Personal and Medical History of Ophelia M. Shaw

Rochester Aug. 23rd. '91

Dear Brother:- It is now time you came for me. Bring the Tailor on the village street with you (the rail Roads risky) Leta, Bly and little Wardie. The operator at Grand Forks station you would not think too much trouble I hope to invite, for in case should become a beast of burden to you. Mr Brady will be the best help you can have.

O. Shaw.

Personal and Medical History of Ophelia M. Shaw

Patient brought here by John Knel Sheriff and brother. This attack began about nine years ago - three days after confinement. Symptoms here manifested by hallucinations, rambling and incoherent talk. She imagines that various people are trying to injure her and insists on carrying a knife to defend herself with. Destroys household furniture etc. No disposition to injure others. Destroys clothing. Has had discharges of blood and pus from vagina. Was confined at an asylum Oshkosh Wis. for about one year during 1882. Was under care of Dr Lord at Edgerton. Six previous to her being placed in the asylum. Troubled by insomnia.

March 26 1891 - Health seems pretty good. Sits pretty about. Looks intelligent - Says nothing unless spoken to. Has an absent minded manner. Appears well, but upon conversing find her mind working vaguely.

June 1 1891 - Health seems good. Manner peculiar & quiet. Sits on lounge & dozes (apparently) day after day. Will rouse to go to meals. Never seems to get rested. Eats well. Never reads. Not inclined to talk, but able to give intelligent answers as a rule. Does not go out doors but by force.

Nov. 16 '91 - Patient still lies the greater part of the time upon the lounge, seeming to care nothing for anything else. Lies with eyes closed the greater part of the day. Will rouse, however, & talk with a good deal of animation, although with a very disconnected & incoherent speech.

Feb. 4 '92 - Has good appetite & though somewhat pale in color yet her physical health seems very good. Talks only a little, & then in a silly way. Goes walking, is neat & tidy in habit & lies the greater part of the time upon sofa. Weight 160 1/2 lbs.

1892 March 28 Moved to annex and there is alleged to eat more.

May 19 - 1892 General health good. Still inclines to lie around on the benches with her eyes shut. When spoken to will get up and open her eyes for a short time but will soon close them and lies down as soon as she is left. Very stupid. Talks very little. Manifests no interest in anyone or anything. Untidy in appearance. Aug 31 - 1892 Mr Shanda called and took her away to day. Capitation unimproved

Mary A. Olson

Date of attack unknown - Brought to Asylum by her aunt & Virginia her aunt - Has been in restraint at home. No special medical treatment

March - 26 - 1891. Patient son says that her father died after 8-10 years of insanity something of this kind; - that she has a sister of something the same behavior and condition - Examined today - A chronic condition formed. She states that the main trouble began 1 yr ago - Came on suddenly within one hour - Had severe pain about the heart - spit up blood + was in great pain + distress for 2 weeks. Says the Dr told her it was lead poisoning. Says she has had trouble in speech ever since. Says had trouble in walking for 5 years.

April - 1 - 1891. Patient has dirty habits - Her mental condition shows progressive weakening or Dementia - Does no work. Reads some, but do not think she comprehends anything read -

Nov. 17" 91 - Patient remains upon B-1, is somewhat untidy in manner, but her general health is very good.

Dec, 12" 91 - Patient has a sore upon the hand. Face shows mint-scales, & a kind of oily, exudative condition. A kind of discharge comes from the ears also, which is quite peculiar. This is nothing acute, but has been growing upon her.

Jan 5" 92, Taken home by her son to day upon trial. There was nothing near in the case, but she wished to take care of her if she could. History is that of a gradually progressing Chorea with gradually progressing Dementia also. Also more than this the history is that of a hereditary tendency toward this in the family, transmitted to her, as at least the 2nd in line.

Personal and Medical History of Mary Venerables

Patient brought here by R. N. Carpenter and wife. First symptoms were manifested about twenty three yrs. ago. After sleeping all night with her mother she awoke and found her dead by her side. She was frantic immediately. Has had several attacks within the last ~~[illegible]~~ years. Runs away from home and is jealous. Has shown a disposition to injure others when in sudden passion. Has been here three times before.

March 26 1891. Health seems excellent. Claims to at times converse "Insane". Cant control herself. Says they do all they can for her but it is of no use. Is now rather restless & uneasy & emotional, but is of no trouble. Seems to be much quieter than as described at home.

May 1 1891. Health fairly good. Helps in rear Dining Room. Nervous in manner. Good will. Talk is now coherent but has not the incoherence & mysterious allusions which it had at the time of her admission. Is quite pleasant & of good disposition.

Nov. 14" '91. Patient remains upon A-2, is quiet, works in the rear center dining Room, makes no particular request, is about as she was when before here, & is quite reasonable in all her ways.

Jan 7" '92. Is suffering from the Influenza, is up to day, has not been very sick. Jan. 8th was in bed again to day, somewhat feverish.

Jan 19" '92. Patient to day for the first time speaks of delusive ideas. She thinks that a man is following her & her husband. Is very much disturbed in manner & somewhat hysterical, flighty, jumping from one subject to another. Has her spells before she has had this day, but never, as I know, has spoken of a distinct delusive idea.

March 4" '92. Has quieted down somewhat & is again able to do a little work in the rear center, is not hovered, troubled very much, wants to go home but is not allowed to do so. Weight 164 lbs.

~~May 13" '92~~ March 15" '92 Was taken out by husband to day upon trial.

Oct. 15" '92. Was brought back in a hysterical & nervously excited condition, talking somewhat incoherently & full of foolish ideas.

May 13' 92 Patient in bed, aches all over. Suffering from constipation.

July 21. Patient had an excited spell, showed signs of faintness.

Personal and Medical History of Mary Venables.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

to Do somewhat more disturbed of late.
Aug 13'92 Was visited by son a couple of days, is now more quiet; has been quite hysterical at times.
Sept 9'92 Patient is pregnant; & has shown a good deal of hysterical behavior, amounting even, nearly to violence at times, but is now more quiet: Her mental condition is, however very unstable & while at her worst hints at delusive idea concerning some man, who lives in Rochester.
Oct 3 1892 Patient was examined a few months after her return from home and found to be pregnant.
Oct 31 1892 Nervous and restless every night sleeps part of the time Bowels regular generally. At times noisy and very excitable Always talks when addressed
Dec 5 1892 Went to bed about 10 A.M. Baby was born at 3 P.M. Labor unusual Bath during mill
Dec 6 1892 Bright and cheerful Rested quite well during the night Ate light breakfast Baby sleeping and nursing well
Dec 16 1892 Made a good recovery and is found sitting up
For daily record See Clinical Report
Jan 3'93 Appetite not very good; at times takes care of baby, quiet; sleeps generally well.
Feb 24 Appetite poor, does not sleep very good, noisy at times seems to care but very little for baby.
Apr. 6'93 Removed to A 2.
" 30 93. Appetite good Habits careless about self & room. Behaves well. Usually talks a great deal. Works in center dining room.

Personal and Medical History of William C Stafford.

This man was brought by wich fallowing history. At some time not stated in history he was injured by having a gravel bank fall on him striking him on the head and back and burying him up. First symptoms were pain in back extending to head. Insanity was manifested by depression because he cannot work and fears that he will starve and that he will be put in prison. Had a similar attack 4 years ago which lasted about one year. Has spoken of suicide.

Apr 2-1891. Patient has been quiet ever since admission, both night and day. Apparently sleeps well. Appetite fair. Sits around greater part of day; saying very little except when addressed. Has been clean & tidy. Said to day, concerning himself, that his head has felt as does now, sick, so droll & things looked so queer. These sensations worse when he stands on his feet he thinks.

Apr 7/91 Thinks he feels some better. Is constipated. Visited to day by a brother & sister. The following was learned from them: That a bank fell on our patient some 16 years ago. He was not made unconscious; badly shaken up; wrist was injured. Six years ago he had a "spell like this"; this lasted about 2 years. He used a cane then; mentally dull & confused. Was lame. Nine weeks ago became suddenly as he is now. Would not talk, was lame; sat in one place, dull, stupid. Had dropped wood, etc, just before the attack. Had noticed no loss of sensation.

Apr 11/91 On examination, in addition to facts recorded on opposite page, there was found, a gait stiff legged & rank, tottering; inability to stand with eyes closed; walks with cane; has diminished sensibility; seeming more marked in lower legs; twitching of facial muscles ~~when~~ when tongue is protruded; an elevation of eyebrows with corrugation of brow; elevation cannot be prevented by patient as eyebrows only partially lowered. Tremor of hands on effort. Claims that he has weak spells when he trembles. Tongue protruded in median line; prominence of eyeballs; staring look.

Apr 15-1891- Visited to day by his wife. Talked with her. Patient plead earnestly to be allowed to go home with her and cried when refused this request.

Apr 21/91 Complains of constipation Apr 25/91 Claims he has caught cold. Coughs. P. 84. Apr 29/91. In am. in bed. P. 92 T 99.7; Feels better; Dry lip.

May 6/91 Conduct sometimes good, is clean, tidy, quiet; sleeps well apparently. Health seems improved; still does not talk much

Personal and Medical History of William A. Stafford,

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

on walk around much, but is more active in both respects than formerly. Has lately begun examination. Wants to know when he can go home: shows some emotion when put off. Has suffered some from effects of his cold but is improving. Up & around every day. Has tendency to constipation. See prs Sept Rec.
May 7/91. Feels a little better; coughs less. Pulse 87, temperature 98.5°
May 11-91. Complains of headache.
May 16-91. Patient has made distinct improvement since admission but is not well by any means. Writes letters to his wife urging her to take him home.
She came to day + took him away on trial.

Discharged

(From p. 9) Mary Venables

Oct. 16'98 Transferred to C3 Feb. 2'99: Stopped working in dining room where she has been working a good many months: Is usually quiet: fairly intelligent At times very cranky & irritable: (Rec'd by Dr. R.A. Bebb) May 2 Aug 1'99 Gen'l health good: appetite good. bowels regular: takes out door exercise: works in Employe's dining room. Is quiet, except during disturbed periods when she is very excitable & noisy: May 28 In bed for few days: appetite poor, rather quiet: neat in habits and appearance. June 13 Home for few days visit. June 29 Returned July 21st and Aug. 21 Visited by friends. Aug. 17 Visited by Son. Sept to Dec. 99. Bowels inclined to be constipated: still works in dining room: very talkative - does not always talk sensibly: Has many delusions: Is occasionally violent: Oct 3'99 Attempted to strike nurse. Nov. 27, 28, 30'99 Visited by friends. Jan 1. 1900. No change, same above state. Mch 1 - Nov 30 1900 Dr. Heyerdahl - Patient somewhat untidy: General health fair: Takes outdoor exercise: Assists with work: Is childish & has delusions: Talks in a silly manner: Thinks she is going to be married &c. Mch. 28 Visited by son: Apr 24 Somewhat disturbed noisy & profane: Fought nurses &c Visited by friends. July 4 Visited by daughter July 21 Vaccinated: menstruates regularly. Oct. 11 Attacked nurses: Disturbed. very talkative & Expresses many delusions. Nov 21 Wt. 168#, Dec. 1 to Feb. 28-1901. No. change. Wt. 174 1/2#

Mar. to June 1901 Mar. 29. patient very disturbed and mentally active, talks a great deal and does not sleep well at night, May 30 patient very much quieter, Wt. 162#. June to Sept. no change in general condition, assists in center dining room, general health good, Sept. 27 Wt. 161#.
Sept. to Dec. Patient quite disturbed, noisy at night, Oct. 6. visited by son and daughter, and daughter-in-law. Nov. 30 expressed many delusions, no change

Personal and Medical History of Mary Venables.

Sept. to Dec. Wt. 169#.
August 23, 1902 Wt. 136 1/2 #. Nov. 28, 156#. General health good: is quiet and agreeable when not in her spells and assists with the dining room work. Her maniacal spells recur frequently and usually last two months, at which times she is noisy disagreable, found in speech and fault finding.
Nov. 20th No Change.

This man was brought by Sheriff Kinney & Dr C.A. Chase with the following history. Insanity was first manifested 7 years ago when he was confined in St Peter for 9 months, and had an attack 1 year ago, when he was confined at Oshkosh for a few weeks. Insanity now shown by explosive speech, great restlessness, insomnia, and almost constantly moving. Has destroyed clothing with his teeth. "Is a strange case. Between his peculiar explosions of speech he is quiet and rational. Is so restless that he bruises himself and his movements nearly draw him out of bed." Natural nourished. March-25-91. Slept none at all last night after having 10 grs of sulfonal. Quite restless this morning. Movements almost choreiform.

March 26-1891. Slept until 4 a.m.; was then "noisy & wild". P. 110 T. 101.2°F. Restless; was catheterized. Is constipated.

March 27-1891. Slept only a very little; was restless & noisy. P. 108 T. 100.8; catheterized. Constip.

March 28-1891. Slept 2½ hrs about. Restless & noisy when awake. Catheterized; 088 T. 99.6; put to bed after catheterizing & falls to sleep. Brn. P. 88. Constip.

March 29-1891. Slept well. Catheterized; urine bloody. P. accel. T. 101.2 Brn Bowels moved. P 84.

March 30-1891. Slept fairly well. Catheterized & bladder washed out. Urine has been offensive (ammoniacal). P. 76. T. 99.4°. Brn P. 78. odor.

March 31-91. Slept an hour or two. Walked the floor restlessly balance of night. Catheterized & bladder washed. Brn T. 99.8. Bowels moved & patient passed water. Has slept much to day. P. 84.

Apr 1-1891. Quick & slept all night. Passed water free from blood. Constip. P 102 (lying down) T. 100.4

Apr 2-1891. Slept but little; nervous. P. 104 (up), 84 (lying down) T. 100.0; passes water, clear. Tongue moist. Bowels moved once. Restless. Brn. P. 72. Catheterized; drew clear urine; natural emptying of bladder is incomplete apparently.

Apr 3-1891. Slept about half the night; walked floor when awake. Catheterized & drew blood stained urine. Is constip. P. 80. Has urethritis & balanitis. Brn P. 80.

Apr 4-1891. Slept about 3 hrs. Quite had balance of time. Drew urine, slightly blood stained. P. 80. T. 100.3 Bladder washed out. Bowels move poorly.

Apr 5-91. Slept but little. Was very noisy & restless. Complained of dizziness.

Apr 6-91. Slept most of time. Passes water; it scalds him. Constip. Brn P 104. (90 lying). T. 101.3

Apr 7-91. Slept till 3 am. Very noisy by spells. Drew urine. P. 76. T. 100.8; Quieter.

Apr 24-1891. He has been more or less restless & noisy, at times. Is now less restless and noisy; — Discharged Aug-12-1891 — passes water naturally and bowels move, altho with some effort.

May 30-1891. See above notes for details. Summary: On admission patient was thin, nutrition poor; wt. 128 pounds; he had retention of urine, requiring catheterization & there was obstinate constipation; there was some fever (possibly due to catheterizing), acceleration of pulse. Mentally there was depression, emotional instability, crying at

Personal and Medical History of Roger M. D. Pease cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

at times; there was decided insomnia & restless, nervous condition both day & night. One marked peculiarity of the patient was restless activity; rapid walking back & forth, very like a hyena in a cage; giving vent quite frequently to loud inarticulate cries or sounds; these patient could control for a time when his attention was held in conversation. When ~~lying~~ patient lay down, he would often twitch & jerk about so violently as to throw himself from bed to the floor. Watching was necessary. Patient when requested to be quiet, would declare he could not; he seemed to want to do so. Was all along pleasant & gentlemanly; clean & neat in habits & dress. Appetite was poor. Patient was put on Bon & Hyoscine & Sedatives; urine was drawn quite regularly, twice a day; urine was ~~taken~~ at time of Ammonical, & bladder was wash at time of catheterizing with solution of boracic acid. There was blood in urine at one & two occasions; introduction of catheter was quite difficult, especially at first. Laxatives & rectal injections were necessary to keep the bowels open. Rest encouraged & appetite stimulated.

As case progressed, the patient became less noisy & restless, sleeping better, getting some sleep during day; there were occasional partial relapses to former condition; some irregular feverishness persisted until about the 21 ult. Pulse at first accelerated gradually but irregularly became slower & better. Patient became less restless, walking less & twitching less when in bed. In fact there was improvement in all symptoms; appetite became better; patient became cheerful & rejoiced in his own changed condition. Weighed yesterday 144. lbs., a gain of 16 pounds since examination.

Went home to day, alone. Was visited on 24 inst by Rev Mr Pope.

Discharged

Natl Paulson.

Rochester, June 28th/91.

Brother Ole. Will drop you a few lines in answer to your letter received the 28th of May from which I learn you are at work in the Lumber Yard. Must also ask you to lend me some money as I have none for which to buy Tobacco or pay my expenses home. If you would come and bring me home I can get out of this place. Be so kind as to answer this letter and state whether you send money or not. Address correspondence to me. Will close my short Epistle

Kindly your brother.

ersonal and Medical History of Natl Paulson.

This man was brought by Deputy Sheriff of Dakota County with the following history. Insanity was first manifested about January 1st 1891 but he had had attack previous & that time so that he was committed to Rochester in 1883. Insanity is at present manifested by hallucinations of hearing. Thinks he hears voices singing. He was in Rochester about 6 months before. His mother died about 2 months ago and and since that time he thinks that he hears voices singing in the house where she lived.

March 25/91 Quiet all night & slept about 7 hours.

March 26/91 Quiet. Slept about 6 hours March 28/91 Has slept about 7 hrs past 2 nts.

May 8/91 Patient has very fair physical health. On examination on admission. Has been quiet night and day. Has slept well. Appetite good. Has been clean & tidy in dress & personal habits. Does not work. Reveals no delusion in ordinary conversation; talks some with Drs. Conversation usually limited to requests to be allowed to go home & claims a good health. Has some work at home he wants to attend to. Is slow in movement & sits around idly & seems lethargic a good deal of the time.

June 28-1891. Has attached translation of letter by patient. (Written in Scandinavian & translated by an attendant).

July 2-1891. Has tooth ache & swelling of cheek.

Aug 17-1891. Refused supper and breakfast, (without giving good reason).

Oct 15/91. Patient has lived along quietly without manifesting delusion, but rather inactive, taking but little interest in his surroundings; evidently partially demented. He has, for some time past, made urgent request to be allowed to go home. Today Eloped, and was not found.

It is Needless for me to attempt to impress upon your mind the importance of continuing to use the same care + Dramatic actions to successfully keep the wool over the Eyes of the Bloated Bond Holders now in Power

Continue to treat me as a Guest Nothing More

+ do not allow foolish Nonsensical Ideas to influence you in depriving me of liberty + Comforts as you certainly understand that I will soon be old enough to Vote

+ my Ideas as to my personal Comfort should be entitled to some respect

I am ready your Commands Albert

June 14th 1891.

Mr. T. A. Schulze,

I am informed by cable through the St. Peter Tribune the Ignatius Donley has introduced in our Senate a Bill to utilize & put to practical use & benefit the labor of State lunatic Asylums For the purpose of making cheap grain centenials McGinty Brogans & Red Wing shoe packs for the Sole use of the farmers of this State. It is claimed that this is the only way in which the West can compete with the East in the manufacture of cheap shoes. It is also rumored that a certain individual (formerly an employee of Foot Schulze Co.) But now a monomaniac on the subject of shoe Factory is to have charge of a female operative of the institution. This is said to be the same person who a few years ago started shoe factories all over the United States. and who if hamerred with Domley would make a good pair to draw to He certainly has struck his gait now. Comerlots are at a premium in St Peter and that city is expected to become the Lynn of the West.

signed duke of Mankato seal.

Personal and Medical History of Albert Kohler

Rochester Minn. Sunday.

Mr. T. A. Schnlze,

St. Paul Minn.

Dear Friend I take the liberty of writing you as an old friend and employe. Am getting along nisely my Health is greatly improved, thanks to the able & efficient corps of physicians in charge Here.

A man can learn here a great object lesson I have sworn off forever smoking chewing tea and coffee and all the good things of life as soon as I can be released I will enter a monestary & become a priest. I always thought that I had mistaken my calling and now am convinced that my work in this world is to do good and save fallen man & soles

You have no idea of the comfort and pleasure to be derived Here Beats Sherman House all Hollow and you dont have to jump your Board Bill of course my pride revolts at the thought that I am an Object of Charity But consoling is the fact that every cloud Has a silver lining & hope that you will be kind enough to give that position of selling shoe Pacs in Michigan Comede at 5o cts. common & eat myself as soon as I am able to work.???????????

Kind wishes to all

Yours as ever.

Albert Kohler.

Personal and Medical History of Albert Kohler.

This man was brought by Sheriff Kinney with the following history. Insanity was first manifested about one year ago when he was at times highly excitable and talked of starting large factories, backed up with millions of dollars. At present time he imagines he is persecuted.

March 27-91. Was quiet but slept only about 4 hours. Says he is constipated.

March 28-91. Was quiet and slept about seven hours.

March 28-91. Slept about 6 hrs. March 30/91 Slept 7 hours.

March 31-91. Was troubled with pain in bowels; slept only about 5 hrs.

April 16/91 See attached letter written by patient, showing decided incoherence; and possible delusion. Some of attached letters without date, had been written previous to this note; one to M.T. declares that his life is in danger here. On examination, patient found in state of exaltation, apparently a simple mania; patient did not acknowledge delusions of grandeur, as described in commitment papers, great schemes; later patient showers in conduct a maniacal condition. Signed letters as Duke of Mankato.

May 27/91 See attached letter of this date, signed Duke of Mankato.

June 14/91 See attached copy of writing, showing incoherency, exaltation & delusion probably. June 24/91 Visited by his brother.

Aug 28-91. Complains of fissure of rectum. Gives salve.

Aug 31-91. Physical condition excellent. Weighs to day 170 lbs, gain 19. lbs.

Sept 29-91. Complains of some diarrhoea & states there is some blood in passages. Pulse 75.

Oct 5-91. Pupils some unequal, some contracted, right more so.

Oct 15-91. Physical health has been good from date of admission, has improved considerable. Always feels well. Rarely complains of some slight headache, which he makes light of.

Always pleasant, clean, tidy & well behaved. Genial with all. Talks very freely; seems rather to enjoy conversation. Has worked some. Has slept well; eats well.

Mental state one of exaltation but usually does not reach a condition in which ideas of grandeur are prominent. Delusions in regarding to being the Duke of Mankato has not been accompanied by any similar one as far as known. Has also some ideas concerning marriage.

Facial expression has always been bright & smiling; has seemed a little more gloomy lately.

NOV 12/91. Complains of pain in small of his back; has been working outside.

DEC 21/91. Complains of constipation.

Personal and Medical History of Albert Kohler.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Feb 4/92. For several months past has gone out daily to work; has been in excellent physical condition and has grown quite calm, coherent and rational. Has been quite contented to remain until he should have recovered.

Was today visited by his brother & taken home by him on trial.

Discharged

Personal and Medical History of Mary Casey

Patient brought here by Dep. Sh'f M. Kinnie and brother. Symptoms of insanity were manifested about ten days ago by refusing to eat and shutting herself in a room and refusing to see any one. No disposition to filthy or destructive habits. No restraint or medical treatment have been employed Patient.

Apr. 14-91 Miss Casey left on 11th She wrote some letter begging to get away, and Bro. came for her. For a day or two after coming she would not eat, though very emaciated. Upon preparation being made to feed her with the tube, she ate at once. At the time of coming she had not spoken for some time, but upon being put in with a woman who scolded her she was afraid, called for help + as she says talked right along willingly, having begun. A couple of days before leaving would not eat, but promised bro. would do so. if home. Sat in a dull way all day. Speaks promptly when spoken to, but otherwise showing no interest

Conversation Cont'd	Seems uncertain, when asked if he had seen any visions or ghosts. Says "no". Then says "let me think" - "I think I did one night."	Conversation, character of,	Speech incoherent. Ans. questions very vaguely

sonal and Medical History of Geo. E. Judd.

mom was brought by his brother. — with the following
tory. Insanity was first manifested about 6 years ago when he had
n attack followed by another in 1888 from which he never fully recovered.
Insanity is at present manifested by his being "off on every subject"
Had an attack of brain fever 6 years ago, and has never been right since.

Apr 1-1891. Pulse as slept quietly, so far, at night. Complains of constipation
Apr 3-91. Makes no noise at night. Pulse 90. Says he is constipated.
Apr 4-91. Temperature, rectal, 99.5°F. Apr 5-91. Claims constipation.
Apr 11-91. Temperature, rectal 99.4°F. Apr In afternoon, temp was 99.8
Apr 12-91. Temperature, rectal 99.4°F.
May 9-91. Patient is tall & thin. Has fairly good color. Health not robust. Complains frequently of pain, usually location down chest & abdomen & hip. Probably imaginary, most likely feigned; and even without expectation of being believed, & as patient smiles as if it were a joke. Conduct has been good. Patient sleeps well, apparently; eats regularly; is quiet, clean & fairly tidy in habits & dress. Talks a good deal, especially to the Dr, in a lazy, rambling way; passing on from one point to another without waiting for an answer. Talk and conduct foolish. Writes letters, oftentimes on scraps of newspaper in shabby style & unreadable. Occasionally writes a better letter. On time rpted. Prsc. Rec. p 500.
June 10-91. See attached scrawl, misdated.
Aug 7-91. Said to Dr to day "Dr, there is a tape worm in me eleven hundred miles long."
Aug 31-91. Visited to-day by his father.
Oct 15-91. Health seems a little better. Rarely complains now of any pains or ill feeling. Seems a little less foolish in conduct. Rarely speaks now. Clean & fairly tidy. Does no work.
Nov 24/91. Had a sudden attack today of diarrhoea, having 5 or 6 passages, accompanied with some pain. Tongue clean. Pulse 81 fair.
Nov 27/91. Diarrhoea, having been checked, recommenced this afternoon.
Mar 4/92. Weight 144½ pounds. Pulse 99. April 4/92 Weight 144 pounds. Pulse 102.
May 3/92. Weight 142 pounds. Pulse 78. Physical health quite uniform and fair. So quiet by day & night. Clean. Occasionally speaks of his tape-worm in a careless sort of way. Sept. 6-92 - Weight 139. works well - is clean & tidy. On the 5th June weighed 142 pds. 6th July 142 pds. About 1st August was transferred to Annex. On 2d Sept was visited by a brother & sister; since at the Annex he has steadily improved, he works home ward - says he has no tapeworm - talks quite cheerfully now wants to go home - Weight Nov. 151 lbs. Has written two letters home this month (Nov) was told he could go home about Christmas; he could hardly wait for the time to come - Left by kindly leave 28-92.

Personal and Medical History of Minnie Stanzel

Patient brought here by Sheriff and her husband Symptoms manifested about eighteen months ago - mostly ~~delusions~~ of all institutions ~~and persons~~ No disposition to injure others Has disposition to filthy and destructive habits - No restraint no medical treatment.

April 1 - 1891 - Patient in good health - Does a little work - Rarely will say anything. Does not seem to realize where she is. Health good

June 1 - 1891 Was moved to A[illegible] again a couple of days ago to the Annex - Health good - Manner dull, restless ~~has~~ been stupid, Hardly seemed to realize what was said or done about her.

June 6 - 1891 On going down to breakfast seemed to lose power of her legs and fell over on attendant - Was carried back to bed - Very pale - Saw her about 7:30 a. M. Was then very pale restless respirations gasping in character Pulse at wrist not perceptable - Ordered Spt Ammonia Aqua Saw her again after breakfast - Temp 101 4/5 - P 120 irregular R. 24 and Gasping - Body covered with cold perspiration - Swallowing with difficulty Incontinent all over - body restless Sat up on side of bed - No pain - Continued restless until about 10:30 a. M. when she died suddenly -

Post Mortem June 8 - 1891

General appearance of body - All tissues much distended with gas and fluid - Chest and back much discolored. Chest greenish and greenish yellow - with dark red spots. Postmortem very dark - Very large bleb filled with bloody fluid - On section layers of fat about an inch thick from which oozed an oily fluid containing bubbles of gas - Much gas escaped on opening thorax -

Pleural lungs adherent almost throughout to parietal Pleural space contained great amount of sanious fluid containing globules of fat

Pericardium & Heart - Pericardium contained considerable gas Same fluid - Heart in state of fatty degeneration - Large Reddish yellow - Fat on surface dilated - Heart muscle infiltrated under pressure - Very soft, thin, almost mushy Was torn easily - Valves discolored but seemed normal Aorta just above heart flabby - and plaques - Lungs full of dark blood

Personal and Medical History of Louisa Pankau

Patient brought here by Sh. and her husband. Has had hallucinations for about a year an subject of with the acute symptoms manifested above week ago. She will not take food. Will not have any fire in the house. Has fits of crying. Tries to get knives to injure herself with. Rude under restraint. Has shown a disposition to injure others. Inclines to be destructive. Has been under constant restraint since the acute attack began also has been under medical treatment for four days.

April 14-1891 Patient is improving in a quiet way, but seems rather dazed. Stands or sits about. Will rarely talk. Appears any interest in her. Talks no English. Habits clean. Lately she has asked several times to go to Laundry saying she want something to do.

June 1-1891 Patient did not want to work finally when it was offered and does little or no work. Health seems quite good. Has little of eyebrows or lashes and squints up eyes; the whole producing a rather odd effect. Is rather dull and listless. Occasionally makes request that she be given work or be allowed to go away.

Personal and Medical History of George Janisch.

This man was brought by ____ with the following history. Insanity was first manifested about 6 months ago. At present thinks he is divorced, and has lost a good name. Has threatned to injure others. Before coming to this country had occasionaly to apply leeches to relieve congestion of the brain.

Apr 7-91. Complains of headache. Put on tonic, Iron Hypophosp. & Strychnin. See Prescription Record p 504.

May 9-91. Patient talks no english & cannot be thoroughly understood. By signs, he, during early stay here, indicated bad feeling in head. & depression of spirits. Was quiet at night & probably slept well. Quiet & well behaved during day. Clean, tidy; always approaches the Dr when he comes around & by words & signs indicates his wishes. He wants to go home. Claims he is better. It has been impossible to determine the nature of his depressive ideas.

Has been making considerable lately at various industries off the ward & is gaining evidently. Is not so depressed.

May 23-1891. Has gained. Today visited by his sister and taken by her away on trial.

Patient brought here by daughter Mrs Bean and V. S. Henry. This attack began about two weeks ago following La Grippe. Had a spell one year ago similar to this and has had attacks at different times for the last twenty years. Has threatened to injure others. Sometimes destroys clothing. Has required constant watching and care for the past week. On admission came in screaming in a mild maniacal manner. Has taken Morphia by order of Physician. Health had been better this winter than for years. Daughter says has had spinal trouble for years.

April - 4 - 1891. Patient hysterically active. Balk with cold to head ordered. Noisy all night. Throwing self about.

April - 5 - 1891. Found to be bruising self & lips dry this morning. Put in bed & attempts ordered to hold her. It took 2 to 3 ale day. She does not rest at all. Explosively noisy and active. No rest. No coherence in speech or purpose in actions. Each has a kind of convulsive motion. No sensitiveness of the back to be found, tho attendant mentions it. Temp at noon 101.2° Drank milk in P.M. Rectal Hypodermic 1/16 at noon. Affected her strongly.

April - 6 - 1891. Temp. Normal in axilla. Looks better. Drank better. Behavior about same.

Apr. 7 - Much more quiet. Constant watching was not needed last night. Temp. 99°. She promised at first to be a case of Ac. Delirious Man., but seems more like an ordinary Ac. Man.

April - 14 - Has been gradually improving since the last. Does not recognize persons or questions as yet, but one can get her attention in a conscious way as if she recognized differences in people. Is up a about at present & held the most of the time.

April - 21 - 1891. Doing fairly quietly. Does not improve mentally however. Health improves steadily.

June - 1 - 1891. Has changed a great deal in behavior. Health is fairly good at present. Suffers some from constipation. Is now excitable at times though usually quiet. Her talk is quite incoherent & full of nonsense. Was visited by daughter whom she recognized & conversed with. Does no work. Reads none. Rather hysterical & mischievous.

Personal and Medical History of Charles F. Wright.

This man was brought by L Underwood with the following history. Has been very intemperate. Insanity first manifested 4 or 5 years ago with duration of several months. Not stated when this attack began. Insanity now manifested by an inordinate desire for drink and the natural abuse of family during fits of sudden passion.

Apr 6-1891. Has been perfectly quiet during the past two nights is reported as sleeping about 7 hours last night. Claims he is constipated. See Prescription Record page 503.

Apr 17-1891. Has an anaemic look. Put on Blands pills.

May 9-1891. Patient has been quiet since first night; claims he sleeps well. During day, has behaved well. On first morning was up in line and greeted the Dr pleasantly conversing quite freely. Had a rather nervous restless way in ward. Was in whole fairly self possessed. Claimed to be feeling quite well. Has been uniformly pleasant, in greeting & conversation. Talks freely, with all conversing in English, and seems quite cheerful. Very soon after coming here began working in the ward, in dining room, painting radiators &c. Worked well. Has for some little been working outside & is now working in store room, Steward's Dept.

Patient's habits are unexceptionably good, quiet, pleasant, clean & tidy. Patient reads, & writes letters to relatives.

May 11/91 Continued to work faithfully. To day went home on trial.

ONE MAN DEAD, 16/5

Over-Exertion Results in Death on the Street.

Thomas Faloon was, as far as is known, the only one who died as the result of the fire, and his death was only indirectly traceable to it. Faloon lived at 29 Seventh avenue northeast, and his home was one of the first to catch fire from the Boom island conflagration. He worked excitedly to save his household furniture, but his efforts were unavailing. With his family he made his way to a place of safety. On reaching Main street, near Seventh avenue northeast, he stopped, staggered and fell. When picked up he was dead. Faloon was about seventy years of age, and was well known on the East side for his peculiarities.

EXAMINATION ON ADMISSION.

	PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.
Height,	5 ft - 10 1/2 in.	Mental activity,	Moderate.
Weight,	156		
Nutrition of body,	Fair	Memory,	Poor. Cannot find closet or bed nor remember how long he has been here.

~~Gynecological exam~~	He claims a druggist told him that his wife (Faloon's) had bought poison of him.	Illusions,	None.
		Conversation, character of,	Company sensible as far as he knows. Companions all good & quiet. Has brogue.

Personal and Medical History of Thomas Faloon

Well Jacob I would like to see you here for I really am sick of being here. I should like to see you here for I do want to get out the worst kind, if you will come and take out of this place as I am very tired of being here. Now I expect you here as soon as you come and take me out of here. Know more at present but I do want you to come and take your father home out of this place.

Thomas Faloon.

Please come and take me out of this place. Please do take me home.

Thomas Faloon.

Apr 21-1891. Has slept quietly, ever since admission, at night. In a letter to his son Jacob of this date, patient says "You will please let my (wife) know that I am well but not with her good wishes." Wrote a fairly coherent letter to son. Has written several letters to relations.

