons from the chart and is much brighter than many of the children who have been in school much longer than he, he know many words in the script, he assorts the colors and names them and builds the little square pen with the sticks and makes it very nice in the sewing class he has improved very much can baste a handkerchief nicely, threads his own needle, and keeps his work very nicely, his deportment in school is very good, he makes a good errand boy, enjoys being called upon to help some one else.

1876

Jan. Martin still improves in reading but for all that I am quite sure he will never accomplish much in school he seems so thoughtless and careless, works very well at the busy work, when he is in the notion other times he will not work at all in the sewing class he does much better work can baste the hem in the handkerchief very nicely and is quite quick about it keeps his work nicely

and seems very happy to think his work does not have to be taken out, his deportment is never the best, but I think he is improving,

Feb. Martin has been transfered to the custodial class

Hiller Gussie

1895

Sept. Gussie does the best he can but he is afflicted in so many way that one can hardly expect any thing of him, he does not see well, things are not where they appear to be to him, then his hands shake so that he can not place his work where he wants to, he comes to the chart class and really enjoys it and seem to learn a little, he can not work in the sewing class. he likes to be errant boy and does that work well his deportment is always good.

Oct. Gussie can not do school work I am quite sure what he learns he learns from memory he enjoys being in the class. he assorts the colors very nicely and names some of them he tries to do every thing I ask of him but many times he fails, in the sewing class he wants so much to learn but he can not his hands are so unsteady can not thread the needle at all. he keeps good time in marching and walks very well he is a good errant boy can trust him to go to any part of the house where he knows he is allowed, his department is always good.

Nov. Gussie would like to learn but he can not see well enough what he does learn is from hearing the class, he likes to be in school and will try to do any work that is given him never objects to any thing, he makes a good errand

boy, he can put some of the sliced birds + animals together and knows the domestic animals and birds, he marches in good time, his deportment is good,

Dec. Gussie will never learn for himself I thing one reason for that is that he does not see as he should, when he will have the book in his hand I will ask him to read or spell and can not do either but if I spell the words for him he will pronounce them, so I feel quite sure that what he does learn he gets from hearing the other children recite, he puts only a few of the sliced bird and animals together, he marches in good time, he makes a good errand boy and is more than glad to do such work, his deportment is always very good

1896
Jan. Gussie has done very much the same work this month as last I had hoped he would learn to read but I have given that idea up I am sure he does not see well enough to do any kind of work, he marches well and is always good in school makes a good errand boy.

1896
Feb. Gussie Hiller
Gussie will never do any kind of school work, he likes to be in school and does his very best he will never learn only as he hears the other children recite he is an excellent boy has a lovely disposition and would be so happy to learn, every day he tries to new but can not see well enough to ever learn,

March Gussie is doing all he can in school but that is not very much his vision is very poor so that he can not see to do any thing, yet he will try to the uttmost, and always likes to have some kind of work on his desk what he learns in school he gets from hearing the other children recite, he likes to be errant boy and does that work very well with a little help, he never makes the least particle of trouble in the school room,

April Gussie has about the same report as last month, he always tries to do any kind of work I give him but is never very successful, he is quite bright understands all that is said to him and could quite a little if he had some one to devote more time to him than his teache can do. his deportment is always all that I could ask of him.

May Gussie has done very much the same work as last month he tries to work but can not accomplish very much what he learns is from hearing the other children receite, his deportment is always very good.

1896

June Gussie is not capable of doing ~~any~~ school work, he learns from hearing the other children, he always wants to be busy at something, Some time he will put the Cut up Birds together then again he does not seem to know any thing about it, He does not See well and for that reason he can not accomplish as much as he otherwise would, In the drill he has improved very much walks much better and keeps good time while marching, His deportment has allway been good

Johnson Johnie

1895
Sept. Johnie belongs to my sewing class but has not been in the class only a few days he has made four pillow cases, he is always busy and really likes to work his deportment is good!

Oct. Johnie is in school very little but when he is in he is always busy, he made one pillow case this month his sewing is fine he is always good.

Nov. Johnie has not been in school this month

Dec. Johnie has been in school only a few afternoons this month, as usual he worked well,

1896
Jan Johnie was in the sewing class for several days at the beginning of the month, he made several pillow cases and did his work very nicely. his deportment is always very good

1896
Feb. Johnie is not in school at all or has not been in mind

Mar. Johnie only comes in school long enough to be ready to match out in line with his class.

April — Johnie is in school so little that I have not much to report only that when he is in school he works well and never makes any trouble.

May — Johnie has not been in school this month except one day, that day he turned the beam on one end of a sheet and partly burned it. when he is in school his deportment is good

1896

June — Johnie has been in school so little this year that I have not much to report, In the sewing class he has done good work. He is a kind good boy and never has given me any trouble

Johnson Bennie

1895
Sept. Bennie has not been in school or the sewing class only a few day this month, he made four towels i.e. hooked the hems that work he does well and keeps his work neat and clean, his deportment is good, he of course is a very restless child but is not mean,

Oct. Bennie is not in school at all

King Carrie

1895

Sept. Carrie is a girl who does all she can in school she is quite timid and I think when she is once settled in her new school and learns what is expected of her she will do good work. she reads in the Word Method and is learning to build her lesson from letters she likes to be busy she knows very little about numbers, she will assort the colors and name some of them, her work in the sewing class is very good she hems towels very nicely and is very careful of he work. her deportment is good,

Oct. Carrie has worked very well in school this month she reads from the chart and in the word Method, in the Word M. she four lessons with the exception of two or three words, she must take her time & not feel, that she is being noticed if she does her best work, she counts fine, assorts the colors names two, purple & red. put the sliced animals together and knows the domestic animals, she is neat and always clean kind hearted. In marching she keeps good time, her work in the sewing class is very good this month she has made nine towels and two handkerchiefs keeps her work nice and clean. her department is good, she is always easily controled

Nov. Carrie is doing as well I think as she can keeps up quite well with her class, seems more interested in the

the number work yet she is quite slow in all of her school work and of course has very much the same work each week, she has learned to build her lesson from letters and is learning to read the script and to spell a few words, she does good work in the sewing class and is improving every day, keeps her work much nicer and is improving in many ways her deportment is good

Dec. Carry has done good work this month she kep up with be work in the chart class and the Word Method she knows many of the words in the script, is learning to name the letter she builds her lesson from the single letters and does it very well indeed and makes very few mistakes can arrange the days of the week, counts ten, she is not very good in her number work, she works well at all kind of busy work puts all the sliced animals togeter, assorts the colors names most of them, she works well in the sewing class I can see she has improved very much she is is more careful to keep her work clean and is careful not to have to take her work out and do it over again, she make a good errand girl, her deportment is always good in school.

1894 Carrie King
Jan Carrie is very slow but keeps up quite well with her classes, she reads in the word method and usually does very good work, she builds her lesson very nicely and is learning to to name many of the letters she also knows many of the words in script. this month is the first time she has thought she could learn to write she forms some of the letters very well and is much pleased to think she is learning to write she counts ten, assorts the colors and works well at any kind of busy work makes a splendid errand girl, she does good work in the sewing class has hemmed ten handkerchiefs keeps her work nicely marches well, her deportment is always very good

Feb. Carrie is doing as well as she can in school she build her lesson beautifully and is learning the letter and can name many of them she keeps her place while the others of the class are reciting she is easily bothered and will not do her best if she thinks any one is noticing her, she counts fifteen and can name the days of the week, she is learning to write a little, in the sewing class she does very good work, she can hem a handkerchief in one afternoon her deportment is very good, she is easily managed in school, marches well & is learning to walk much better,

1896 Carrie Kinns

Mar. Carrie is doing fairly well in school I think she is able of accomplishing more, if she just had a little more energy, yet she does improve a little every day, but like most of these children she has her dull days and her bright ones. she reads in the first reader and is doing good work, she builds her lesson from the letters and I am sure it is a great help to her, she spells a few words of of the book, she is more interested in writing than any time this year, she assorts the colors, can name the days of the week and counts ten, in the sewing class she has improved very much, the pillow case she made was very nice indeed, she is quiet in school and never gives me any trouble

April Carrie has worked well this month she seem to have more ambition and is really doing her best in many ways she works faithfully with her word building and many time she succeed with her lesson splendidly I feel more encouraged about her than I have since she came into my school she, to be sure is very slow but I feel sure she is doing much better she does all the all the busy work such as assorting the colors stringing

1896 the beads putting the sliced animals and birds together she marches well know how to keep the step, in the sewing class she is doing splendid work this month she hemmed a sheet and many towels turning the hems herself; she keeps her work very neatly and works quickly. Her deportment is always good in school.