May 5-91. In examination, memory found very poor. Patient cannot find water closet this room. Cannot tell how long he has been here. When questioned about trouble at home, he hesitated & says he guessed he would not say anything about that. Attendant reports that patient has talked in the ward about trouble at home, some church matters. Dr asked patient what about poisoning; Patient replies there was something in that. When finally his wife's name was coupled in inquiry with the poisoning, patient broke out "Ah, you know almost as much as I do myself" & went on talking freely about it. He claims he learned from a young man, a druggist that his wife bought poison of him (the druggist & patient seems to think there was an attempt to poison him. Patient cannot say why he was brought here. He never has a pain in his head or anywhere. When questioned what he thought of his fellow patients, he replied that they are all good quiet company, sensible as far as he knows.

May 7-91. On admission patient was stubborn refusing to take a bath, shave & have hair cut. When compelled to submit by sufficient force, yielded gracefully & has been obedient since. Has been well behaved; is quiet, clean & tidy. Usually announces to the Dr that he is going home to morning morning or at some other stated period of time. No work. Bxc. Rec. p 30'.

May 20-1891. Has diarrhoea.

June 5-1891. Had retention of urine; catheterized & drew urine; pulse small & slow. Kept in bed. Bn up. Passed water.

June 10-91. At 3:30 Am. had a chill, severe headache & general bad feeling,

Personal and Medical History of Thomas Faloon.

This man was brought by Dpty Sheriff Chas. F. Miles with the following history. Insanity was first manifested about four years ago by the idea that his family had put poison in his tea and also by an antipathy toward the Roman Faith in his family. At present is very jealous, irritable and excitable, and during fits of sudden passion has shown some violence at home. Has not done any regular work for four years.

Apr 21-1891. He has slept quietly, ever since admission, at night. In a letter to his son Jacob of this date, patient says "You will please let my (wife) know that I am well but not with her good wishes." Wrote a fairly coherent letter to son. Has written several letters to relatives.

May 5-91. In examination, memory found very poor. Patient cannot find water closet this room. Cannot tell how long he has been here. When questioned about trouble at home, he hesitated & says he guessed he would not say anything about that. Attendant reports that patient has talked in the ward about trouble at home, own church matters. Dr asked patient what about poisoning; Patient replies there was something in that. When finally his wife's name was coupled in inquiry with the poisoning, patient broke out "Ah, you know almost as much as I do myself" & went on talking freely about it. He claims he learned from a young man, a druggist that his wife bought poison of him (the druggist) & patient seems to think there was an attempt to poison him. Patient cannot say why he was brought here. He never has a pain in his head or anywhere. When questioned what he thought of his fellow patients, he replied that they are all good enough company, sensible as far as he knows.

May 9-91. On admission patient was stubborn refusing to take a bath, shave & have hair cut. When compelled to submit by sufficient force, yielded gracefully & has been obedient & nice. Has been well behaved; is quiet, clean & tidy. Usually announces to the Dr that he is going home to morning morning & at once after stated period of time. No work. Exc. Rec. p 505.

May 20-1891. Has diarrhoea.

June 5-1891. Had retention of urine; catheterized & drew urine; pulse small & slow. Kept in bed. Bn Up. Passed water.

June 10-91. At 3:30 am. had a chill, severe headache & general bad feeling,

Personal and Medical History of Thomas Falvon. Cont.

+ wakefulness. P.94 T@ 103.3; R accel. (emotion + chill). Given Quinine + dose of salts. 9 Am. P.75-R21 T@ 101.0; No particular pain, no nausea; bowels constipated. Passes urine. Bn. Bowels moved. Feels better; no more chills. P.60 T@ 98.8; No pain, no tenderness. June 11/91 No chills. Feels well. P78, some irregular. T@ 98.3. Bn. Feels well. Discharged. June 12/91. P.66. R20 T@ 99.0. Got up to day. Was visited yesterday by Rev Mr Fowler. Aug 31/91 Was visited to day by his wife.

Oct 15/91 Seemed to gain some physically + mentally for a time. Was not so forgetful. Improvement did not go on further. Has feeble memory. Worked some. Physically has been well since the attacks mentioned above. Always feels well. Had tooth ache + tooth pulled to day. Clean + fairly tidy. Tries to read some.

Jan 14/92. Patient taken sick today with Lafrippe. Went to bed. Has headache, pain in chest + and occasional cough. Is in apparent distress but denies that he is suffering any. Pulse, while not very rapid, is very irregular + of poor quality. Jan 17/92. Made some improvement since last note, but to day is again worse. Pulse is irregular + small; heart sounds are not strong. Lungs are evidently involved: Eats poorly but says he feels well. Jan 21/92. Visited today by daughter. Jan 26/92. Still sick abed and quite seriously so; coughs a good deal but does not raise much. - Examination of lungs shows some irregular physical signs; some areas of exaggerated breathing and respiratory murmur, - some rales and areas of impaired resonance. Feb 5/92. Weight today 140½ pounds. Feby 12/92. Has been up today for the first time since attack. Feels rather weak + has a sense of weakness about heart + side. Spent the afternoon in bed. Feb 17/92. Patient is up + down as he chooses since the last note. Finds he is not very strong. Mar 7/92. Weight 155¾ pounds. Is considerably stronger. Apl 4/92. Weight 159 pounds. Apl 11/92. Complains of having diarrhoea. May 3/92. Weight 166½ pounds. Pulse 64. Recently gave a possession, on questioning him, to feelings of antipathy towards his wife. May 10/92. Has diarrhoea today. June 3/92 Wt 169½ pounds. Pulse 68. June 8/92. Has earache, due to impacted wax. July 6/92. Wt. 174 lbs Pulse 78. Aug 3/92. Wt 170¼ lbs. Pulse 74. Sep 5/92. Wt 170 lbs Pulse 64.

Sep 13/92. Has been uniformly quiet at night, sleeping and resting well. Has been quiet and well-behaved by day. Personal habits good.

Visited yesterday, by his wife and taken home by her today, on trial.

Discharged.

Put in History - wife married.

62

Rochester June 10th 1891.

Dear Brother Bill:- Yours of the 6th instant was duly received. there is no use of your writing the Doctor in charge as it will do no good I have seen enough of that to know. Almost all the patients here that have been released have gone through the same course writing to the Doctor and always got the same reply, "you had bettr let him stay a little longer" and God only knows how long that little longer will last unless the friends come and demand his release. It is no use of your writing Jim as he thinks I ought to stay here until the habit is overcome but you know as well as I that as soon as a person has a determination to quit and has quit long enough to get over the effect of the habit that he is just as able to resist as if he had abstained a year or longer and the same with tobacco habit. If I could half explain to you the torture I am in in staying here I know you could not rest untill you had me out and unless a person has friends to take him out they can never get out as their work is worth more than their keeping. I have been here 2 months & 6 days do not have to do much work only making beds and light work as my head is not entirely well but does not require a doctors care any more as it is only dressed once a week and does not materate, the place is only ½ inch across and is not sore at all A friend of mine promised to write you, if he does he will tell you how things work here I understand some of the patients letters are opened but only those that are expected to do injury to the institute and are not of a sane mind, others say they are all sent to a guardian appointed by the court- I should think you could tell by the P.O. mark and the time between mailing and arriving at your Office if there is a guardian I know nothing about it and can get nothing out of Jim & have written twice to Lou. & Dora and got no reply so I do not know what to think Hope as you say all will come out well but I am afraid if I am not released soon I will be insane as I do not sleep good and my stomach is bad and very costive. having to take physic all the time. I suppose it is caused by worrying and thinking all the time, but I can-not -help it. I think I was committed for with attempt to suicide I do not know whether the cause was mentioned or not, perhaps cause by drink. write soon, love to all. Destroy as soon as read and let know one learn out since that

fernishness, a decided acceleration of pulse some of respiration, with a troublesome (dry) cough; patient ate rather poorly & slept poorly; was fairly cheerful in conversation; always conversed freely; was clean & tidy; remained in bed at request of Dr. On Apr 22, got up & remained up greater part of the time until May 1- when

Medical History of Charles Barrie.

was brought by Dapty Sheriff of Winnipeg Co with the
ng history. Time at which insanity was first manifested
Stated but were Melancholia with a tendency to suicide.
Has attempted to injure his wife and boy and has tried to kill himself
by striking his head with a hammer. Has been restrained for
about one week.

Apr 5/91 Put in sick ward under night watch. Did not sleep any all night. Was nervous & disturbed by others.

Apr 6/91 Slept but little by snatches. Talked quite wildly toward morning. Dressed the wound in scalp made by the hammer blow. Pulse 105 when quiet.

Apr 7/91. Slept only after 3 am. Got up quietly & was taking suspenders from room mate's pants when discovered; intent probably suicide. In afternoon complained of chilliness; coughs. P. 108 T 101.0 Ordered to bed.

Apr 8/91 Slept quite well last night. Am. in bed. P102, Coughs some T(a) 100.3; has laryngitis; hoarse.

Apr 9-91. Slept better. In bed. P 114; has laryngeal cough. T 100. Am P 124 T(a) 101.3

Apr 13-91. Rest much broken; partly by cough. Coughs but does not raise much. Has earache to day.

Apr 22-91. Has kept his bed until to day; has wanted to get up; permitted to do so to day. P 116. Am P 112.

May 1-1891. In night, had quite severe pain in epigastrium & under lower ribs. Given Morphine. Pulse then 124. Am. Feels no pain except in movement. There are friction murmurs heard on auscultation of left axillary region & tenderness in percussion in same area. P 114, R 26 T 100.2 - Considered a pleuritic attack. Am P 114 R 28 T 100.2. Remains in bed.

May 8-91. Remained in bed until today. Is up.

June 25-91. Weighs only 119½ pounds, a decided loss. Sleeps poorly.

July 8-1891. Still bothered with insomnia. Coughs some. Pulse 78.

July 17-1891. See above running history of the case.

Summary: On admission was decidedly depressed, apparently frightened; nervous; made several moves which were interpreted ~~to mean~~ as suicidal in purpose. Personal and Medical History of Charles Barrie Onk

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

in night, he had an attack of pleurisy, which did not seem to greatly ~~or~~ long aggravate his physical condition. Sat up again on the 8th May & has been up & around the greater part of the time to date. Has been well behaved; clean & tidy; pleasant, but quick in manner & conversation; responds to jocose remarks; on quite intimate terms with a fellow patient Mr. Godfrey. Patient had a good deal of visitors; the copy of one of June 24, attached was something of a surprise to Dr. as patient had not seemed very discontented, & was always pleasant in manner. Patient complained to the last that he did not sleep well; could not tell why. Physical state was unsatisfactory & considered as most probably pointing to tubercular lung trouble, altho' no physical signs were noted.

Went away to day, to go to a brothers in Stearns Co, on a farm.
Oct/9 Patient recently wrote and mentioned that he was getting along pretty well but was still troubled with insomnia.

Discharged

Personal and Medical History of Annie M Johnson

Patient brought here by Dep Kinney & wife - This attack began four days previous to admission. Had an attack after her first child eighteen years ago. Has been caring for or nursing a child (condition bad) for the last eighteen years. Has shown a disposition to injure herself and others - Habits filthy & destructive - No restraint or confinement Medical treatment unknown

April - 21 - 1891, Patient seemed on arrival to be in a state of acute mania. Was placed down on Cot & watched. Wicked & twisted aimlessly about all day & greater part of night - Finally seeing she was failing she was placed & kept in bed, where she has been for about 6 days. Milk was given to her as much as possible - 3 days ago her Left eye which had been suffering from some conjunctivitis ever since her arrival, showed deeper trouble & treatment for Keratitis was commenced at once. Eye has less inflam. action, but the iris is somewhat involved. Patient ordered up part of day - today -

May - 31 - 1891. Patient has improved steadily in physical condition - Health is now fairly good. Is quite active. Face of good color & expression is now one of life instead of the dull, lifeless blank look which characterized the first week of her stay.

July 1 - 1891 Very noisy at times - Ugly to dress and undress struggles a good deal when attendants bathe her.

July 25 - 1891 Very much more quiet & manageable at times

Aug 28 - 1891 Became quite violent and noisy at times so that were obliged to move her back to B 4 -

Dec. 11th 1891. Patient does little & says little. Is not however as silly as she was nor has she been violent of late.

March 4th '92. Has become so well & well behaved, that she has been moved up to one of the upper wards. Is quite quiet at times. Is rather demented in manner, says little & what she says has usually been silly & disconnected. As however, bright, clean, tidy & quiet - as compared with her former condition.

May 19 - 1892 Physical health good Mental to same. Has been very quiet for the past three months. Sits on the ward in a rather indifferent way - Does not manifest any interest in anything. Talks very little. Sleeps well -

Personal and Medical History of Annie M. Johnson

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

1892 Aug 29 General health has been good. Quiet and clean in habits. Does no work.
Oct 11-1892 General health continues good. Does not ride and walking. Eat and sleeps well. No work. Takes no interest in anything. Talk is incoherent.
Nov 22-1892 Sits very quietly on the ward. Does quite well to realize her condition. Never speaks of her home or friends. Silly in manner.
Feb. 8th 93 Sits quietly on the ward, incoherent, takes no interest in anything, general health good.
April 22 93. No work. Is quiet. Habits clean. Health & appetite good.
May 19. Of late has been somewhat cross. Never does any work. Incoherent in talk.
July 21. 93. Appetite good. Habits clean. Is quiet. Has not been violent for some time. Rides and walks. Gen. health good. Oct 13 93. Appetite good. Is quiet. Clean in habits. Gen health good. Nov. 10. 93 Appetite good. Neat & clean in habits. Quiet. Goes riding & walking. Gen health good. May 1894 Appetite good. Is rather noisy. Clean in habits. Occasionally violent. Goes riding & walking. Gen health good. July 6 94 Appetite good. Clean & tidy in habits. Is quiet. Violent occasionally. Goes riding & walking. Gen health good. Oct. 9 94. Appetite good. Clean & tidy in habits. Usually quiet. Occasionally violent. Goes riding & walking. Gen health good. Feb 4 95. Appetite good. Clean & tidy in habits. Is quite noisy at times & occasionally violent. Gen health very good. Goes riding & walking. Mch 23 95. Appetite good. Clean & tidy in habits. Talks very little & then incoherently. Occasionally violent. General health good. Goes riding & walking. July 3 Appetite good. Clean. Quiet. Talks very little & incoherently. Occasionally violent. Gen. health good. Aug 8 No change. Sept 23 Appetite good. Clean & tidy in habits. Is quite noisy at times. Occasionally violent. Talks incoherently. General health good. Goes riding & walking. Oct & Nov. Appetite good. Clean & tidy in habits. Quiet in behavior. General health good. Nov 30 Menstr. Dec. 30 Menstr. Jan 29 Appetite good: Clean in habits. Quiet: Talks very little. General health good. Takes out door exercise. Feb 11 Menstr. Mar. 28 Appetite good: Clean & tidy in habits. Quiet. Does not talk any: General health good: Takes out door exercise. Apr. 7 May 5 Menstr. Summary Nurse's Notes by Dr. A. L. Phelps - Aug. 96: Appetite good: habits clean: quiet most of time: becomes quite excited & has violent spells occasionally: talk incoherent: menstr. regular. Oct. 96 no change. Feb. 97 Rather demented, makes very little trouble at present: Gen. health fair: Apr. 97 no change. Aug. 97 Lungs & heart examined: Resp. 22: Chest expansion good: percussion note normal: breath sounds normal: Heart sounds at base rather weak: Pulse 96: rapid & rather weak: no murmurs. (Dictated by Dr. P. M. Phelps) (Oct. 21 97) General condition good: habits clean: quiet: does not talk: very demented. Feb. 9 98 Weight 114 lbs. Feb. 99 Intervening notes show no change during year. (Dictated by Dr. P. A. Bell) Mar. to Sept 99 Gen. health & appetite good: bowels regular: sleeps well: takes out door exercise: neat: has delusions: talks to self at times: very disagreeable: obstinate & occasionally violent, especially when bathed: sometimes answers questions sensibly. Apr. 10 99 Visited by sister.

Crazed by Religion.

WASECA, Minn., April 15.—Religion has driven S. Merrill insane. Recently he had a habit of drawing a pistol and asking his wife if she believed in God. He would then hold the cold barrel of the weapon against her head and tell her to kneel and pray. He is now in jail yelling like a Comanche for liberty.

Rochester Minn. May 1th 1891.

Dear Wife, Your letter of the 15th received I wrote to Herbert and got an answer several days ago. I am glad the time is coming that he will be at home you seem to think it is a fine thing to stay here. I tried it once before and always try and never go to such a place again I went to Cummings Office and did see him if I had found him and got medicine from him I am satisfied there would be no need of coming here I cant make it seem clear when or why or what I have done at home a few days before coming here but it will all get clear or have to be left blank anything I have done at home or about home I am ready to face at any time and I think can be made all right I asked about my ring they said they would look it up I dont remember of selling it since I have been here I think may be it was at the jail if it is gone let it go did you ask Henry Reynolds about it Ih have asked the Doctors here when I could go they dont say I want yu to see Calister about it he must have had the say so about sending me if I am not coming home soon I want you to send my clothes I have at home send hat shoes, stockings, anything you think I will need I need some hand kerchiefs, watch I have no hat and one each of your pictures I wear my best clothes all of the time. Send me a little money if no more than $1.00 I want a pencil I dont want to beg for everything I get I want to work once more have idled all winter in spite of myself, now am idling away the summer you seem to talk as though it was a nice idea to stay here How would like to stay in a place like this away from your children for a year as you talk to me of doing have you written to L. D. since I have been here Send me some papers anything that is new they say that they will give me some clothes to wear, I dont want the State or County to clothe me or any one but am waiting to earn what i need I have always told Herbert to do all he could in the shop towards paying his way for they have done a good deal for him You know how it looked at St. Peter if you think that was a Hive of bees what would you think of this they say there is 1100 here Of course there is lots that have to stay but it seems to me as though I was as well now as I will ever be Write soon and all the news if you feel as though you are afraid of my coming home say so I have always tried my best to provide for you and the children and have worked hard when there was an opportunity and you know it and want through more than I can ever be able to tell you let that go as it is, do what you think is right and dont worry or meddle with the affairs of others Well write soon, as ever,

Yours Truly Your Husband, S. Merrill.

There are a lot of people that think if anyone has been in a place like this if they think so let them try it themselves.

Well, Good bye,

S.M)))

Apr 24-1891. Slept well. Pulse 69. Tongue clean.

Apr 25-1891. Pulse 90. Says he does not feel well. Is constipated Apr 27-91. Constip.

Apr 28-1891. Says he does not rest well. Is apparently sleeping well.

Apr 30-1891. Pulse 74.

May 25-1891. See above for details of patients clinical history. Patient was noisy restless on admission. Howard quite easily influenced by hypnotics and slept considerable almost every day. During first few days patient had outbursts of excitement, when he was noisy talking incessantly & incoherently; one sentence

Merrill

Waseca Minn June 30/1890

Mr Mills Dear Sir

Dr Baker promised that I could come by the 1st of July and this morning he said I could have to wait for Kittleson I wanted to attend to my business now so I took a walk up here been good to me and I feel thankful for it and am sorry to go in the way I did but was hard to go if you will see Kittleson and get him to send my things and call it a discharge all right as I will come down after Thanksgiving up the business here yours very truly

S Merrill

Medical History of Axel Marica.

Was brought by Sheriff Henry Reynolds and Otto Retzinger with the following history. Was committed to St Peter July 14th 1881 and remained there until sometime in October of the same year. Unnaturalness of manner with incoherence in conversation began in April 3d 91, and culminated in a maniacal outburst on the 11th inst. since which time had been violent and during paroxysms has been inclined toward dirty habits and destructiveness. Came to hospital handcuffed, incoherent, restless and afraid of injury. Was confined for a few days in the Waseca Co Jail.

Apr 14-1891. Slept about 6½ hrs. Was somewhat noisy toward morning. This morning, pulse is 84, regular; tongue some coated, moist; In afternoon, became suddenly excited, was given hypodermic ½ Morphia & Hyoscin. Pulse 100; Temp. ext. 99.8. Tongue dry & coated. Con. Has slept, P. 78, Rg. Sluggish.

Apr 15-91. In morning, having passed a quiet night, was up, comparatively quiet, P. 75. Tongue coated moist. Ordered Eggnog. Takes but little food. Pm drank eggnog, P. 120 T 101,7. Put to bed. Had diarrhoeal passage.

Apr 16-1891. Was quiet during night. Am. P. 99 T(s) 101,5. Fed by nasal tube, having refused food. Pm. P 105; drank milk & eggnog during day. Stays in bed fairly well.

Apr 17-1891. Passed comparatively quiet night. Am P. 100. T. 101,3. Tongue coated & dry, kept in bed. Takes eggnog. Talks almost incessantly, incoherent. Pm P. 68 T(s) 100. Rectal.

Apr 18-1891. Slept about 6 hours. Am. Struggling, excited. P 105. Tongue dry & coated. 2 Pm. P. 68 T 101. 8 Pm P. 66 to 72. Lying quietly in bed. Ate supper. Skin hot. Ordered Cold to head.

Apr 19-1891. Slept about 4 hrs. Pulse 92, regular & strong.

Apr 20-1891. Slept only about 1 hr. Am. Quieter, ate some & drank eggnog. P. 66 T(s) 98.9. Tongue coated & dry Pm. P. 87, quieter. Tongue moist.

Apr 21-1891. Slept about 8 hrs. Am. P. 88, regular, good. Eats well. Pm slept some to day; comparatively quiet; Talks fairly well. P. 96. T(s) 102.6° F. Constipated. Given rectal injection

Apr 22-1891. Slept well. P. 98. strong T(s) 100.4; bowels moved with injection. Pm Has been up 6 hrs. P. 84. Tongue moist.

Apr 23-1891. Slept well. Up; ate breakfast. P. 88. Tongue coated but moist. Am Up; P 100 (standing). Tongue clean & moist.

Apr 24-1891. Slept well. Pulse 69. Tongue clean.

Apr 25-1891. Pulse 90. Says he does not feel well. Is constipated Apr. 27-91. Constip.

Apr 28-1891. Says he does not rest well. Is apparently sleeping well.

Apr 30-1891. Pulse 74.

May 25-1891. See above for details of patient's clinical history. Patient was noisy & restless on admission. Somnum quite easily influenced by hypnotics and slept considerable almost every day. During first few days patient had outbursts of excitement, when he was noisy talking incessantly & incoherently; one sentence

Personal and Medical History of Lyne Merril Entlin.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

being repeated much. One such example was "Cheat or swing!" Patient struggled violently with those restraining him; and would doubtless have done harm if not overpowered. Patient had some fever, refused food for a time & had a coated & dry tongue, and was kept in bed. Restraint was necessary for a time. Since date of last note, patient has been quiet, sleeping well; & during day, quiet orderly & well behaved. Has not been decidedly dirty nor destructive. Gradually became more coherent in conversation, finally appreciating his former "confused state" as he called it. He, for a time, labored under the delusion that he had been D.B. in D.B. Hosp.; he thought for a time that he was at St Peter. Also thought that he had struck D.B., Gradually overcame these ideas. Has been very cordial & pleasant for some time. However was distrustful of himself & hesitating for a time. Now is better. Writes his family very fair letters. See attached Copy of 17th inst. Is now working. Thought himself about well enough to go but seems quite contented when told that he had best remain awhile.

June 12-1891. Visited by a friend. (Sheriff).

June 16-1891. Is constipated.

June 30-1891. Patient has continued quite well; has been working outside daily; has lately been quite urgent in request to be sent home. His business is now beck. He to day eloped while out working.

July 1-91. See attached letter rec'd this day by Dr Mullen, Ass't Superv'r; in which patient explains his act & expresses sorrow at what he considers the necessity of taking this step.

It had been intended sending patient home soon.

Discharged

Personal and Medical History of Rosa M. Hachmann

Patient brought here by Mr Kinney, Deputy Sh. This attack began in August 1890 when she took some Nitro Acid with suicidal intent - First attack was in 1880 which lasted 18 mos. At first was very much depressed. Now has periods of excitement - Has hallucinations and delusions and imagines that all her friends try to do her injury. Has tried to injure others in a slight degree when in sudden passion. No disposition to pilfer or destructive habits. During her period of excitement she sings, has great admiration for pictures music etc. Nothing in previous history to indicate the approach of attack up to 1880. No restraint - Has been under medical treatment and attending Physician says that for 2 or 3 yrs she has been subject to a peculiar nervous cough and has had a tendency to Hysteria

April - 21 - 1891 Patient is quite pleasing & seems to act quite sensibly, though her talk is a jumble of all kinds of subjects, Complains of a cough

June - 1 - 1891. Patient is a persistent and quite troublesome talker - Talks loudly & incoherently - Is polite in manner but very loud & impressible - Her talk is very incoherent & of no importance - Is usually neat & not otherwise making much trouble, Health continues excellent. Does no work - Reads but little, -

Nov. 1st. Patient has improved a great deal, though essentially a chronic case - Was allowed to go home

Discharged Feb 5 - 1892.

Personal and Medical History of Lydia Wynnes alias Buschacker

Patient brought by Sheriff Braley. History very poor. Duration of this attack that Rheumatism manifested in form of nymphomania. A drunkard & cohabited with men. Has been in Winona ten days. Has been living with different men. Has great fear of dogs & cats. Has suspicions of many are. Gives different answers to the same questions. Has been in St Peter Asylum.

April 21-1891. Patient for first few days only scolded at the Sheriff for bringing her here as she was "not crazy." Has behaved steadily ever however. Has been tearing clothing & yesterday was shut up in room & too untidy to be out. This morning clothing torn & half naked. Scolding incoherently at being here. Wrote letter to her Bro. second day. She recognized Dr Kilbourne & owned up to being at St. Peters. Said had been there 10-12 yrs. That she left 4 yrs ago. Spent 6 mo at home & 6 mos in Montana at a hotel at $18 pr mo.

May 28-1891. Health good. Manner uniformly irritable. Scolds loudly. Has quarrelled with & struck patients. Swears a good deal. Accuses the Sheriff of stealing her away & bringing her here. Swears at him almost always. Is not very neat. Has much improved over the paroxysm of the first few days however.

Nov 4-1891 Mixed & Annex.

Nov 24-1891 Health good. No work. Quiet and clean.

Dec 29-1891 Has a sick spell occasionally when she complains of headache and stomach trouble. Generally quiet.

Feb 19 1892 General health good. Very flashy. Sits idly rocking and scolds a good deal when not busily locked up. Very anxious to get away.

May 9-1892 Became so nasty and voluntarily dirty in her habits that was been obliged to put her in B4. Very contrary and annoying. When she is not scolding she laughs in a loud and silly manner. General health good.

July 10 '92 Patient has been over from the Annex for some time. Upon attempt, however, to move her up to B-1, it was found that she became so talkative & disturbed, that she had to be moved down again.

Dec 1-92. Patient is steadily irritable & loud in talk. Changes in no respect however.

Personal and Medical History of Lydia Wymer.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Dec. 31 92 Appetite good, dirty five times during mo. no work. Sleeps soundly, behavior silly, irritable at times.
Jan 31" No change. dirty 4 times during mo.
Feb. 28" About the same every day; always relating about going home & her money.
May 24. 93. No change. At times resists attds. Menst May 10. Is always irritable & easily made violent
July 15; Appetite good Bowels regular Is very annoying, always complaining and finding fault wants to go home. Aug 28. 93. Violent & destructive. Fought attds. Bit in clothes destroyed several articles of her own clothing, usually claims other destroyed them.

his man was brought by Constable C. P. Lundquist, and C. Swanson with the history of having had Epilepsy and attacks of insanity for past 22 years at intervals. Was under medical treatment in Sweden but particulars are not known.

Apr 16-1891. On admission was restless, lunging from side to side when led in. In unclean & untidy condition. Almost oblivious to all surrounds. On ward was excited, restless & destructive. Drank some milk in lieu of dinner

Apr 17-1891. Slept only 2 hrs. Is restless; ate a little. P. 96. T. 100.2 Rm P 108. T. 103. & Ordered kept in bed.

Apr 18-1891. Slept well. Am P. 110 T. 103.6°F. Restless. 2pm. T. 103.6 8pm. P 120 T 104.7. Ate some. Skin hot. Cold to head ordered & 5 iss phenacetin.

Apr 19-1891. P. 110. R 39. T. 103. Has erysipelas of left arm, surrounding & encircling the elbow joint. There is pus in bursa over olecranon. Opened abscess, washed & dressed in pm. Patient resisted vigorously.

Apr 20-1891. Slept 3 hrs night before last & well last night. P. 94. regular, strong. T. 101.5 2 Pm P. 100. 6pm P. 102. Apr 21-1891. Slept about 4 hrs. P. 96. Eats fairly well. Rm Arm dressed. P. 99. Apr 22-91. P. 86. Rm Dressed arm. P. 96. Apr 23-91. P. 78. Rm P. 78. Apr 24-1891. P. 81. strong. Arm discharges. Rm Arm dressed. P. 80.

Apr 26-1891. Lies in bed quietly with restraint & watching. Eats well.

May 3-1891. Up in chair. P. 88, strong. May 6-91. Arm much better.

May 10-1891. Had a fit in night, the first observed since coming here.

May 13-91. No fits since above as far as known. May 15-91. Sit in pm.

May 17-1891. Had one fit yesterday.

May 25-1891. While restless, destruction & incoherent in word & conduct on admission, patient became quietly not destructive on being attacked with pains preceding appearance of erysipelas of the arm. Put to bed & remained there with but little watching, & was not destructive nor very dirty. Resisted at first opening of abscess & dressing arm but made less trouble later & did not disturb dressings. Was visited by his mother for two days (21 & 23 inst). Gradually grew better physically, getting fair degree of sleep, eating quite well & resting in bed. Patient was gotten up & dressed on 3rd inst & has kept up to date. Had no fits for some time after admission & has not had many since the first. Patient has been quiet, clean & well behaved. Is more or less demented doubtless. Says he has nothing to complain of. Arm recently became worse, erysipelatous inflammation reappearing. Is being dressed.

Personal and Medical History of Otto Fargerquist Cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Aug 16-1891. Is having an occasional fit; fell + cut his brow in one day.

Sept 1-1891. Was to day visited by his mother. Patient did not seem to think of wanting to go home with her.

Oct 15-1891. Physical health uniformly good. Has for some time worked regularly in the tailor shop + seemed contented; and happy. Occasionally has a fit but has not been maniacal; clean + tidy. Is on medicine.

Oct. 24/91. Has had three fits today and is in bed.

Jan 6/92. Became excited + unruly in the dining room at supper + was put in seclusion.

Jan 21/92. Weight 137 pounds. Pulse 76.

Feby 8/92. Fell in a fit today + cut his eyebrow. Mar 4/92. Weight 139 pounds. Pulse 120.

Apl 4/92. Weight 149 pounds. Apl 30/92. Had 2 fits today. Fell + hurt himself.

May 3/92. Weight 139 pounds. Pulse 86. — Works with the tailor.

June 3/92. Wt 138 pds. Pulse 72. June 23/92. Erysipelas has started in, in his face, in a bruise. Patient isolated. 5 Pm. Pulse 123. Erysipelas spreading. July 4/92. Visited today by friends. July 6/92 Wt 118½ pds (without clothing). Pulse 74. July 14/92. Facial Erysipelas has not severe and was quite quickly recovered from. Isolation continued until today when patient was got up. Aug 3/92. Wt 135 pds. Pulse 80. Sep 5/92. Has been moved to the Annex. Has worked quite regularly with the tailor. By spells, irritable + ugly. Nov 14/92. Has been growing more irritable and troublesome. Today attempted to strike a fellow patient with a chair. Was transferred from the Annex to C[t]. — Nov 23/92. Has been very ugly + pugnacious lately. Today is noisy + excited. Jan 23/93. For a time, was extremely excitable, getting into frequent fights with fellow-patients and viciously attacking the attendants when they were struggling with any patient. Also noisy, for a time. Has quieted down. For the past few days has lain in bed, sleeping the greater part of the time; at times, difficult to arouse. Few definite convulsions seen. This state is considered a sort of "Status Epilepticus" — a little lighter + more active to day.

Jan 24/93. 830 Am. Pulse 78. T(e) 98.6. 5 Pm. Pulse 80. T(e) 99.2. Jan 25/93. 7 am. Pulse 88. T(e) 98.2 Seems bright. At 930 Am. In bed, but talks some. 5 Pm. Pulse 80. T(e) 99.2. Is dull. Constipated; given salts. Jan 26/93. 7 Am. Pulse 78. T(e) 98. 5 Pm. Pulse 120. T(e) 102.4. Jan 27/93. 7 Am. Pulse 88. T(e) 98. 5 Pm. Pulse 104. T(e) 100. Takes about a pint of milk 3 times a day. Is now unconscious — Jan 28/93 7 Am. Pulse — R 50. T(e) 104.8. Became worse during morning; gradually sank and died 8.50. Am —

Relatives had been notified of his critical condition. Brother arrived after patient's death and removed the remains. No autopsy held.

— Died —

Also noisy, for a time. Has quieted down. For the past few days has lain in bed, sleeping the greater part of the time; at times, difficult to arouse. Few definite convulsions seen. This state is considered a sort of "Status Epilepticus" — a little brighter & more active to-day.

Jan 24/93. 830 Am. Pulse 78. T(e) 98.6. 5 PM. Pulse 80. T(e) 99.2. Jan 25/93. 7 am. Pulse 88. T(e) 98.2 seems bright. At 930 Am. Irked, but talks some. 5 PM. Pulse 80. T(e) 99.2. Is dull. Constipated; given salts. Jan 26/93. 7 Am. Pulse 78. T(e) 98. 5 PM. Pulse 120. T(e) 102.4. Jan 27/93. 7 Am. Pulse 88. T(e) 98. 5 PM. Pulse 104. T(e) 100. Takes about a pint of milk 3 times a day. Is now unconscious — Jan 28/93 7 Am. Pulse — R.V.D. T(e) 104.8. Became worse during morning; gradually sank and died 5.50. Am —

Relatives had been notified of his critical condition. Brother arrived after patient's death and removed the remains. No autopsy held.

— Died —

~~Gynecological exam.~~	Refused to try some tests of coordination - Exhibits nervous movements.	Illusions,	
		Conversation, character of,	Does not like it if they talk about him

Personal and Medical History of William Huckman.

This man was brought by Dept Sheriff Kinney with the following very incomplete history. Insanity probably first manifested two years ago and has increased to such an extent as to render confinement necessary. At present is afraid of people and imagines he is being talked about. Has shown Extravagance & Delusions of Persecution. Once showed a disposition to injure others from sudden passion. Has grown lazy.

Apr 19-1891. Dresses quite neatly. Sleeps quietly. Has restless movement of body, head & eyes. To day attacked attendant.

Apr 20-1891. Patient & brother, Charles, got their clothing on to day in clothes room to go home, when attendants interferred to prevent them going, the patients attacked attendants; William at fought hard & struck attendants. Moved to B3. Down there, at dinner time, patient got into trouble with attendants & scratched one of them, & later, in the hall, kicked another of them.

Apr 28-1891. Patient tried to run away while out walking.

May 25-1891. Patient is in good health, fat & rosy. He has been perfectly quiet at night, probably sleeping well. During day, has been quiet usually, always clean & fairly tidy. Usually stands apart from others, gazing out of the window. When approached & addressed by any one turns away his eyes with a peculiar squint & at same time smiles; only answers simple questions. Occasionally asks when he can go home. Made effort to escape but has now less show to do so. Does not converse with fellow patients. Does no work.

May 28/91 Became excited and smashed a chair because the attendants would not give him his accordion.

June 3/91 Complains of headache, the only complaint of feeling ill to date.

Aug 1-91. Visited to day by a brother.

Oct 15-/91. Health fair. Sleeps quietly; appetite good. Clean & fairly tidy. Somewhat restless & easily stirred up but has lately not been ugly & so badly behaved. Says very little even when addressed, then usually turning impatiently away. Does no work.

Mar 4/92. Weight 154½ pounds. Pulse 72. Apl 4/92. Weight 152½ pounds. Pulse 80.

Apl 10/92. Was visited by a friend to day.

May 3/92. Weight 156 pounds. Pulse 84. — Is quiet day & night – but is not improving any. June 3/92. Wt 152 lbs. Pulse 72. July 6/92. Wt 152½ lbs Pulse 84.

Aug 3/92. It has recently been moved to the Annex. Has been quiet & well – behaved, as a rule. Sept 6-92 Wt 147 Health fair Can walking talks a little words or word is clear but slowly Mind is indifferent in behavior Nov 15-92 Wt 145 is in good health talks some hears up considerable clothing a pair of pants nearly every day Mar 6-93 Wt 152 Health good Is slowly Mind works – none – Cannot see trouble.

Personal and Medical History of William Heckman

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

May 1893. Is a quiet, harmless patient. Inclined to escape. Works a little on ward. Health good. — July 31/93. Has tried to escape, several times, of late. Says "his able to work & ought not to be confined in a Poor-House". Bodily health good. Sept 2 93. A quiet, harmless patient, inclined to run away. Tidy in dress, does no work. Health good. Oct 5/93. No change in condition. Nov. 2 93. A quiet harmless patient, intolent and careless as to his appearance. He does no work. Is inclined to run away. Dec 28 93. No change. Jany 31 94. Same. Feb 10/94. Quiet & inoffensive. Health apparently good. Works a little on ward. Inclined to escape. Mch. 24/94. April 27/94 No change up to date. May, June & to July 31/94. No change noticeable. Patient is quiet & inoffensive, sits in one place, most of the time & seldom speaks. He does a little work. Habits clean; physical health good. Is still inclined to escape. Aug 10/94. Keeps in quite good health & physical condition. Aug 31/94. No special change is noticeable. Sept 29/94. Attempted to escape this morning. He got out of the dining-room door & started across the lawn, but was caught before he had gone any distance, & brought back to ward. Sept 30/94. Above general note still good. — Oct 31/94. Physical & mental condition do not seem to change any. Habits clean. He is still inclined to escape. — Nov. 94 quiet, does a little work on ward, talks a little, is always watching for an opportunity to escape. Health good. Dec/94 — Jany 31/95. No change noticeable in any way. Feby. March & April 30/95. No apparent change for the quarter. Is much inclined to run away. Habits clean. Health is good. Works some on ward. May, June & to July 31/95. Patient keeps about the same from month to month. Quiet. Works some on ward, though is inclined to be indolent & lazy. Health good. Mentally, no change. Is still on the alert to make his Escape, & requires very close watching. Aug Sept & to Oct 31/95. During this period, no change to note in either his mental or physical condition. — Is dull & stupid: seldom speaks: inclined to make his Escape. Health good. Nov 4/95. Wt 156 lbs. Pulse 84. Nov. Dec 1 & to Jan 31/96. No change especially noted. Quiet: works on ward: incoherent: occasionally "asking to have a settlement & offers to pay his board, so that he can leave". Continually watching for an opportunity to escape. — Habits clean: health good.

Summary Nurses Notes by Dr. Phelps Feb 1/96 to Aug 1/97 Quiet & inoffensive: a chronic case: Tries to elope at times: No physical illness noted: Wt. 151 to 159 lbs. Aug 1 97 to Jan 31 99 Wt. 146. Sept 2/97 Ran away while on farm: Brought back a few hours later. Oct. 31/97 Health good: works on ward at present. No change in condition. July 6/98 Visited by friends Tries to escape frequently. Sept 9 Eloped at 11:30 AM. found at Byron. Returned at 6:20 PM. & transferred to B'. Jan 31/99 No change of note during period.

Cont. by Dr. Washburn Feb. 1 - July 31/99: Wt. 163# Quiet on ward: needs watching when out of doors. Feb. 28: Tried to get away by starting out with help in the morning: No change during period.

Cont. by Dr. Lobsapple July 31/99 - Jan. 31, 1900: Wt. 158#: very little change: physical condition good: well behaved except that he tries to run away: very dull mentally but is cleanly & works on ward. Feby/1900. Wt 148#. P70. April 30. Nothing special to report. July 19. Attempted to elope: was caught by farm-hand. July 20. Vaccinated: result good. July 31. Has been in good health: is a good worker on ward: habits cleanly. Is considerably demented & seldom talks. Never causes any trouble, but watches for an opportunity to run away. — Aug 1/1900. Wt 142#. P68. Sept 10. Transferred to D'. Sept 13. To D'. Jany 31/1901. General health has been good: works regularly in ward during - room: neat in habits: very quiet: says but little: tries to run away. Feby 1/01 Wt 150#. March 1st. Eloped: was returned the same day: May. Wt 146#: Augt 1. Wt 156#: Nov 2 Wt 146# — July 31/01. No change mentally: works regularly in wards Dining-room. Is neat & quiet: talks but little: watches opportunities to elope. —

Personal and Medical History of William Heckman

July 31/01. No change: works well on ward: very quiet & peaceable: inclined to run away. Dec 14/01. Endeavored to elope: Dec 20. Attacked nurse Anderson, striking him in face. — Jany 31/02. Has worked regularly in ward dining-room: is cleanly and well-behaved. Except as noted above. Has very little to say. —

		Conversation, character of,	Very garrulous. Pronunciation is fair. Has brogue.

Personal and Medical History of Michael Sullivan

This man was brought by Deputy Sheriffs Kinney & Harris with the following history. Has been an inmate of Almshouse for 10 years. About 3 months ago began to manifest insanity by exposing his person & women, destroying clothing, shattering & destroy buildings, burning papers etc.

Apr 17-1891. Was comparatively quiet during night. Slept about 5 hrs.

Apr 18-1891, Some noisy. Slept about 8 hrs

Apr 23-1891. Patient has been somewhat noisy as a rule, but has slept some each night. Was worse last night, sometime, singing & yelling, threatening the night watch when the latter asked patient to keep still. Did not sleep well.

May 25-1891. Patient is thin, hollow cheeked & wrinkled. Not very strong. Actions are stiff & tottering. Spine is bent some. Does not complain of feeling ill, as usually. While patient was usually more or less noisy at night at first he is now usually quieter. During day, patient has been quite active, bodily & mentally. Has been a garrulous, almost incessant talker. Conversation is often times foolish & usually rambling. Talks with every one whom he meets. Is somewhat less talkative lately. Was at one time, rather mandatory & even threatening in talk, demanding this or that. Was especially persistent in asking for his trunk which he assumed us must have come before this. Patient's habits have been fair. Is not destructive, is clean & fairly tidy. No work. In examination on the 8th inst patient was stubborn & suspicious & would not try certain tests.

June 6-91. Complains of pain in back & asks for plaster

Aug 25-91. Patient has had some small carbuncles on back of neck which he began treating himself, not speaking about them. Dressed.

Oct 14-91. Health only fair. Rarely or never complains of feeling ill. Recently patient began kicking a fellow patient for some slight offence & when stopped by an attendant, made some resistance, was set on a seat. Patient complained of having been hurt but no marks or injury found. Patient grew very indignant when so told & straightened up & moved around freely in his anger while before he had groaned & cried out at slight movements. Patient had been quarrelsome & obstinate, hard to get along with for some time. Was to day moved to B4, from A3.

Jan 16/92. Became better behaved & was moved up to B3. Usually perfectly quiet at night - was last night somewhat noisy for an hour.

Feb 5/92. Has not been repated noisy at night, since last note, until last night.

Personal and Medical History of Michael Sullivan

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Mar 4/92. Weight 152 pounds. Pulse 72. Mar 20/92. Got into a quarrel last night with a fellow patient. Apl 4/92. Weight 149½ pounds. Pulse 80. Apl 21/92. Struck a fellow patient in the head last night, with a shoe. May 3/92. Weight 150 pounds. Pulse 84. Is comparatively well behaved; talks quite freely: is quite active, going about walking — Plays cards. Is clean and tidy. June 3/92. Has been moved to the Annex, since last note. Has been comparatively well-behaved lately. Sept 6-92 Wt 143-health fair-goes out walking some, gets spells of loud talking & praying, talks to himself some, plays checkers, is sometimes ugly. Oct 25th says he was disturbed last night by the devil walking about in his bed. Nov 15-Wt 153 health good-Every morning he has a new conundrum for the Dr. Jan 15-93. Has got kicked on the left & has remained in bed six days on account of it. Feb. 20-Still plays checkers every day & jokes with the Dr. Mch. 10-Wt. 153 health good. Mch 12. In bed-has D&C. says he is constip. & dont want to get up. Mch 15-Still in bed-says he has a terrible fever-temp. taken 98.6-appetite fair-He says he is going to die-is given a laxative occasionally. Mch. 31 Has been in bed ever since the 12-has lost some in Wt. Was today moved to 73 so that he could have a bath & more attention.

May 31. 93. Appetite fairly good. Is always complaining of his bowels not moving Regularly, but his bowels move about every day. Has been confined to bed until about 3 weeks ago. Does not go out walking complaining of rheumatism. Has delusions. Habits clean.

June 4. 93. Wt 140 lbs. P. 64. July 1. Wt 136½ lbs. P. 64

July 9. Appetite rather poor of late. Always complaining about his constipation having so much pain & asks for medicine. Habits clean. Aug 1/93. Has been, for several days, complaining of pain in right side of chest & seemed failing; began spitting up blood & coughing yesterday. Hurts to take every breath. Moved to C. Aug 3/93. Wt 130 pounds. (Loosing considerably in weight) Appetite fairly good; bowels costive. Lungs show a marked impairment on right side; a loss of action. Aug 9/93. Since 1st inst. has slept, on the average, 6 or 7 hours each night. Continually complains of pains in chest, side & back. Lies in bed almost all the time. Aug 12/93. Comes out of room & into hall, occasionally, sits in chair. Aug 19/93. Sleep has continued about as last described. Still complains of pains, all over. Is up & down from his bed. (See attached record). Aug 23/93. Bowels moved freely today: passages thin; of a dark brown color. Patient complains of sharp pain in right side. Aug 25/93. Lies steadily in the bed; appears quite weak. Aug 26/93. Breathing today, is quite hard & rapid. Aug 31/93. Patient has been sleeping, of late, from 6 to 7 hours each night. Bowels are constipated, requiring frequent laxatives. Talks freely & seems interested in what is going on around him. Sep 1/93. Says is not much bothered with pains, of late." Sep 5/93. Rests & sleeps, at night, about as last mentioned. Says "he feels very weak." — Sep 8/93. Thinks he is improving some. Sep 10/93. Again complains of these pains, today. Sep 11/93. Did not sleep any, last night. Feels weak today. Sep 15/93. Complains, now, of either head or side troubling him, almost all the time. Sep 16/93. Continues to sleep about 6 or 7 hours, each night. Sep 22/93. Complains of not sleeping well, at times: quite often of pains in head & side; of feeling weak. Sep 25/93. Lies in bed nearly all the time. Appetite fairly Good. Still complains of pains. Sleep at times, much broken and disturbed. Sep 30/93. Says "he did not sleep any all last night." Bowels constipated. Coughs some. Complains continually of pains.

Mr. SULLIVAN (POST MORTEM) Report
Examined Jan. 4th '94.

The lung upon right side, as complained of showed a more almost complete collapse, and was adherent quite closely around the whole of its external area, collapsing into a very small mass upon being detached.

The most interesting part, however, was the examination of slight tumor projecting from right side of spinal column; a purulent fluid of rather bloody look, and without any of the characteristic pus exuded, and upon following this up, we found that it extended so as to nearly detach one rib, and that it extended, eating into one of the spinal vertebrae, so that it was almost nearly hollow.

And at one place, the finger could be placed through, pushing through both the rib and the vertebrae. The rib must have been almost entirely detached, and the vertebra as well, would seemingly have given rise to spinal cord symptoms, although none were noticed.

Dec 26. – Complains of not sleeping. Eats but very little also of having pains all over his body.
Pulse A.M. 94 P.M. 92.

" 27th – Gave dose of Salts. Pulse A.M. 100 P.M. 96.

" 28th – Pulse A.M. 106. – P.M. 108. Respiration very hard and rapid.
Taken suddenly worse. Complains of being cold. 4 P.M. Groaning
Cold Applied sandbags. Eyes set. Perspiring profusely.
Called Dr. Eby. Gave Hypodermic and Stimulant.
4.30 Seems to be recovering some.
5.30 Asked for the Priest.
6.00 After taking Hypodimic and Considerable Stimulant
seems quite strong. Visited by Rev. Reardon.
29th. 4.40 A.M. Died.

Autopsy revealed that a swelling at one side of spine, seen first about 1 month ago led upward to a tubercolous ulceration in one of spines which involved body of Vertebrae as well – One rib on L. side cut through like cheese or ulcerated was it. The matter was perfectly sweet smelling – & Spinal symptoms had not been noted – Nor had he ever directly complained of his spine – But the spinal nerves soon having ulceration & the finger alone pushed into the canal – No exam. of Cord made – Left lung was adherent to wall of chest throughout, according to diagnosis made – but – no one had suspected the Spinal lesion – The heart had no pericardial space being perfectly adherent to its sac. The walls were very thin – clots were found in all cavities – The Rt. lung, was so the bound to walls as to have been useless. It collapsed when detached – Rt. lung oedematous

, lack night. Sep 27/93. Complains of not sleeping well, at times; weak. Sep 28/93. Lies in bed nearly all the time. Appetite fairly much broken and disturbed. Sep 30/93. Says he did not sleep any . Complains continually of pains.

all

complains generally of pains.

(Carried to next page)

Oct 1/93. Appetite fairly good; bowels are badly constipated; he has to take laxatives quite frequently. Oct 6/93. Since last noted, Patient has been sleeping 5 to 6 hours, nightly; thought he at times, complains of not sleeping any. Oct 7/93. Today, complains of pains "all over". Oct 12/93. Has a severe pain in hip and shoulders. Oct 14/93. Again, complains of pains "all over". Oct 20/93. Lies in bed, all the time. Sleeps quite poorly still. Bowels constipated quite badly, at times. Complains, steadily, of these pains. Oct 27/93. Says he feels better today, than he has for some time. Oct 31/93. Complains, almost continually of pains. On some days, Coughs considerably. Appetite is good; has still to take laxatives regularly. Can scarcely help himself, at all now. Nov 1/93. Patient is failing in flesh. Appetite good. Bowels still costive. Says he is feeling better, of late". Nov 3/93. Says he had a very bad night, last night. — Nov 5/93. Coughs but little. Appetite fairly good. Is always asking for something. Wants someone to be with him, all the time. Breathing is very labored, at times. Nov 9/93. Again Complains of pains "all over". Coughs but very little. Nov 22/93. Has been sleeping a great deal during the day, of late. Nov 29/93. Appetite, as a rule good. Bowels, however, still badly constipated. Frequently complains of about pains. Talks considerably. Somewhat curious, wanting to know everything that is going on. (See attached Nurse's-records). — Nov 30/93. Appetite not very good. Bowels badly constipated. — Dec 6/93. Complains today of a pain in right knee. Dec 7/93. Still Complains of this pain in Knee. Liniment applied. Dec 11/93. Appears to be growing weaker, day by day. Dec 14/93. He, today, Complains of pains all over his body; of a very sharp one in right hip. Dec 15/93. Appetite is fairly good. Bowels, as a rule, somewhat Constipated. Dec 19/93. Says he can feel himself growing weaker, day by day. Dec 23/93. Is coughing some of late. Raising phlegm. — Dec 25/93. Complains of not sleeping. Also, of having pains "all over his body". Eats but very little. AM. Pulse 94. PM. Pulse 92. Dec 27/93. AM. Pulse 100. PM. Pulse 95. Dec 28/93. 7 Am. Pulse 106. 3 PM. Pulse 108. Respiration very hard & rapid. Taken suddenly worse. Complains of being cold. 4 PM. Growing cold; hot-bags applied. Eyes set. Perspiring profusely. Physician (Dr. Fry) called. Gave patient hypodermic & stimulants. 4.30 PM. Patient seems sinking some. 5.30 PM. Asked for the Priest. 6 PM. After taking hypodermic and considerable Stimulant, seems quite strong. Visited by Rev. Father Riordan. Dec 29/93. Failed, and died at 4.45 AM.

Died. (Remains placed in vault for burial in Spring)—

Autopsy revealed that a swelling, at one side of spine, (Seen first about 1 month ago), led upward to a tuberculous ulceration in one of spine which involved body of vertebra, as well. One rib on left side cut through like cheese, so ulcerated was it. The matter was perfectly sweet smelling and spinal symptoms had not been noted, nor had he ever directly Complained of his spine. Yet the spinous process was loose, having ulcerated off, and the fungi alone pushed into the canal. No examination of cord made. Left lung was adherent to wall of chest throughout, according to diagnosis made, but no one had suspected the spinal lesion. The heart had no pericardial space, being perfectly adherent to its sac. The valves were thin. Clots were found in all cavities. The right lung was so bound to wall as to have been useless. It collapsed, when detached. Right lung oedematous. (Original attached) —

Personal and Medical History of Emma Schaf

This patient was committed to St Peter about four yrs ago Has been about three months No disposition to injure others No destructive or filthy habits No peculiarities of temper - No medical treatment

May - 28 - 1891 Patient is quite dull in manner and at times irritable - Eats + sleeps well. Goes to sewing room and is now at Has been quite constipated. Is not inclined to talk. Palate seems fairly healthy.

Nov 15" 91 Patient says has somewhat of pain in her chest. Lies to day in bed. Is very easily irritated, full of queer + odd ideas, although able to answer questions quite rationally.

Nov 16" 91 Is noted to day as not so well as she used to be. Usually says nothing, and such queer things as to put on 3 dresses.

Jan 8" 92 Lies upon bed, When asked, says "have Davis's sickness, I guess." Is probably only nervous + angry, because she was made to take off a cloak

Feb 9 92 Patient quite restless + uneasy. Said this morning - "Every morning I want pills, anyway !" Is very peculiar in her talk, + irritable in manner.

Mch 7" 92 Patient continues upon A-1, still irritable, works in the Sewing Room at times, usually sits at one side of the hall in a silent + morose condition.

Sept 9" Patient has during the past month stayed quietly upon A-1, + in no way has shown any variation from behavior before described. Her health has been good + except for occasionally asking ~~for~~ pills, complains of spotting. She does not work as much as she did, + has been occasionally in a violent, talkative mood. Usually, however, says nothing

Oct 1892 Appetite very good Bowels constipated Behavior quiet unless provoked Very seldom speaks unless addressed

Oct 27 - 1892 Seems always pleasant, the same Irritable if disturbed Scolds about flying spots here at times

Nov 30 - 1892 Complaints of constipation occasionally Gone at times but generally quiet + Appetite fair -

Dec 1892 Planned to Annex Did not like the change and asked to be taken back

Jan 13 - 1892 Has been very quiet - Never talks unless addressed General health has been good -

Personal and Medical History of Emma Scharf.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

April 27 93. Generally quiet but the last few days has been irritable + asks to go home. Never works or takes any interest in any thing.
May 18-93. Transf to C. 2. Removed to 4th ward. Replaced prolapsed rectum.
" 29. Removed to B1. In bed from May 18th until she was removed to B1 (See Nurses record)
June 30. Appetite very poor at times. Sits in one place most all day long, ~~rather~~ talks quite sensibly at times. Troubled with constipation. July 2 93 Moved to C 2
July 3 93 Was put to bed. Moaning + crying all afternoon. Seems afraid of being burned alive.
" 9. The agitation is about gone. Visited by her son, would not see him. Grew weak + suffered very much pain, but would not have anyone help her, refuses to eat - did scarcely take any nourishment but milk + coffee - then + then ate a little bread or a dish of sauce. Moaned very loudly + crossed hands + legs. and died Aug 11 93 at 3 30 P.M. (See nurses record case)

John Peterson. #2

Thursday June 18th/91

Beloved Mate.

Will send you a few lines, and humbly ask you to come here and help me out of this place, makes no difference if I am kept here for ever, as I can not do anything good here.

If you will help me out of here I shall willingly do what is right towards you and the children

I have no news to relate Will herewith close with fond greetings to you and children.

Signed John Peterson.

Written in Scandinavian & translated by Mr Dahl.

Personal and Medical History of John Peterson. #2

This man was brought by Deputy Sheriffs Kinney & Davis with the history of having first manifested insanity about 3 or 3 months ago. Has been wandering about the streets exposing his person & has threatened suicide.

April 17-1891. Was quiet all night & slept well. Up in line; quiet. Tidy, clean.

Apr 18-1891. Slept well. Quiet. Apr 19-1891. Slept all night. Quiet.

May 9-1891. After examination yesterday (see opp. page), patient was quite persistent in demanding to know when he could go and if he could not go right away. This morning renewed the question if he could not go to day, saying "If I don't get out to day, I must as well stay here".

May 24-1891. Visited to day by wife and child.

May 26-1891. Physical health seems fair to good. Is in good flesh & has quite decided color. Since coming patient has been uniformly quiet, at night, sleeping well apparently, and during day. Has been clean & tidy. Converses very little with fellows and with Dr only when addressed or to request to know when he can go. Manners usually pleasant, smiling. Keeps eyes fixed on floor when talking. Thinks himself well both physically & mentally and is anxious to go. Lies around usually during day, doing no work. Does not seem much disturbed by his surroundings. Has been moved up from 33 to 13.

May 29-1891. Conduct more markedly foolish this morning. Patient walked out of line, grabs a book, throws himself full length on a bench & puts feet up on heater & opens book. Comes back to line & pounds chest in a foolish way.

June 18-1891. See attached copy of letter, translation by an att. Short & evidently hinting at some erroneous idea.

Oct 15/91. Health fair. Conduct restless & foolish. Walks about in a restless manner. Lies around on floor or behind the beds in dormitory; amusement only when hunted up & called. Is idle; talks considerable to fellow patients but little to Dr. Clean; but careless in dress & personal appearance.

Jan 1/92. Was visited today by his wife & children. Seemed pleased to see them.

Feb 1/92. Weight 160 pounds. Feb 27/92. Is usually quiet at night, but last night was quite noisy for three hours. Mar 14/92 Weight 169 pounds. Pulse 90.

Mar 23/92. Was restless out of bed last night. Mar 31/92. Was noisy an hour last night.

Apl 4/92. Weight 172 pounds. Pulse 76. Apl 23/92. Scratched his own face during the night and said it was done by the devil. — May 3/92. Weight 165 pds. Pulse 76.

June 3/92. Wt 158½ pds. Pulse 82. July 6/92. Wt 161 pds. Pulse 60. Aug 3/92 Wt 165 pds. Pulse 80. Sep 5/92. Wt 155 pds. Pulse 84. Oct 4/92. Wt 153½ pds. Pulse 72.

Personal and Medical History of Peter Peterson

Nov 1/95. Wt 179 lbs. Pulse 90. Nov. Dec & to Jany 31/96. No change noticeable, this he seems some brighter. He is still restless: works outside, most of the time: when on ward, walks the floor & talks to himself, a good deal of the time: holds delusions: is restless, at night: Health good.

Summary Nurses Notes by Dr Phelps Feb 1/96 to Aug 1/97 Patient usually well-behaved: Works outside: Rather restless on ward: Talks a good deal. Imagines he is persecuted by the Devil: No bodily illness noted: Wt. 190 to 197 lbs.

Aug 1/97 Wt. 185 lbs Oct 31/97 Health good: Will talk & answer questions in a fairly rational manner: Rather untidy in appearance: Works about grounds: Eats at times to overeat & become sick. June 11 98 Sick in bed today Says complaints are caused by the Devil. 16 Remains in bed. Complains a good deal: Trans. to Infirmary. Vomits & vomits after every meal lately. Temp. 100 4 in afternoon. Complains of pain in abdomen. 23 Temp. up slightly every day, to about 100. June 30 98 Again up on ward: Temp. still up to 100 every day. Has had a swelling on side of face. Teeth pulled. Jan 31 99 About same as before: Still eats excessively. May 24 to June 30 99 (Cont. by Dr Warnock) Wt. 200 lbs. Mar 8 Struck in face (or nose) by patient. Bled freely. appetite good: Sleeps well: general condition good. Behavior good: no change. (Cont. by Dr. Chapple) Aug 1 99 to Jan 31 900 Wt. 180 lbs. Nov 1 Wt. 194 lbs Health fairly good. appetite ravenous. well behaved, but untidy: works in green house: demented & very deluded. Feby 1/900. Wt 198 lbs. Pulse. Apl 30. Condition about same, all the time. July 2-4. Severe diarrhoea. Dalyes. Vaccinated: result good. July 31. Except as noted above, has been in very good physical health. Has ravenous appetite, but says "he cannot eat". Has delusions that the Devil causes him to vomit his food". Is quite untidy in habits: behavior very good but inclined to be noisy & talkative, at times. Is a good workman about lawn & greenhouses. Aug 1/900. Wt 187 lbs Pulse. Sept. Transferred to D's — Jany 31/1901. No important Change: quite fleshy: a ravenous eater: works regularly about green-houses and lawn: very delusional: says "the Devil is in him": Is slouchy in habits. — Feby 2 Wt 198½ lbs: May Wt 198 lbs: Aug. Wt 199 lbs: Nov. Wt 203 lbs: Jany 31/02. Works regularly at green-house and on lawn: No Change mentally: very delusive: says "the Devil is after him and he does not get anything to eat" — but he eats so ravenously that he frequently vomits after meals. July 16-30/02: At Lake Shady (at Hospital Camp). — (Has been working, regularly, at greenhouses) — returned, as he was not well: (Probably due to overeating: is gluttonous): Aug 1 to 15. Has been very depressed: throws himself, on face, in dirt: Talks of suicide &c. Aug 16. Has improved, considerably: (it was necessary, for a time, to restrain him in bed): Now appears in about his normal condition: up, on ward. Augs. to August. — Mental Condition, apparently, as before. Jany 1903. To Al. Jany 31. Continues to work in Greenhouses: very quiet: Seems to be dormant at brighter, mentally, than before the "Melancholy Spell" mentioned. Still on parole. He has spoken several times, of a desire to go home.

Helgren P.

tten by Holtgren on fly leaf of book.

As it appears to me at present. I have been greatly defrauded. d it is now a question if him and I want both some time have our exsistnce shortened by a too early death. As I am not any longer fond of living and am ready to die any moment, and I pity the one that falls in the clutches of a false woman, as nothing can spoil a man so completely as a false woman's company. And it will undoubtedly be but a few dayswhen him and I will both fall victims to the bullet, so that he will in a short time observe what he does not expect. He did everything in his power to take her away from me, and she shall lose her within a short time, as I can impossibly live.

Rochester July 21st '91

Brother Gust:-

I must now and probably for the last time, drop you a few lines, so as to let you know how I am getting along fairly well. But I do not think that there is any possible show of me ever getting away from here. I do not care any more whether I am dead or alive, and do not care for hell, heaven or anything, as I am now completely tired of every thing, and anything else could not be expected after eceiving such a treatment as I do here. And as you will not believe me but believe this pack of liars, you can now have it as you want to have it. I shall certainly not beg you to help me any more, as I can stay here the few days that I yet have to live, which shall certainly be few to my delight. And I will then not be in the way for either one or the other. If you had taken me away from here when you were here, everything would have been well, and this you could have done, if you had not let them here persuade you.

Rochester Apr. 27th '91.

Brother Gust:-

I was to see Dr Sahlstrom on Monday but he was not in his office. I will go to see him next week. If you can help me in this way please do so. Yours truly

P. Halgreen

Rochester March 5th 1891.

Brother Gust:- Translated by Mr Sahlstrom and probably for al-
so will all the same drop you a few lines, so as to let you know

Rochester June 18th 1891.

Mr. M. Skoglund, Dear Friend:- Your letter of the 10th instant at hand. It was something new for me to hear from you, have a long time been expecting a letter. I learn from your letter that my brother has not received any of the letters which I have written him, and I have sent him three. The reason why he has not received them I do not know, but I shall surely find this out some day. But it is like this, those that get inside of this Institution do not know of anything that happens on the outside of it. And those outside of the Institution do not know what happens or takes place inside of this so called Hospital for Insane., but it ought to be called an eternal Prison. I am well so as to speak bodily, but am depressed in mind, and presume I shall have to stay here for always, as when one comes in this Institution all prospects of his ever getting out of same have vanished. Though at times I belive that my days are soon numbered, as my strength is fast failing. If you only knew how I suffer both physically and mentally, you could not help but sympathise with me. And if you knew what happens and takes place here, you would not be surprised to know my feelings. I have been expecting my brother to come here, so that I might see him once again, but presume I shall have to wait in vain. He must not ecpect that I shall ever come out of here. When I look upon past times and then upon the present situation it makes me feel as though my heart would burst. Though I can not weep any more, I have wept quite a considerable in my days, but the remainder of my days I shall not weep. If I had staid in my native land I would have been a man and lived in peace, and had joy and happiness from living. And have been of some good to my fellow men. But this is generally the way with those that come to this country which is composed mostly of deceivers and those who try to be honest are very apt to be deceived. But we have an impartial God which shall discontinue the exsistence of these deceivers and banters. And I do know that the time being shall be discontinued and a new one take its place, at which time I shall be released and never again have to be locked up. Will you be so kind as to greet my brother? Ask him to come here at once. He must not expect letter or anything from me, as none of the letters which I have written him have reached him. I am in need of more clothes, as I do not get anybhere. Some of the patients get everything they call for, and some of us do not get any clothes and hardly ehough to eat. Will not write any more this time.

Have enough which I might write, but shall wait till next tme.

Yourself with friends are greeted

From P. Halgreen.

Rochester Apr. 27th '91.

Always remembered Brother:- As I see I shall not have the chance of meeting you, I shall drop you a few lines, so as to let you know I am still alive and in good health. But am anxious, to see you again. Hope you will come and see me as soon as time permits it. And probably time will allow us to meet again and l ive together for always. God bless you all, and even me that has to live a life like this. So that we may meet where we shall never part, and associate forever. Although I expect you to come at once so that I may see you. Have nothing of importance to write this time. Yourself and family are greeted and even all of the rest of you. Be so kind as to greet Farnhem. I shall undoubtedly write him some time.

Your Brother,

P. Halgreen.

Translated by Mr Sahs -

Rochester March 5th 1891.

Brother Gust:- As I am now parted from younand probably for al-
, I will all the same drop you a few lines, so as to let you know
I am fairly well, though at times bothered with headache. So I am
getting along as well as I would like to. It appears dreadful to me
I shall have to stay here for any length of time, who have been brought
p in freedom and lived well all of my days. But now I understand my
life is spoiled for the future. I shall never be able to reach the ideal
of life I have andicipated. Still I am glad that I am alive and in posess
ion of my full senseee? Something has been wrong with my head otherwise
I should not have been in this place, and shall have to feel contented
with my situation as it is. Am longing for home to see my friends and
acquaintances, but whether this wish of mine shall ever be realized is
uncertain. Therefore I shall ask you my brother, to be kind and come here
and see me. Do not hesitate about coming, but come at once. You undoubt-
edly know that here I have to live among strangers and most of them are
very crazy. Have no reason to find fault with the attendants. They are
very kind to me, and I shall also be kind in return.. And it always was
my aim to be k nd and polite to my fellow men, although we at times have
to suffer for same. As honest people are not often found. Now I shall not
write any more this time. As I wish to see you before I write any
more. So that I may know how younare prospering. Am longing to hear from
you and other acquaintances.

Yourself with family are greeted. Also Mr.
Skogland and others of my acquaintances.

P.Halgreen.

Rochest4r Oct. 5th '91.

Dear Br ther Gust:- Will again send you a few lines. Although I have
not heard anything from you. Have written you three letters and received
none in reply, and you do not even come and see me, for what reason I do
not know. Probably they do not send the letters I am writing. Nevertheless
I shall again write you so as to let you know that you must come and see
me at once, if you wish to see me at all. As I understand this a place
where a good many come but few get away. But if I have to be one of them
that have to pass my days here I honestly believe my days will be few,
as this is a place which is not fit for me, who am used to freedom and
have been of help to my fellow men, but I hope all the same that the time
shall come when I shall be free. So that I may again go out and do what
is right, which is my desire, and always has been.

I must ask you to be kind and come here and see me at once. If you
can not come you must write me a few lines. You know I wish to hear how
you are prospering. Do not hesitate aout coming, but come at once, as I
have something to relate to you. If any letters have come from Sweden, yu
will please send them to me. Must say that I am physically well
nut longing to get home.But I am not the only one here, as here are a good
many who are longing for home, but can not go and the reason for same I do
not know. A good manybof them are entirely well. Am inclined to think
that I am numbered amon_ the who have to be here for always.
and I do not know the reason why I have to be here, but presume it is lije
this that one who tries to be honest and upright shall have to suffer for
others. And this I often have done, and now by being deprived of my free-
dom. If you do not write me or come and see me you must not expect ay
letters from me, but we shall always remain parted. Nevertheless I trust
this is not your wish, consequently I expect you will soon come to see me.

With best regards from your brother

P.Holgreen.

In case you can not come here, please send me a dollar. For which
I can buy tobacco.

Dear Brother Gus:- your letter of the 2 nd at hand.

It is with pleasure that I learn from the same, that I will soon be discharged from this place. And trust that with God's help I shallnever have to come here again, but be protected by the grace of God so that my sane ness will never fail me agind. and hinder me from enjoying life's freedomm

Have not conversed with the Doctor since you were here, as you know I am not posted in the nglish language, so that if I should try to say anything surely would be unheeded.

Hope that what you do undertake for me will be for the best. Have nothing more to write at this time. You are all greted from me and that you will write me agin in case I shall soon be permitted to leave.

Your brother,

P.Halgreen

Translated by Mr.Satrie.)

RochesterSept 24th '91.

Dear brother Gus:- Your letter of the 20th have I received. I see that you have not got those two last letters that I wrote you. As I understand they do not mail my letters is it not of use writing any? But I will anyhow write a few words. I am well both body and soul, so I dont understand what they are keeping me here for, all I have got to do is to be satisfied. I know that this life is but a shot time, and soon shall Hi come back, whomhas built the world, and do a short end of its existens

And about that time shall I be let out, and not need to be shut in any more, but it takes a good deal of patience to stand it. But so long I dont have to wait vainly so goes it through this world. This time is short accorning to the Eternity. And Him who loves God has nothing else toexpect than cheek himself. It is a costly hope to expect a better world after this, and therefore am I glad as the Apostle Paul says. If shall have spent all my life in the Fool House, among insane peolple so will even trough. I am now to the end ofthis letter. Acceot my very best respects,

Your Brother,

P.Halgreen.