May Carry has done good work in school this month has seemed more interested than at any time this year, she builds her lesson very nicely and does it quickly and reads very nicely in the primer and on the chart, she is busy all the time, her work in the sewing class is very good and she keeps it neatly her deportment is good,

June Carrie has worked well all the year and has kept up her energy to the last, she seems to be more anxious to learn now than at any time. She of course is quite slow but is anxious to improve She knows about form and color assorts the colored beads, sticks and pegs, assorts the letters does not know many by name, She builds her lesson from the letters and does her work very nicely. She reads ten lessons on the chart and also reads forty six pages in the Primer. Write the sentence The cat can run. I feel

sure she can learn to write for
the letter she does make are
well formed. She counts twenty
The Sliced Animals and Cat nap
Birds she puts together easily
and names all those she has
seen In drawing with the Slate
Steneil she does very well although
she has not done much of it
In marching she keeps good time
and the drill has be the cause
of her standing and walking much
more erect. In the sewing class
she has made a decided
improvement, she makes Towels
Sheets and pillow cases. Her
deportment is always good.

Misslin Theador

1895
Sept. Theadore is in school part of the day
he learns a few new word each week
he writes very well will write his own
name and the name of all the
teachers and his attendant. his work
in the sewing class is very good he does
not work very fast. his deportment is
good he likes to be the errant boy.

Oct. Theador is in school only from ten
until twelve fifteen, he does many thing
as errant boy likes to have something to do
when he is well, he sews well when he
is in the class, this month he has made
one pillow case one towel, two handkerchiefs
his deportment is good.

Nov. Theador does good work when he is
in school but he is in school so very
little that I have but a little to report
this month he has made one handkerchief

Dec. Theador does his work well wherever
he is, in the school room he is a good
help, he seem to understand so much
that asked of him, when he is in the
class he sews nicely and is quick with
his work, his deportment is good in
school.

1896
Jan Theador is in school so little that
he does very little work of any kind
he sews well and usually likes to be
busy, his deportment is very good

1896 Theador Mirslie

Feb. Theador is in school in the morning he makes a good errand boy likes to be busy very often, he will spend all the time sewing he does his work well and quickly, he is always kind and good, he writes beautifully and can write any copy he needs

Mar. Theador has much the same report as last month he is not in school very much, and when he is he usually sews this month he made one pillow case, he like to be the errant boy and and when he does have that work he know what I want him to do and does the work nicely, he has not been very well this month so I have not expected much of him, his deportment is good,

April Theady has not been in school much this month who he is in school he likes to be busy he sews nicely and keeps his work very neat, this month he has worked on towels hemed quite a number when he is in school he helps me in many ways, his deportment is always good in school

May Theadore is not in school very much he sews well and usually likes to be busy, he will take the first reader and copy the lesson on the board, writes well, I can make him understand any thing I want him to do, his deportment is always very good

1896

June Theadore is industrious what ever he does is well done knows form and color, assorts the letters and write beautifully will take a book and write a short story on the board without any help. Writes his name and the names of all the teachers and many others. Puts the Sliced Animals and Cut up Birds togeth. He is bright and understands quickly what is expected of him In the sewing class his work is very good, in that he has made quite an improvement. His deportment has always been the best.

Mundt Eddie

1895

Sept. This child knows every word that is said to him and will do any errant you send him to do, but he just will not try to talk in the chart class he will sometimes try to repete the words after me, he do not seem inclined to want to learn, with the busy work such as assorting the colored sticks + heads he does well, he will try to write if I will stand by him all the while, in the sewing class he does good work when he will try his deportment is not always the best

Oct. I really do not see very much in Eddie to report this month he is such a willful child, that it is difficult to really know whether he can not learn or whether he just will not try, the things he learned last year he has not forgot he can hem very nicely in the sewing class this month he hemmed, two towels and two handkerchiefs, he likes to be praised but does not want to do any thing to merrit it. his deportment is never very good.

Nov. Eddie seems to take a little interest in the chart class this month tries to say a few words some I can understand, he works well with any thing he likes to do but does not like all kinds of work. in the sewing class

he does very good work and keeps his work quite neatly if I could spend more time with him he would do much more work this month he put the hem in two handkerchiefs i.e. basted them,

Dec. Eddie really seems to want to learn when he hears the other children reciting and will always make some kind of a noise when the class is reciting in concert, he says only a very few words that I can understand, and I am quite sure that no else except myself can understand one word he says he does not like work of any kind, but always wants the thing you do not want him to have in the sewing class he does better work can has the handkerchief very nicely he puts many of the sliced animals togeth and will name some of the domestic animals. I can never brag on his deportment,

1896
Jan. Eddie has not a very encouraging report he likes to be amused, and if one could devote a great deal of time to him he might, with much patients, accomplish some thing, but in school he will never do very much work in the sewing class he has a better report he basts the handkerchief very nicely and is quite neat with his work, this deportment is never very good,

1896 Eddie Mundt
Feb. Eddie is not a very industrious child he simply will not make an effort he likes to play if he can find some one to play with him, he always wants to come to the chart class and say his lesson he does not talk so any one can understand him, but I feel sure he does not know one word of the lesson his deportment is never very good,

Mar. Eddie does not improve very much for which I am very sorry he look to be such a stout child and it does seem that he could learn if I only knew just how to get him interested but so far all my efforts have been in vain he will put all the sliced animals together and assort the colors and build the little pig pens and will work at almost any kind of busy work but he will not learn to talk in the sewing class he does very good work his deportment is not the best by any means.

April Eddie improves so little if any that his reports must necessarily be very much alike each month, he has done very little school work does better in the sewing class this month he basted the hem in a few towels. His deport-ment is never very good

May Eddie has learned to assort the letters and put them in boxes. I know he can do this but he is just simply too lazy to do it as it should be done, he works well at almost any kind of kindergarten work. his deportment is never good but he has improved very much this year,

1896
June Eddies improvement through the year has not been as much as I had hoped for. He can fit the forms in the boards assort the colors, using either the colored pegs, beads or sticks. with the stick he builds the little pigpen nicely. He can put all the sliced Animals and Cut up Birds together independently Assorts the letters putting all the letters of the same name in one box. In the drill he can march well and stand erect but he very often chooses not to do so. In the sewing class he has worked well and has improved very much Threads the needle ties a knot in the thread. and keeps his work nicely His deportment is never as good as I would like but he has improved very much indeed,

Muller Willie

1895-
Sept. This boy belongs to our sewing class but has not been in the class very many day this month he has been at work other places, he is a good boy and can do very nice work

Oct. Willie is in the sewing class so little that I have nothing to report except that when he is in the class he does good work, he is a good boy always in a good humour.

Nov Will is not in my school only a short time each day does not have time to do any thing

Dec. Willie does not come to the class at all.

1896
Jan. Willie only comes in school so as to be able to march out with his class

Feb. Willie has been sick nearly all this month,

Mar. Willie has been in the hospital nearly all this month

April Willie has not been in school at all comes in just in time to march out in line.

1896 Magney David 1896

April David doks just what he likes. he will assort the colored sick in groups of ten sticks of each color if I will make the numbers on his slate on a piece of paper and will have them all right he make all the numbers up to 31. and makes them beautifully, does not talk nor one try but hears and knows what you say to him, his deportement is not good but he is not bad for the sake of being mean.

May David is not indolent he wants to be busy all the time, this month he has made the calendar over and over again and does it perfectly, some times will even put in the letters standing for the days of the week he will allow me to help him, but much prefer working independently, he is a strange child acts more like an insane than a feeble minded child,

June David is always busy. He can fit the forms in the boards and assort the colors using either the pegs, sticks or beads, with the sticks he will place them in clusters of ten in each cluster with the heads he will improvise different ways of putting them on the string, He puts many of the sliced animals or leaf up Birds together. He can make all the

number and makes them beautifully. He is a child that can not be expected to keep good order he is extreamly nervous. and the most trifling thing will irritate him, but if left to himself he is a very good child. He will draw the Calendar and have just the exact number of squares and will make up all kinds of pictures on the board.

Magney David.

1895

Sept. David is one of the most nervous children I have ever had in my school if any thing unusual happen in the school room I like some one speaking louder than usual or let a slate fall or the door slaming, it seem to cause him great pain and he will quiver and hold his ears and make such a strange noise he never walks like any other child, he does not speak one word but his hearing seems to be very acute. he is really never quiet in school.

Oct. David does not do any kind of shool work, he hears and seems to understand all that is said to him he has no use for a book or paper of any kind except to tare it in the smallest bits, he will take the childrens books and tear out the pictures he is very sly about such things. if sent to the board he will nearly always draw the same picture he seems to have a little idea of drawing, in writing the number he will make 1. 6. 4. he is never quiet.

Nov. David has been more quiet in the school room than usual, he does very little work. if I will sit by him he will sew on the sewing card but as soon as I leave him he will spoil the card, he likes to work at the black board will draw a house & square

he does not talk so will never do much school work.

Dec. David Wagner do not talk and is to nervous to learn if he could, he will draw pictures on the board all day long if allowed, he makes the figure 4 and 9 but will only do it when he wishes to, he can sew a very little on the very simplest sewing card folds paper very well, he is never quiet or still,

1896

Jan. David does no kind of school work at all, amuses himself by drawing pictures on his slate or the board he does just what he likes makes a few of the numbers but does not know their value, he does not improve in his deportment in the least.

Feb. David does just what he wishes to one day he copied all the number up to 10 from the board and did it nicely but I have not been able to get him to do it since, he is a very nervous child, so easily excited, when he is very quiet it is the exception.

Mar. David makes all the number from 1 to 20. very nicely indeed and will assort the colored stick in order ten of each color in each group if I will make ten numbers on a paper as a guide for him, he understands all that is said to him but never talks.

(Page 169.)

1895

Sept. Neshiem Isabelle.

Isabelle is an industrious girl works well in school reads in the Word Method and seem to understand how to read and keeps the place while the others are reciting counts ten and write a little, build her lesson quite well with the letters, counts ten does not write the numbers but will try when I ask her, her deportment is good, she is always quiet in school.

Oct. Isabelle is doing well in school likes her work and is always busy, she reads seven lessons on the chart and ten lessons in the first reader, she is learning her letters spells her lessons on the book with a very little help, she is also in the Word Method and does good work I think she understands what she reads, every morning she builds her lesson from the single letters that she learned this month and is much pleased with her success, she is learning to write and makes some letters very well she is also learning to read script, she writes the numbers after a copy can pick up ten sticks, knows the value of the numbers, she assorts the colors names none but red, she does all kinds of busy work such as stringing the beads in groups of 5. and assorting the stick in groups of 10. In the sewing class she does good work this month she basted and hemmed three handkerchiefs and two towels she is kind and good in school is not the least trouble marches in good time but she lacks expression in all her work.

Nov. Isabelle Neshem is doing good work in school will learn a new lesson in two day, is learning the letter spells nearly all the words on the book and quite a number off the the book reads script very well builds her lesson from the letters and does it quickly, and very nicely, she is becoming interested in numb and writes a little, she is very industrious and does all she can, in the sewing class she does good work but is very slow this month she hemed three handkerchiefs and she seemed to be busy all the sewing hour her department is very good.

Dec. Isabelle is working well she never has to be urged, she is reading in the first reader builds her lesson, knows very nearly all the letters and can spell her lesson from the book, she names the days of the week can count ten know the numbers when written on the board, she writes only a very little, assorts the colors, put the stick animals together and is improving in all her work, she sews quite well hasts her own handkerchief and hems it she does not like to be errand girl, I think that is owing to her diffidence and not because she wants to be stubborn. she is a very nice girl in school and is very easily controled, marches in good time and carries her feet well,

1896

Jan. Neshem Isabelle

Isabelle improves a little every day she is never idle she reads her lessons in the first reader very well and can build them with out a mistake and do it alone she spells her lesson from the book knows her letters, she writes a few words very well, counts ten assorts the colors and names some of them she is a very good girl in every way, in school she does her work well in the sewing class she has hemed several handkerchiefs, keeps her work very nicely. she is very quiet does not like to be any place where she will attract attention does not like to act as errand girl,

Feb. Isabelle is doing very well in school she seems quite interested in her reading and is improving she works well and is always busy, she does not care for number work but will will do her best in class, she counts fifteen and does all kinds of busy work such as assorting the colored sticks, stringing the beads &c&c, she works well in the sewing class and keeps her work nicely. she marches well keeps good time her deportment is always very good

Mar. Isabelle improves a little every day she has nearly finished the first reader she spells her lesson off the book and can read many words in script she is learning to write a little can write her name after

a copy quite well she builds her lesson from the letters without a mistake she add numbers a little can make all the numbers, she seems much interested in school, she assorts the colors and names four of them, she works well at any kind of work she has to do in the sewing class her work is well done and kept very nicely, she never makes any trouble in school,

April. Isabelle is an industrious girl she is never idle unless she is sick she writes after a copy quite well counts a little writes her name, builds her lesson beautful never makes a mistake she has finished the first reader and has taken up the second reader and is getting along nicely spell the lesson off the book, She does all the busy work such an assorting the colors, stringing the beads, putting the shied animals and birds together and in the sewing class she does splendid work, types her own hems, this month she hemed a sheet and several towels, her deportment is always the same, (good)

May Isabelle has done good work in school this month, she builds her lesson with out a single mistake, and is doing her best to learn to write, makes many of the letter well and will

1896 make nearly all of them from a copy, write her name, sometimes she does not get it quit right, she adds pimple numbers and make all the numbers she does all the busy work well, in the sewing class she does her work very well and keeps it neatly, her deportment is always good,

June Isabelle has worked well all the year, She know how to work intelligently but she is very slow She fits the forms in the board assorts the colors. Assorts the letters and can name all she has ever used, Builds her lesson every day. She reads in the Second Reader Spells her lesson independent of the book and can write it with help on the board, She writes her name (Isabelle) Writes all the numbers and can add very simple numbers, Put the shied Animals and but up Birds together and knows the common ones, In the drill she marches well and walks quite erect, keeps good time. In the sewing class she has improved very much, she makes Sheets, Pillowcases, Towels Handkerchiefs Her deportment is always very good,

Nicholas Rosa.

1895

Sept. Rosa is in the sewing class and does good work. she basts and hems towels nicely. she is a quiet good girl never gives any trouble,

Oct. Rosa is in school a little while in the morning in the chart class I am sure she does her best but that is not very good. she knows only a few words seems anxious to learn. she asserts the colors names red and green. in the sewing class she does basting she is only in the class Saturday morning her deportment is always good

Nov Rosa is doing good work in school for the time she is in she reads on the chart and learns a little every day she of course is very slow. in the sewing class Saturday morning she does quite good work and could do much better work but her hands becomes numb and she is compeled to stop and rest them. she is a very good girl and gives little trouble.

Dec. Rosa is improving quit a little she reads several lessons on the chart she likes her school work. she is only in school in the morning before recess, she is in the Saturday morning. she is always good and kind in school.