NOVEMBER 3RD 1891 EXAMINATION OF PETER HELGREEN by Dr Phelps

Remembers last conversation of September.
Said had letter last week in which brother said he would come if got order from court.
That we had no business to keep him here.
That he was a little sick in head when he came down
Thinka he is all right now.
Cant remember the first time.
Patient seems at first to be evading questions concerning jail &c, but finally says
Remembers only in May of this year distinctly.
Remembers as in a dream a big house where some played cards &c.
Denyes remebering ever trying to drown himself
Denies remembering shooting girl
Denies remembering seeing girl since about Christmas
During winter at home doing nothing.
Cant say when the loss of memory began.
Concerning drowning he folks tell he left factory &c. and only remembers finding himself in Minneapolis on the bridge.
CHARLEY ANDERSON NIGHT WATCH, HERE STEPS IN TO INTERPRET & PATIENT TALKS MUCH MORE CLEARLY RAPIDLY AND LOSES THE DULL, STUPID HALF COMPREHENDING MANNER.
Says that he had trouble with a girl in the fall of '90
But another fellow cut himmout.
That he dont remember when he bought the revolver.
That the boarders told him and that he put it in a trunk.
That he only used it once as he remembers and that was in the woods.
That he told some ane was going to kill himself on account of the girl, but did not really mean to and did not try.
That he kept tevolver in trunk.
That when he was 12 years old he had a sickness.
That he went to bed and they had to hold him in bed at times.
That in 1889 was sick, not exactly in the same way.
That the first he knew he found himself on the bridge.
Patient was asked to write out on paper an account of all this w and was sent upon the ward.
CHARLEY ANDERSON NIGHT WATCH COMING BACK FROM TAKING PATIENT ON THE WAR SAYS PATIENT TOLD HIM ON THE WAY UP, COULD TE L ALL IF HE WANTED TO BUT DID NOT WANT TO TELL THE DOCTOR. WOULD TELL SOME ONE ELSE.
Sept. 3rd 7 P.M.
Mr. J.U Anderson attendant seen. He says" t
that patient had been most intimate with him.
That patient had already told him of the conversation of the afternoon.
That patient had told him last fall, that at times he did not know what he was about.
That he walked about and was confused.
That he looked at the side-walk and walked along and got confused, not realizing what he was about.
That his mind became confused and could not remember.

STATEMENTS BY GUS ANDERSON BROTHER TO PEETER HELGREEN JULY 4TH'91

Mailed to Dr Baker

tient had no Sweet heart in 1899 when he was reported to have tried to drown himself.
Last fall patient went from above parties to another man's/ Olson's
And at 10 o'clock at night. Said it is time to go down to river
Olson escorted patient to boarding house.
This occurred on Sunday
On Monday said he seemed well and said it was toobad he was so crazy yesterday, and that he knew nothing where he had been, what doing and saying at all.
Patient went to work afterwords.
Worked for Farnum in the Stone qourry
Working partner knows patient
Patient told partner that at 5 o'clock the Devil come and take me.
This was Saturday preceding the Sunday described above.
Brother went to work in woods on section one and did not know events of the winter.
Heard of the shooting 14 days after its occurrence.
Patient tried to shoot himself at the time he shot the girl.
First spell in spring of '89
Came to this country in fall of '88
Brother claims he had two such spells in Sweden
Brother claims he read too much in the Bible in the Old Country.
Brother can not tell what patient did in '89 that led to the idea of purpose to drown himself.
Brother ~~cxxxexxox~~ was told so by some neighbors.
Claims patient told a neighbor last fall that he was not going to twork any more he was going to Hell.
Later pointing to the grave yeard "That is Hell, that is where I am going to live."
Brother repeats story concerning the wandering away while in St.Paul and winding upmin Minneapolis.
Patient then wrote a letter to brother saying that he was tired of life and did not want to live any more.
Brother claims that our patient told his land lord that he was ging to se his brother that he was gong to die.

to do so. Sept 23/91. See attached record of examination made by Dr. Phelps on this date.
Translations of letters written to his brother during past 2 or 3 months are on file in letter-file.
Nov. 3/91. See attached record of examination of patient.

See attached also translations of letters of Mar 5th June 8th Apl 27th July 21st Sept. 24th and Nov 9th. Also the translation of a note written by the patient in the flyleaf of a book at home befae the shooting of the girl and sent by his brother to us. See also in letter-file brother's letter of the 6th inst.
Nov. 17/92. See letter file for letters of 11th inst & present date. On 10th ult. patient weighed 168 pounds.

EXAMINATION OF PETER HELGREN, SEPT. 25TH 1891.

Says had headache first in '89. Was in St. Paul and in a shoe Factory and "so lost my mind". Sometimes much headaches, sometimes less Since June 1889 has been most. That he then lost his mind for three or four days and did not know anything. Asked if he had lost his mind at any time since here, answered "No." The first time he came here, said that he knew, little, 'seemed like a dream' andthat he knows everything now.

Concerning the time spoken of in '89 saysd t that he only knows that he ate breakfast in the morning, took his dinner pail and started for the Factory. He knows no more until he came to Minneapolis. Asked how long, thinks it was Tuesday morning and Friday morning that he found himself in Minneapolis. Denies eve jumping in the river and denies drinking. Asked if he ever shot him self says that " he can say." "were you ever shot?" answer, "No." "Did you ever shoot any one else?" Answer, "No, I never have." "Did you ever write letters to brother saying that did not want to live?" Answer, "Well, I know was in boarding place and started to write but dont know what room." "Did you ever shoot at the girl." No answer. Admits that many people have asked him about- "Were yu ever in jail in St. Paul" Stupidly answers "Dont know." Was in a big building and many people were there." "What did they put you in Prison for?" Answer "Dont know." "Did you ever think to kill you self?" Answer. "There was one time when I was in trouble with this girl that I did think to kill myself."

During the whole of this conversation it was very difficult to get any good answers from the patient. Hesitated and seemed to be very dull mentally. He persistently disclaimed all knowledge of the shooting or rememberance of the same. He seemed at first at various times, to deny any knowledge of having heard about it. But afterwards admitted that many people had spoken to him about it. Seemed in a dull sort of way not tomknow that he had been in Jail, although he described building &c. In fact in all of the conversation seemed mentally in a very dull state and one in which it was quite difficult to even comprehend the questions asked him.

Dr Phelps—

See attached also translations of letters of ... and Norg^th. Also the translation of a note written by the patient on the flyleaf of a book at home before the shooting of the girl and sent by his brother to us. See also in letter-file brother's letter of the 8^th inst.

Nov. 17/92 See letter file for letters of 11^th inst + present date. On 10^th ult. patient weighed 168 pounds.

Conversation held with Peter Helgren, May 8th 1891.

Can not remember just when he camehere. About three weeks ago. Worked for Mr. Farnham last. can not say when he quit working for him, can not remember whether it was one week or two or three days. ~~XXXXXXXXXXXXXXXXX~~" Ans. Can not say that. Worked for him last in December. Q What did you do after December? Ans. "Can not say anything about that. QQ- How is your memory? Ans "Sometimes can remember well. Sometimes my mind is gone and can not remember anything. (Answe to some question) " Two years ago was in St. Paul in a shoe factory. Q-- Did you have one ~~of~~ those spells then? And how many spells have you had? Ans. Can not say exactly. I can remember well working in St. Paul and worked one whole week & Monday and Tuesday. & then so-- forgot all things. Tuesdy morning started from boarding house to Factory I remember that. My mind was gone, can not remember anything from Tuesday to Friday. (And found himself) in Minneapolis.) Does not know how he felt. "During his spell. Felt sorry afterward. Q- Did you try to drown yourself about two years ago. Ans. (Half smiling) I can not say that. Q- Have you had any of these spells since December? Since quiting work for Mr. Farnum? Ans. Yes Q-When? (hesitation) Ans. Can notremember anything. (Doctor says to patient) I heard you were in jail a while in Minneapolis. (Patient.) Hesitates again) sighes) I can not remember -no. Q Where did you board? Ans. Before I came here I was in a big house- a big house and many people were in there, and I can not say what house that was. " Q. Did any one ever shoot you Did you ever get shot?" Ans. I heard one revolver in Minneapolis." The last time in December " (Will not talk much on religion.) Q- Did you ever hurt any body?" Ans. "No sir." Q. Were you ever in love?" Ans. "Yes I had a girl in the old country." She got sick and died." A school teacher." Q- Have you ever loved any one since coming to the U.S.?" Ans. "Yes I have had one girl since I came to this Country." Q- Is she in good? Is she well?" Ans. "I guess not." "The last time I saw her was New Years day." Q- How was she then." (hesitates) (Doctor repeats Q.) Ans. "Yes -yes." I cannnot understand." I have got this girl since one year ago last Christmas. (Patient says) She had fooled him, fooled all his money away and had fooled him all the time.) (Said with evident emotion.) Q. What did you do then?" Ans. "Nothing."

...onal and Medical History of Peter Halgren.

...man was brought by John Bdwyft with the following history.
...June 1889. he attempted Suicide by drowning and has not been well
...ince, and has been more or less "off" since that time. Insanity is now
...anifested by Hallucinations, Religious ideas, Suicidal mania etc. Also has
...shown a disposition to injure others through premeditation. Shot himself
...6 weeks ago, but did not do much damage. For last 5 weeks has been in
...County Jail for attempted murder of Swedish Farmer. An acquaintance
...states that he has known him for 8 yrs and that he never considered him
...right in his mind.

Apr. 17-1891. Was quiet all night & slept well.

Apr 18-1891. Slept well. Apr 19-1891. Slept only about 2 hrs. Was quiet how, (ever).

Apr 20-1891. Slept well.

May 8-1891. Was examined on this date. See app. page. Facial muscles were noted as twitching, especially & almost wholly on the right side. Upper lip twitches toward right side.
A conversation of considerable length was carried on, in endeavor to bring out his knowledge of the shooting affair. Patients answers were deliberate & seemed cautious. See copy of what was recorded at the time of conversation, attached.

May 26-1891. Physical condition seems fair. He has not been sick nor complained of any ill-feeling. He has also been quiet, night & day. He slept quietly and well; has been quiet & well behaved during the day. Clean & tidy. Does not work any and is rather quiet mentally. Does not talk much. When questioned answers quite promptly & pleasantly.

July 4/91. Was visited today by his brother. The brother, when questioned concerning our patients' history, gave an account, a synopsis of which is attached — The brother repeats the story concerning the attack while in St. Paul, in which the patient wandered away & seemed to have no memory of his doings. From the brother's story it appears that our Patient has had Spells of depression, in which he has threatened to take his own life & has even attempted to do so. Sept 25/91. See attached record of examination made by Dr. Phelps on this date. Translations of letters written to his brother during past 2 or 3 months are on file in letter-file.

Nov. 3/91. See attached record of examination of patient.

Nov 9/91. See attached letter written by patient to Dr. Phelps after above examination. See attached also translation of letters of Mar 5th June 8th Apl 27th July 21st Sept. 24th and Nov 9th. Also the translation of a note written by the patient on the flyleaf of a book at home before the shooting of the girl and sent by his brother to us. See also in letter-file brother's letter of the 8th inst.

Nov. 17/92. See letter file for letters of 11th inst & present date. On 10th ult. patient weighed 168 pounds.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Jan 26/92. See attached letter to Mr. Farnham, his former Employer.
Feb 1/92. Weight 168 pounds. Feb 20/92. Has pharyngitis, the first physical illness he has had or complained of since coming here.
Mar 4/92. Weight 169½ pounds. Pulse 80. Apl 4/92. Weight 169½ pounds.
May 3/92. Weight 170 pounds. Pulse 70. Has written quite a number of letters to the Superintendent lately asking for one thing & another (see letter file). May 13/92. Went home to day, alone.

Rochester Jan-26 1892

Mr: Farnham

Dear sir:
I have thought to write to you many ocasines, but I have been still ward and had no feeling to write. I hope you with family are all well and have a great time and your business the same as be for. you was very kind with the time I working for you, so I never forgot the time I lived in your hous. I will now tell you something about this institution, the people outside have no idea about insane asylum, here looking every thing

very nice for a man who
came here for to see his
friends but I will tell
you that it is no nice
place to stay in, in one
asylum, for I have been
in here about nine months
and have seen how badly
they take care of the in-
sane people, especially
they, who is sick and have
to stay in a bed, that
it seems to me, that it
is so many attendants here
so they could take good
care of the sick people and
give them what the need,
but they is to proud to
attend to a sick person
so I never have seen one
attendant have give a
sick person a glass of

water, so I dont think
they take very good
care of a person in here,
if the people out side
had only knowledge ab-
ut the insane asylem nob-
dy would send his rela-
tives in here; I are well
and healthy as ever now,
so I hope the Doctors
will send me home soon
and I am very glaid to
go out from this place.
Hope to here from you
soon, I remain with best
Respects to your family

Truly yours

Peter Helgren

Personal and Medical History of Amanda Nelson

Patient brought here by C. A Swenson. Symptoms were first manifested two yrs ago Was melancholy and threatened self distruction - Talks nonsense Wants to paint the house with cream and other items of same nature. She is afraid of having her property taken away. She has struck her mother when in excited passion. No disposition to filthy or distructive habits. No restraint. Has been under care of Dr. Backman. Results unknown.

May 28-1891. Patient is in good health. Her breasts needed attention at first as she had not weaned her baby. Of late she has been in the Laundry part of the time. Had some fever 2 days ago went to bed for the day. Doubtless had simply caught cold. Eats + sleeps well. Seems contented. Is somewhat silly in manner. Her talk is incoherent.

July 30-1891 Quiet most of the time. Eats and sleeps well. Walks on the ward also in sewing room. Violent at times. Habits neat. Inclined to be mischievous. Cut her hair off.

Aug 31-1891 No change.

Sept 30 1891 No change

Oct 26-1891 Works in laundry every day and also helps in the dining room.

Nov 29-1891 No change

Dec 23-1891 Works in laundry every day. Habits dainty

Jan 29-1892 Has complained of not feeling well of late and has not worked for a few weeks.

Feb 20-1892 Has been moved to Annex. Sits very quietly on the ward looking down in a very pensive manner. Talks very little. Visited by husband and mother few days ago. She talked with them part of the time. Seemed when her mind would wander and she would attempt to mix things up in her conversation. Neat in appearance and general health seems good. Does no work.

Nov. 16th 1891 - Patient remains upon A-2, is quite perverse, will not talk + gets up a rather sullen manner.

Dec, 31st 91 In bed, is somewhat feverish, has the prevailing Influenza.

Jan 24th '92 In bed again. Makes no complaint, says nothing, has been in bed now quite a good many times, in about the same way.

March 4th '92 Still remains upon A-2, works in the laundry.

Personal and Medical History of Amanda Nelson.

& is usually quite well. Weight is 103 lbs physical condition. very good.
May 9-1892 Maried to Annie some time ago. Since she has been there has done no work. Has been troubled with ingrowing toenail on great toe of left foot. At present it is almost well. Sits most of the time looking blankly down at the floor. When roused up will generally answer questions. Manifest no interest in anything.
June 7-1892 Was visited by her husband today.
Sept 28-1892 Sits stupidly on the ward with head hanging down. Does no work. Never speaks unless addressed then will talk very little. Will answer questions. Goes out riding and walking.
Nov 22-1892 Mental health good. Mental condition unchanged.
Feb 16'93 Went riding today. very demented, sits with head hanging down & face down up, all out of shape. Does no work, never manifests any interest in anything, will answer questions at times.
April 24 93. Very demented. Sits with Eyes closed and face twisted up. Never speaks unless roused up. then will sometimes say a few words. Never manifests any interest in anything.
April 28 93. Was visited by her brother.
May 20 - No change. July 22 93. Visited by her husband. July 26 93. Appetite good Very stupid. Sits with head down all the time. Habits dirty. Rides & walks. Gen. health good.
Oct 19. 93 Appetite fair. Is quite dirty in habits. Very much demented. Sits with her head down all the times. Gen. health good. Nov 4 93 Home. Feb 15. 94 Have to commence to feed her every meal, otherwise she will not eat. Sits in one place all day with her head turned one side. Is very obstinate. Habits dirty. Goes riding & walking. Gen. health good. April 18 94 Appetite fair. Habits dirty & rather quiet. Stupid most of the time. Is quite violent occasionally. Goes riding. Gen. health good. July 15 94 Appetite fair. Dirty & untidy in habits. Is quiet. Violent occasionally. Very obstinate. Sits with her head on one side most of the time. Goes riding & walking. Gen. health good.
Oct 17. 94 Appetite good. Dirty & untidy in habits. Is quiet most of the time. Is very obstinate. Always objects to bathing. Has to be dressed & undressed. Occasionally violent. Sits with her head on one side all the time. Goes riding & walking. Gen. health good. Dec. 8. 95 Appetite good & everything else best report.
Transf. to C. H. January 31. 95 Appetite poor. Habits dirty, violent at times occasionally throws herself on the floor. Pounds her nose until it bleeds, scratches knuckles. Bowels constipated. Feb'y 26. 95 No change.
March 28. 95. Very noisy at times. Appetite good. Habits dirty. Has to be dressed & undressed. Violent at times. Bowels constipated.
Apr 23 95. Appetite poor. Sleeps well. Habits dirty. Bowels constipated. May 28. 95. No change.
June 30 - Appetite quite good. Sleeps well. Habits dirty. Bowels ~~regular~~ constipated. July 30 95 No change.
Sept Oct & Nov Appetite good. Very noisy. Habits dirty. Bowels regular. Goes walking.
Dec 30. Appetite good; sleeps well; habits very dirty; violent at times. Sores on arms healed up. Bowels constipated. Feb 96 A large blister on left arm where first sore was. Otherwise same.

Personal and Medical History of Amanda Nelson.

March 4. Appetite good most of time. Habits dirty; rather stupid most of time.
" 6 Trans. to C. H. Fought nurses several times; very noisy. Mar 19 Trans to C. H.
May 1. Has sores on limbs which require dressing every day. May 21 Very dirty in habits. Stupid most of time. Has to be dressed & undressed. Good appetite. Menstruates regularly. Bowels regular. Food served on tray.
Summary Nurse's Notes by Dr. C. E. Phelps:- Aug. 96 Very demented; never manifests any interest in anything; very obstinate & hard to manage; sits looking down at floor most of time; very dirty; Nov '96 extremely noisy during spell; fights & throws dishes; Feb. 97 Very demented; never answers questions; talks to herself & at times fights violently; Quit health good; Apr '97 no change. July '97 Very dirty; very stupid usually; At times violent & strikes other patients; quit health fair; (Contd by Dr. P. M. Phelps) Oct 5 97 Visited by husband; Spoke a few words, but afterward would say nothing to him; Is very depressed; Has been at times somewhat emaciated & apparently in very poor health; Does not, however, seem to be failing; July 18 98 Visited by husband today; Has been failing considerably of late. Temp. today 103. Daily 2+. On Infirmary; coughs & expectorates a good deal; In bed most of time; Temp. averages 99 2/5 to 102; Is failing.
Aug. 5 98 Died at 11.50 A.M. Nurse's notes show nothing but a quiet, gradual failure.

ANNOUNCEMENT was received to day, of the death, at Rochester, this morning, of Mr. Emil Smith, a young man well known in Winona, where he was born and lived during a greater portion of his life time. He was the eldest and only son of the late Jacob Smith, one of the pioneers of Winona, and his sisters, Miss Carrie V. and Veroncia, are among the best known young ladies of the city. Mr. Smith was for several years the delivery clerk in the postoffice, where he became widely known and universally respected for his courtesy and intelligent attention to his duties. At the close of his service there he took a trip to the Southwest, and was for about two years in charge of the postoffice at El Paso, Texas, as assistant postmaster. He then entered the service of the American Express company, and was placed in charge of important business on the railway line running Mexico. This position he held for a considerable time, until seized with a severe attack of "mountain fever, which, unfortunately, not only prostrated him physically, but seriously affected his brain. He was assisted home to Winona by his friends here, but despite all that the physician's art and the tender ministrations of his mother and sisters could do for him, he never recovered from the malady which seized upon him, and death has at last come to release him from his sufferings. No nobler, truer, young man, or one with more fidelity or purpose and devotion to duty, ever went forth from Winona than Emil Smith, and his premature death will be deeply lamented by those who have learned to know his good qualities of head and heart. Peace to his remains! The funeral, which will be private, will take place from the family residence on Monday. He was 32 years of age.

Winona Republican 10/29/92

EXAMINATION ON ADMISSION.

	PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.
Height,	6 Ft.	Mental activity,	Slow. Probably lessened.
Weight,	132 lbs (150 1 yr ago).		
Nutrition of body,		Memory,	Very poor thinks he has been here 6 wks 8 to 10 mos.
Wounds or abnormalities,	Scar on penis. Acknowledges having had a sore.		Makes long effort to recall.
Tongue,	White furred, moist & tremulous.	Perceptivity,	Poor. Does not know no of attds or hall or how dressed.
Pupils,	Equal. Some dilated. Respond to light & accommodation.		
Sight,	Seems good. Equal.	Reasoning power,	Probably poor.
Hearing,	Impaired. Right side much so.		
Co-ordination,	Good.	Emotional state,	Says is no happy as ought to be. Has not been doing right way.
Reflexes,	Requires a strong stimulus to get, but Patellar reaction is excessive.		
Heart,	PSO. Sounds clear.	Delusions,	Depression of ideas. Has not been doing as he had ought to have done.
Lungs,	Resp slow. Exam good.		
Examination urine,		Hallucinations,	Ringing in head. No voices.
	Seems annoyed by close questioning.		Answers at times incoherently to questions belonging some time to preceding question as if patient had not yet finished what he wanted to say in preceding point.
Rem. ~~Gynecological exam.~~	Face has a vacant look. Facial muscles seem quite steady. Tongue protruded to left at times.	~~Hinion~~	
	Talks to self. Has scar on penis; acknowledges having had a sore on penis.	Conversation, character of,	
	After reading a paragraph in newspaper could not tell what it was about.		In reading, skips some words (prs & by) but manages to get it quite well. Can pronounce after dictation quite well.

Personal and Medical History of Emil Smith.

This man was brought by Miss Smith & Sheriff Brawley with the following very incomplete history. Insanity brought on by shocks in Rail road accidents and manifested by depression exalted ideas, and tendency to injure others from sudden passion.

On admission: Sister learned the following: Patient was employed on the Mexican Central Ry; was in 3 railway accidents; no great injury received; it is thought the shock might have affected him. Had catarrh & went South. There was 4 yrs in post office. Then 7 years in postal car; was lonely. On Aug 20-91, friends received telegram from S that patient was wandering about. Had been taken sick in July & wrote that he was at watering place. Wandered away. Was sent home. Was then peculiar & worried but was not at first thought much insane. Since returning home has been freely about town; memory poor. This last work ran away and became unmanageable. When sick always says trouble to catarrh. Talks to himself. No definite delusions except no foundation for those ideas about money. No family insanity. Father was killed; mother living. Went to Hot Springs for catarrh. Seems a blank to patient between going from watering place to "Eagle Pass". Has been easily irritated during past week. Neat in habits.

Apr 19-1891. Night watch reports patient "as so annoyed by noise & shocked by the vulgarity of — that he could hardly endure it. Changed his room & was then quiet for the most part, sitting up once." During day, attendant reported patient has having a "sudden gush" of blood from his nose.

Apr 20-1891. "When asked about himself and his work, frequently answers "it has not been done in the right way." Is some deaf. Pulse 87. Is constipated. Does not eat well. Says he does not sleep (well).

Apr 21-1891. Slept about 5 hours. Apr 22-91. Slept about 6 hours. Quiet & composed. Visited by mother.

Apr 25-1891. Is constipated. Says he does not sleep well. Is sallow and anaemic.

May 20-1891. Visited by his mother & taken out riding.

June 8-1891. Does not look much better physically. Sallow & pale. Tongue white furred. Patient does not complain much or any. When asked how he is, he repeats question & usually says deliberately "Pretty well". Continues quiet & clean; well behaved. Patient is reported by attendants as a good worker. Also that one day patient scalded a fellow worker greatly for not being as efficient as he (the latter) should have been. Patient talks to self a good deal; occasionally talks out loud about his fellow patients & in their presence. Recently, in Chapel, was overheard to say about a fellow patient who was laughing, "he is crazy" and to nudge his neighbor & say of him: "here is another crazy man".

Spirits- unable on account of patients serious sickness. Full examination of these

Personal and Medical History of D.E. Davis.

This man was brought by Sheriff of Stearns Co with the history of having been an inebriate for past 5 years. No further history given.

Apr 19-91. Was quiet during night; in morning found up on hall. Says he has been up & around; has now marked dyspnoea & cough. Pulse 129, Resp. accelerated and rectal temperature 102.4°F. Reluctantly remained in bed.

Apr 20/91. Quiet during night. 5Am. P. 112. 9Am. P.136 R32 T 103.1; Constipated. Right side of chest has dullness, absence of respiratory murmur; is probably full of pleuritic effusion. Left side has exaggerated breathing & murmurs: there was dullness in one area posteriorly.

Apr 21-91. Slept in sick ward. Slept about half of the time, and was restless & groaned a good deal. Am. Says his shortness of breath began about Christmas & has lost wright & coughed since then. P 120 R35: Pm P.126 R36 T(r) 102.6°F.

Apr 22-91. "Slept a little at a time. Coughed a good deal & appeared to feel bad" Am. P130 R32 T(r) 102.4 Pm P. 128 R36. Tapped left pleura & drew one quart of blood stained serum.

Apr 23-91. Had disturbed sleep about half the night. Coughed, groaned & talked "at random" when awake 2Pm P. 129 R30 T(r) 102.8° Pm R120 R32.

Apr 24-1891. Slept a little better than usual. Coughs. P. 132 R30.

Apr 25-1891 - Had some disturbed sleep but passed a poor night. Am Coughs. Vomited up emulsion of Codliver oil given. P. 114 R32.

Apr 26-91. Slept some. Very restless, talking deliriously when awake. Am. P124 R32. Pm P. 135.

Apr 27-1891. Groans & talks, when awake. Did not sleep much. Am P120. R32. Pm P126 T(r) 100.2

Apr 28-1891. Slept less than one hour. Talking & groaning as usual. ~~Apr 29-1891~~ Am. P. 120 R36 T(r) 100.5. Tapped (by aspirator) the 2d chest and drew only 2½ 4 ozs fluid - some cloudy. 2 Pm. P 120 R 36. A diagnosis of pleuritic effusion into the left pleura was made & this side tapped in afternoon and 20 to 24 ounces of fluid drawn. This proves double pleurisy.

Apr 29-1891. Slept only 30 or 40 minutes. Patient was very "wild" & required close watching to keep him in bed. Delirious in talk. Am. P 117 R28 T(r) 100.3. Delirious. Afternoon tapped right chest & drew 10 or 12 ounces of fluid: Pm P. 132 T(r) 102.2.

Apr 30-1891. Slept 4 or 5 hours. Am. P 124 R 36 T(r) 102.6 Tongue dry. "Pm Sleeps (belong to May 1) a good deal (to day)". P 124 R30 T(r) 101.6. Tapped left chest & drew 24-30 ozs clear serum.

May 1-1891. Slept one half the night. Am. P 124 R36 T(r) 100. Tongue dry. Pm. Sleeps some to day. P 120 R 30 T(r) 100.

May 2-1891. Slept some during night. Am. P 126 R 34 T(r) 101. Pm P 124 R 32.

Personal and Medical History of D. E. Davis

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

May 3-1891. Slept none at all during night & was wild.
Am. P 126, small, feeble; very delirious; has delirium tremens.
Pm P 120 R 33. Tm 100.6
May 4-1891. Slept none all night. Delirious. Am. Hands cold, feet cold. Pulse very small and irregular; some beats stronger. Delirious. Has not slept (during day). Tm 99.8 R 34. Sand bags have been used.
Patient failed during day and died about five pm. Seen at 4 pm by Dr. Pulse 75, small & irregular. Left pupil larger than right. Friends had been warned of danger from time to time and were notified of death. Telegraphed instructions to bury here. No postmortem was held. Diagnosis: Double pleurisy with effusion and Delirium Tremens.

Died.

Personal and Medical History of Emil J. Smith

from page 116

by his mother. Aug 25/92. Is growing thinner and pulse is very weak. Sep 2/92. Visited today by his mother. Sep 5/92. Wt 79 pds. Is growing thinner, and is feebler. Sep 15/92. Was visited today, by his mother. Sep 28/92. Visited today by his mother. Has, on several occasions of her visit, resisted her approach, in the same way that he has repelled the approach of others. Today, received her quietly. Has, for some time, however, been unable to talk any articulate, intelligible sound. Oct 4/92. Wt 80 pounds. Pulse 92. Oct 13/92. Visited, today, by his mother. Oct 21/92 — Has a changed look today, looking haggard & pale, and, this evening, pulse is found much accelerated, and very small. Seems rapidly failing. Oct 22/92. Continued to fail steadily, dying quietly this morning.

Mother notified of death. Remains were removed. No autopsy.

Summary. For the 163 nights, since the 11th May, the night-nurses have reported an estimated amount of sleep on 151. These night nurses have been several different individuals. The average no of hours sleep for the 151 nights is $4\frac{53}{100}$. The hours slept have been quite uniform, rarely as few as 0 or 1, and very rarely as many as 7 or 8. Has, when not asleep, more or less restless & noisy, getting out of bed and fumbling about the room. Patient may have slept a little during the day, as he was in bed the greater part of the time, but it is thought that he did not sleep much then.

Patient has kept his bed for months past, being, however, more or less restless the greater part of the time, getting up and down from his bed. Powers of speech have been almost completely paralyzed, Patient having not said an articulate, intelligible word, for months. Has been somewhat pugnacious, repelling even the approach of any one the greater part of the time, doing so rather bloodily. Has had no definite convulsions since those described above. Has, however, grown more and more helpless & paretic. Has been a little quieter, lately.

Died

Personal and Medical History of Ferdinand Godfrey.

This man was brought by Dept Sheriff Kinny with the following history. Insanity was first manifested about 6 weeks ago by incoherency, inability & cares for self and mental confusion. Has had Rheumatism & Kidney disease and has been in Hospital, Jail and Work-house. Apr 20/91 On admis. P 120.

Apr 21-91. Did not sleep much during night. Had four short naps. Had one spell when he was very wild, hollering & covering up his head & trembling as tho' he were afraid. Talked some at other times.
In morning, remained in bed. Pulse 104 Tm 99.7. Vomited up solid food taken at breakfast. Drank eggnog & held it. Talks incoherently.
Apr 22-1891. Given hypnotic last evening. Was up & down from bed early in night. Slept latter part. Am. P. 90 R 18. Drinks eggnog. Won't take solid food. Has a little diarrhoea Bm P. 92. R 22. Has remained in bed up to present.
Apr 23-1891. Was frequently up during night & slept but little. Talked some when awake. Am. P 94 R 22. Bm P 100. R 20. In bed to day.
Apr 24-1891. Slept one half night. Suddenly in night bellowed loudly, appearing frightened. Patient sleeps in sick ward under night nurse's observation. Takes no food except eggnog. P 100 R 20.
Apr 25-1891. Restless during part of night, sitting up. Slept about half the night. P. 100 R 16. Apr 26-1891. Slept fair. Am. P 92 R 20. Bm P 90 R 20.
Apr 27-1891. Slept better. P. 76 R 18. Dullen, won't speak.
Apr 28-1891 Slept fairly well. Am. P. 84, R 22. Prendia seems tender to touch. Bm. P. 84. R 22. Apr 29-91. Awake & troublesome early part of night. Resisted examination in morning P. 80 R 20. Gets out of bed frequently.
Apr 30-91. Attacked his ward mate & when taken away from assault by watchman, attacked the latter. Did this a second time. Awake a good deal. Up this morning. P 84. Bm Up. May 1-91. Slept well. Up all day to day.
May 4-1891. Up. P 92, strong. Patient says he does not feel right.
May 5-91. Has boil in gluteal region. May 6-91. Feels better to day.
May 13-91 Complains a good deal of headache. May 18/91 Has some diarrhoea. Complains of headache. May 26-91. Complains of frequent urination.
May 27-91. Complains of having night sweats.
June 6-91. Has sore throat. Patient has left inguinal hernia, gut descending into scrotum.
June 11-1891. Summary. Patient on entrance was physically sick, having gastric disorder, a coated tongue. Pulse accelerated. Also had chronic heart disease & a hernia. Mentally, patient was much confused. Answers to questions usually incoherent markedly & unfinished. Very little could be learned from him of his condition, feelings etc. There was considerable restlessness & insomnia & spells in which patient seemed terribly

Personal and Medical History of Ferdinand Godfrey Asst.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

frightened. Was also evidently suspicious of those around him. This was shown by attacks on quiet & offenseless fellows & actions toward Drs & attendants. From incoherent speech & obstinate silence in answer to questions, patient gradually became more freely communicative but still very confusedly, often ludicrously so. Patient was fearful of having insulted & wronged those around him & asked forgiveness. On 15th inst, in an examination, it was noted that patient started sentences & did not finish. When asked to repeat, "around the rough & rugged rocks etc", & after doing so, said "That's the way I came here, I suppose". Hepatic & epigastric regions quite prominent.

At date patient is gaining; is in better physical health. Is fleshier. Bodily functions more regular. Mentally is much improved. Fears seem gone. Confusion is nearly disappeared. Conversation is quite free & coherent. Manners pleasant. Sleep & appetite good. Habits good. Recently furnished with brace. Hernia had caused some discomfort & compelled guarding.

July 17/91 Continued to gain in self possession & mental clearness; improved physically. Went away to day trial.

Discharged Aug 12-1891

...ersonal and Medical History of Charles Black.

This man was brought by Sheriff J S Billings without any history accompanying warrant but is said to have been very much an inebriate for the past 10 years and also to be of very violent temper.

Apr 22 - 1891. Slept quietly.

May 15 - 1891. Was given an examination on this date. For details see opposite page. Thinks his confinement is unjust. He has not been drinking to such an excess. Also says he thinks his guardian is trying to do by him (patient) as he will. Guardian has rented patient's farm; thinks renter is cutting too much timber. Patient quarrels with his guardian.

June 11 - 91. Since admission, patient has been quiet. Has slept well apparently. Has claimed to be feeling well. Has asked for no medicine. Has had a good appetite. Has been clean & tidy. Speech quite free. Manners pleasant. Has worked some on the hall. Patient thinks his commitment here unjust & implies that it was uncalled for. Thinks he is being wronged by his guardian. That guardian is evidently carrying on his affairs unsatisfactorily. Patient said to day that he had heard from home this family reported things as going wrong. Is anxious to go.

June 16/91 See attached translation of letter written by patient.

July 24/91 Visited to day by a friend.

Sept 17/91 Continued about the same in health and conduct; has been anxious to go for some time.

Rochester, Minn Apr. 30th '91

Dear Sister:-

You will be surprised to received this from me and from here, this is the Insane Asylum so you see what I have come to among all my bad doings. Have been here a week am getting so as I can stand the racket very well but at times it is hard. the is tough swearing all day and night there is about 12 men who can talk to besides the employees. Two Docs who are up to their Business it is hard luck but I have made up my mind to take it all and say nothing for if I do I surely will then be condemed a crazy, this is all ~~Sams~~ wonderful doings, I should not say a word if he had explained to me where I was coming, but to be taken off hand by four men and stripped of your clothes put in bed in a room with two crazy men it was enough to get a fellow wild well it is better now I have got in the ways; the attendants are kind and do for you the rules are strict you go out for a walk twice a day with guards and it makes one feel as if he was in Sing Sing. I dont know the object of my being here nor do the attendants as I could just as well live in the town as here but it is a State institution and Sam has his eye on the mighty Dollar. This letter has to go through the Doc hands before I can mail it so you will not get soon as he will not come again until 5 P.M.