1896 Nicholas Rosa

Jan Rosa is in school only the first hour in the morning, she reads from the chart very well, she counts ten and assorts the colors, she is a good girl never is the trouble,

Feb. The report for Rosa is very much the same as last month she keeps up with her class, she will never read well enough for it to be any pleasure to her, she counts a little assorts the colors and will keep busy if the work is given to her, but she will never ask for it herself, her deportment is always very good

Mar. Rosa does the very best she can she reads a few lessons from the chart she will never do much school work she works well with any kind of busy work, she sews a little saturday morning and does that very nicely I think she is not lazy but she just lacks the power to apply her mind her deportment is allways very good

April Rosa's work in school is not at all satisfactory, she is in school only during the first session in the morning she reads in the chart class some times she does very nicely than again she seems not to be able to recall any part of the lesson, she works well with the busy work and does not seem at all lazy she is in the sewing

1896 class Saturday morning in this class she does quite good work, she is a good kind girl and never makes any trouble in school,

May Rosa works well for her the little times she is in school she reads on the chair, some stories she reads very well, and some days she reads better than other, she is in the sewing class on Saturday morning and works very well. Her deportment is good

June. Rosa does not do much school work, she can place the forms in the form boards assort ther Colors either with the stick heads or the Pegs. She will name them sometimes but is never quite sure that she is right. She reads a few lessons on the chart, she counts 10. She puts the Sliced Animals and Cut up Birds together and knows the common ones She is not indolent. The only trouble with her is that she has not the power to understand, She works in the sewing class Saturday morning she sews very well can baste and hem the handkerchief or towel Her deportment is very good

1895

Sept. Papke Lewis

Lewis is not in school more than a half hour in the day during that time he recites in the chart class and does very good work can read, three lessons, he does not like to work. he is very stuborn and willful and inclined to be quarelsome.

Oct Lewis has left school

Nov.

Dec.

Jan

Feb

March

April Lewis has been sent back to school has been in only a few days.

May Lewis is in school all day now he assorts the colored stick, heads and pegs, can assort the letter and put them in seperate boxes, he is in the chart class, and round days will read very well in it. if he is in the right spirit, his deportment is usually quite good

1896 Lewis Papke.

June Lewis has been in school so little that I have just much to report for him. He can place the forms in the Form Boards, assort the colors with either the Pegs, Sticks or Beads, and can name them. He can assort the letters and name many of them. Puts the Sliced Animals and Cut up Birds together, and names the ones he sees in ever day life. In the Sewing Class he threads the needle basts the hem in the towel. His deportment has been as good as could be expected of a child of his disipodition.

1895-

Peterson Martin

Sept. This is Martins first year in school he seems quite bright, he learns well in the chart class reads four lessons, he can express his himself much better than many in the class, he understands all that one says to him and is very bright looking works very nicely I think he will be one of the bright children in the future. he is always quick awake and usually likes to be busy. his deportment is all that could be expected of a new child, has not learned to count ten yet, he makes a good errant boy, he does some work in the sewing class can thread the needle and baste a little.

Oct. Martin is a bright child for this school he reads seven lessons from the chart and seems to understand them, he also reads two or three lessons in the first reader, spells some of the words, he assorts the colors, names only green puts the sliced animals together and knows the domestic animals, he has not the least trouble with matching the forms in the form boards and all the busy work is easy for him. he makes a splendid errand boy knows as well what is expected of him is very quick marches well keeps quite good time and if his shoes fit his feet I am very sure he could walk without dragging his feet. his deportment is very good in the sewing class he has learned to thread the needle and baste the handkerchief. this month he basted four.

Nov.

Peterson Martin

Martin is a nice bright boy and I am sure he could learn more than almost any of the children in my room if I could give him more of my time he reads in the Word Method and keeps up with the class, is also learning to read the script and to spell a few words, is learning to build his lesson with the letters puts several words togeth he is a splendid errand boy knows just what to do and how you want it done in the sewing class he does good wok this months he has basted the hem in eight handkerchiefs and did his work well, his deportment is good.

Dec.

Martin is a nice bright boy, that is could learn quite a good deal but he is just a little inclined to be lazy yet he is improving every day reads in the Word Method and is as bright as those who have been in school much longer than he, he has learned to build his lesson from the single letters and know some of the letters counts five and some times will count ten, know his right hand and left, puts all the sliced animals together assorts the colors name not more than three he knows just what to do and how I want any thing done when he is acting as errand boy and is very quick about that kind of work, his deportment is very good.

1898
Jan.

Martin Peterson

Martin is doing nicely in school he learns intelligently, he reads in the chart class in in the first Reader, he knows many of the letters and spells a few words from the book, he builds his lesson very nicely and quickly, he is learning to write his name and is improving very much, he is quick to take up any kind of busy work nothing seems to head for him, he assorts the colors & names them sometimes he makes a good errand boy, in the sewing class he does good work but does not like to sew very well, his deportment is very good.

Feb.

Martin is still doing well in school he reads in the Word Method and the first reade he is quick and understands what he is doing keeps the pleace while all the class recites knows nearly all the letter and spells both in script and print writes his name quite well and builds his lesson beautifully from the letters counts fifteen & can truly say that he is improving every day, the work he does in the sewing class he does well and nicely, as an errand boy there can no better with the same experience, he is restless in school but never mean or vicious and always ready to help any one who needs help.

Martin Peterson

Mar. Martin is a bright child for a school of this kind, he reads in the fist reader and also on the chart knows all the words in the first division of the Word Method in script and in print and can spell many of them, he writes his name very nicely and makes all the numbers counts twenty assorts the colors, puts the sliced birds and animals together, he does his work quickly and intelligently makes a splendid errand boy knows just what to do and how to do it, in the sewing class he works well, just now he is much delighted to be in the Kindergarten a part of the day. he is a very nervous child and if allowed he would never be in the same place two minutes at a time, but with all that he is not hard to manage and gives very little trouble in school

April Martin is improving nicely reads in the primer can spell all the words on the book and many off the book, builds his lesson from the letters and does is so quickly and correctly writes many words and can write his name he is bright and quick in all his work, this month he has spent a part of his time in the Kindergarten, which is a source of much pleasure to him, he has not been in the sewing class this month, his deportment has been good.

May Martin has done good work in school he builds his lesson and knows all the letter he has had in any of his lessons reads ten lesson on the chart, and ~~also~~ reads in the primer assorts the colored sticks into groups of ten in each group, writes his name very nicely and write many other words from a copy, he is inclined to want to be changing his work often, likes to be the errant boy, is very quick about his work, his deportment is usually very good

1896
June Martin is quick and bright. He does all such work as placing the forms in the Form Board, Assorting the Colors, and assorts the letters know all that he has had in any of his lessons, Build his lesson story beautifully and spell the words on the book. Reads on the Chart ten lessons and in the Primer, Writes his name independently and will copy any simple words that I may put on the board or Slate. Puts the Sliced Animals and Cut up Birds together and names the ones that are the most common. In the Drill he marches in good time stands erect and does not drag his feet. And the Sewing class he has improved very much. he has learned to thread the needle

and bast the hems in the Towel
and Handkerchief as an errand
boy one could not ask for a better
is very orderly and understands
readily what is wanted or expected
of him His deportment is very good,

1895 — Rosencrans' Belle.

Sept. Bell is doing as well as she can she reads in the Word Method and I think will do good work, when she learns what is expected of her, she does not do much in numbers work but tries. She is easily governed and gives very little trouble in school. In the sewing class she can baste the hem in the towels, and handkerchief.

Oct. Belle does good work in school reads from the chart & the Word Method in the N. M. she reads four lessons with the exception of two or three words, and on the chart can read four lessons writes well from a copy but has not learned the letters writes her name is learning to read script with her other lessons assorts the colors and knows red, in numbers she counts five can make all the numerals but does not know the value of them all, puts the plaid animals together and knows the domestic animals, in the sewing class she does good work this month she made one pillowcase and four handkerchiefs. she marches well and is a very good girl always kind and willing to obey. make an splendid errand girl knows so well what is expected of her.

Nov. Bell keeps up with her class and seems quite interested in her work she has improved very much in building

her lesson from the letters and is learning to read the script and to spell a few words from the book, and in the number work she seems to understand much better what I want her to do yet her knowledge of the work is quite limited she can write her lesson from a copy and can write a few words from dictation, her work in the sewing class is very good this month she has hemed two towels and eight handkerchiefs she keep her work nicely, her deportment is always very good.

Dec. Bell is doing good work in school she reads twelve lesson in the Word Method, can keep the place while the others in the class are reading she reads the script very well builds the lesson with but few mistakes, she writes very nicely, is learning to spell, knows several of the letters, counts twelve, assorts the colors knows red, and green, makes a good errand girl, she is much brighter than the most of the girls in my room, she can write her own letter with a little help, puts the sliced animals and birds together and the domestic animals & birds. in the sewing class she does good work and does it quickly and neatly. her deportment is always good.

1896

Jan. Rosencrans Belle

Belle seems bright in many ways and I can not understand why she does not learn more from her books; she talks quite well and likes to listen to a story but would rather I would tell it to her than to have me read it, she counts ten and writes well from a copy read script as well as print, she has nearly finished the first part of the word Method does not read readily. she does all the busy work nicely, in the sewing class he work is very good and she accomplishes quit a little for during the sewing hour she is always busy, her deportment is very good,

Feb. Belle's report is very much the same as last month I think she improves a little each day but she is verry, very slow about learing to read, she reads in the Word Method and the first reader, she is learning the letters in both script and print, she counts fifteen with a very little help and take a part in all the general exercises as an errand girl she is very good. her work in the sewing class is all that could be expected of her this month she has made nearly three pillow cases and hemed several handkerchiefs, she marches in good time, her deportment is always good in school,

Belle Rosencrans

Mar. Bell is improving a little every day I would be more than glad to report her as doing as well as it seems to me she capable of doing, but I can not hurry her one particle she reads in the first reader but not very well yet she do I presume as well as she can she builds her lesson beautifully and writes from a copy nicely but does not know all she has written she is learning script knows many of the letters, she writes her name. counts fifteen, puts all the sliced animals and birds together assorts the colors know four of them, her work in the sewing class is very good and she has improved very much, she makes a good errant girl known so well how to do the work, her department is very good,

Apr. Belle is doing quit well in school I some time wonder if she could not do better if she would try a little more, she reads in the primer some times she has her lesson very nicely, she builds her lesson from the single letter beautifully, she know many of the letters, writes very nicely indeed, this month she wrote a letter home to her mother she works well in the sewing class and is improving nicely in that class She never makes any trouble in school,

May Belle Rosencrans, is doing good work in school, I think she may be doing all she can, she reads in the primer, builds her lessons and can spell nearly all her lesson on the book, she does not read very well, she writes nicely from a copy and some word she can write without the copy, in the sewing class she does good work and keeps her work nicely her deportment is always very good,

1896

June Bell places the forms in the Form Boards assorts the colors and names some of them assorts the letters and can name all she has used in her lessons, Builds her lesson with the letters, beautifully, She spells her lesson on the book does not read as well as she can spell She will write any copy that is given her and write beautifully She know many letters in the script Her work in number is not very encouraging, she counts twelve and can place any number of stick from one to twelve on the desk if asked to, She reads in the Primer and on the Chart, She keeps up with the class but is not the best, She Put the Sliced Animals + Cut up Birds, together and will name the common ones, She will draw very pretty pictures on her slate, by the aid of the Slate

Stencil. In the Drill she marches in good time stands erect and does not drag her feet. Her work in the Sewing Class, has been very good, she has improved very much, hems sheets, Towels Pillow cases + Handkerchiefs. Her work is very good indeed. When acting a Errand Girl she does good work Her deportment is very good she has never given me the least trouble,

1895 Ristow Clara

Sept. Clara is a quiet good natured child works well reads in the Word Method likes to be busy; will work at any busy work such as stringing beads and assorting the colored stock. In numbers and writing she does very little. In the sewing class she hems towels thread her needle uses the thimble. Her deportment is good.

Oct. Clara is an industrious child and is working to the best of her ability, she reads the first four lesson in the Word Method, also reads on the chart, can spell. boy, man, rat, dog & girl. writes her name so that one could recognize it, she builds her lesson from the letters of course she takes it from the book. does not know any thing about numbers assorts the colors can not name them, marches in good time and is learning to hold her shoulders up when she walks. In the sewing class she is improving in her work, hems the towel and handkerchief. She makes a good errand girl, she speaks almost any word but can not repete a sentence, her deportment is good, she has a kind disposition

Nov. Clara is keeping up nicely with her class in the Word Method and is learning to read the script, she can build her lesson from the letters with but little help and in that way she

is learning some of the letters. she is very slow but seems to retain what she learns from day to day, numbers are very hard for her, yet she tries and I am sure the exercise is good for her mind, she works well with any kind of busy work I give her, in the sewing class she is improving, does her work much better and likes the work. she makes a good errand girl, her deportment is very good

Dec. Clara is keeping up with the class in the Word Method can read twelve lessons quite well, write a few words and also the numbers builds her lesson very nicely from the single letters, likes to be busy, does all kind of busy work well, in the sewing class she is working well, has improved very much, keeps her work nicer and sews faster and better, she makes a good errand girl, her deportment is always good,

1896
Jan. Clara is improving very much in her reading and builds her lesson very nicely and in that way is learning how to keep her place while the others of the class is reading and is also learning the letters and to spell on the book with a little help will count fifteen, she improves in her writing, she is improving in her sewing keeps her work much nicer and does it more quickly, she is always good in school,

Ristow Clara.

1896
Feb. Clara has done good work this month she has finished the first part of the Word Method and can spell nearly all the words in print and script builds her lesson nicely and understands what she is doing she has improved in her writing counts as well as last month in fact she remembers all she learns from day to day. She works much better in the sewing class, marches in good time, her deportment is always very good

Mar. Clara is learning a little every day she knows all the words in the first part of the Word Method both in script and print and can spell many of the word in script, she reads two lessons in the second division of the book, she builds her lesson from the letters and is learning to do it alone, she writes her name and a few other words but not well, she makes many of the numbers, she assorts the colors and names some of them counts a little, she has improved in sewing very much, does any kind of busy work that I may require of her, she makes a good errand girl and likes to do that kind of work, marches in good time. her deportment is very good,

Apr. Clara is doing much better work this month. she reads in the first reader can spell all the words on the book and many off the book. she builds her lesson nicely and write many words very well, she is capable of learning quite a little I think she seems more interested now than she has this school year she makes a good errand girl her work in the sewing class is very good as far as it goes she does not like it very well she hates hems quite well her deportment is very good

May Clara is working well, she reads ten lessons on the chart and can spell all the words on the chart, she also read several lessons in the first reader, and builds her lesson from the letters, and writes quite well from a copy, she has made quite an improvement this month, in the sewing class she does very well. but does not like sewing as well as some other school work her deportment is very good.

1876 Clara Ristow

Clara R. is rather bright and works intelligently. it is no trouble for her to fit the forms in the boards she assorts the colors, using either the colored pease sticks or beads. She assorts the letters and call the name of those she has used, Builds her lesson story with the letters without making any mistakes except with the the letters D. & B. Reads in the First reader, has read fourteen lessons she also reads on the Blart. She spells her lesson on the book, and is attentive in class. She writes after a copy forms her letter very nicely she counts fifteen. Put all the Tame Animals and Cut up Birds together and names the common ones. In the drill she marches in good time walks erect and does not drag her feet. In the sewing class her work has not been as good she does not like the work and of course is not interested in it She hastes the hem in the Towel and Handkerchief. Deportment is good, she likes to be busy and works quietly.

1895- Stewart Harry

Sept. Hary is in the chart class and is quite interested and if he could make himself understood would do very good work, He assorts the colored sticks and heads from dictation and does it nicely In the sewing class he, threads the needle sews his thumble and darts towels and handkerchiefs, His deportment is usually very good.

Oct. Harry does very much the same work as last month he likes to work but wants to choose the kind of work he is very obstinate, he make a good reader and boy in the schoolroom, he writes a each very well, in the sewing class he does very little work it seems he can not learn with ever so much help he will hurt the hem in one handkerchief in a month, his deportment is not the best.

Nov. Hary ~~enjoys~~ being in school works well, at busy work likes to be in the chart class, but does not learn very much, he has no power of concentration, he has worked better in the sewing class, but has accomplished very little this month one reason for that is, that he has had very sore fingers, his deportment is very good,

Dec. Harry Stewart, Does very much the same work I can't see that he improves very much, he make a few numbers and writes a few words can read two lesson on the chart, as errand boy he does very good work he know all that is said to him, and what he learns he get from hearing the other children and not from applying himself his deportment is not very good,

1896
Jan. Harry will never do much school work in the first place he will not try and then it is possible that he can not learn, he works well at some kinds of busy work; he sew a little his improvement in that line is very slow, I think this month his deportment has been much better

Feb. Harry's does not improve very much he seems anxious to learn but it is just impossible for him, he will work well with the bussy work put the sliced animals and birds together nicely assorts the colors and builds the little pig pen his deportment is not the best but he is not mean, but restless,

Mar. Harry does about the same work a last month, he can assort the letters and put all letter of the same name together that he has accomplished this month he puts the sliced animals together and at

1896 assorts the colors and works well at any kind of busy work make a good errant boy, in the sewing class he does not improve very much is seems impossible for him to learn how to sew, he can thread the needle and bast a little, his deportment is not very good he seems inclined to be quarelsome.