Say Sarah, I have got a girl at last and she is a daisy and business, she has kept the books at hamerly's for the past year and a half; R.C. and Irish so will have to join them I dont care she is worth it you can keep this to yourself as I dont intend to tell the folks about it until I wish, as they dont act square with me I think Sam is on to it as he flung it out to me that I was riding about in ~~Cots~~ Koehler's as we went to see the 12th night. you can bet your life when I am free he will not get his hand on me again he is the one that should be shut up instead of me. I have a chance to buy 640 achers of good land in N. Dakota for $5 per acher and a good man to run it but what can a fellow do in this Box if I could get out of her tho work I could make 5o M by this time next year, it is enough to set a fellow crazy alone, if you answer you must direct this way

...nd Medical History of William J. Moore.

... was brought by Dapty Sheriff Lucky & Brother with ...ing history. Insanity was first manifested ...e Ago by Strange conduct, emotional suspicious, & irritable. ...nsult has maniacal excitement, incoherency, insomnia & ...ating delusions. Has talkid of suicide. On Dec. 5th 1890, was injured in hand and was obliged to go at to morphia. The accident with business worry caused attack.

Apr 22-91. On admission, is very tidily dressed. Put in sick ward under night watch. Seen there by Dr, patient was in great emotion, crying & sobbing & praying, and begged the Dr for his mothers sake to let him go home. Patient was not informed by those who brought him here, where he was coming. In fact he had been deceived. He realized on reaching the hall the nature of the institution.

Apr 23-91. Did not sleep any. Prayed & sang in an undertone during the night. In morning up & around. Ground to Co.

Apr 24-1891. Was awake & talking some during night. Watchman thinks patient slept about 4 hours. Apr 27-91. Crying, depressed. Wants to go home.

Apr 30-91. See attached copy of letter of this date, written to a sister (in Troy N.Y.). Patient suspects his brother of mercenary motives in sending him here. Note also the reference to his girl. Brother claims he had not noted much communication between our patient and the young lady - who is the book keeper of the laundry owned by our patient. The reference to buying land in N.D. suggests the probability that this patient has received an offer of a farm from one of his fellow patients - who owned property in N.D.

May 1-1891. Visited to-day by his brother. Patient says he does not sleep very well. and that he has a cold in the head.

May 2-1891. In a letter to his sister "Jen", writes "Old Aunt Sarah is a bird; she can play a fine game every time". See also attached copy (from letter press) of letter to a friend. Note the handwriting.

May 8-1891. Pupils are unequal. Left some larger than Rt.

May 13-1891. In a letter to sister, says "x while I was in bed that night, every thing was taken out of my room and I was or had been drugged in good shape. I commenced to raise the roof and ask what it all meant." Letter full of complaints of his use by his family.

May 16-91. Complains of headaches; says he has been troubled with them for three months.

Personal and Medical History of William J. Moore cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

May 19-91. On examination, some points were brought. Patient claims that Prof Shepherd of McGill coll. said he had syphilis. There were some motor symptoms as tremulousness of tongue, twitching of facial muscles, especially on right side of face; inability to stand steadily on the right leg. (This last patient states is of some considerable duration). There was some inequality of the patellar reflex. On reading, patient starts out rapidly & slows up some as he proceeds. He muffles some words, having to repeat some. Pronunciation, on test sentences & when asked to pronounce as test, was fairly good. Patient claims his eyes have bothered him, by blurring; that the sight of right eye especially bothered him.

Patients emotional state could be defined as unstable; usually exalted in a measure; again depressed. Thinks he was sent here because he got nervous - irritable and troubled his master.

May 23-91. Visited by his brother.

May 25-91. In afternoon, patient was lying down, on bed. Complains of headache, begins over the right eye patient states; left pupil is larger than right.

May 27-91. Complains of headache. May 28-91. Complains of headache - June 2/91 Head aches.

June 5-91. Visited by his brother and taken away.

Patient remained about the same in physical health. Was in fair flesh; color was somewhat pale & sallow. Complained of headaches frequently. Got relief for a time from antipyrin he claimed.

After first few nights, when pat was restless & talked some to self, patient was quick & slept fairly well; complained some at first of being kept awake by noise. Appetite was fair. Patient was always clean & tidy in habits. Was able to dress his own injured hand. Patient was always ready to talk. Usually accompanied his conversation with an occasional outburst of laughter moderate in degree; his style was "jerky", both in word & act; had a quick nervous movement. Was all along dissatisfied with being kept here & occasionally spoke of it. Letters which he would quite often spoke of it. Hand writing was rather poor; possibly partly due to inability to steady paper with left (deformed) hand. There was an occasional omission of word or letter. Patient work & read considerable; did no work.

Was allowed privilege by request of brother of going to town occasionally & staying with a gentleman who keeps boarders and of riding out.

Brother proposes to take our patient first for a visit in Minneapolis & then down in Ills to a cousin's farm.

Personal and Medical History of Jasper Johnson.

This man was brought by Dept. Sheriff John Century with the following history. Has been drinking for a number of years but has been worse for the last 4. Has also been in the habit of using morphine but not since August 1890. At present has an uncontrolable desire for drink and has shown disposition to injure others through sudden passion. Was in a private Asylum 8 years ago and in in the Fall of 1890.

Apr 24-1891. Went to sleep at 5 A.M. to day. Feels nervous & restless; slept poorly. Asks for sedation.

May 12-1891. Complains of having a cold in his head.

May 13-1891. Complains of pain over his liver and in his back. May 17-1891. Is hoarse.

June 4-1891. He has been given parole of the grounds for some time. Asked yesterday and this morning, permission to go unaccompanied to town to the circus. Refused this & granted to allow him to go with the others. Patient took advantage of his freedom of the grounds and went down city without permission. Came home in afternoon under influence, in part, of liquor. Sent to his ward. But this misunderstanding was let out on grounds after supper by Attendant and again went to the City & began drinking. Was hunted up & brought home in evening.

June 5-91. Started off again; was hunted up & brought back & shut up in ward; parole taken away. Is nervous & wants sedation.

June 7-91. Complains of a sore throat.

June 17-91. Patient has slept well, appetite good; physical health good. Dresses neatly; is very talkative; talks in a loud tone; ~~boasts~~ boasts his experience in sporting; is evidently not sorry or ashamed of his past life. Evidently has no purpose to ever quit drinking. Is reported as having said as much. Boasts of how he managed to avoid serving out a sentence of 90 days in Minneapolis workhouse, by getting himself transferred first to City Hosp. at Minneapolis and then committed to this Hospital. Is asking for parole again. Writes letters, reads, sings, plays cards. Does no work.

June 26/91 Went home to day.

Discharged August 12-1891

May 7-91. P 96 Bn P. 96. May 8-91. P. 90, quite strong.

May 10-91. Bn P. 84. May 12-91. Is constipated.

May 15-91. Pulse 87. May 18-91. Pulse 92.

June 7-91. Pulse 93, small. June 8-91. Was refused to take medicine. In afternoon asks to go home. Talks some. Pulse 112.

June 17-91. Summary. Patient ate poorly for a time after admission but later ate better and even called for a second supply at meals. Has gained in flesh. It is noted that the pulse rate has risen since admission, at times seeming both rapid & small. Patient for some time has resisted taking of his pulse by Dr. Circulation seems feeble at times, hand being cold & Cyanotic. Bowels have a tendency to constipation. There is no cough. Patient has not always slept well, occasionally being wakeful the greater part of the night.

Patient converses very little, occasionally asking for a change of ward or to be allowed to go home or for his clothes; & requesting to be let alone when interferred

Personal and Medical History of Edwin M. Richardson Cont

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

with. Does not talk with his mother when she visits him. Conversation is in a peculiar measured tone, quite unaccented; Expression of face blank a good deal; occasionally scowls when provoked or smiles when pleased by callers pleasantries. Patient has kept his bed the greater part of the time, having on a few occasions asked for his clothing & dressed but soon undressing & going to bed. Has repeated this act several times in one day. Sits up on edge of bed considerable & will not stay in bed covered unless restrained. Gets up to go to closet for passages from bowels but passes urine in bed. Walks in a peculiar awkward way; usually keeps one foot ahead & often walks partly sidewise.
He has been quite frequently visited by his mother. Was put on potassium Iodide but often refuses his medicine.

June 19/91 Eats well. Pulse 72.

July 8/91 - Sits up much now, more than formerly; is fleshier and stronger. Resists examination persistently. Speaks occasionally.

July 18/91 Visited to day by his mother. Is up and dressed and wants to go and see his sister.

July 22/91 Is gaining some. Talks more day by day.

July 30/91 Has been up and dressed for several days. Goes out walking some.

Aug 19/91 Visited by mother. Aug 31/91 Again visited by mother.

Oct 30/91 Has been visited by mother & friends three times this month.

Dec 18/91 Visited three times since last note.

Jany 22/92. Visited to day by his father. Was very ugly & wanted to fight - Struck the Supervisor. Jany 24/92. Struck an attendant to day.

Feby 12/92 Recently struck a fellow patient and to day an attendant.

Feby 26/92 Visited by a friend. Mch 4/92 Weight 134 lbs. Pulse 82.

Apr 4/92 Weight 133¼ lbs. Pulse 100. Apr 9/92 Visited by mother.

Apr 16/92 Again visited by his mother.

May 3/92 Weight 136 lbs. Pulse 84. Is rather pale but never complains of feeling ill. Usually refuses to say anything about it. Up daily, goes out walking. On ward sits usually on a bench. Walks slowly & with cautious steps. Talks sometimes, as the mood strikes him. Is quite dirty and slovenly. May 27/92. Visited to day by his mother. June 3/92. Wt 134 pds. Pulse 96.

June 18/92. Visited today by his mother. July 5/92. Wt 138½ pds Pulse 76. Is very rarely slightly noisy at night, usually resting and sleeping well. Is dirty in habits. Aug 3/92. Wt 131 pds Pulse 84.

Sep 5/92. Wt 131½ pds. Pulse 92. Has been a little more troublesome lately, getting into fights and striking patients & attendants. Sep 22/92. Was kicked in the mouth today by a fellow patient and his lip cut. Wound was sewed. Also visited to day by his mother.

t Mrs Phankuch Nine mnths ago had
stong Rheumatism after getting up
illy. Think she has been some weak
Steadily worse Melancholy Refusing
inks She is not at home No de-
position to injure others No disposition to filthy or de-
structive habits. So far as known she was in good health
up to the time of her having Rheumatism

April 25 1891 Refuses to eat. Fed with tube ever since admission

May 2 1891 Very stupid Stands up with head hanging down
most of time Has to be fed with tube every day.

May 3 1891 Diarrhoea began Very weak.

May 4 1891 Diarrhoea bad. Vomited during the night. Fed
with scalded milk into which introduced a mixture of
Opium Bi Sub Nitrate Put to bed and had her watched
constantly as she struggled to get out. Temp 97. Face
flushed.

May 5 & 6 1891 Diarrhoea continued Very restless. Watched
constantly Fed with tube Emin Opium & Bi mixt. with Aqua
Calcis Gtt in scalded milk May 7 1891 Seemed better. Ate
three oyster crackers and drank Cup coffee. Diarrhoea returned
in P. M. Diarrhoea continued up to May 5. Fed with tube every
day & keeping May 11 when she ate a little

May 16 Diarrhoea still, but seemed stronger. Dressed and setting
on Bed

Nov. 91 Still remains as a dirty & quite stupid patient. It is very hard to get her to do anything, as she is rather
obstinate in manner as well as untidy & dirty in appearance.

Mch 4th 1892. Remains upon side of the house wards, has very
good physical health, but is quite untidy in habits. Has wt. 142 lbs.

May 1st 92 Patient very stupid & exceedingly dirty. Still
remains in the end of S. S. Health is good, will sit all
day in one place, staring stupidly at the floor & rarely
talking.

Sept 9" 92 Is a little more active in behavior, but is otherwise exactly the same as for years past. Dirty & untidy.

Sept 30 92 Patient dull & stupid, appetite good, bowels constipated,
sleeps good, did not menstruate this month, dirty in habits
every day. Dress. No change since the above noted, dirty in habits
every day, is quite demented in manner, has had only a little
of the Hysterical condition.

Personal and Medical History of Mary Gerkey

Patient brought here by Sheriff and her husband This attack followed confinement in about three weeks Second shell upset this time - Symptoms manifested upon different subjects especially Religion No disposition to injure others No disposition to pilfer or destructive habits Has been in restraint also under Medical treatment to no effect -

May 26-1891. Patient seems to have no memory - can not remember from day to day - This fact is most prominent because she talks willingly & readily. Manner is pleasant. Behavior is usually quiet - sometimes mischievous in an aimless way -

Discharged Aug 12-1891

EXAMINATION ON ADMISSION.

PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.	
Height,	5 ft 4 1/2	Mental activity,	Good
Weight,	127 1/2		
Nutrition of body,	Good	Memory,	Good
Wounds or abnormalities,	None		
Tongue,	Good	Perceptivity,	Good
Pupils,	Normal		
Sight,	Good	Reasoning power,	Good
Hearing,	Good		
Co-ordination,	Good	Emotional state,	Quiet
Reflexes,	Pat. 5		
Heart,	Normal	Delusions,	Desire to get back the graces she has lost On religious
Lungs,	Normal		
Examination urine,	Pale yellow. Sp. Gr. 1018 - Urea 1.5 % No albumin & sed.	Hallucinations,	-
Gynecological exam.,	Normal Condition	Illusions,	-
		Conversation, character of,	Talks well. Says she has always been excitable - especially on religious. Says matter was out of her mind for short time once.

Personal and Medical History of Christina E. Fackens

Patient brought here by Sheriff Braley - Symptoms were developed gradually - Then in sudden fashion has attempted injury to some member of the family - No restraint upon medical treatment have been employed May. 28-1891. Patient quite silly in manner at times - Usually looks up in an intelligent way & answers questions readily - There is a good deal of vagueness in the answer however. Is quiet on A. - A good deal of the time is in her room - Occasionally angry for a little it is said but usually pleasant even to silliness - Claims herself to have laughing spells. Health is quite good. Does a little work for self in room.

Nov. 17th '91. Patient has been kept upon the upper ward & is doing fairly well, although is subject to fits of unreasonable actions & perverse behavior. Has expressed no definite or decided delusions, however, simply silly & foolish in mind.

Mch 4th '92 Recently fought quite desperately upon an attempt to make her do something. Has moved to the lower ward on this account & there she knows enough to behave herself much better. Occasionally does violent acts during the year - 3 or 4 mos. such as throwing a flower pot or something of the kind, claiming afterward that she hardly knew why she did it.

Sept 9th '92 History of this patient for the past 6 mos. is merely one of an occasional move from one ward to another on account of destructiveness. Seems intelligent enough to always appreciate what she has done, but will suddenly break a dish, or other article, describing it simply as an insult & giving no reason. She is not mischievous in other ways & does considerable work. Is always silly in manner, with a partially demented Mental state. Sept 30th Takes care of herself & seems to be sane in ~~ordinary~~ respects except her mania for breaking everything breakable. Talks with reason on every subject, except the one above mentioned. She claims there is a curse on her, & that is the only way to rid herself from it. She has spells of uncontrolable laughter or crying, as the case may be, & after these spells pass off is very much annoyed & speaks about them. Her health seems good in every respect, although she did not remember this morning. Sleeps good & has a good appetite. Oct 10th Has recently taken some more pleasure, & for this has been Rpt. on ward. Her morbid idea seems to be to attract attention to her troubles.

Personal and Medical History of C. E. Fackens.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Jan 25th '93. Appetite good, sleeps well usually, wants to wash dishes etc. In laundry part of time.
Feb 24 '93. Very treacherous, mischievous, without any provocation, will suddenly run up to a glass, or picture & break it; silly in manner, never talks very sensibly, works some on ward.

March 10 '93. Came to ward C[lean]. Transf[erred] on a/c of her impulsive violence.
" (2nd visit) 1. " Appetite good. Sleeps well. Talks quite natural. Needs constant watching. Tidy in habits. Menstruated 12 of month. Talks much more during that time. Does not work. Cares on ward. Menst 10 from B2.
Bowels regular.
May 14 '93. Been very violent all day. In seclusion during present month 2 times.
" 22 " Very silly in manner. Throws things in dining room. Destructive at times. Eats health good at times works a little. June 9 '93. Appetite good. Habits tidy. Does no work. Sleeps well. Talks quite natural at times. Menstr: 10th. Very violent during period. In seclusion 12 hours. June 11 '93. Showing more violence than heretofore. Menstruating & talks very silly. June 16. EXAMINATION ON ADMISSION.

	PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.
Height,	5 ft 6".	Mental activity,	Quite active.
Weight,	139½ lbs. (Formerly 138 lbs).		
Nutrition of body,	Poor.	Memory,	Good.
Wounds or abnormalities,	Scar cuts on Scalp.		
Tongue,	Some coated, moist, quite steady.	Perceptivity,	Good.
Pupils,	Contracted to light sluggishly. Equal.		
Sight,	Right eye impaired. Left eye can only count fingers.	Reasoning power,	—
Hearing,	Impaired.		
Co-ordination,	Good.	Emotional state,	About normal.
Reflexes,	Patellar - subnormal. obtained only by clinching fists.		
Heart,	Pulse 108. Harsh grating sounds over base.	Delusions,	Thinks his brother-in-law put up a job on him.
Lungs,	Expansion much less on left side. Impaired resonance, distant voice, vocal fremitus absent.		
Examination urine,		Hallucinations,	None-his claims.
~~Gynecological exam.~~	Skin harsh, scaly. Probably had a Pleurisy on left side at base. Chest contracted on this side and expansion much less than on right. Left chest 14½" Right 16½". Difference in expansion of 2 sides 2 inches.	Illusions,	None.
		Conversation, character of,	Prompt, Pronunciation indistinct. Has Brogue.

Personal and Medical History of John P. Gorman.

This man was brought by Dep'ty Kinney of Ramsey Co on a warrant for inebriety with no accompanying history.

Apr. 26-91. Has been quiet at night. Complains of a cough & says he has been treated for his lung trouble, taking Codliver oil. May 4-91. Hands [illegible] chapped.

Mr. John Gorman:- commenced treatment March 19th to April 9th. Tried once or twice to take liquor, but threw it up at once, or rather spit it out of his mouth and it was thought perhaps he did this for effect.

Testified, however, that he had agreed to quit before the treatment commenced and that at least he had no desire for the stuff and a smell of it even, was offensive to him during this time. Did not know how much the treatment had to do with it, but felt assured that it was a benefit.

(For general comment concerning treatment see attached slip Vol 18 page 98)

June 5-1891. Complains of being disturbed at night by a cough.
June 17-1891. Has slept quietly & well as far as known from date of admission. Appetite quite good. Up and around every day. Complains occasionally of not feeling very well, trouble usually concerning his chest. Coughs more or less during the day; expectoration rather scant. Has not changed much in appearance of health.
Has been clean & fairly tidy. Conduct good. Converses freely; always ready to talk.
During early part of stay here, patient showed signs of mental aberration. He talked much on religion; conversation sometimes incoherent. Also frequently laid a string of beads (rosary) on various articles & in various shapes and made some remarks (wording not now recalled nor well understood at the time) of a religious character. Patient one day called the Dr (B) aside and confidentially asked him his opinion concerning the propriety of allowing certain small statues (copies) of human female figures to remain in sight on the table in the hall. Has lately not shown the above characteristics. Has been on 5 mils of Codliver oil & 5 gr of Iodide of Iron. Lately given a cough mixture.

Personal and Medical History of John P. Gorman.

This man was brought by Deply Kinney of Ramsey Co on a warrant for inebriety with no accompanying history.

Apr. 26-91. He has been quiet at night. Complains of a cough & says he has been treated for his lung trouble, taking Cod liver oil. May 4-91. Hands harsh & badly chapped.

May 29-91. Patient given an examination on this date. Weighed 118½ pounds & states his weight as having been as much as 138 pounds; bodily nutrition is poor; skin is harsh and scaly & dry. There is a easily noticeable contraction of the left half of thorax; measurement of the left half 14½ inches and of the right 16½. On full inspiration the two sides do not change much in difference in measurement. The condition considered due to a former old pleurisy at the base, followed by contraction. There were found on this (left) side impaired resonance, distant voice Sounds and absence of vocal fremitus. It was also considered possible that the left lung was also affected, altho' not demonstrated.

June 5-1891. Complains of being disturbed at night by a cough.

June 17-1891. Has slept quietly & well as far as known from date of admission. Appetite quite good. Up and around every day. Complains occasionally of not feeling very well, trouble usually concerning his chest. Coughs more or less during the day; expectoration rather scant. Has not changed much in appearance of health.

Has been clean & fairly tidy. Conduct good. Converses freely; always ready to talk.

During early part of stay here, patient showed signs of mental aberration. He talked much on religion; conversation sometimes incoherent. Personal and Medical History of Katherine Fischer

Patient was brought here by Constable Mr. Kalk. Present symptoms began about six weeks ago. Has had occasional attacks for last six yrs. of indefinate duration. Manifested usually by outbursts of anger and by threatened violence to household. Has destroys property. Never attempted but threatened suicide. Filthy and destructive habits. No bodily disease. No restraint. No medical treatment have been employed.

May-28-1891. Patients grand-daughter called to see her yesterday. Patient is old & feeble. Health seems fairly good except for the extreme feebleness of age. Seems failing. Potters about. No especial symptoms have been noticed however.

Nov. 28" 92. Patient cares for her room & does some little, trifling things. As a/ no particular trouble, has worked in the mending room a good deal. Immagines trouble concerning herself, is very feeble minded, & is apt to have delusive ideas, although speaks of no distinct delusion.

Mch 4" 92. Remains upon B-2, gets along quite well. Was visited a while ago, for the first time by her daughter. They gave as a reason for not visiting her, that they were afraid she would want to go home. Health is fairly good. Is however very feeble. Feature tottering in manner.

May 24" 92. Patient has remained steadily upon B-2, and enjoys fairly good health. Has not manifested so much agitation lately as used to. Reads to herself a good deal in a dull sort of way, & has worked some in the mending room.

Sept 9" 92. Seems in as good health as ever, but has not so much strength of mind. Sits on the floor or in the corner all day & reads to herself, seemingly reading the same thing over & over again. Is very feeble minded, & has acted in an emotional way when her friends come to see her, which they have done once or twice.

Sept 24" 92 Sits about reading hymn book, nervous, agitated manner, if spoken to. Sept 30" Appetite good, sleeps well, cries most of the time. Nov. 21" Health good, no change since last mo. Dec. 1" Eats & sleeps good, cries most all the time, bowels regular. Feb 18 93 Is uniformly feebleminded & querulous. Does no work now. Has a book which she looks at for hours, reading to self. Prefers sitting on floor, has a polite, apologetic manner, tells everyone she might not to be here & that she is here to be

EXAMINATION ON ADMISSION.

	PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.
Height,	5 ft 9½".	Mental activity,	Reads some and talks.
Weight,	154 lbs. (175 lbs - 5 yrs ago).		
Nutrition of body,	Good.	Memory,	Confused for events occurring about time of coming here. Good for times previous.
Wounds or abnormalities,	Scar on scalp.		
Tongue,	Clean, moist, quite steady.	Perceptivity,	Appears fair.
Pupils,	Normal.		
Sight,	Good.	Reasoning power,	?
Hearing,	Good.		
Co-ordination,	Good.	Emotional state,	Seems contented.
Reflexes,	Patellar: Sluggish much diminished.		
Heart,	Puls: 84, Sounds clear.	Delusions,	Money coming to him from old country. Amt seems $49000. Seems to old country told him. Sister owes him $500. - his "Erbtheil."
Lungs,	Girth 35". Expansion 3". Sounds good.		
Examination urine,		Hallucinations,	
~~Gynecological exam~~,	Nevvus in movement.	Illusions,	
		Conversation, character of,	Prompt, quite rapid. Speaks poor english. Pronunciation probably good in own language.

Personal and Medical History of Gregor Domschutz.

This man was brought by Deputy Kinney from St Paul with the following history. Had facial Erysipelas 12 months ago and 2 months later had first symptoms of his insanity. But little history is given. Insanity at present manifested on money matters with a disposition to injure others during sudden passion.

May 3-91. He has been quiet at night & during the day. Slept about 7 hours last night. Has been clean, tidy & neat in person.

May 29-91. Patient has been well behaved and has been moved to B'- (from C3). He was examined to day. Weight this date 154 pounds. Claims he weighed 175 pounds when he came from the old country 5 yrs ago. Movements somewhat nervous. Patient's memory seemed confused for events about the time of coming here. Appears good for other times and events. Delusions seem to exist in regard to money matters. He claims there is money coming to him; from the old country; one sum of $49000, which patient claims some one in old country told him was due him & which it seems the Patient made some more to get. He repeated several times that some one told him that this money was due to him; he did not seem to have other reason for claiming it. Also stated that his sister in Germany (?) owes him $500., which is his 'Erbtheil'. Patient seemed somewhat annoyed by close questioning in regard to this matter. Does not talk or understand much English & conversation carried on with some difficulty. Patient named the party who told him as "Karl Forbinny."

June 6-1891. Complains of headache.

June 17-1891. Patient's conduct was good from date of admission; was quiet at night & during day. Always up in time; answered Drs greetings, at first making some complaint of ill feeling, ill defined; later claiming to feel well. Health seemed fair. Clean, tidy. After a time commenced working, seemed more cheerful. Moved to B'. Soon began asking when he could go home & grew impatient with being put off from time to time. One day, put on his hat & was determined to go. Was moved to B2 to be under care of larger number of atts.

Here was again quieter + better behaved. Is now on B2; works quite well.

July 8/91. Spends the greater part of the time walking the floor and does not have much to say to anybody. Works but little. Oct 14/91. See attached letter which patient wrote to some one evidently in Germany. Patient has been requested repeatedly to write to his wife but has refused to do so. Dec 28/91. Is about the same, but does not work.

Jan 18/92. Has been crying this morning + last night. Refused his supper and breakfast. Thinks people are fooling him. Feb 1/92. Weight 152 pounds. Mar 3/92. Was crying last night — Mar 4/92. Weight 155 pounds. Pulse 64. Apl 4/92. Weight 155 pounds. Pulse 73.

May 3/92. Weight 159½ pounds. Pulse 73. Continues in good physical health. Is quiet night and day. Takes care of himself + is clean + tidy. Goes out walking. Does not talk very much. His speech + air are gloomy. Patient is depressed.

June 3/92. Wt 157 pds. Pulse 74. July 6/92. Wt 162 pds. Pulse 80. Aug 3/92. Wt 160 pds. Pulse 66. Sept 5/92. Wt 162 " " 68 Oct 4/92. Wt 161½ " " 68 Nov 2/92. Wt 163½. " 76.

Nov 17/92. Uniformly quiet, resting + sleeping well. Quiet and well behaved. Clean + tidy. Keeps apart from others, doing nothing, saying nothing unless spoken to. Looks gloomy. Goes out walking daily. Bodily health good. Has been on B1 for some time. Nov 21/92. Had nose bleed today. —

Jan 23/93. Uniformly quiet. Stands or sits in silence. Looks gloomy. Answers greetings in a half-hearted, almost inarticulate way. Health good. Feb 1/93. Struck a fellow-patient today with a broom-handle. May 2/93. Quiet + well-behaved. Keeps by himself, in silence, either standing upon sitting down. Goes out walking. Does a little work on ward. Has 'spells' occasionally, when he talks a good deal to himself, at times appearing excited. Health good.

May 31. 93. Appetite good. Bowels regular. Good patient. Not inclined to work. Talked to himself a good deal. June 5. Wt 166½ P. 61. June 30. Appetite fair. Bowels regular. Is the same all the while. July 14 Wt 166½ P. 76. July 29 Inclined to talk to himself more than ever. Acts quite contrary at times. Has a habit of slamming the door making considerable noise. Aug 2/93 Wt 164½. P 82. Aug 5/93 Transfd to Inf. Sept 1/93. Walks the floor and talks a good deal, but works actually works a little on ward. Health good. Oct 6/93. No change. Oct 28/93. Has been very noisy of late. Walks the floor incessantly most of the time. Nov 21. 93 A harmless patient, talks a good deal + sometimes noisily as in an incoherent manner. He works a little on ward. Health good. Dec 26 93 No change. Jany 3. 94 Same. Feb. 16/94. Walks the floor talking to self + occasionally bursting into a hearty laugh. Broke mirror in closet and assigned as his reason that another patient had just broken one. Health good. Does no work. March 27/94 Vaccinated unsuccessfully. Apr. 29/94 No change. May 2nd to July 31/94. During these 3 months, he has been nervous + restless; talks a good deal, but incoherently; laughs for no apparent cause; runs from one hall to the other, every few minutes. Lately, he has been given to striking other patients, without any pretense whatever. Is rather neat + cleanly in his habits. Health is good. In a long time would not help with work, but of late, has been working in farm. Aug. Sept + to Oct 31/94. During these 3 months, patients condition, mental + physical, has apparently been unchanged. Habits clean. Dress neat. Health good. Works out in the farm, every day. Nov. 94 Well behaved, works on farm at present, — health good. Dec 94 - Jany 95 No change in anyway.

Nativity,	Ireland.		5 Years. 23 Days.
Predisposing cause,	Unknown.		Died: Pneumonia
Physicians committing,	J. VanBark & J. E. Fitch.		
Correspondent,			

EXAMINATION ON ADMISSION.

	PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.
Height,	5 ft 7 1/4"	Mental activity,	Quite active.
Weight,	135 lbs.		
Nutrition of body,	Fair.	Memory,	Approximates the facts.
Wounds or abnormalities,	Several small scars.		
Tongue,	Slightly coated, moist. Irregular jerky movement.	Perceptivity,	Fair.
Pupils,	Normal.		
~~Sight~~,	Impaired.	Reasoning power,	Poor probably.
Hearing,	Impaired.		
Co-ordination,	Hands good. Legs somewhat feeble.	Emotional state,	Seems exalted
Reflexes,	Patellar - Much exaggerated (8-9).		
Heart,	P. 69. arteries hard. Sounds feeble & distant but sound clear.	Delusions,	See next page.
Lungs,	Girth 35". Expansion about 1". Coughs, wheezy.		
Examination urine,		Hallucinations,	Hears voices at times.
~~Gynecological exam.~~	Has wheezy breathing when talking. Quite marked tremors of hands, especially of left.	Illusions,	
		Conversation, character of,	

Personal and Medical History of Michael Hackett.

This man was brought by Dept. Sheriff Hyland with the following history. Insanity was first manifested about 1887 since which time he has never been steady. At present insanity is manifested by a habby of talking about Materialism and also a disposition to injure others during fits of sudden passion.

May 3-1891. He has been sleeping quietly (on A). Complains to day that the food and drink cause his head to swell up.

May 29-1891. Examined to day. Has a wheezy breathing especially while talking; coughs some. Chest expansion poor. Has quite marked tremors of the hands, especially of the left. Talks rapidly. Is garrulous. Talks about his piles & his treatment for them by Dr A. of Chicago and asks to go back there to that Dis charge. Thinks he is unjustly shut up; a "man of his rationality and understanding". He says he went to St Paul and asked the Mayor if this materialism, concentrating of thoughts, came from the atmosphere; people got married who would not but for that. He spoke of the 'control power of the clock; "the clock speaks like a human being at times". "Materialism is materializing thoughts, substituting individuals, similitudes". Conversation started by question on materialism, of which the above are some phrases caught, was ~~parrotty~~ incoherent, & difficult to report as patient talked rapidly. In explaining origin of a scar on his arm, patient said he was stabbed there on the 14th, 15th and 16th nerves of his arm.

June 17-91. Conduct good, clean & tidy, from beginning.

June 19-91 Frequently asked why he is kept. Lately has seemed more distant as if growing impatient with his detention here. Walks the floor of his hall much, hands in his pocket. Does no or little work.

July 19/91. Complains of being constipated. Sept 24/91. Is sick today having diarrhoea with considerable pain. Sept 25/91. Is in bed. Diarrhoea continues. Claims he has not passed water, but there is no retention. Pulse 78. T 97. PM Pulse 108. R 24. T 99. Sep 26/91. AM. Pulse 64. R 26. T 98.2. PM. Pulse 70. R 25. T 96.2. Sep 27/91. AM pulse 62 R 20 T 99.4. Sep 28/91. Am Pulse 58. R 20 T 98.4. Sep 29/91. Am Pulse 60. R 18 T 98.4. Sep 30/91. Pulse 74. R 24. T 99. Refuses medicine & takes food in scanty quantities. Has a suspicion of being poisoned. Discharge from bowels is offensive looks as if mixed with pus. Oct 1/91. Am. Pulse 66. R 21. T 99. Oct 6/91. Has kept his bed until to day. Is now up; Eats better. Oct 9/91. Asks for some alum to apply to his piles.

Personal and Medical History of Elizabeth Hull

Patient was brought here by Deputy Sheriff Mr. Kinney. Many years ago she was in an asylum in Neb. later was in St Peter Hospital. No prevailing delusion. No disposition to injure others. No disposition to filthy or destructive habits. Has attacks of passion. Has been under restraint.

May. 28-1891. Patient has been quite untidy in her habits & manner so that of Dementia. She is silly in her jokes & laughs. Health seems excellent. Does no work. Is rather hard to control.

Nov. 30"91 Patient is quite clean, is apt to be very noisy at night, & is very silly in manner. Is able, however, to perform a good many errands & to show somewhat of interest.

Jan 2. '92 Has been suffering for the past week from the prevailing Influenza. Course of the same is shown by the nurse's record attached. At present no peculiar symptoms.

Mch 4" '92. Patient has entirely recovered from the above & is as usual. Her wt. is 142 lbs.

May 15-"92 Patient gets along fairly well, except for noisiness during the night. Seems in good health, & partially realizes her condition at times.

Aug 5-1892 Would to Annex today.

Oct. 11-1892 Has been very much more quiet since she was moved. Takes care of herself. Neat and clean. At times will talk quite sensibly but apt to get confused & says as she begins to tell anything. General health has been good.

Nov. 22-1892, Has been very noisy at times of late at night when she will persist as hard as she can for an hour or so. During the day is quiet and causes no trouble. Feb 3" '93 Health good, no work, noisy at times, often during night — about once in two weeks during day. Talk incoherently.

April 22. 93 No work. Is very noisy at night. Habits clean. Gen health good. Appetite good.

May 10 93. Noisy at night. Quite often, so that necessary to give a sleeping dose at times.

Jn 23. Very nervous & noisy. Setting up in bed. Given sleeping dose at 9 o'clock.

Jy 25. Extremely noisy for hours. Screaming at the top of her voice. Given sleeping dose.