April Harry has very much the same report as last month he does not do much school work, he will work at any kind of busy work and likes it, he did quite well in the sewing class for him better than usual this month, he is not always the very best boy in school

May Harry has learned to build several words this month and seems much interested in the work he has been more industrious this month works well at all kinds of busy work comes to the chart class and seems to like it but can not speak well enough to make himself understood, his deportment is usually very good,

1896 Stewart Harry

June Harry Will never als much schoalwork He can place the Forms in the board assort the Colors using either the Sticks Beeds or Pegs. He assorts the letters and can build any lesson story he has had. He is more interested in schoal wort this last month than at any time during the year. He writes the word. Cat. does nothing with number Cuts the Sliced Animals and Cut up Birds together On the drill he marches in good time and has nearly overcome the habit of draging his feet. he is a very stuborn child but can be managed very easily His deportment is usually very good

1895 Stapleton Walter

Sept. Walter seems to have retained all he learned last year and is more interested in his schoal work, he does very good work in the chart class, reads four lessons all kinds of busy work he does well. In the sewing class his work is good, His deportment is good

Oct. Walter is doing all that he can I think he reads from the chart and some day he surprises me by doing so well then again he disappoints me by not doing so well it seems almost impossible for him to fix his mind on any thing connected with schoal work, his kindergarten work is very good, in the sewing class his work could not be better his deportment is usually very good.

Nov. Walter is working very well, he reads several lesson from the chart and seems much pleased to think he is learning to read he does not work as well as he can I am sure, he likes all kinds of busy work and is very exact with his work assorts the colors and names them, and will work for a hour with the sticks making original pig pens as he calls them, His work in the sewing class is good this month he has hemed five handkerchiefs, his deportment is usually very good,

Dec. Walter Stapleton, may do as well as he can but I feel that he ought to do much better work he can bright enough, and some days he does very nicely and then again he is quite dull, that is in his book. but in any other work he does well, and much better than any child in the room his paper foldings are perfect assorts the colors names them and is quite original in making little devices with the colored sticks, each little figure is always perfect, in the sewing class his sewing could not be improved upon, he makes a good errand boy. his deportment is usually very good.

1896
Jan. Walter is so headless, that it is harde to know just what he does know or can do Some times he will read very well indeed then again he will not even try. he counts ten to with a little help will count fifteen he works better at any thing than with his reading lesson, he seems so bright to look at him, that one becomes quite discouraged with him he makes a good errand boy, in the sewing class his work could not be better, he keeps his work very nicely and works part his deportment is very good,

Stapleton Walter.

1896
Feb. Walter is becoming more interested in his school work he builds his lesson with out a mistake from the letters and knows many of the letters by name I feel sure that he has done much better work this month than at any other time, he is quite delighted to think he can build his lesson with out any help, all the busy work he does well and quickly in the sewing class his work is good, as an errand boy he does well in the schoolroom, aside from be being restless his deportment is good.

Mar. Walter works well with the letters in building his lesson, he does is so well and in that way he has learned to spell many words and learn many of the letters by name, but when he comes to class he is so heedless that I become quite discouraged with him he just will not give his attention to the class and the lesson, such work as assorting the colors and building the pig pen, putting the sliced animals and birds together, he will do with out the least trouble, his sewing is remarkable, his deportment is as good a child as can be who has such a restless disposition.

Apr. Walter is working very well in school he builds his lesson from the letters without a mistake and knows many of the letters and when he wants to can read quite well from the chart, there is no work in the school room in the way of busy work that he cannot do, in the sewing class his work is good this month he hemmed a sheet and could have done more if I had had the work for him I am sorry he cannot learn more from his books. his deportment is as good as I can expect of him.

May Walter is working as well as in the past he is very slow but what he does is done well he is very systematic and any and all his work is done in order, he never makes a mistake in building his lesson and he has learned many of the letters in this way. his sewing is beautiful his deportment is good for a child of his disposition

1896
June Walters work during the year has in some respect been very good and in other, not so good. He can do all the busy work in school such as placing the Forms in the boards assorting the colors using either the Beads, Sticks or Pegs his work is very exact, Assorts the letters, and can build any lesson story on the Chart never

making a mistake, but when I require him to read aloud from the Chart he seems to lack any power of fixing his mind on the work. some days he will do very well, then again he seems to know nothing whatever, i.e. in regard to reading. Spells his lesson on the book Writes this copy, a cat can run, Know very little about numbers can count 10. Puts all the Slides & ammgs and Sort up Birds to get the names the most common ones. In the Drill he marches very nicely keeps good time and is attending much more erect and does not drag his feet on the floor. In the sewing class his work could not be better He hems Handkerchiefs Towels Pillow cases & Sheets, Keeps his work very nicely His deportment is usually very good.

1895- Slayton Theresa

Sept. Theresa reads in the chart class she does not learn very readily I do not know enough about her to know just what to report for her she do nothing in number work and in the sewing class she does only the very simplest work. Her department is good,

Oct. Theresa will never do much school work she will not interest herself with anything pertaining to books but likes to be busy with some thing, in the sewing class she does the very simplest work but does not like it, her deportment is good, she marches well keeps step well,

Nov. Theresa reads three lessons from the chart she does so little work that it is difficult to write much for her she makes several of the numbers but does not know the value of them, she likes to be busy and will work well with some of the busy work, she sews very little she can thread her own needle and bast the very simplest hem but not very good. she is quiet in school,

Dec Theresa reads three lessons on the chart very well she does not try to learn any thing alone, all she learns she picks up from being in the class with the other children she counts four she can copy the word cat but has not learned the letters yet, she also

Dec. make several of the numbers but does not know their value, she is busy all the while but likes to do the same thing day after day, her deportment is very good,

1896

Jan Thressie is doing good work in the chart class knows all the words in four lessons, can not count at all writes the word cat very well makes a few of the numbers she will never do much work of any kind. in the sewing class she does a very little work, she marches well keeps good time, her deportment is very good

Feb. Thressie really has improved this month, she can recal several lessons from the chart and spell many of the words, she is much more interested than at any other time, in numbers she does not improve very much she does very little sewing, she marches well & keeps good time her deportment is quite good,

Mar. Thressie improves a little each month she can read many lessons from the chart she is reckly the brightes child in the chart class, the word cat, she writes very nicely she can make many of the numbers, but she will never know very much she likes to be busy and would learn more if I could devote more time to her, her deportment is good.

Apr. Thressie is working quite well for her she reads nine lessons from the chart and know all the words and will remember all the words she has learned and name them in a new lesson she know some of the letters, can write the word cat nicely and makes many of the numbers she is doing much better than I had expected she ever would, she assorts the colors and names them. she is quiet in school and is never gives any trouble,

May Thressie is doing as well or better than I had expected she reads ten lessons on the chart and every word she writes the words cat & dog nicely, makes some of the numbers her other report is much the same as last month, her deportment is very good

1896

June Thressa Has done better work during the year than I had expected she would she know about Forms, and can name the Colors Red, Yellow, Blue Orange Green a Purple, does not know much about Numbers can count ten, Writes the words Cat & Dog, She reads twelve lesson on the Chart and know the words she has learned any place she see them, She put the Liced Animals and Braid together. in the drill she Marches well always has

1896 step walks erect and lifts her feet. She is neat about her person She is always busy at something Her work in the Sewing Class has not been so good, she hasts the Towel. does not like the work and will not do it if she can get out of it. Her deportment is always good

Sept. 1895-

Shiels Burtie.

This is Burties first year in school, he came in about the second week of school and of cours had to overcome being home-sick and learn what is expected of him in school. He seem quite bright and likes to be in the class works well he reads in the chart class and is a much brighter boy than some who have been in school last year he is learning to count the colors does not count at all in the sewing class he basts very nicely. his deportment is good.

Oct.

Bertie is doing very well but not ~~as~~ well as I had hoped he would do he reads on the chart knows nearly all the words in the first seven lessons his knowledge of numbers is quite limited can not count at all. he assorts the colors has not learned to name them yet, he can fit the forms in the boards and put the sliced animals together knows the domestic animals makes a good errand boy, in the sewing class he has basted four towels and could have done more if I could have gotten the work ready for him, he is learning to hem also his deportment is good, in the march he is learning to keep step very nicely.

Nov. Shiels Berttie

Berttie is working very well reads from the chart, he will try to do any thing I ask of him, but is very slow. at the commencement of his school work I hoped he would do good work, but he has not come up to my expectations yet he learns a little every day. he makes a good errant boy and is quick about his work, he is leaining to assort the letters and tries to put some words together, his work in the sewing class is quite good, he hasted the stem in seven handkerchiefs and did it nicely, he marches well, his deportment is good.

Dec. Berttie works well but does not accomplish very much he reads several lessons on the chart, and is trying to build his lesson with the letters can make one or two words, he know some of the letters, in number he know almost nothing, he puts the sliced animals together and names may of them assorts the colour names one or two make a good errand boy. in the sewing class he is doing very good work and keeps his work nicely. his deportment is good,

1896
Jan. Berttie has worked well this month he reads from the chart and in the Word Method, he builds a part of his lesson and does it well, he counts ten and is leaning to count fifteen he

1896 has give me much cause to hope that he may after a while do quite a little work, he puts many of the sliced animals together and assorts the colour names nearly all of them write a very little, makes a good errand boy, in the sewing class he does good work and keepst his work very nicely. his deportment is very good,

Feb. Berttie has worked well this month has learned quite a little has kept up with the class in the Word Method, he builds his lesson from the letters and can name many of them, she is leaining to spell both in script and print, he is leaning to write makes many of the letter very nicely he likes to be busy, makes a good errand boy, in the sewing class he does good work, marches well and lifts his feet from the floor, his deportment is always quite good

Mar. Bertie Shields works well in school he builds his lesson very nicely from the letters, knows many of the letters and can spell a few words, he is learning to write forms some of the letter very well, he is an industrious child and I feel sure that he does his best his articulation is very poor. some words he can not say at all, I think he may be able to overcome that a great deal after he is in school longer. he

1896 makes a good errant boy he is quick about his work. in the sewing class he does very good work and is improving. his deportment is usually very good

April Bertie Shields improves all the time but of course it is very slow, he works well at building his lesson from the letters and in that way he is learning to spell, he writes some words very nicely, he, such work as assorting the colors and putting the sliced birds and animals together he does well in the sewing class he is doing very good woork. his deportment in school is very good.

May Bertie has improved in many ways in building his lesson and learing the letters. He shows quite an improvement, in the sewing class he works nicely basts and hems the towels nicely his deportment is always very good

June Bertie is one of the children who will learn quite a little in school, He can place the forms in the boards, assort the colors and names only two of them assorts the letters and names some of them. Build his lesson story nicely. Reads on the Chart

and in the Primer He does not speak very plain, but I think he is overcoming that defect, and may in time talk quite well He is more interested in his work now than at any time during the year, He can spell some words on the board, Write from a copy, He knows very little about numbers, counts ten. Will put the sliced animals and cut up Birds together, and names the common ones. In the drill he marches well and keep good time. In the sewing class he has improved very much, he hems the Towel nicely and kept his work in good order His deportment is very good.

1895-

Sept. Winkjer Lena

Lena is a new girl in the school came the first of September she is quite a peculiar child she of cours must learn the english language and until she has it will be hard to know what she can do, she seems anxious to learn and does very good work in the chart she will try to say any word I ask her I fel quite sure she will learn quite a little. In the sewing class she has learned to thread her needle a thing she thought she could not do and she uses her thimble she can not sew very much, but I think she will learn. her deportment is usually very good

Oct. Lena has been doing fairly well, she seems quite interested in the chart class and remembers several words she is very slow, learned to assort the colors and could build the little square pen with the sticks, she did not succeed very well with the sewing but could take several stitches use the thimble and thread the needle quite nicely, her deportment is good.

Nov. Lena has been sent to Sunny Side.

1896 Rosa German

Mar. This child is peculiar she knows more than she seems to know she reads on the chart can spell and count name the days of the week and many things, she assorts the colors and names them. and I think may learn to build her lesson from the letters. her work in the sewing class is not so good yet she does sew a little, she is never any trouble in school,

Apr. Rosa has much the same report as last month she reads several lessons from the chart knows the letters and can spell many of the words she will always be busy in school if the work is put in her hand but she will never ask for any thing to do, her work in the sewing class was much better this month Her deportment is always good

May Rosa is such a diffident child I find it very hard to get her to tell what she does know she works well at any thing I give her, in the sewing class she sews a little can baste the hem in the towel very well Her deportment is always very good

June. Rosa is a good girl she works at any kind of work that she can comprehend, she is not energetic yet I would not say she was lazy She fits the Forms in the boards Assort all the colors and names them. Reads only a few lessons on the Chart yet she one has a word fixed in her mind she is able to retain it, She knows all the numbers and counts thirty. She can name the days of the week. Put the Shied animals and Cut up Birds together, She does not write in the sewing Class she has the Tape and is learning to hem, the hemming has never been done well enough to leave it in the work. In the Drill she marches well stands much better and lifts her feet from the floor. Her deportment has always been good,

1895 Jeman Rosa.

Sept. Rosa is not a girl that works very well in school she seems to lack energy, but if I stand by her she will work very well she does quite good work in the chart class she knows very little about number she works very well in the sewing class can baste the hem in the towels thread her needle and is learning to use her thimble she is very quiet in school and is not at all hard to manage.

Oct. Rosa is not inclined to work well at any kind of work she will work as long as any one will work with her but when left to her self she will sit perfectly quiet with her arms folded to seem to be dreaming other times she will cry for not any reason whatever she reads on the chart sometimes she will do very nicely then again she will seem not to know any thing she is not troublesome in the least. In the sewing class she will seem to be working but does not accomplish but very little this month she has basted the hem in one handkerchief.

Nov. Rosa reads better than any in her class and I think she really does understand what she reads, she of course does very little school work in the number class she does very nicely at times, she assorts the colors names some of them, will work at

almoat any kind of busy work if I gine it to her but she would never ask for it, she sews a very little. her deportment is good,.

Dec. Rosa is inproving in her reading she seems much more interested and has learned quit well, she would never ask for work of any kind but when you gine the work to her and make her understand what you want her to do she will do the best she can, she assorts the colors nicely and will try to build her lesson, In the sewing class she works but very slowly, her deportment is good

1896

Jan (Rosa is in school only until recess she reads quite well from the chart. This as a mistake I thought I was writing for Rosa Nicholas.

Rosa Jeman is inproving a little she has done very good work this month if one could sit by her and spend quite a little time with her she might be able to do quite a little work she will never work alone, she does all the busy work nicely. sews a little but if she does that one must sit by her side her deportment is always good

Feb. Rosa has very much the samd report as last month.

(Rosa's report will be found on page 238)

Alson Sebert

Nov. Sebert spend the half hour before lunch in my school does no school work.

Dec. Sebert does nothing in school

1896

Jan Sebert only comes into the school room so as to march out with his class.

Feb. The report for Sebert is the same as last month

Mar. Sebert come in every day and marches out with his class.

Apr. Sebert does not come any more to march out with his class

May Sebert has been in a few times to march out with the class.

1896

June Has not been in school this month.

1895

Wall John

Sept. John is a deaf mute, he has been in school about two weeks he is quiet. knows his own desk and will try to do what ever I want him to do if I can make him understand, he marches very well but will drag his feet in the march he does not give any trouble in school

Oct. John has learned to fit the forms in the boards and to assort the colored sticks and is learning to build the little square pen, he always know his own desk and seems to understand quite well, he behaves very well in school marches well.