July 20, Appetite good. Helps a little with the mending. Sometimes. Clean & neat. Is very noisy at times, more so at night. Rides & walks. Gen. health good. Oct. 10. 93. Appetite good. Is very noisy at times. Neat & clean in habits. Gen. health good. Feby 23. 94 Rec'd on Ward. Coughs & complains of headache & pain in lung. Slight bloody expectoration. Rales in middle right lobe. Appetite was always good. Nights noisy & restless. Up a good deal. Feb 26. 94 removed to B. Ward. Dr. for particulars see records.

Personal and Medical History of Line Andersan

Patient brought here by D. C. Crowley Sh. and wife. Symptoms of insanity have first manifested after the death of Her husband four years ago. on transient subjects but especially on the death and the way he died. Has threatened often. Talks of killing herself and children. Destroys clothing and furniture. Ugly bad temper. Her neighbors have been watching her for some time past in fear that she would kill her children and herself. No medical treatment. No confinement

May. 28-1891 Patient is still quite depressed & tearful. Anxious to go home. Is not quite well however. Physical health good. Does no work. Has not been destructive or noisy.

June-16-1891 Does not remember the first days, nor the time that she came. Claims to be right now. Will try & do well if can go home. Don't remember what did at home. 8 years ago was sick for a year.

June 23. A man named Johnson came to take her, but on account of a protest by the citizens as her is complete recovery, she is not allowed to go just yet.

July 24 — Today 2 ladies came signed bond for her safe keeping & took her home. She is dull, despondent & apathetic but answers questions well

Discharged Oct 31 - 1891

Rochester Minn. May 15th 1891.

Dear Mother, I am shut in and tormented night and day not allowed my mission book or beads and not allowed to go to mass. And put in for insanity and I suppose I shall be burned alive I think that i owe Record and fluke 90 cents but I am not certain I wish I could find out for sure. And I suppose I am going to be burned alive for my ~~XXXXXX~~ faith (over other side) Make that three cents good that I owe Dr. Dodge. And for Mrs. Bracket's knife and pencil.

Yours Truly,
Francis Patrick Kennedy.

Remember and do not forget to write.

Personal and Medical History of Frank McDonald.

his man was brought by Dapty Sheriff James Tully and Dr A McKinney with the following history. Insanity first began to appear about 5 years ago by a gradual decline of mental faculties and is at present manifested by avoidance of work of any kind, homicidal tendency on irritation and a disposition to injure others during fits of sudden passion

May 4-91. Has been quiet at night sleeping well, apparently.

May 15-91. See attached copy of letter written by patient on this date; Note; "I am shut in and tormented night and day, not allowed my missin book or beads and not allowed to go to mass; and put in for insanity and I suppose I shall be burned alive. I think that I owe Rec— and Flube 90 cents, but I am not certain. I wish I could find out for sure. And I suppose I am going to be burned for my faith. xx". Note the delusion of fear; of persecution and note sudden change of subject.

June 19-1891. Since admission patient has been quiet; neuro noisy & maniacal; has been well behaved; not quarrelsome; clean & fairly tidy. When on ward is up in line; stands rather listless or with an unpleasant expression on face & often averting his face while being addressed. Never complained of feeling ill. Is somewhat thin & pale. Has for some time been working outside & did fairly well. Makes no allusion to any fears as expressed in his letter, in his conversation. Says but little except when questioned. He was called for a suspensory for one of his testicles.

July 13/91. Habits are clean. Is quiet and prays a good deal of the time. Reported as masturbating and ordered to be blistered. Sept 30/91. Is rather careless in dress. Spends all his time at one end of hall looking steadily in one direction, either on floor or out of the window and pays no attention to anything.

Jan 19/92. Weight 140 pounds. Pulse 90. T(e) 99.6. Has good appetite & rather pale. Bowels are regular. Tongue clean. Talks only when spoken to. Reads; goes out walking; moves very little about ward, and very slowly. Dresses & takes care of himself. Is clean and tidy. Is stubborn. Cries at times.

Mar 3/92. Weight 136 pounds. Pulse 100. (while sitting). April 4/92. Weight 132 pounds.

May 3/92. Weight 128 pounds. Pulse 80. May 14/92. Was put upon Malt wine & Cod-liver oil on account of loss in weight. June 3/92. Wt 124 pds. Pulse 96.

July 6/92. Wt 115 pounds. Pulse 82. Has lost 13 pounds in past two months —

July 8/92. Dm. Patient's pulse is rapid; he is cyanotic & troubled with difficult breathing & was ordered put to bed. Patient went unwillingly, claiming

that he was well. July 9/92. Had several spells of severe coughing last night; slept but 4 hours. Am. Pulse 150. T(R) 101.6. Coughs badly. Lungs were examined and found extensively affected with unquestionable tubercular process, or disease. July 11/92. Pulse is rapid and feeble; unfavorable outcome foreseen; Priest sent for & friends written to. - Has coughed much & sweat a good deal at night. July 13/92. Visited today by his mother. July 15/92. Has been failing rapidly; is very cyanotic & dyspnoeic. July 19/92. Patient continued to fail rapidly and steadily, and died at 5.07 PM today.

Summary. By consulting attached record, it will be seen that patient has had a very high fever since the 10th inst, with quite a wide daily range. On the 17th PM the Temperature fell to sub-normal and has been low up to death. Respiration, disturbed from the beginning, has grown more so, and has been rapid for past 3 days. Pulse has been much accelerated, and quite weak during the greater part of this sickness. Patient was put to bed on the "Sick-Ward" at the beginning of this attack. Has kept his bed fairly well, although protesting against being kept there. Patient has had severe cough and quite heavy purulent expectoration. Sweat also quite profusely, by spells. Examination of lungs has shown a very extensive disease process, a disease diagnosed as rapid or pneumonic tuberculosis. Remains were sent home for burial. No. Autopsy held.

-Died-

Personal and Medical History of Alice McGuire

Patient brought here by Thomas McGuire Husb. Had been going about screaming. Has jealous of her husband and thought her friends were working against her. Gets angry and strikes and bites those around her. Tightly dressed does not destroy her clothing. Breaks furniture. Has been confined the last few days. She was confined last Dec. and has been a little peculiar ever since.

May 26-1891. Patient is very quiet. Can scarcely be made to speak. Eats very poorly. Was fed with tube once. Stands about ward with dull, depressed look on face. Has been quite constipated. Will not talk.

Sept 3-1891. Patient can hardly be said to have improved, but husband has been quite insistent and was today allowed to take her home. She has been lethargic in all her habits. Her health is fair.

Discharged Feb 6-1892

Personal and Medical History of John Hogan.

This man was brought by Sheriff Matt Wittell with the following history. Insanity first manifested in Feb 1890 by the idea that he had been killed and resurrected and also thinks that he is an illegitimate child. Has shown disposition to injure others during fits of sudden passion.

May 5-91. Was quiet all night & slept about 7 hours.
May 6-91. Slept about 8 hours last night. May 7. Slept 8 hours
May 21-91. Visited by a friend.
June 13-91. Up to date, in conversation with Dr in the ward had spoken pleasantly and had expressed no delusion. Examined more thoroughly to day with following results: Physical seems good, and as good as usual. Weight only a little below his average (175-180 lbs). Dr feels thinks he only weighed 165 lbs just before coming here and has gained 6 pounds. There was noted some twitchings of the lips & around corners of the mouth. Has tremors of the hands & legs in motion; seem more marked in left hand. Patient claims about that he met & talked with Dr B. in Jaynesville about 1½ yrs ago and that Dr B was his physician when patient was as he claims in this Hospital 1 and one half years ago. All this is error. Patient claims his right name is not Jno Hogan but Pat Lee, as near as he can make it out. The folks he has been living with are not his parents; he only recently found this out. Michael Hogan, who has been in this Hosp. patient now claims is no brother. Pat. claims that his mother told him she was not his mother, that he was bound in a convent in Ky. Pat says he can now remember way back & now remembers that they adopted him as a child.
He was also killed; does not know who hit him in head with a club; there are people who know it. He also claims he has a power that will fetch him to life again. Has not got it now; some people took it away from him when a boy; they were killing him with the power so he would forget. There is not another man like him in the world, who has such a power. He has not lost it; they hold it. They had no right to send him here. If he is sick, he has a power to put over it. They tell me it took three men to make me. Patient told all this freely when questioned. Seemed rather to enjoy telling this story.

Personal and Medical History of John Hogan Cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

June 12/91. Visited by Sheriff of Waseca Co.
June 19-1891. Conduct has been uniformly good from beginning; on first day here, made some remarks about his physical powers at home, but has not been quarrelsome at all. Talks freely & pleasantly when questioned. At other times inclined to quiet. Sits & reads, or unoccupied. Has been very clean & tidy. Does no work. Health excellent. Always up in line, standing very straight & arms crossed, smiling when greeted. Has never mentioned delusion except at time of exam when questioned about it.
June 23/91. Visited today by a friend. July 14/91. Works some in hall. Reported by the attendant as talking a good deal of nonsense. Aug 31/91 Weight 170 pounds. Physical health excellent. Sep 20/91 Visited by mother & brother. Sep 28/91. Attendant says that patient does not talk so much nonsense - Is quiet, contented & well behaved. Nov 3/91. Patient has behaved exceedingly well, not mentioning at all his delusions, unless questioned - Was taken home today by his father & mother, on trial.
Mar 14/92. Has returned today. Patient's delusions made themselves now manifest, and so affected his conduct, that it was found necessary to return him.
April 4/92. Weight 168½ pounds. Pulse 90. May 3/92. Weight 166 pounds. Pulse 82. Was visited today by the Sheriff of Waseca County.
May 13/92. Physical condition good. Is well behaved, pleasant & free in conversation; clean and tidy. Does not mention his delusions, and has settled down into a quiet, contented life here, not complaining of having been returned.
June 3/92. Wt 167 pounds. Pulse 86. July 5/92 Visited by his mother. Did not talk very well with her. July 6/92. Wt 168½ pds. Pulse 76. Aug 3/92. Wt 166 pds. Pulse 80. Recently moved to A². Sep 5/92. Wt 163½ pds. Pulse 110. Oct 4/92 Wt 160 " " 104. —
Nov 2/92 Wt 162 ½ pds. Pulse 72. Nov 17/92. Uniformly quiet, resting and sleeping well at night. Is quiet and well-behaved; very clean and tidy. Does not talk much, but makes pleasant response to greeting. Does not mention his delusions. Seems Contented here. Plays games. Does no work. Bodily health good.
Jan 23/93. Uniformly quiet, night and day. Quite active. Plays games, talks. Pleasant. — Seems Contented. Never asks for anything. Does no work. May 8/93. Visited today by brother — May 21/93. Continues, in all respects, about the same - Pleasant & good-natured. Is in good health. —
May 31.93 Very quiet on ward. Does not take part in any of the games nor does he do any work on hall Appetite good Bowels regular Sleeps well
June 5-93 Wt 160. P. 80 June 12 Father came to see him & brought him some clothes. Thought son talked all right but was afraid to take him home.
July. 1.93 No change, Continues very quiet on ward Bowels regular. Appetite good Sleeps well. July 3. 93. Wt 159. P. 100. July 31. Very quiet on hall. Talks none unless necessary or some one speaks to him.

Personal and Medical History of C. A. Barnes.

This man was brought by Deputy Sheriff Chas F Nash with a history consisting principally of reference to "former records"
Said to have been in Rochester before but Sheriff's book does not show it.
Insanity manifested by incoherency of speech, fleeting delusions excitable, shiftless etc.

May 5-91. Slept about 7 hours. May 6/91 Is noisy. Slept about 5 hrs.
May 8-91 Slept about 6 hours. May 14/91 Slept only 5 hrs. May 15/91 Slept 4 hrs
May 16/91 Slept only 3 hrs May 17-91. Is restless; throws spittoons around; undresses himself. Shut in his room.
May 28-91. Since last note patient has frequently been noisy & restless at night, sleeping 2 to 4 hrs; again sleeps better. Pulse 96. May 29/91 Restless. Pulse accelerated.
May 30-91. Is noisy. Slept only 4 hours last night.
May 31-91. Am. P. 108, strong, tongue moist & clean. Pm. Is tearing his clothing. P 87. June 3-91. Am. P 78. Constipated Pm P. 72.
June 7-91. Has been kept in bed a good deal. Up to day. Pulse rapid. Pm In bed.
June 10-91. In bed. Pulse 81. Had diarrhoea
June 11-91. Am. P 84, quite strong; restless, destructive, and dirty Pm Up. Has diarrhoea.
June 12-91. Pulse 96. Restless, destructive. Slept 4 hrs. Noisy.
June 13-91. Still in bed. P 70. Is losing flesh. Pm P 88.
June 14-91. P. 76. Quieter. Slept none last night. In bed.
June 19-1891. Patient in admission was quite thin & pale. Has lost flesh. On account of failing strength, patient has been kept in bed the greater part of the time, having to be constantly watched to keep him there. Patient is restless; if left alone, will get up, soil room possibly, turn everything into confusion. Destroys his own clothing & bedding. Talks a great deal, jargonously. Is quite bright & pleasant at times. Speech full of delusions and incoherence. Religious matters involved in talk & delusions. Rest in bed & tonics & sedatives constitute treatment.
June 22/91. Is in bed. June 26/91. Is up in a straight-suit. June 30/91. Slept none last night. 9.30. Am. Is sleeping now. Pulse 66. July 3/91. Had an apoplectic stroke last night. In bed; left arm helpless: head & Eyes turned to the right; pupils unequal, the right smaller than left. Is dull. July 8/91. Lies stupidly & quietly in bed. Pulse slow; bowels constipated. July 10/91. Am Pulse 88. Pm. Pulse 104.
July 18/91. Patient sleeps all the time. Aug 4/91. Left (paralyzed) leg is becoming contracted. Put on a splint. Aug 8/91. Reported by night watch as having a convulsion. Pulse 100. Aug 10/91. Pulse 100. Aug 17/91. The splint on leg produced points of pressure sores. Sept 10/91. Has remained in quite uniform health until this date, when he seems somewhat sicker. Pulse 120. T (R) 101.2. Dec 21/91. See attached sheet.

Personal and Medical History of C. L. Bemis.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Jan 3/92. Both the paralyzed leg & arm (left side) have contracture. This prevents patient from getting up & about. Appetite good; health fair. Jan 8/92. Has some diarrhoea which lessened during the day. Jan 11/92. Diarrhoea has continued. Pulse 120. PM. Pulse 120. Diarrhoea continues. Abdomen is tense, painful and tender to the touch. Jan 12/92. AM. Pulse 124 T 101.5. There is some pain in abdomen. PM. Pulse 112. Patient eats well. Jan 13/92 AM Pulse 96. Coughs a good deal. PM. Pulse 88. Jan 27/92. T(e) 98.

Feb 15/92. Coughs a good deal T(e) 99.8. PM. Pulse 108. T(e) 99.8. Vomited today.

Feb 16/92. AM. T(e) 100. PM Pulse 100. T 100.2. Feb 17/92 AM. T(e) 99. PM Pulse 90. T(e) 99.2

Feb 18/92. AM. Pulse 102. T(e) 99. Mar 4/92. Occasionally coughs quite badly. Did so last night.

Apl 20/92. Still keeps his bed. May 3/92. Weight 115 pounds; Pulse 80. During the latter part of February and the month of march patient was quite often wakeful & somewhat noisy at night. Is lately sleeping better and is quieter. May 27/92. Has been coughing a good deal at night, for the past 4 or 5 nights. June 3/92. Wt 124 pds. Pulse 81. June 14/92. Pulse 84. June 7/92. Is quiet. Pulse 78. June 14/92. Has been coughing quite hard at night, at times, lately; has also had diarrhoea. June 17/92. Wt 125 pds. June 27/92. Wt 126 pds. July 6/92. Wt 128 pds Pulse July 14/92. See attached record of Pulses. Aug 3/92. Wt 136 pds. Pulse 81. Sep 5/92. Wt 135½ pds Pulse 72. Oct 14/92. Wt 134 pds Pulse 68. Oct 17/92. Is reported as coughing a good deal at night. Nov 2/92. Pulse 84. Nov 21/92. Occasionally somewhat restless at night; on the whole, sleeps well & is quiet. Coughs some; at times considerably, at night; has kept his bed daily for months past, marked contracture of leg & arm making it impossible for him to stand up. Good natured; talks freely when approached. Somewhat demented. Bodily health good. Dec 9/92. Both legs, the paralyzed & the other, are contracted. Has been in bed daily for months. Was today got up in a chair.

Jan 23/93. Is occasionally slightly restless at night, but comparatively quiet. Has been got up, for a short time, almost daily, since the last note. Patient does not like it, however. Is good-natured as a rule. Swears much & chews the corner of the sheet all the time.

May 21/93. Keeps his bed day & night, and, as a rule, remains there quietly. Remains about the same from month to month.

May 30. 93. Appetite good Bowels regular Confined to bed. Coughs some at times. Left arm & leg paralyzed. Habits dirty and often soils his room. Number of days dirty during month 31. Talks quite sensibly in answer to question.

June 1st 134. P 66 July 1. 93. Wt 134½. P 64.

July 7. 93. No change from last month. Number of days dirty 31. Aug 1/93. Wt 134½. P 92

Aug 14/93. Appetite good Bowels reg: Stays in bed. Left side paralyzed. Habits dirty. Coughs some at times. Number of days D. Sept 2/93 Wt 137. P 78. Sept 28/93 Appetite good. Bowels reg: Oct 2/93. Wt 137. P 84. Oct 21/93 No change. Nov 1/93. Keeps in about his usual flesh. Nov 30/93. Still daily confined to bed. Lies there quietly. Does not change any. Number of days dirty 30.

Dec 4/93. Has gained slightly in flesh. Dec 31/93. No change to note.

Jany 4/94. Patient is still troubled with some coughs, at times. Jan 14/94. Did not sleep any during the night. Coughed a good deal & quite hard. ——— Jan 13/94. Another patient (Hans C. Michaelson) broke Bemis' left leg above the ankle, with a chair. This was an unexpected and unprecedented cruelty

So you will know to inform the guards of it. He is prefectly harmless. He is a Carpenter by Trade when he 1st came there he was very despondent & mostly despairing but now he is more of a restless disposition. He was bitten by a dog abt 10 days ago from place in his windpipe in the leg perhaps it would be as well to have his leg examined & ask him about it. I will by & bye send some clothing for him in a few days. If any thing should happen to him please let me know at once

Yours Respectfully
P M Nulty
N° 451. Carroll St
St Paul
Minn

PS I have been told that ever since he has been confined. His whole desire is to escape. He wanders around the County on foot. When he escaped from the Hospital before it is put out of a window on some scaffolding some painters had placed there. It is now our plan to confine him on the 3rd floor.

St Paul 6th May 1891

The Superintendant
2nd Hospital for the Insane
Rochester
Minn

Dear Sir

To day my Nephew William Kelly was ordered by the Probate Judge of Ramsey County to the care of your Hospital. I no doubt by the time this reaches you he will be in your charge. I write to inform you that on 12th augt 89. I took him to the Hospital at Rochester but he escaped from there on the 15th augt 89 & wandered back to his Parents at Marmora Ontario abt 120 Miles East of Toronto. After being there for a few months they were compelled to have him sent to the Insane Hospital at Toronto Ont. but Escaped from there in about 2 months time & again returned to Marmora but the Authorities came for him & took him back and he has remained there till about 6 weeks ago when he Escaped again. He has been from that time till about a week ago making his way out here. I write you these facts to put you on your guard as I have not the least doubt he will always try to escape the first opportunity he gets

Rochester Minn. Wed. May 20 '91

My Dear Littel Wife:- Your letter came yesterday and the package this A.M. Thank you dear & Roy for everthing- dont send any more clothes or money till I send for them for I can get underclothes here if I want and money I dont need much of -- Now my darlings I want to tell you- My head has come back I am myslef again pray God it may never leave me again I dont know when I got right but yesterday as was looking in the glass- all at once I saw Newt- and fainted right away-they fanned me and took care of me but when I came to I was Newt just the same. This P.M. I have had a bath for two hours first they steamed me for an hour and then rubbed me for an hour and I am as well bodily as I ever was in my life. The only trouble now is I have those dreamy spells when I cant locate myself you have heard me speak of them but the Doctor says that will pass away in time the worst is passed and he says with my good health I will be as good as I was 20 years ago -head and all. But I must stay here till I get strong enough to bear excitement etc. so am going to float with the tide and let everything go at home- if I dont enquire about anything or people, dont think I care less but the less thinking I do the quicker I will see my darlings- Tell Ray to be as good to you as God ever let a boy be to his mother for my sake & it will help me so much as anything can.

Mr. Barnum has put me under obligations to him which I can never pay- but will see about that later. Should love to see Mr. Mullen should he call. I have a splendid appetite and sleep well now and of course have to be very regular here am taking 2 kinds of medicine & play cards pitch quoits eat & sleep & rest.

They have put me up another story in the best ward in the Hospital where the best patients are and it is very quiet no violent ones here. We have a billiard table an Organ & violin and once a week a ball in the building, you would laugh I suppose to see 300 crazy men & women dancing. Sunday we have religious services, which of course strikes me, I go any way for the change. But I tire easy so will stop Tell that big boy of mine to stand by me and his ma and well have a good time yet.

Much love to you both Pa. D. A. Newton

June 3-91. Am. P84 Tb) 100.8. Head all sore.

June 12-91. See attached copy of letter of this date. Patient's wife has sent him money in letters which

Personal and Medical History of Daniel H. Newton.

Put in History

Rochester, Wed. P.M., June 12-1891

Dear Wife & Boy:- I have waited 10 days or so for a word from you but none comes & so I suppose it is all settled.
You and Ray have got me in a place where you want me & calculate to keep me but I will fool them all. I start this week for Liverpool and London then St. Petersberg across Siberia, Japan Bering Sea to Alaska and if you want to see me you can meet me in Portland Or-

You said you would send a paper and did not. yesterday was your letter day and none came -last night I walked my room all night the door locked and window grated calling for you and you did not come- if it on acct of the dollar I wanted dont send it but for God Almightys sake send me a postal.
Ill burn the damed Institution, tear down the whole outfit if I dont hear from you tomorrow You know mama I dont deserve this I dont deserve it & cant bear this neglect any longer.

D.H. Newton

and Medical History of Daniel K. Newton.

now was brought by Dapty Sheriff L. K. Lucker with the following history. Has had attacks of insanity at various times last 3 days ago was taken with an attack which led to his commitment. Thinks now that he has lost his original head and that he is pursued by people who wants injure him. Is subject to fainting spells, during which he will lie unconscious for an hour or two at a time.

May 7-1891. Quiet. Slept about 7 hours. Up in line in morning. Tongue firm, badly coated, dryish. Pulse 105.

May 8-1891. Slept about 7 hours. Is constipated

May 12-91. He has slept from 6 to 8 hours each night since last note. Never noisy. This morning, pupils are somewhat unequal, left the larger.

May 15-91. Complains of constipation, headache & cold.

May 20/91. See letter of this date, in which patient describes his regaining his recognition of his own head. Dr cannot learn of patients having fainted away. Patient also stated to Dr to day that he has in spells, lost feeling when he cannot tell where he is, in place & time; not clear. Claims he used to look in the glass & could not recognise his head (as his own). That has now passed away. He does not know when the change occurred. Patient feels quite happy related conn his present state.

June 1-91. Complains of being "bilious".

June 2-91. Has sore throat; bones ache; tongue is coated; ordered to bed. Rm. P90 R20 T(t) 101.8

June 3-91. Am. P84 T(t) 100.8. Headache gone. Throat still sore. June 4/91 P. 96

June 12-91. See attached copy of letter of this date. Patient claims his wife has sent him money in letters which he never received.

July 2/91. Patient has slept well since admission. Has never been maniacal, noisy; conduct always good; habits neat, clean. Conversation free, not incoherent or irrational. Spoke freely in early part of stay here about his lost head - he had lost his own head some one's else; but usually did not speak of it unless questioned. Since may 20, patient has seemed free from this delusion; has lately also claimed to not have those "lost spells". Not very long ago, patient went into a "fainting spell". Dr called, found patient lying on a bed. He has called an attendant to his room. Spells consisted in closing eyes, relaxation of muscles & almost complete absence of breathing; the apparent unconsciousness to calls of his name; pulse at same time

Personal and Medical History of Daniel H. Newlon Cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

while some accelerated, was regular & quite strong; pupils dilated while lids closed, contract on their being opened. This condition last a few minutes or so, followed by a kind of arousing beginning with a deep sighing inspiration, opening of eyes continued accelerated breathing; pulse not much altered. Patient then lies quietly, somewhat listless, but answers questions rationally & well. After a time (2 or 3 minutes) passes again into the first described state. This cycle is repeated half a dozen to a dozen times when finally patient arouses himself more fully & says he is all right; that he will soon be well. He claims this is one of his "fainting" spells and that he has them not oftener than once a year. He feels better after them. Spells occurred just before dinner & patient went out on lawn in afternoon. Shaking patient & shouting to him seemed at times to be the cause of his arousal

Patient has expressed himself as ashamed of the letter of the 12th inst. Patient works well. Is active, full of banterings; active physically & mentally. Writes quite frequent letters.

July 9/91. 8 PM. Had been out in the rain; came in; took a warm bath; changed his clothing ate some supper and soon after went into one of his "spells". He had told his companion during the afternoon that he was going to have one of his spells and requested and urged the latter not to call the Dr.; and after the spell began patient tried to prevent attendant from going for the Dr. Dr saw patient in a spell of quiescence or absence of breathing and shook patient when the latter opened his eyes and began a spell of rapid breathing. Pulse accelerated & small.

July 10/91 Patient has been, as usual, since last note, up & around, waking quite lively and cheerful. Went home to day on trial.

Discharged

		Conversation, character of,	Quiet for. Pronunciation seems good in German.

Personal and Medical History of Georg Seimus.

This man was brought by Deputy Sheriff J. E. Hyland and J. W. Wadler with the following very incomplete history.
"We were unable to find out any thing from the patients and the Drs could not get him to answer any questions. In trying to get him to answer questions, he became angered and threw a chair at one of the Drs. Do not know any thing in particular about him. He has been here for about one year. Do not know if we got his name right. He has never made friends here and judging from appearances, and his actions today at examination, he is apt to be dangerous.
May 7-91. Slept only about one hour, but was not noisy. In morning was up in line but would say nothing when greeted. Looked quite ugly.
May 8-91. Slept about 4 hours. May 10/91 Slept about 6 hrs each past 2 nights. Quiet.
May 11-91 Is pale. He as said only one or two words since admission. Has been quiet + well behaved. Always up in line in morning visitation - by Drs. Does not answer greetings.
May 16-91. Spoke more freely when greeted by Dr + seemed pleased. Says his name is, I wrote it out for Dr. George Ziehenaus. He is a shoemaker. Talks no english.
July 2-91. Patient has apparently slept well since last few nights. Has all along been clean + tidy + quite obedient. While never breaking out into wrath or ugly conduct, has the air, during earlier part of stay especially, of one who would be easily provoked to an outburst, were simple addresses + questionings carried too far. Early in stay here, patient said nothing. Has lately talked quite freely. Conduct improved and patient was moved to B'. He has been well behaved there. Has not lately seemed to change much. Patient cannot converse with the majority of his companions. He has lately, while on ward, given a good deal of time to playing chess, which he probably plays quite well. He says he learned this game while in a Hosp in Germany. Patient has asked frequently for work + probably meaning he wished to learn here to go to work. At times acts as if he were impatient. No definite delusions detected so far; altho there is a difficulty in the way in that the patients language is not freely understood by the Drs.

Personal and Medical History of George Seimus.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Sep 20/91. Complains of some pain in his head. Is constipated. Pulse 81. Pt. Feels much better. Feb 8/92. Weight 125 pounds. Mar 2/92. During the summer our patient was not badly behaved, maniacal or noisy: he seemed considerably depressed and could not be persuaded to do much or any work. In some time past, however, he has been in some-what better physical condition, more cheerful, more interested in his surroundings: playing chess, talking with his companions as far as the his knowledge of their language would permit. Has lately for some time worked willingly with the Shoe-maker. On the afternoon of this date, behaved quite strangely and differently from his usual conduct, refusing to say anything, or to do anything that the Attendant requested, lying around on floor and by the heaters. He seemed unwell & acted as if his head ached. Was seen by the Dr who got from him no word except the assent to the Suggestion that his head did ache. Pulse 87.
Mar 14/92. Weight 124½ pounds. Mar 20/92. Has been idle for some time past, refusing to speak to the Dr and to shake hands, spending his time in solemn silence. Has at times a peculiar almost sardonic, grin.
April 4/92. Weight 133 pounds. May 3/92. Weight 132½ pounds. Pulse 98. Is somewhat more amiable & approachable. June 3/92. Wt 130½ pds. Pulse 91. Today, had a sudden attack; became suddenly blue & pale & weak; was put on the bed. Is not unconscious. When asked what is the matter, calls attention to some pimples & seems to indicate that his blood is out of order. Pulse taken before the attack was 91. Is now 96, while lying on the bed. Got up after a time. July 6/92. Wt 136 pds. Pulse 86. Aug 3/92. Wt 135 pds. Pulse 84. Sep 5/92. Wt 128 pds. Pulse 96. — Sep 25/92. Was found up, dressed & walking the floor last night, by the night-watch. — Oct 2/92. Was again found up, walking the floor, last night. Oct 31/92. Wt 124½ pds. Pulse 96. Has lost 10 pounds in the past 2 months. Nov 2/92. Is pale & anaemic. Wt 117½ pds. Pulse 92. Nov 5/92. Moved to B¹ from A¹ where he has been since August. Has been so disturbed lately & depressed that it was thought best to move him. Has been very surly, refusing to talk. Has failed in health. Nov 21/92. Has been uniformly quiet at night, apparently resting and sleeping well, as a rule. Since the spell of depression noted on the 5th inst, patient has grown more cheerful & active, asking to be permitted to go to work in the tailor-shop, where he is now employed. Bodily health seems better.
Jan 23/93. Is uniformly quiet at night, apparently resting well. Is subject to distinct spells of disturbance, when he is taciturn, restless & unapproachable & does not work. Between these spells, is pleasant & communicative, claiming that he feels well & works willingly. Fluctuates markedly in weight. Apl 13/93. Tried to pull down the gas fixtures over the billiard table; attacked one of the attendants with a piece of tube in the shape of a knife. Was moved to B³. — May 21/93. Since his removal to this ward, patient has been more or less restless & disturbed at night & on some nights noisy for from 1 to 2 hours. Sits around daily; goes out walking. Is inclined to be slouchy & untidy. At all times, taciturn & uncommunicative, for the most part. Weight Continues to fluctuate much.
May 31. 93. Appetite good. Bowels regular. Behavior fairly well. Is very quiet & does not speak much. Talk seems to be fairly good. Does not work any on

June 23. 93. Has complained of being ill, of late especially in the morning as
he don't like to get up.
July 1. Wt 133 P 80. July 14 Wt 132½ P 78. July 31. 93 Has had an light epileptic seizure
his last return on B1. Lasted for 2 days. Would walk on board & throw other patients
off, carpet. Aug 2/93. Wt 134 P 100. Aug 15/93 Transf to Annex. Sept 1/93 Quiet harmless
patient, walks the floor a good deal, seldom speaks, does no work. Health apparently good
Oct 6/93. Has talks a little of late otherwise no change. Nov 24. 93 Quiet & well behaved, talks
a little with the others in a sensible manner. Has been at work. Health apparently good
Dec 26. 93 Appears to be in poor health of late. Jan 1st 94. No change —
Feb. 12/94 Patient is failing. loss of appetite. tubercular. on medicine & extra diet.
March 24/94 Apr. 29/94. Previous note held good. May June & to July 31/94 Patient continues quiet
& well-behaved; inoffensive; sits in the one place, most of the time; talks a little, when addressed and then
quite rationally. For some time past has been more cleanly about his person & appearance. Health is poor.
Aug Sept & to Oct 31/94. During these 3 months, little or no change is observable - Is quiet, well behaved.
Seldom speaks - Habits clean; dress somewhat untidy of late. Health poor. Does not want to go walking; Does no work.
Nov. 94 Quiet Dec. 94 has been working with shoemaker for several days. —
Jan 1 95 - Night nurse reports him as destructive to clothing, having torn off his
clothing & thrown them out of the window. Feby March & to April 30/95. Patient, during this
quarter, has been quiet & well-behaved. Lazy & indolent. Does no work. Once in a while, will work in
the shoe-shop, but soon tires of it. Is demented: at times, destructive & dirty in habits rather dirty.
He is noticing about his dress & appearance. Health seems poor. May, June & to July 31/95. No change
to report, in any way, for this quarter, though health seems somewhat improved, of late. -
Aug Sept & to Oct 31/95. Keeps about the same from month to month: stupid & demented: has done
no work for a long time: seldom speaks. Health seems good. Nov 1/95. Wt 145 pds. P 80. About as usual.
Nov. Dec & to Jany 31/96. No change to note. Stupid & dull: no work: sits in one place & rubs his hands
Continually. Health seems good.

Summary Nurses Notes by Dr. Phelps Feb 1/96 to Aug 1/97 Patient quiet: stubborn: does no work:
seldom speaks: is quite demented: No bodily illness noted. Picks finger nails & keeps
them sore: In Feb. 97 patient was noted as having failed somewhat: Wt having
gone from 153 to 135 lbs. Was placed upon Infirmary where he stayed about
3 weeks presenting no any special illness altho he had a slight cough:
Transferred back to Annex Wt May 1/97 141½ lbs. Aug 1 Wt. 136. Oct. 31 97 Health
good: Laughs to himself a good deal: Clean in habits: Does no work: Fairly quiet
in behavior: March 31 98 Noted as being rather destructive to bedding & clothing of late:
Jan 31 99 No change in behavior of late (Rept by Dr Wanamaker) Feb 1 - July 31, 99 Wt 140 to Feb 13
noisy, sleepless & destructive to bedding & clothing: July 31 Well behaved: Has had
several spells of destructive behavior. Has delusions & talks to self. (Rept by Dr Phelps)
Aug 1 99 to Jan 31 1900 Wt 139½ Nov 1 - Wt 145 No change: physical cond: quite good:
neat in dress: seldom talks: untidy: does nothing: subject to restless & destructive
attacks.

Patient brought by deputy with history; with
Commitment papers alone.
[illegible] influence of
[illegible] of delirium
[illegible] Sick ward
2690
[illegible] watchman he
[illegible] he is all mustning.
[illegible] slept 4 hrs. Pulse
[illegible] ssed. Eats poorly.
[illegible] nlaults.