Nov. John does very much the same school work as last month he likes to be busy works well with the busy work, he is quiet in school,

Dec, John is learning to use his pencil tries to make these marks / / 00 but has not been very successful yet, he will assort the colors and will keep busy at any kind of work I give him. he marches as well as one could expect a deaf boy, he is quiet in school, know when to take his seat and when to stand with his class. His deportment is good

1896 Wall. John
Jan. John has learned to assort the colors. can build the little pig pen and does it well, uses the peg board and will busy himself all day long with something. I have been trying to teach him to write, but I find it quite difficult work, he will never do much school work, he is usually very quiet in school, knows what it is to mind

Feb. John's work this month is very much as last, he does such work as assorting the colors stringing the beads. and uses the peg boards very nicely, uses the pencil a little also the chalk but does not seem to have any idea of forming a letter of any kind he is always very quiet in school

Mar. John assorts the colors and builds the little pig pen perfectly and will assort the colored peg. and stick them in the boards, he is quite orderly his deportment is always good.

Apr. John has learned to put two of the sliced birds together, he likes to be busy and will try to do any thing I give him to do. His deportment is always good.

May John Wall is taking quite a little interest in his work in school he assorts the colors string the beads in groups of five of each color and much of the busy work he does well in the sewing class he has learned to thread the needle tie a knot in the thread and hem the hem in the towel his deportment is good,

1896
June John has learned since coming to school this year, how to keep his own chair and when to stand and march out with his class If he was not deaf & Dumb I feel sure he would learn very much He puts the forms in the boards assort the colors build the little square pen the children call the Pig Pen, when he came in school he could not hold his hand steady enough to three sticks in place In the sewing class he has learned to thread the needle, and how to hold it, he hems the hem in the Towel nicely and keep his work in good order. He put all the Sliced Animals and cut up Birds together, has learned how to hold the pencil and chalk but can not form letters yet In the drill he does not march in time and will scrape his feet when he walk. His deportment is always good,

1895 Ove. Grand Hugh.

Hugh is in my school only long enough to get in line with his class each day.

1896.

Jan. The same as last Month

Feb The same as last month

Mar. Hugh has been sick this month when he is on duty he always comes in to march out with his class.

Apr. Hugh does not come to march out with his class any more

June Hugh has marked out all this month

Clipley Tillie. (Bothilde)

Nov. Tillie has just entered school and is homesick, so that it is difficult to know just what she is capable of doing. she tells me she has attended school before coming here, she evidently is much brighter than almost any of the children in my school.

Dec Tillie I think will do well in school, she reads in the first reader knows the letter spells nearly all her lessons of the book and can write her lesson on the slate, write her own letter with a little help does it well, counts ten and can combine the smallest number, she build her lesson from the letters and does it quickly can assort the colors and name them, puts all the placed animals & birds together, know the days of the week, in the sewing class she does very nice basting, threads the needle herself, she marches in good time. her deportment is very good,

1896
Jan Tillie has taken hold of school work very nicely she enjoys her work and will do good work, she reads in the first reader and, spell her lesson from the book, writes her lesson in script and builds it from the letters both she nicely writes numbers to

1896 twenty and can add very well she is ampious to learn writes her own letters after I have helped he compose them, she is quick to imitate; in the sewing class her work is very good and she improves every day, she makes a good errand girl her deportment is good.

Feb. Tillie is improving every day she reads in the first reader and can spell almost every word in any lesson she has, she builds her lesson and, write it on her slate she has learned the 2s 3s 4s 5s in the multiplication table and add numbers very nicely write her own letters and will try to do any kind of work I ask of her, in the sewing class she has learned to hem the handkerchief and does it very nicely and quickly as an errant girl she is very good her deportment is always good

Mar. Tillie is improving every day she has nearly finished the first reader and knows all the letter both in print and script and can spell all the words in each lesson off the book, she has learned the 6s in the multiplication table and can work simple examples using the table as far as she has gone, she writes her letters after I have written it on the slate, she works intelligently puts all the sliced animels and

birds together without any help writes her lesson on her slate and builds it from the letters names the days of the week, her improvement in the sewing class is quite surprising, she hems very nicely thread her needle for herself and often helps the other children who have two good hands, her deportment in school is good.

Apr. Tillie is improving nicely she has finished the first reader and has learned several lessons in the second reader, she has her lesson well learned spells all the words off the book and write all her lessons on her slate beautifully knows the multiplication table up to the 7s and add numbers well writes any numbe up to 100, writes her own letters to he parents after I have helped her write it on her state, she does all the busywork and in the sewing class she sews beautifully this month she hemed a sheet and several towels and Turned the hems herself she is usually busy in school, her deportment is always good.

May Bothilde works well and is improving every day, she reads well in the second reader spells the lesson off the book and writes it on the board, she is a

1896 very energetic child takes up any kind of busy work readily and does it intelligently she likes to be the best in her class and works to excel, the work she has done in the sewing class is more than could ever have been expected of her, her department is always good

June Bothilde is an intelligent girl but works slowly, understands what she is doing. Knows about Form and Color. assort the letters. and knows them all Build her lesson Story. Reads in the Second Reader, Her last lesson is on Page 63, write he spelling on the board after the words have been pronounced to her She is very ambitious and has made much improvement in all her work, she knows how to write numbers and will read any thing up to 1,000, Adds very diffcult examples in addition Know the Multiplication take up to the 7's, and can work simpl examples in Multiplication Puts the Sliced Animals and Cut up Birds togethe and knows many of them, Puts the Dissected Map of the U, S. together, In the Sewing class he work is very good, She hems the Towel, Pillow case, Handkerchief and sheet

can turn the hem and baste them too. In the drill she marches well keeps good time and stands erect, her deportment is always very good

1898 Hoge Allie

Jan Allie is learning to talk english and knows a few words on the chart he count ten and seems quite bright in some things while in others he is very dull, one thing in particular he never knows where his desk is, his deportment is good,

Feb. I think it will be a long time before one can see that Allie is learning anything in school

Mar. Allie is taking a little interest in the chart class and will say a few word he may after he learns what is expected of him learn quite a little, he is usually quite good in school,

Apr. Allie is slowly not improve much in school he will say any word over after me but slowly not seem to try to apply himself, he likes to string the beads but will not do it in order, he may do better when he has learned the language his deportment is usually good

May Allie has very much the same report as last month,

June Allie has learned to talk in English And understands what is said to him, He knows his own desk and when to march out with his class

he has not taken much interest in school, when in the chart class will not give any attention In the Drill he will walk around, but does not have the least idea why he does it, or what it is for. His deportment is as good as one could expect from such a nervous child

1896 Peterson Peter

Feb. Peter has not been in my school long enough for me to know much about his ability to learn.

Mar Petter reads very well in the second reader and will spell the words in his lesson from the book knows all the letters he is an intelligent boy and I think will learn quite a little. he is learning to use the pencil and to write his name, he counts twenty does not make the numbers yet but I feel sure he can learn. he knows the colors can put the sliced animals and birds together. he has only one hand to work with so will never be able to sew, his deportment is always good.

Apr. Peter is improving every day he he reads well in the Second reader and spell all the words of the book and is learning to write can write his name very well and will write his lesson from a copy and will write the numbers from 1 to 100. add numbers well and is learning the multiplication table, he looks intelligently can do all the busy work in school, his deportment is always good,

1896
May

Peter Peterson

This boy is leaning well one can see an improvement in him every day he works well has learned to copy his lesson on the board in script and reads number up to 10,000 add any column of number that I may put on the board for him and very seldom makes a mistake of more than one or two, in the sewing class he has learned to baste the hem in the towel, and comes to the sewing class in preference to going out to play, his deportment is always good

June

Peter has improved very much since he came in school, he does all the simple work such as using the Form Board and assorting the Colors, placing the colored Sticks, Beads & Pegs from dictation, Build the Pig Pen, know all the letters and has learned to know all the numbers and their value, can read anything in numbers up to 100,000 writes the number and understands simple addition, Subtraction Multiplication and Division, He likes number work, Reads in the Second Reader His last lesson is on page 53. He understands what he reads and can tell the story

has learned to write, writes his name independently, Will write his spelling on the slate or board. Puts the Sliced Animals and Cut up Birds together and names many of them On the Drill he has learned to March in time and to stand much more erect. In the sewing class he has learned to thread the needle and to baste the hem in the Towel, which is a good deal for him with only the use of one hand. He make a splendid errand boy likes to be trusted to pass the work to the other children. His deportment is always very good.