Mr. T. H. Bromley; took the treatment by Hypodermic and prescription of Strychnia with some little of Chlride of Gold toward the last, with the rest. Could not take, however, so large doses, and had occasional headache lasting a day or two from the same, together with several times cramping pains in his bowels. His health, however, was quite uniformly good. He did not take so large doses as did the others, but claimsthat the prescription has done him a good deal of good in depriving him of the taste for liquor, although he seems still to be quite apprehensive of [illegible] abcess. (For general comment concerning treatment see attached slips Vol 18 page [illegible])

[illegible] night. Was up
[illegible] some. in morning; pulse 100; tremibles some; ate some; drinks eggnog.
Was some quieter; feels some better.
May 11-1891 Slept about 2/3 of night.
May 12-1891. Slept well without sedation during night.
May 17-1891. He as been out working. Complains that he caught cold.
May 18-1891. Cold persists. Was in bed yesterday. Up now. T. 96 to 100.2. Has tickling in throat & chest. Is stuffed up; has general soreness & coughs.
June 26-1891. Patient began work out in lawn after a few days spent in ward after coming. He slept quite well. Was comparatively free from tremblings. Took food better. Complained of feeling weak & of his cold. Worked quite faithfully. Some time ago (a week or two) patient told the night that he should not work any more unless discharged as patient & put in pay. Patient then remained in the ward a few days, when he concluded to resume work; however wanted to go.
Went away to day alone.
July 9/91. Returned today. July 10/91. Slept about 5½ hours last night. Ate nothing this morning; is very nervous & tremulous. Put on special diet. July 11/91. Slept nearly all night but restlessly. July 15/91. Has been sleeping 8 and 9 hours per night—
July 23/91. Has had pain in right wrist for some days; of a rheumatic nature—
Aug 2/91. Has had a cough for some time; considered as due to chronic bronchitis.
Aug 19/91. Complains of constipation and occipital headache.
Sept 28/91. Has caught a renewed cold & has cough. Oct 11/91. Weighed 137 pds four or 5 weeks ago: 132 pounds one week ago. Still coughs. Oct 25/91. Still feels badly & coughs. Weight decreasing. Recently weighing 130½ pounds.
Nov 19/91. Still losing flesh & has no appetite.
Nov 25/91. Has had diarrhoea for past 3 days, accompanied by some colicky pains.

Personal and Medical History of Andreas Knudson.

This man was brought by Dapty Shriff Kinney with a very meagre history of having been intemperate, that insanity was first manifested ten days ago, has asked to be killed, was confined in Jail for 5 days.

On admission: Is composed; talks coherently. Claims he is all right now. Deply reports that patient had improved so much since examination before Judge of Probate, that that official examining Dr had considered advisibility of not sending patient to Hospital. Conduct for last few days reported as rational. Mental condition at time of examination considered as due to liquor.

May 12-1891. Patient was quiet all night & slept about 6 hrs. Makes request to know how long he will have to stay here. Says he has a brother in Santa Ansgas Iowa, where he was intending to go when he went to St Paul, from Wisconsin

May 13-1891. Slept about 8 hours. Was quiet.

May 14-1891. Slept about 8 hours. May 15-1891. Slept 7 hours.

June 8-1891. Is constipated.

June 12-1891. On examination to day, there was noted some slight motor symptoms: e.g. some unsteadiness in use of legs in feets; some tremulousness of the tongue & twitching of facial muscles while protruding the tongue; & movements some shaky. These are not present at all times. Memory confused for events occurring about the time of coming here. Was closely questioned as to his movements after leaving home in Wis & in journey to St Paul & while in St Paul. Result showed that he had lost track of exact time spent in different places & on the journey. Had an approximate idea of the time trains were taken. Claims he left Madison & went to Dousman Minn bound for St Angas Iowa; changed his plans here & went to Minneapolis & then to St Paul. Cannot give a clear account. When attention called to conflicting statements & to lack of details, explains it by saying he was under influence of liquor. At times, when questioned on his conduct, seemed to grow suspicious & hesitated to answer & laughs at the questions. He thought the Dr might keep him longer if he told of any of his bad conduct.

Since coming here, he has not talked very much with attendants & fellow patients; he did not care to do so because fellow patients are not quite good enough condition to talk with and attendants are down on him or indifferent to him. Discharged Aug 12 — 1891

Personal and Medical History of Andreas Knudson Cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

June 21-1891. Patient has been quiet & slept well at night since admission. Has not been markedly physically sick. Complained of constipation; & had an eruption in face. Ask for medicine "for blood"; put on Dowlers solution. Conduct during day, quiet; clean & tidy. Never maniacal. Worked some on ward; more anxious to work outside, but was suspected of intention to run away; worked for a short time in storeroom but those in charge considered that his conduct indicated an intention to elope. While on ward, sat around considerable apart from others & slept in his chair. Conversed with Drs quite freely; usually asked to be allowed to work or when he could go home. He claimed that he was all right. Wrote letters to relations; those to Pat. in St Augars were all returned. A Brain law firm Dowa was reached by mail, & came on this date & took patient away. From a letter of the 10th inst to bro. the following is extracted: "Got in a saloon, filled with some drug or poison & was robbed. Got crazy on this account." Claims in letter that he is sane; no omission of words; handwriting poor; no deterioration from beginning toward end of letter.

Personal and Medical History of G. W. Gillen.

This man was brought by Deputy Sheriff Kenney with the following history. Insanity which was manifested one month ago in St Paul by blank cerebration & dementia. Was in St Paul City Hospital for one month.

On admission: Came in at 9pm & was put on sick ward. Soon went to sleep.

May 12-1891. Slept until 5 am. Was quiet. In morning, was up in time. Pulse 66, strong. Left pupil a trifle larger than rt.; nearly normal. Tongue slightly coated, moist & protruded in jerky manner.

June 8-1891. Patient cries to day; seems weak; ate no breakfast; has headache; P. 72 T 100.1 Bn P 64. In bed to day

June 9-1891. Up. Fell while walking; seems to lose control of legs. Patellar reflex much exaggerated and spasmodic.

June 22-1891. On examination, among other things were noted: inequality of pupils; jerky irregular movements of tongue; twitching of face; tremulousness of hands; irregular gait; that legs twitch & fly around awkwardly & uncontrolled at times & may fall. Reported as running into obstacles. At times seems to have better control of muscles & their coordination; e.g. can stand with feet together & eyes bandaged. Cannot stand on either foot alone. Mental characteristics clearly those of dementia. Sentences are unfinished; speech incoherent; words stumbled over & followed by silent working of mouth as if to articulate. Patellar reflexes much exaggerated; there is ankle clonus.

July 6-1891. In afternoon, shook & stumbled & seemed sick. Put to bed. Got up to stool. P 96. Lying down P 78. Shaking of nervous origin apparently.

July 7-1891. Up and around. So tremulous & seems weak, possibly from lack of control of muscles. Pulse strong, some accelerated. Pupils unequal.

For some time after admission, patient, while dull & stupid, was quiet & clean & not destructive; slept well and ate well. Has lately grown worse. Incoordination is worse. Mental confusion seems even worse. Falls more frequently. Patient interferes with fellows; even pushes them or knocks them over occasionally. Says almost nothing completely. Is now beginning destruction & disarranges his clothing. Maintains quite fair flesh.

July 13/91 Has attached check with details of condition since 8th inst.

Aug 29/91 Patient in his usual aimlessness, fell early this morning. Examination of right elbow showed a cut about size of the palm.

Feby/1900. Wt 149#. Pat. Mar 5. Transferred to IW. Complains some. Has sign of pleurisy & swelling on fore-arm Mar 6. Abscess on fore-arm opened. Mar 12. Abscess on right arm opened. Apl 11. Patient is upon ward. has improved considerably but is still weak: signs of pleurisy have disappeared. May 10. Right side again painful & swelling apparent over lower ribs: has fever. May 25. Condition has been steadily growing worse. Pain in side & increase of swelling. Was, today, anesthetized & thoracic wall opened & localized Empyema evacuated: packed with gauze. June 25. Wound nearly healed: patient is up on ward: condition much improved. Is very quiet: speaks only when addressed. July 7. Vaccinated result negative. July 31. Still improving physically: goes out for exercise. Is well-behaved & tidy. Is mighty demented & does no work. Augs/1900. Wt 136#. Pat. Augs. Transferred to annex. Wound on side is nearly healed: discharges slightly. Sept 10. To D3. Dec 15. Has been working for a few days, in Shoe Shop. Dec 19. Has transferred to IW. Is in a restless & destructive "spell": no special physical ailment. Dec 29. Has transferred to D5: is still destructive and restless. Jany 31/1901 More quiet: otherwise unchanged. Feby 2. Wt 119#: May 1. Wt 138#: Augt 1. Wt 143#: Nov 1. Wt 146#. Jany 31/02. Has worked some, of late, on ward: did nothing during first part of year. Sits about quietly, but, at times, becomes quite restless, tearing up bed-clothing, and garments, at night. Is never violent: health good. Jef 31/02. No special change: works some on ward: at times, becomes very confused & destructive to clothing: otherwise, not troublesome. Sept 27/02. Eloped: was brought back by a farmer. ——— Jany 3/03. Worked a little on farm, during fall, but has since done nothing. Usually quiet, but has "destructive spells": habits untidy. —

Person

PIONEER PRESS CO., PRINTERS

The appearance of deformity suggest fracture or dislocation, but careful examination led to diagnosis of simple bruise + swelling - The cut was over the point of the olecranon and extend quite deep, down to the bone. The cut was washed + dressed antiseptically.

Sept 3/91 Patient has been kept in bed until to day. Disturbs removes dressings of his arm as fast as they can be replaced.

Sept 4/91. This morning, seems stupid; lies with eyes closed; is pale and shaking. Hands cold. Put to bed. P. 78 T 99.5. Arm dressed. Bro Pulse 68, has vibrating thrill. Dull. Has lain quietly in bed all day.

Sept 9/91. Has been in bed since last note. Has failed rapidly during entire day here, both mentally and physically and to day died. Case clearly one of General Paresis. Buried here No relatins know. See attached sheet.

Died.

Condition has been steadily growing worse. Pain in side + increase of swelling. Was, today, anesthetized + thoracic wall opened + localized Empyema evacuated: packed with gauze. June 25. Wound nearly healed: patient is up on ward: condition much improved. Is very quiet: speaks only when addressed. July 7. Vaccinated; result negative. July 31. Still improving physically: goes out for exercise. Dwell-bet awed + busy. Roughly demented + does no work. Aug 1/1900. Wt 176#. P50. Aug 11. Transferred to Annex. Wound on side is nearly healed: discharges slightly. Sep 10. To D3. Dec 11. Has been working for a few days, in Shoe Shop. Dec 19. Was transferred to IW. Is in a restless + destructive "spell"; no special physical ailment. Dec 19. Was transferred to D1: is still destructive and restless. Jany 31/1901. More quiet: otherwise unchanged. Feby 2. Wt 119#: May 1. Wt 138#: Aug 1. Wt 143#: Nov 1. Wt 148#. Jany 3/02. Has worked some, of late, on ward: did nothing during fore part of year. Sits about quietly, but, at times, becomes quite restless tearing up bed-clothing, and garments, at night. Is never violent: health good. Jly 31/02. No special change: works some on ward: at times, becomes very confused + destructive to clothing: otherwise, not troublesome. Sept 22/02: Eloped: was brought back by a farmer. Jany 3/03. Worked a little on farm, during fall, but has since done nothing. Usually quiet, but has "destructive spells": habits untidy. —

Gynecological exam.,		Illusions,	
		Conversation, character of,	

Personal and Medical History of Oscar Johnson.

This man was brought by Dapty Sheriff Atts Johnson with the following history. Insanity was first manifested May 10th 1891 by an attempt to cut his throat saying that his Brother would if he did not and is also said to have illusions.

On admission: Put under suicidal watch.

May 12-1891. Was quiet and slept well.

May 13-1891. Slept well all night. Conjunctiva are yellow.

May 14-1891. Slept well, as usual. May 15-91. Slept as usual.

June 6-1891 Has been out working; came in at noon & went to bed. Chilly, has headache. P 72, some intermittent; R 22. T 101 102.7. Has epigastric tenderness and coated tongue.

June 7-1891. Up, feels better. P 87. Is constipated.

June 29-1891. On examination to day, the following facts noted: His usual wt is 175 lbs. Weighed 4 wks ago 166, now 167 lbs. Patient has good nutrition; large full chest; Pulse 66, some ringing sound over apex of heart; had rheumatism 8 yrs ago.

Patient stated as a reason for his being sent, that he thinks he must have been in way of somebody; he happened to see a couple of men go to a place where they ought not to go, and one of them said to that he had better leave town. Put replied to man that they need have no fear.

Says he worked up to Saturday night before coming here. Had been drinking some; thinks it possible he may have been confused by liquor; he had not been eating much for about a week. he could not readily explain why he had not eaten well; thought it because he had been taking too much beer; he did not eat because he did not go for his meals; ate a good breakfast sunday morning & then nothing until Tuesday a.m. following when he took his first meal here. Had no quarrel or trouble with his family. Thinks he had not been drinking enough to make him drunk. Denies ever having thought of cutting his throat & that his brother or any one was down on him (& threatened his life).

July 1891. Since coming here, has slept well; eaten well; been clean & tidy; not talking much unless questioned but answering questions coherently & rationally; has not seemed depressed unless when sick on 6th ward. Has for some time been working outside at carpentering. Has a good deal of liberty & does not seemed inclined to abuse it. Was visited by brother in law on June 1-

PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.	
Height,	5 ft 11"	Mental activity,	Quite active.
Weight,	167 #		
Nutrition of body,	Fair.	Memory,	Somewhat confused.
Wounds or abnormalities,	Scar on right leg.		
Tongue,	Pulse, white, fibrillary muscular movements.	Perceptivity,	Seems good. Gets a little mixed.
Pupils,	Responsive to light poorly. Equal, contracted, sluggish.		
Sight,	Poor for age. Wears glasses.	Reasoning power,	—
Hearing,	Right ear much impaired Left some impaired.		
Co-ordination,	A little unsteady.	Emotional state,	Says he has felt sad. Feels happy now.
Reflexes,	Pat. Normal or slightly diminished.		
Heart,	Pulse 112. An impulse and murmur over mitral cartilage.	Delusions,	?
Lungs,	Seem good.		
Examination urine,		Hallucinations,	Hears sound of feet occasionally. No voices.
Gynecological exam.,		Illusions,	
		Conversation, character of,	Talks freely. Claims his hands are steady, — his nerves are steady. Claims he is better and working.

Personal and Medical History of Atlas Lincoln.

This man was brought by Deputy Sheriff Otto Johnson with the history of having threatened to bring cable & boat through any one. Says he was paralyzed 6 years ago.

May 12-1891. Was quiet & slept about 6 hours. Up in line in morning; is forward in greeting officers.

May 14-1891. Quiet & slept about 7 hrs each during past 2 nights.

May 15/91. Slept 7 hours last night & was quiet.

July 6/91. Has a boil on his forehead and last night face was noticed as swollen and red. Patient was isolated for fear of the disease being erysipelas. Face is still some swollen today. Does not seem more so than last evening.

July 7/91. The disease proves not to be erysipelas & patient is permitted to get up.

July 4/92. Patient's physical health has been uniformly good since admission; there being no physical sickness to record, except the slight one noted above. Patient has been up & around daily claiming at all times to feel first-rate. At night he has been uniformly quiet, and apparently has slept well. His personal habits, as far as dress & cleanliness are concerned, have been uniformly good. Patient was quite active, physically and mentally. Was of a cheerful nature, always smiling and pleasant, fond of the jocose. In fact, his light-heartedness seemed, at times, almost unnatural under the circumstances. He was very fond of attending his wooden hand with a peculiar hitch by which he opened the thumb, for shaking hands with the Drs & others. He was free in conversation & was, in fact, very fond of talking. In his conversation he did not show any marked degree of incoherence, or reveal any distinct delusion. Read some, and played games. Has for some time past been writing his mother, through dictation to some other patient or attendant. When questioned in regard to his idea that he could see through people and read their thoughts, he hesitated and made some partial defense of the claim, but did not seem to think it a very important matter.

Patient is undoubtedly of rather feeble mind with this rather illy-defined delusion. Was today sent home alone.

Personal and Medical History of John Patterson.

This man was brought by Capty Sheriff Johnson with the following history of insanity being first manifested 4 or 5 months ago by breakdown and a disposition to wander away from Hospital, Home & Farm.

On admission: Put in sick ward, under night nurse.

May 12-1891. Slept well after 11 pm. In morning, was up in line; says almost nothing, when questioned; pupils equal & much contracted; tongue quite clean & moist, fairly steady.

May 22-1891. Has no control of bladder. Urine thick & dark. Has headache.

July 7-1891. On examination, there was some unequality of pupils & difference in patellar reflexes. There is a limp in Rt side; right half of body some weakened from hemiplegia. There is marked dementia; dull expression of countenance; silent idleness, of body & mind; stammering or slow speech; indifference of emotions. Slouchy & at times dirty habits. Patient showed ~~a little~~ signs of pleasure at being examined. Patient has been quiet, sleeping well. Has a good appetite. Never speaks unless addressed. Talks no English. Does no work & seems incapable of working.

Oct 7/91. Was today examined by Dr Phelps. The following was noted: Tongue can hardly be protruded. Pupils are pin-hole, left smaller; do not respond to light. Hearing is some impaired. Co-ordination is poor: cannot stand at all on either foot alone: right hand is fairly steady; left has tremor in doing anything; there is some paralysis on the right side: patellar reflex quite markedly exaggerated, the right more than the left: the mental state is that of deep dementia. Patient can speak but very little; stumbles over words when he does speak. Saliva is apt to drop from mouth. There is a blackness of the face in both sides. Diagnosis is between organic dementia and general paralysis.

Nov 13/91. Had a spell of helplessness on attempting to get up. Returned to bed himself. There is no unconsciousness or paralysis. Pulse 52. R 22. T(R) 97.4. — PM. T(R) 98.4. Nov 14/91. AM. Pulse 66. R 18. T(R) 98.4. Vomited during the night. PM. Pulse 70. R 26. T(R) 99. Nov 15/91 Am Pulse 74. R 22. T(R) 98.4. PM. Pulse 73 R 20. T(R) 98.4. ———

Jan 2/92. Got up from the above attack in a few days. Is taken sick again to-day and went to bed. PM Pulse 88. R 30. T(R) 103. Tongue is coated. 10 PM. Pulse 112. Jan 3/92. AM. Pulse 86. R 25. T(R) 99.2. Patient fell out of bed & bruised his face, which is now red & swollen. Refused food yesterday. There is no increase of paralysis. Jan 4/92. T(R) 99.4. Bowels moved this morning. Is mentally lighter. PM. T(R) 99. Jan 5/92. Am. Pulse 70. R 18. T(R) 99.2. Does not want to get up. Jan 6/92. Am. Pulse 74. R 16. T(R) 98.4. PM Is up on ward & dressed. Feb 5/92. Weight 146 pounds. Mar 7/92. Weight 151½ pounds.

Personal and Medical History of John Peterson #3

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Apl 4/92. Weight 152 pounds. May 3/92. Weight 151½ pounds. Pulse 78. Physical health is quite uniform. Has not been sick abed since January. Is dirty & demented. June 3/92. Wt 150 lbs. Pulse 80. June 20/92. Had an attack of sickness yesterday. Is up today and feels better. July 6/92. Wt 151 lbs. Pulse 78. Aug 3/92. Wt 150 lbs. Pulse 78. Sep 5/92 Wt 153 lbs. Pulse 64. Oct 4/92. Wt 153 lbs. Pulse 60. Nov 2/92. Wt 154 lbs. Pulse 86. Nov 11/92. Had a spell of sleeplessness this morning, staggering & falling about. Voluntarily lying down on the bed after a time. There is no local paralysis. Is conscious. Gets up. Is induced to remain in bed. Nov 13/92. Is in bed; is weak; seems not otherwise sick; Eat quite well. Nov 18/92. Has kept his bed since the last note. Pulse has been counted; found to vary not much from normal. at times between 70 and 80; usually between 60 and 70. Breathing is wheezing; there are numerous sibilant wheezing rales in chest; abdomen is distended & tympanitic. — Nov 19/92. Is eating very poorly lately. Nov 20/92. Abdomen still distended. Breathing wheezy; and accompanied with a cough at times. Nov 21/92. During the past 6 months, has been about as described in notes preceding that time. Uniformly quiet, resting & sleeping well. Quiet dull & inactive by day. Contented apparently, saying nothing; slow & ataxic in gait. In the present attack, has kept his bed up to date. Is without fever; pulse not much disturbed; breathing is asthmatic; abdomen distended & tense. Probably constipated. Nov 26/92. Has been obstinately constipated. Bowels moved slightly today. Dec 2/92. Eat irregularly. — Dec 12/92. Keeps his bed up to date. Gets up & walks to the water-closet, however. Lost heavily in weight this past months.

Jan 23/93. Has kept his bed steadily since the above notes. An attempt was made to get him up, but he seemed too weak to stay up. Pulse, counted for some time, was always between 60 & 70. No fever. Takes food quite well at present. Apl 6/93. Has been in bed the past 2 days; is weak; cannot stand on feet. April 7/93. Today, transfered to 6th – the "Sick-ward." April 8/93. Lies quietly in bed. Appears dull & sluggish & paretic in behavior. May 1/93. Still lies quietly in bed – Takes a reasonable amount of nourishment, chiefly, liquid food. May 5/93. Is quite restless today, sitting up in bed. May 6/93. Sluggish and paretic, lying prone or back in a lifeless, stupid way – Answers in a half intelligent monosyllable. May 14/93. Lies in bed, in a typically paretic way; face sluggish. Speech almost absent. May 17/93 – Bowels, for some time past, have been moving freely; moved a number of times to day. May 24/93. Lies quietly in bed; no activity – seems to sleep a good deal. June 6/93. Remains the same from day to day. Lies prone or back. June 8/93. Mouth seems sore today. June 11/93. Takes what nourishment is given him. Sleeps a good deal of the time. June 14/93. Has been taking very little nourishment the past few days. June 17/93. Has a beginning bed-sore on hip. June 19/93. Too weak today to be weighed. Seems to have difficulty in swallowing. Is apparently failing. June 21/93. Took but very little food this morning. 4 P.M. Is perspiring profusely. Respiration labored. Is rapidly failing. Died at 10. P.M. — (See Clinical record attached).

Comments. This patient, though senile, has most of the motor symptoms & the general appearance and decline of General Paresis; so typical were the symptoms that the age can hardly set them aside.

Remains were buried here.

Died.

CASE OF THOMAS BURMINGHAM. EXAMINED JUNE 12TH 1891.

After a considerable conversation the patient gave a very clear and quite reasonable account of his family and their different relations to oneanother, of himself and the work which he had done during the winter and even to a great degree of the things which he had been accused of doing as unreasonable. He is quite garulous in his talk and has to be interrupted or he will run off on side issues. He claims that his son Jim has been bad off his mind and that he is now the one that put him in here. That he has run away from home several times and has been unmanagable always and that the day before coming he overheard him say to his wife that they ought to put him in some Charitable Institution and they, the sons, would take care of her and the other boy who is sickly. Declared himself as of not filthy habits and never exposing his person. ~~EXXIXXXX~~ Described the buildings he was making and gives the reasons for them. A wood shed and a stable as he was expecting to have a cow and horse. Quit working as late as lo o'clock and sometimes getting up early in the morning. Says however that he never staid up all night and never slept out of doors. So far he had talked quite reasonably. But upon some rapid questioning concerning the bring home the leg of a dead horse and feeding to the dog, he became rather confused. First saying he only kept it a couple of weeks, kept it in the snow, then saying that it was not gone 'till the time of his coming here or about the first of May. Then perceiving faintly that a few weeks would not cover this time amounting to about three months, he said that it might be as much as six weeks and seemed to not try to reconcile the six weeks with the three months of time needed. Having said that he always kept it in the snow and thus kept it in good condition, he tried to account for it by saying that the snow lasted until about the first 9 May and could only be partially shaken from this statement in any way. He insisted that the frost was in the ground until the middle of June. So that he as a mason was unable to work until that time. Upon cross questioning admitted that perhaps he might begin work earlyer but not at a profit. Admitted that the flesh could not keep for even two days in hot weather, butt seemed to deny that there was any warm weather of the kind in the month of April. Made the statement also positively that he slept in a room by himself for the first few nights here; whereas there were three beds in each of the rooms upon his ward. He also stated that Mr. Willis had not said things ~~truthfully~~ which Dr. Baker remembers hearing him say. The attendant upon questioning says that for the first ~~b~~few days he seemed to be unable to find his room and to remember things. Says also that he seemed to be wanting to bathe frequently a good many times a day. And in such ways seemed a little confused. Als said that he had come down here to do some Mason work and keptasking to go out seeming not to realize he was confined here.

During his talk he talked very inteligently upon most subjects but seemed to be rather forgetful toward the last and quite confused as will be seen upon some of the subjects mentioned.

MENTAL CHARACTERISTICS.

Second Minnesota Hospital for the Insane
Superintendent's Office

EXAMINATION ON ADMISSION. THOMAS BIRMINGHAM.

Physiical Characteristics
Height 5'11"
Weight 167 lbs .
Nutrition of Body fair.
Wounds or Abnormalities scar on r.leg.
Tongue pale white, furred, moist
Pupils eq. contracted, do not enlarge as much in dark as normal. respect light.
Sight fair for age, wears glasses
Coordination a little unsteady, good
Heart, P.112 arter stiff only impulse at rt. if ensiform here found a murmer
Lungs seem good.

Mental Characteristics.
Mental Activity Quite active
Memory seems some confused
Perceptivity seems good.
Reasoning Power
Emotional State, says he has felt ~~sad, discouraged, now normal~~ happy now.
Delusions (?)
Hearing- r.much impaired l some
Reflexes, Patel norm or dimin st about equal.

Examination of Urine

Hallucinations, hears sounds of bell occasionally, no voices.
Gynicological Exam. (now 30) "Sin Jim" a mean scoundrel a sober scoundrel a wide awake ruffian, says he is quarelsome, gets into fights at times- James does not go to Church James has been coming to and going from home since 16 years has behaved quite well never gives the father any of his money. Mr.B. overheard the son talking to mother, "father is getting old and we had better put him in some charitable Institution and we will care for Johny and you" Patient thinks his wife (8-1o years younger than pat.) was not firm minded or she wo ld not have assented to the plan. Says with regret that his wife has been saucy to him. Has a farm in Wright Co. 12o acres with some mortgage on it and has house costing 13oo dollars; which he bought of real estate dealer, who persuaded the patient that he could work a garden and have cows.
Thinks his son and wife do not bthink him insane. His wife is an industrious clean housekeeper, she is a spiteful passionate woman.
Tom boards at home, he does not know whether Tom knows where he has been sent. Depty Kinney and another came for him. Son did not go to Court House, says there was no witness examined. He was introduced to several gentlemen but fdid not know them. They questioned him. Claims he did not look for work this last winter & spring because he thought Mr. Leo his former employer, would send for him. He thinks the frost is not out of the ground until the middle of May Dr. Phelps leaving at this point) says that gentleman does not know what he is talking about. He was sure the frost was not out of the ground.. Patient wears a cord around neck and a little bag. attached containing salt petre for rheummatism he says he sweats and the salt dissolves and is absorbed.

Conversation, Character of. Talks freely, claims his hands are are steady- his nerves are steady. Claims he is better out working

"to kill her" as he vomited at the time. During the past year he remained up often until 3 and 5 o'clock in the morning making useless articles, as canes out of pieces of board &c. When he retired he went to bed with all his clothing including boots, & could not be induced to change his clothes. The latter

Rochester June 16th 1891.

Mr. Thomas Graves:-

Dear Sir:- it is now 2 weeks since I wrote you. I must say that you answered it both promptly and quick for which I thank you You said the Governor was not at home, but would be home Saturday or Monday and that you would write to me again and let me know what he had to say to my case.

It is over a week now since he came home and I would like to know the result of your interview.

Mr. Willis or Lawyer Willis from St. Paul, and another gentleman by the name of Clark, I think, who is one of the Commissionors of the Asylum.

Mr. Willis knew me well as soon as he saw me at the time my unlucky boys traded off my mare I was in his office. I wanted to see him to plead my case. He remembered me well. We had a warm shake hands.

Fiend Thomas, you dont know how much comfort you woulf feel when a friend visits you in an Institution like this. It will almost pay a man who will have pleanty of money to spend and pleanty of time to spare to come down here and go through of this Concern. I am tired of it.

Friend Thomas, I will conclude for the by,

Hoping to hear from you soon.

Give my respects to Mrs. Drake. I remain your affectionate friend,

Thomas C. Burmingham.

N. B. Friend Thomas there is no one the wiser for what is going on between you and me. Yours etc.

Thoas C. Burmingham.

N. B. Friend Thomas I have wrote you a few lines in the 23rd of May please let me know if you got that letter. This is the 3rd letter I have written to you. Excuse my long letter hoping to hear from you soon I will conclude.

ON.

See ref on p. 227.

-dence and who, he said, was a good boy. He describes his father as always of rather ill-balanced temperament, going to great extremes and says that last winter, was so violent that the children were not safe in the house with him. He has been temperate until within the past 2 or 3 years, during which time he has been drinking to excess. One evening last winter he came home drunk and was with difficulty prevented from entering the room where his wife lay dangerously sick, "to kill her" as he vowed at the time. During the past winter he remained up often until 3 and 5 o'clock in the morning making useless articles, as canes out of pieces of board &c. When he retired he went to bed with all his clothing including boots, &c; and he could not be induced to change his clothes. The letter

Rochester May 30th 1891.

Mr. Thomas Grace% It is just one week since I wrote to you Not getting an answer I thought it best to write you again. I dont know whether that letter reached you or not. They tell me here that a great many letters written here are destroyed or never sent, to their destination. I am of the opinion that is the case with my letter. What I was sent here for is something I cant understand. The best ide I have was a conversation that I heard passing between my oldest son James and his mother. I happened to be up stairs they did not know it; the following conversation passed between them. He said to his mother, Father is getting old now we will take care of you. We are better put him in some charitable In stitution. I lost track of the remainder of the conversation But friend Thomas I believe that conversation has put me here. I am informed that I sho ld be brought a Doctor and examined and pronounced insane beforelzwas put here. There was no such examination Mr. Kinney (The sub Sherif) did not even tell me where I was going I am amongst a lot of crazy people hare its enough to make a man crazy to be look ng at them. So dear Thomas I wrote to you hoping you will be kind enough to use your influence to get me out of here. If you get me out of hare I will never forget it for you I can also assure that no one will be the wiser That is I ill tell no body if you dont think proper to do so. Friend Thomas if you get me out of here I shall never forget your kindness.

Give my respects Mrs. Grace Hoping to hear from you soon I remainy your Humble Friend.

Thomas C. Birmingham.

ersonal and Medical History of Thomas Birmingham.

man was brought by Dapty Sheriff Kinney with the following history. ast Fall he began to stay up all night colluting old lumber and building uelless sheds and barns. These buildings are entirely worthless. All winter he has been working at these. On moonlight nights he works all night commonly does not go to bd. when he does does not take his clothes off. Ugly at times. Shortly ago he brought home an old dead, dreamed horse which he has kept was since. He cuts grass off this & feed his dog and keeps it covered upin the back yard" "Very dirty, exposes his person. Commonly stays awake all night. Lately has been sleeping in the yard in the day time".

Discharged Aug 12 - 1891

May 14/91. Was quiet all last night and says he slept well. Watchman reports, however, that he waked up every time he opened his door. Am. Wants to go home — Does not know why he was brought here, and wants to know. He thought the Deputy had brought him down on business.
May 15/91. Patient was often awake - probably did not sleep more than half the night
May 18/91. Seems to have slept better and quite well since last note. Has scam in his leg and hands are chapped. May 21/91. Patient is constipated —
June 1/91. Is troubled repeatedly with constipation. June 11/91. Is still calling for laxatives; his only physical complaint being constipation — Complexion is rather sallow and pupils are contracted —
June 12/91. See the attached detailed record of an examination made today. Patient has been writing to friends in St. Paul, claiming that he was sent here by the conspiracy of his wife and one son. A member of the State Board of Corrections and Charities has seen and examined patient.
June 16/91. See letter, in letter file, written by the patient's Youngest son, Thomas, Jr, at the request of D. Phelps for further information concerning patient's conduct before coming here. This son is one in whom the patient expressed perfect confidence and who, he said, was a good boy. He describes his father as always of rather ill-balanced temperament, going to great extremes and says that, last winter, was so violent that the children were not safe in the house with him. He has been temperate until within the past 2 or 3 years, during which time he has been drinking to excess. One morning last winter he came home drunk and was with difficulty prevented from entering the room where his wife lay, dangerously sick, "to kill her" as he vowed at the time. During the past winter he remained up often until 3 and 5 o'clock in the morning making useless articles, as canes out of pieces of board &c. When he retired he went to bed with all his clothing, including boots, &c; and he could not be induced to change his clothes. The letter

Personal and Medical History of Joseph N. Hyde.

This man was brought here by Deputy Sheriff A. Hiland and W.W. Peters with the following history. Insanity first manifested 10 days ago subsequent to an attack of Delirium Tremens. Says that some persons are trying to kill him. Deputy states that he has hallucinations and illusions and delusions of persecution. – That while in jail he thought people were drawing sand on him and he put a towel over his head.

July 6-1891. Says he saw gophers running up wall previous to his being committed, also other things of similar nature. Said he had drank very little for last year. Thought he could see things when he could not. Would go to put his hand on them and they would not be there. Says that about 9 yrs ago, had a gathering in right ear and that it discharged about a pint a day which was followed in with a chill and afterwards ear-ache. Confirmed that there was an acute inf. of the middle ear. Says memory has not been so good since that time as formerly. Had chills and sweats alternately during the period of his illness. He was very much reduced in flesh by this attack.

May 15-1891. Not found awake during night by watchman; evidently slept well.

May 19-91. He has been quiet, sleeping well. Asks for camphor for which, made sore by hypodermic given before coming here he claims.

May 25-91. Constipated. Given Cathartic pills.

June 12-91. Feels badly; head sore, general soreness; dizzy when on feet. Tongue markedly coated; breath foul; P 93 T(R) 101.4°; P 66 lying down. Ordered to keep bed. Given dose of calomel.

June 13-91. Bowels moved freely; tongue coated. P 90. Feels better. Is up.

June 18-91. Has caught cold. Lying down in p.m. June 20/91 Constipated

July 6-91. At examination, today, some facts drawn out are noted above, first note. Patient states that any attack of any kind affects him around the heart + in the back of the head – especially since he had the suppurating disease there.

July 7-91. Has slept quietly + well. Has been quiet, clean + very tidy. Has been pleasant in manner; free in conversation when addressed, coherent + rational. Has not shown any decided delusion or hallucinations since coming here. Patient claims he was all over that when he got here. He says a hypodermic given him by the Dr at home made him feel strange + led to his flightiness. Acknowledges seeing animals.

Walks some on ward; reads a good deal. Desirous to go home.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

July 16/91. Went home today alone, on trial.

Personal and Medical History of Emil Bragg.

This man was brought by Deputy Theo Dahl and Mr Michael Crow with the following history. Evidently had an acute Brain Disease manifested by a Choreiform attack and followed by a maniacal outburst. Was in City Hospital for a few days. At present is unmanageable, noisy, violent and has maniacal excitement.

Admission: Not able to sit up or walk. Carried in by Deputys. Emaciated & eyes dark & sunken.
In a state of restless activity; pays no attention or almost none to surroundings. Carried & put in sick ward. Reached Hospital at about 7 pm. At 10 pm, was examined by Dr. Pulse very rapid & poor. Temperature (rectal) 105.0°F. Restless, noisy; given hypodermic 11:30 Pm P 137.

May 15 1891. 3:30 am. P 141. Temp 104.0°F. 4 am. Given milk, & fed asleep. 5:30 Given milk again. Slept about 4½ hrs continuously and got snatches of sleep afterwards. Has been fed about a pint of milk. 8 am. Pulse 150, small & soft. Temp. (R) 105.5°F.; is very noisy & restless; is kept in bed; tosses hands about restlessly & aimlessly; pays no heed to presence of any one. Attention secured for a few seconds at a time only; got him to speak a broken name tho' indistinctly. Took some food.

1:20 Pm. P. 145 R 24. Sleeping

6:00 Pm. P. cannot be felt at wrist or but feebly. Takes some eggnog. Temp. (rectal) 106.5°F.

9 Pm. Watchman reports: is wriggling most of the time. Gave him milk. will take only a little at a time.

9:45 Pm P. 164 very weak.

10:00 Pm. Given hypodermic injection.

11:00 " Went to sleep for 10 min & awoke.

12:00 Pm More restless than ever. Talks almost incessantly,

May 16-1891. 1:30 am. Temp. (R) 105.2. Visited by Dr & hypoderm given.

2:30 am. P 160 Hypodermics given by nurse, of antipyrin

3:15 am. Temp. 105.3

5 am. Pulse too feeble to count, R. 33. Temp. (R) 105.5°. Seems in a stupor. Slept but a short nap at a time.

8 am. In a stupor, some twitching. Heart sounds 164. Temp. (R) 105.6°F.

10:00 am. Died.

~~Hyperchlorhydrous~~	Hands seem tremulous.	Illusions,	
		Conversation, character of,	Pronunciation bothers with recital.

Personal and Medical History of Philip Kuhn.

This man was brought by Deputy N.T. Schwartz with the following history. "Wandered into Stillwater and was placed in Jail. Insomnia and hallucinations and attempts to do himself bodily injury." Insanity was manifested by "wandering and illusions" "Last night in Jail endeavored to injure himself by throwing himself against the side of the cell" Nothing known of his immediate previous history. Thinks probably was of alcoholic drinks was predisposing cause.

On admission: Quiet, well behaved. Put in suicidal dormitory.

May 16/91. Was quiet all night and slept well.

May 17-91. Was again quiet & slept well.

July 31-91. In conversation to day, gave an account of his life and of certain family difficulties. He claimed to have opened up a farm for his mother, doing the hard work, extending over a period of 7 years; that his mother then gave the farm (deeded) to a brother; the brother on finding that our patient was vexed by the act, returned the farm & deed to the mother. The mother later sold part of the farm. Patient has tried to live at home since these unpleasant occurrences took place. He wanted his family to move (away from farm) to St Paul but they would not go. Patient left the farm & went about working, chiefly at carpentering, in Benson, Stillwater & St Paul. He has not worked on the farm for 2 years. Was in Stillwater when sent here.

Patient thinks he has not been drunk much; that he has not drunk any more heavily lately, just before coming here. Patient can remember his ideas; one is that he thought (while in Stillwater) that he was on a street car riding down hill, where there was no car. Patient claims that he also wandered out among farmers, from place to place. Heard voices & talked with them. Cannot remember much about what they said. These voices he claims have been gone since a few days after coming here. Cannot remember trying to harm himself.

Aug 3-1891. Patient slept well from date of admission. Has been regular in habits, eating well. From first day was quietly up in line, answering questions quietly. Did not seem much depressed. Always clean & tidy. Quite soon after admission began working; was

Personal and Medical History of Phillip Kuhn (Klein.)

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

a willing + fairly efficient worker. After a time, patient went to work in the stewards dept., store room, and did well. Remained quite steadily at work here until time of leaving. Always seemed quite cheerful.
Physical health good. Letters from friends of the family were received, telling of patient's apparent desertion of his wife + of her anxiety to hear concerning him. Patient was spoken to concerning the matter and asked by Dr. to write his wife. Patient neglected to do so however.
Went home (away) to day alone on trial.

Rochester Hospital, Minn. Oct 5 '91

Dear Brother, I got your letter on the Sunday following your writing, and welcomed it rejoicingly and was surprised at its reception. I did not expect any assistance whatever from you and am very sorry for you to trouble youeself about sending me any whatever for I am not in nedd of any money. I get most everything I want here and again I am not to say hard taken and I am not to say sick only once in a while . I had worked Railroading last summer runing out of Minneapolis, and took sick I expect to be here two or three months yet, I will write of and on to you while here. When you write again let me know all about my brothers and sisters, mother as I would like to know about them. As I have not heard from them since the year 1886. When I wasup in the British Dominions on the Police Forge, I am sorry to say the circumstances that have befallen on me are I would have thought of it long ago if it were not for it. Be that as it may, I may possibly get around that way some day I came down from Montana last spring a year ago and I saw Henry James in Butte City he was working there. That is the only one of the boys I saw from there since I left there.

Yours Truly/

M.J.W.

address your letters the same way J.D.

Rochest4r Hospital, Minn.

I am sorry to use that name, but I dont want to change it, bein as I came here under it. I do not need any assistance from you whatever and I am a thousand times obliged to yours and never shall forget you again

Thomas J.Walsh,

Write soon.

Sept. 18th'91.

Dear Brother Martin Halsp. As I have not written for a long time, I now take the pains to write you hoping to hear from you, letting you know my whereabouts. I am at present in Rochester Hospital sick. I was working between St?Paul & Minneapolis and took sick and I am not very bad; hope to be all well in a month or so. That is about the extent of my correspondence. For this time you must excuse me for this, I am not in very good humor at present. Let me hear from all the people in and around that vicinity and I will write you again soon.

Address your letter to James Dunkirk, and do not forget that address. I will write you a better letter next time. your Brother.
Month, Sept, Saturday, 1891. State of Minnesota.
Address James Dunkirk, Rochester Hospital Minnesota. That is all from me at present.

...al and Medical History of James Dunkirk.

...man was brought here by Deputy Sheriff V.C. Howard with the following history. Insanity said to have been caused by Confinement in State Prison where he was serving out a sentence at time of attack which began about 2 months ago with refusal to work, hallucinations and tendency to injure others. Insanity now manifested by incoherency and illusions. Has been at times quarrelsome from sudden passion. Has been in solitary confinement for about 10 days and has refused to take medicine to any extent. July 6th 1891. Says he had things his own way in Stillwater for a while. They chained him up & had to take him down again at once. Says that while he was confined in Jail at St Cloud awaiting trial he took all sorts of medicines to cure Catarrh. Says he refused to work because he was locked up. Says they did not try to make him work. "But I can't understand it". Realizes the fact that he has been off & remembers his ideas at times of attacks. Had been drinking heavily before going to Stillwater. Says he had D.T. while at the Penitentiary.

May 17-91. Was noisy greater part of night; sleep possibly 2 hrs. In morning, up in time; Pulse 114; skin hot; tongue coated; incoherent. Rx Ig quinidex.

May 18-1891. Was noisy some during night. Ran P 96, tongue coated. Rx P 120 & more Tm 101.; incoherent, noisy, very active. Struggles when taken hold of.

May 19-1891. Is excited; has periods of excessive ugliness. Is incoherent. Rx P 130 & more, excited, noisy Tm 101.8; sitting P. 111.

May 20-1891. Eats well. Slept some. P 120 Tm 101.6.

May 21-1891. P. 84. Quieter. Has been shut in room most of the time up to date. Out in hall now. Eats well.

May 25-1891. Pain in throat & lame back, he claims.

June 16-1891. Is worse again. Restless, sleepless last night. Whispering to himself now.

June 17-1891. Is shut up to day; noisy, constantly talking. Hit one of the attendants.

June 18-91. Still shut up. Noisy, restless; constipated.

June 19-91. Has been wild to day

June 22-91. Shut up. Was tapping steam pipe & asked what he was doing said; he was telegraphing around the world; repeats the same thing; incoherent; profane & vulgar. June 25/91 Chés.

July 6-91. Examined in greater detail. See opposite page & note above, of this date. Statements of patient.

Personal and Medical History of James Dunkirk Cont.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

July 7-91. Above notes give an idea of patients condition. Patient was in a state of active maniacal excitement at the time of his admission; was noisy, restless, ugly, striking attendant; resisting handled & examined; answering questions curtly & angrily. Sleepless, noisy at night in a measure. Did not however become decidedly destructive nor demonstrative much. Had some fever; bowels moved; pulse rapid at times; took food & medicine quite readily. Patient was secluded in a room for sometime but was not restrained to bed. His appearance was sthenic. About May 21. there was some improvement with several relapses. Patient became gradually more coherent & rational, calmer; remained on hall during day. Began asking to be allowed to go. About the 16th inst. patient again became maniacal & had to be shut up. Was obstinately constipated for a time. Gradually quieted down & is now quite calm. Is out in ward. Talks quite freely when questioned. Has gained in wt.

July 30/91. Became maniacal & excited last evening. Is noisy & restless. Denudes himself.
Aug 2/91. Is badly excited. Aug 11/91 hard to keep clothes on today
Sept 1/91. Is in another maniacal spell & is in seclusion.
Sept 2/91. Ate no supper nor breakfast. Is in his room. Is wildly maniacal.
Sept 4/91. Has evidently a dislocation of the left shoulder which was quite easily put in place. Sept 13/91. Will keep no clothing on. Is wildly excited. Scratches himself. Sep 17/91. Is better & quieter today. Is out on the hall. Voice is hoarse; made so by the great amount of talking & yelling. Oct 10/91. Has been better since last note, until yesterday when he began to grow restless. Is now maniacal & shut up.
Oct 17/91. Patient has been taking food rather poorly and was put on eggnog ——
Oct 24/91. Is again calmer; says he does not sleep well, and complains his mind wanders.
Nov 19/91. Is again growing excited and noisy. Nov 20/91. Is somewhat quieter.
Nov 24/91. Denudes himself. Is somewhat quieter. Nov 28/91. Kept his bed all day today; does not appear very sick; has refused food for 3 meals. Nov 29/91. Is noisy but remains in bed; ate his breakfast. Dec 9/91. Complains that he has a sick headache; is in bed. Pulse 84. Dec 12/91. Is again sick abed, pulse not much accelerated, but small. Dec 15/91. Tore up his bedding and his clothing & will keep nothing on. Dec 16/91. Is fairly quiet while in his room, but when taken out on the hall, gets wild and unmanageable. Keeps his underclothing on & stays in bed, part of the time.
Dec 19/91. Is constipated. Dec 27/91. Claims he does not sleep well, and that for several nights he has not slept a wink.
Feb 27/92. Complained of lame neck & back, several different times, and today of a dull headache & a feeling of weight about his neck. Mar 4/92. Weight 161½ pds Pulse 76.
Apl 4/92. Weight 158½ pounds. Pulse 80. May 3/92. Weight 158 pounds; pulse 100.
Patient has not lately had a typical maniacal spell, but has been quite restless,

Rochester Asylum,

State of Minnesota, May 13th'92.

Dear Sister and mouther:- I write you again letting you know how I feel. At present I am doing fine and am getting over all of my foolishness now. I was ina peculiar perdicament for the last year, cause by my own hand. Thank God, I am getting over it now. Since I caused myself so foolish I may say I have lost all manhood in regard people looking for through faith. There is one class of people here put me down as everything, in order to hide their own sins. Now mother:- I say to you that me and you never could agree, owing to Church matters, and you were right as far as you were concerned, and I was not sure then either. But owing to you driving me away from home, on that account have hunted it up and have found proof. Now you must not feel bad for me telling this, because if I live, I expect to be good friends with you any how and see you again, and never take it to heart, what I am writing you, because such a thing was bound to be found out some day or other and I know the secrets of the whole world and I forgive you every thing that has happende between us and w ll be friendly in corresponding if nothing else. Do not be frightened at this writing, for such a law could not last all of the time. I am outlawed here by the State of Minnesota, and I can not say what they are going to do with me. The State is trying to claim Christianity, for I say there aint a blessed woman or man under the sun, not before they make new commands. Now I could have saved allmof this trouble, but I thought they took m efor another man, and when I seen the way things was, I could not yield to them. They took me for eating of the forbidden fruit at Stillwater, which if I had to done the poison which they gave me they would have killed me , and I took it because I didnotcare whether I lived or didnt. Than I got in prison on account of the Catarrh. It was my first time to be locked up and it went hard with me. Now I hope you will write to me and let me know all about my brothers and sisters, because I would be a dead man, if I did not have a pure heart, and I fear death yet on account of the poison I took and it is hard to say how soon it will ~~break~~ break or last. But no matter when it breaks, I will die happy and I will never go inside of the Catholic Church again, and I will say to you that the mother of God aint blessed any more, for I have revealed every thing just on account of right and what I was looking for and if I had to been a forbidden fruit eater, I could not do it. Now I will tell you to send a letter, by the name I was arrested and that is, James W.Dunkirk. When I gave that name I was crazy with the Catarrh, and I never will have another sts name while I live, and expect to name myself from the state. The name Dunkirk is a State name, in the State of New York, which place I took Dunkirk from. Now w at has made me t is way is the Catarrh. It has made me ashamed of myself, every place I have went, and I dont care any more, what happens me.

Address you letter,

James W.Dunkirk,
Asylum, Rochester, Minn.

party pursuits, [illegible], especially in [illegible]. refused regular medication. Has been quiet and tractable. Has been up the past few days, but still feels badly & coughs & expectorates. Jan 23/93. Uniformly quiet at night for some time. Up daily but does not feel very well.

		Conversation, character of,	Will talk but little

Patient brought here by father and mother - Symptoms were first manifested three years ago - Has kicked and abused at that time by husband - Has not been well since - Has tried to injure others at times - No disposition to filthy or destructive habits - No restraint - Has been treated for Syphilis

May - 26 - 1891. Patient has done very quietly since coming - has made no trouble except in eating - Has brightened up a little at times, but usually will not talk - Health seems good.

Nov. 29" 91 Patient is not violent, but is apt to be very vulgar & silly. Has been in the past quite violent at times.

Jan 7" 92 Has been secluded several times for exceedingly vulgar & loud talker. Is quite noisy & has been violent - several times striking her mother once quite severely.

Jan 9" 92 Is to day in bed - Is mentally quite healthy, is said to be seeming considerable to day.

Mch 4" 92. Has been very well of late, taken part in the Masquerade & has been better behaved in every way. Is very silly however, & rather intractable.

July 16" 91 Patient has remained upon B-2, but is quite restless & uncertain in manner. Is apt to strike impulsively at other patients, or even attendants, at almost any time.

Sept 9" 92 Has not been violent toward any one for a considerably time. Her health good, behavior about as in the past. Rather quiet usually, but easily irritated & uncertain in behavior ~~Sept 9" 92~~ Manner does not change quite usually, violent occasionally, health good.

Sept 30" Patient eats well, vomits after eating sometimes, sleeps well, bowels regular, menstruated from 10 - 15th, behavior quiet usually. Oct 8" scolds some, has done nothing violent for some time. Oct 30" tears up her dresses some times, is quite noisy & inclined to fight; lately, vomits some most every day.

Nov. 92 Eats well, vomits once in a while, noisy at times, always being around on the benches or floor.

Jan. 25" 93 Appetite good, sleeps well usually, behavior noisy at times, does no work, menstruated 23" 26", talks in a silly, incoherent way.

~~Feb~~ Feb 24 93 Notes well behaved of late, reckless & careless in talk & manner. General health has been good, menstruated 27"

Personal and Medical History of Eugene L. Talbot.

Personal and Medical History of Mary Fleischhacker

Patient brought here by Mr. Kinney Dep. Sh. & Mr. Acken. Symptoms have first manifested themselves one year ago after the birth of her child. Was in St Peter Hospital 2 yrs ago for eleven months. Claims that she is the mother of Christ that she is divine. Hallucinations. Said to have made assaults on neighbors. No disposition to filthy or destructive habits. No peculiarities of temper habits etc.

May. 26 - 1891 - Patient claims to be Mother of Jesus.

Nov. 7" '91 Patient is quite noisy for a few days at a time, then will be quiet for a week or two, scolds very loudly.

Dec. 28" '91 Is bed, seems to have no especial sickness however, has been generally healthy.

Mch 4" '92 Has fair physical condition, scolds, hollows very loudly & angrily at times, although usually does not seem violent.

July 13" '92 Patient remains upon C-1, is in fairly good health, but quite irritable in manner, & at times will scold quite violently, although is rarely violent in behavior.

Sept 9" '92 Still remains upon C-1. At times her noisiness is quite a disturbing element & she would be better upon the lower ward, if there was room for her. Her health is good, however, & she is rarely violent or destructive, although is somewhat untidy. Her talk does not show any coherence, nor does she make any requests, nor complaints.

Sept 29" '92 Violent & disturbed in manner at times, usually quiet, scolds loudly, without much cause, does no work.

Sept 30" Appetite good, sleeps well generally, has not been sick in bed this mo, was secluded one ho, bowels regular, behavior violent & very noisy by times. Does no work & sits quiet most of the time, talks very noisy, will answer questions correctly, at times.

Oct 26 Noisy only 2 ds, in past 3 weeks, usually quiet, does no work, sits about, talks rarely except to scold. Nov. 29 Appetite good, sleeps well, menstruation absent, bowels regular, sits quiet most of the time, very noisy & violent at times. Is now on C-1 & under watch

Jan 29 '93 Eats well, untidy habits, does no work, behavior noisy at times, sit in chair most of time, sleeps well, menstruation absent.

Feb 21 Appetite good, untidy, no work, talks very loudly & sits in chair. Does not move around at all.

Personal and Medical History of M. Fleischhacker.

Behavior noisy at times. Has delusions. Bowels reg. Tidy in habits. Menstruation absent. June 11.94 Extremely noisy about 1 hr. July 1.94 Very much the same. Very noisy at times. Takes no interest in her surroundings. Gen health good. Aug 23.94 Very violent. Fought to day. Entry noisy & talking very loudly. Aug 31.94. Has become violent & extremely noisy at times now. Sept. 4.94 Appetite good. Sleeps well. Does no work. Talk. and scolds in a very loud manner. Clean in habits. Has delusions. Bowels regular.
Oct. 1.94 Is becoming very noisy and violent. Oct. 9.94 Moved to Annex. Nov 27.94 No change, is very noisy

Personal and Medical History of Mary Fleischhacker.

1895 Jan 31. Appetite good. Clean in habits but rather untidy in personal appearance. Is occasionally very noisy, talks loud. Gen. health good. Goes riding and walking.
March 7.95. Came on Infirmary ward on a/c of broken arm. During her stay after her arm was set put in plaster paris cast. She slept very little the first few days – Expectorated a great deal. She usually sat up in bed. Bowels moved regularly & freely when sleep improved since March 13. Appetite very poor at the beginning became normal since March 12. Was visited by relatives Mch 19. Tonic which was given to her she refused to take after Mch 13. She continued to expectorate considerably was partly restless & noisy and sometimes very weak & breathing seemed became some difficult. Feet much swollen & livid & she was then quiet, but did not sleep much and in April 5 bed sores & livid blotches on swelling of left lower limbs. Pulse weak and thready like. Her appetite failed, she only took milk. Wine was given to her & Strychnine, 1 doses of gr 1/30, was given hypodermically – she also took brandy, but her strength failed rapidly and she

Died April 8th at 5 P.M.

Personal and Medical History of Catherine Petersen

Patient brought here by Mr Kenney & McAdam. Symptoms were manifested about three yrs ago and has been gradually growing worse. Hears strange voices and sees strange objects. No disposition to injure others - No disposition to destructive or filthy habits - Seemingly worried over not getting married. No restraint - Was treated last fall and improved somewhat

May 26 1891. Patient slipped into the routine of the Ward as if she had always been there - Quiet - No complaints - no wishes - Eats all day long - Eats & sleeps well - Admits the hallucinations ~~& says she is the Mother of Jesus in the most placid & matter of fact way~~.

Nov. 12" '91. Patient remains upon A-2, has been usually considered quite quiet, but is at times quite noisy & to day complains of a sore throat. Is usually healthy, quiet, & makes no complaint of any kind.

Mch 4" '92. Still remains upon A-2, Has fair appetite & physical condition. Walks rapidly & vulgarly, goes walking & riding, takes care of herself, but is occasionally filthy, is quite irritable in manner. Wt. is 128 lbs.

Sept 9" '92. Patient remained upon A-2 until 1 week ago, when she was moved, on account of excessive noisy talk through the windows & untidy & filthy habits, & tendency toward violent behavior. This patient has never talked in the way of holding conversations with us, & her behavior has gradually become worse, until as described.

Jan 31" 93 Looks bad in face, but eats well & says does not feel sick, Throws thing at table at times.

Feb 24" About the same, irritable at times.

April 24 No change in any way

May 1 Seems failing in health. Sits idly about. July 27. 93 Appetite good. Is rather noisy quite thin. Rides & walks. Gen health good. Oct. 21. 93 Appetite fair. Is quite noisy occasionally. Habits clean. Gen health improved. Febr. 17. 94 Appetite fair. Is quite noisy. Looks thin, but seems to get out well. Does riding & walking. Apr 20 94 Appetite good. Is clean in habits. Growing thin in flesh. Is quite noisy. Goes riding & walking. Gen health good. July 15 94 Appetite good. Clean in habits. Is quite noisy. Talks incoherently. Goes riding & walking. Gen health good. Oct. 27. 94. Appetite good. Dirty & untidy in habits. Is very noisy. Talking loud & stamping her feet on the floor. Talks incoherently. Goes riding & walking. Gen health good. Febr. 11. 95. Personal and Medical History of Barbara Obrecht

Patient brought here by Alex. Anderson Dep. Sh. & Jane Anderson. Has had attacks at different times for several years. When she exhibits fits of anger, destroyed clothing, furniture, and threatened the neighbors. Mornings of commitment burned her bedding, clothing and furniture.

May 26-1891. Patient is quiet & seemingly contented to sit all day on bench on the ward, neither sewing or reading & caring for what is going on about her. Health seems good. Clean in habits. Admits burning things but excuses self. Says it was too old to move and she had to move and so burned it. Seems to think she is doing well to live here without work.

Aug 12-1891 Now at Annex No work Quiet. Clean. Health good

Sept 14-1891 No change

Dec 29-1891 General health good No change.

Feb 4-1892 No work Sits quietly on the ward. Neat in appearance No change mentally

March 4-1892 General health good Has spells of scolding at times. No work.

May 1-1892 Appetite good. Sleeps well and looks well. Refuses to do any work. Sits on a bench gazing around in a blank way. Never manifests any interest in anything. Never speaks unless to scold. Quite irritable at times.

Oct. 5-1892 Generally quite irritable and has spells of scolding. Talks very incoherently & has many delusions. Appetite good. Sleeps well. Goes out riding and walking

Nov 22-1892 General health has been good. Refuses to do any work. Takes no interest in anything. Very irritable and acts insulted if asked to work.

Jan. 30. 93 Generally sits quietly on ward, but often when visitors go through, will go up to them & ask for money &c. Very irritable at times. General health has been good.

Feb 24 Sits idly on ward, no work, quiet but easily excited.

April 24 Irritable & cross when disturbed. Sometimes very noisy. Never works or talks sensibly. Sits idly on a bench from morning to night.

May 20. 93 Very dull. No work. Gen. health good. July 27. 93 Appetite good. Habits clean. Quite noisy at times. Scolds a good deal but is not violent. Rides & walks. Gen health good

July 29. 93 Visited by friends. ~~Appetite good. Clean in habits. Very noisy~~

Personal and Medical History of Augusta Benson

Patient brought here by C. N. Kirk and wife Symptoms of insanity first manifested about two months ago - Had fears of being arrested and later bodily harm. Symptoms manifest an religion and fortune telling - No destructive or filthy habits No restraint has been employed - Has been under medical treatment at times. Seems to do well under Bromides

May. 26 - 1891. Patient has been quite quiet & reasonable - Does not talk quite freely - Health quite good. Is easily afraid at patients who are noisy. Today, upon being told that a friend had called to see, was taken suddenly sick, chilly & trembling & complaining of pain in abdomen Given dose laudanum - Quiet thereafter it all. Went to bed - Hot water bags - Says has had pain in uterine region for 6 weeks, more or less all the time. Upon questioning she admits that friends told her of what a fortune - teller had told. Says they told of things she had never mentioned to anyone -

Aug 15 - 1891 went to St Paul -

Feb 15 - 1892 Returned in an excited state of mind Has many delusions

Aug. 11" 92. Patient still remains upon 6 - 1, & how she has been since her return. It has been very difficult however, at times, to keep her there, as she would be noisy & even violent - at times. Has been destructive to property, although usually in a sly & secreted manner. Her general health has been good, has done considerable work at crocheting &c. Sept 20" 92 Menstruates at about the 12" Eats well, regular, not constipated, quiet but mischievous & violent - at times, & incoherent. Oct 26" Silly at times, deluded always, health fair, manner irritable, has been quite mischievous in the past. Nov. 28" Appetite good, sleeps well, bowels regular, behavior quiet - sleeps well. Feb. 21" Appetite good, sleeps well, tidy, behavior quiet; talks silly at times, does no work, has been much more bright of late, but is not ambitious nor does she have any requests to make. Feb. 28" Appetite good, tidy, quiet; sleeps well, does no work.

March 1. 93. Appetite good Tidy in habits. Behavior silly at times noisy - Bowels regular Does some work at times in dining room. Sleeps well - Menstruated about the 14th - Behavior during time most quiet. Talks quite naturally at times.

May 31. 1893 Appetite good Bowels regular Does no work.

Personal and Medical History of Augusta Benson.

Personal and Medical History of Annie M. Colbraith

Patient brought here by son and daughter. This attack dates from a severe illness two yrs ago. She attempted suicide at that time. Talk is incoherent and has delusions of great injury being done to her. Imagines that she has committed some great sin. Deplored crisis & moans. Has no dispositions to filthy or destructive habits. No bodily disease. Has been confined at home during one of her spells of depression. Has been under medical treatment at the Sanitarium at Hudson Wis. with negative results. One year ago had severe attack of La Grippe followed by Rheumatic symptoms.

May. 26-1891. Patient is quite polite & usually quiet. Will at times moan during hours, walk up & down & tell of the how bad she is, & how wrong she has been. Wants to go home. Eats & sleeps fairly well. Is quite ladylike & neat in all her ways aside from this. Is a case of Melancholia Agitata.

Nov. 4-1891. Patient has been failing during the last month. Grows emaciated & weak. Her friends were telegraphed today as she has become rapidly worse. Nov 6. Taken home by them. The state during the Summer has been one of great depression & of slow decline. A monotonous condition of mild agitated melancholia.

Discharged Feb 5-1892

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

March 27/93. Had one of his "ugly spells" this afternoon - struck two of the attendants; was wild & violent. Got his head bruised in the struggle - May 21/93. Is quiet at night & probably rests & sleeps well. With the exception noted above, has had had no "violent spell" up to date; this, doubtless, owing to the close watch now kept upon him in C[3] - Occasionally complains of soreness in stomach; this may possibly be caused by constipation - For some time past has been fairly well behaved for him. Is in good health. -
May 31/93. Appetite is very good. Bowels regular. Had a spell of coughing for some time: has chronic catarrh. Complains, at times, of pains in chest & back. There has been no "violent spell" during the month. Is inclined to be destructive & mischievous on the ward. No injuries noted. Is irritable & profane; not inclined to say much. - Untidy in habits. June 3/93. Wt 153 pds. Pulse 90. June 30/93. Appetite remains good. Bowels regular. No apparent change from last month. Has spells, during month, of being ugly & silly. Works a little on ward, each morning - Mischievous & destructive. On 15th inst. had a fight with a fellow - patient & received some bruises on face. July 2/93. Weight 158½ pds Pulse 75.
July 3/93. Just before supper, this evening, patient was missed - Has not been found. Eloped while out on the Grounds. July 7/93. Was found in the woods this morning by an attendant & returned. Said "he was coming back of his own accord as he found it too hard to work at civil" - Was put again in C[3] -
July 3 93 Made his escape from the Hospital July 7. Found near the grounds and returned without any objection. Quite rational and good humored. Says outside life is pretty tough. Had a spell lasting 6 or 8 days per not ugly or noisy but inclined to be mischievous at times. Appetite fair. Bowels irregular, Behavior fair, Visits room, Seclusion none. Transferred to Fergus Falls July 31. 93

		Enunciation	fair.

Personal and Medical History of Henry Winklemann.

This man was brought by Dupty Sheriff Sucker and Dr Crow with the following history. Was arrested on the Street of Minneapolis on account of his excited actions, and constant talk. Insanity is manifested by delusions, hallucinations, and excited and irrational talk.

May 23-1891. Put in C3. Was noisy some during night. Slept abt 4 hrs. In afternoon tears his clothing all up.

May 24-1891. Was noisy considerable during night. Slept about 4 hours.

May 25-1891. Slept only 2 hrs. Was noisier than before, exceedingly part of the time. Am. Is shut up. Tears clothing; P. 84, tongue moist.

May 26-1891. Slept 2 hrs. Noisy by night & day. When in motion noisy P 120; when quieter P 90. Tongue slightly coated & dryish. Tm 100.8

May 27-1891. Slept 1 hr. Noisy at night. Out in hall to day. P. 78 small. Is restless (but less noisy); Eats well.

May 28-91. Slept only 2 hrs; noisy. Am. Shut in room, restless; P 99, strong. Pm P 105; tears clothing & denudes himself.

May 29-91. Slept only 1½ hrs. Noisy. Restless to day

May 30-91. Slept 3 hrs. Noisy when awake. Am. On hall, dressed; P. 78, rather small. Tongue some coated. Pm. Is very noisy.

May 31-91. Slept about 6 hrs Am P. 88; quieter Pm Very noisy. P 96. Tongue dry.

June 1-91. Slept about 5 hours. Is quieter P. 84. (Am).

June 2-91. Slept " 5 hours. June 3/91. Slept 2 hrs. Noisy. Am. Restless occas noisy.

June 5-91. Slept 5 hrs, each, last two nights. June 11-91. Has been quieter at night & slept better.

July 8-1891. Patient gradually became less actively maniacal, less distinctive, less noisy & sleeping better. Up in ward during day. Always more or less restless, unbuttoning clothing, keeps tidy with difficulty, scowling, muttering or talking loudly or turning away when addressed or interferred with. Never very approachable. Not very aggressively quarrelsome however. Health suffered some from restless sleepless activity. Has improved some lately physically. When recently examined, patient tried with reluctance & evident suspicion some tests applied. Also muttered to himself. Is unpleasant in look. Distinct delusions not made out; possibly due to the foreign tongue of patient.

Sept 13/91. Patient has been persistently maniacal and noisy, day and night since last note: having been given a sleeping dose of Chloral & Hyoscyamus almost daily. Is noted as talking noisily to day.

Sept 27/91. Sleeping doses discontinued this date.

Nov 22/91. Is much more rational & coherent & is quieter. Walks now

Personal and Medical History of Henry Winkleman

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

and is gaining in flesh. Dec 15/91. Has been so well behaved that he was moved to B'. a few days ago. A slight bruise on his nose has become infected with erysipelas. Dec 16/91. Was kept in bed to day; pulse 105. T(R) 103·2. Dec 17/91. Face is better and patient feels better. Pulse 76. Dec 18/91. Patient got up on this date. Dec 23/91. Patient has continued to feel well & is now up on the ward. —

Feb 6/92. Weight 164 pounds. Mar 4/92 Weight 166½ pds. Apl 4/92 Wt 171½ pounds. May 3/92. Weight 172 pounds. Pulse 88. Is quiet & well behaved. Pleasant and works well. Plays games & is quite bright & cheerful. June 3/92. Wt 172½ pds. (Is on B'.) July 6/92. Is out working; in laundry. Aug 3/92. Wt 165 pds. Pulse 110. Has been moved to F'. — Sep 5/92. Wt 167 pds. Pulse 90. Oct 4/92. Wt 161½ pds. Pulse 94. Oct 30/92. Is constipated. Nov 2/92. Wt 154 pds. Pulse 88. A decrease in weight, which is quite marked, since June 3d., probably largely due to quite active out-door work, at which patient has been engaged for some time past. Nov 16/92. For months past, patient has been uniformly quiet at night, resting and sleeping well. By day, has been clean, tidy & well-behaved. Quite free in conversation, apparently coherent and free from definite delusions. Has been active physically, working quite well, playing games, when on the ward, desiring strongly to go home but still cheerful. Having opportunity to escape, but honorably observing his privileges. His conversation is entirely in German and it has been impossible, to make out, for a certainty all that he says; but, on one or two occasions those understanding his language have attempted to prove him and have found him coherent & rational. Has had a manner & laugh which some have considered as a sign of feeblemindedness, but which the attending physician looked upon as merely a sign of good nature. —

Work had been secured for him and he was permitted, today, to leave.

Discharged.

EXAMINATION ON ADMISSION.

	PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.
Height,	5 ft 4 3/4 in	Mental activity,	Fair - Talks freely.
Weight,	127 lbs. Usually 140.		
Nutrition of body,		Memory,	Seems inaccurate.
Wounds or abnormalities,	Soft tumor on scalp.		
Tongue,	Coated, dry & unsteady.	Perceptivity,	Poor.
Pupils,	Normal.		
Sight,	Seems impaired.	Reasoning power,	Poor.
Hearing,	Much impaired.		
Co-ordination,	Hands good. Cannot stand on one foot.	Emotional state,	Seems exalted.
Reflexes,	Pat. Normal. Progress limited.		
Heart,	Acting rapidly from excitement of exam.	Delusions,	Thinks his sons have poisoned him.
Lungs,	Probably fair.		
Examination urine,		Hallucinations,	?
Gynecological exam.,	Talked very harshly and noisily while being examined	Illusions,	?
		Conversation, character of,	Talks freely & generously. Communication fair.

This man was brought by Deputy Sheriff Tucker & Mr Crow with the following history. History states "Being considered insane by the court, his son Arthur was appointed his guardian in 1881. Thinks that he has been poisoned that his son Dennis is at the head of a conspiracy & poison him.

May 23-1891. Slept pretty well, tho' awake several times. Talked very irrationally & has delusions of a not very definite character.

June 29-1891. Visited to day by a son. As soon as brought into the sons presence, patient broke out into loud wrathful talk & would have nothing to do or say with his son. Charged him loudly & vehemently with attempt to poison him. Argument from Dr with patient only involved the Dr in the patients wrathful condemnation. Excitement kept up for some time after parting. No conversation could be held by son with the father. Son felt very badly about the affair.

July 7-1891. On examination to day, following facts noted; Usual wt. claimed to be 140 lbs; present wt 122. lbs. Son states his father has aged & shows failure in physical strength. Patient is mentally confused; does not seem to know where he is. Evidently considers he is kept for some wrong which he is supposed to have done. Has distinct delusion that he has been abused; thinks his sons have poisoned him. Talks freely, garrulously. His commitment is unjust. While Dr was making notes of his case, patient jumped up & vehemently declared that he does not want to be written up in all the books; there is nothing against him. His suspicions could not be allayed & examination had to be terminated. Heart, only superficially examined, was in very rapid action.

July 8-1891. He has been sleeping well apparently; is clean & tidy. Talks freely to fellow patients & attendants; full of queer erroneous notions; is getting impatient with being kept here. It is unjust, he thinks. For several days after the sons visit of 29 ult, patient would have nothing to do with the Dr who tried to persuade the patient to converse with his son. Has written a few almost completely illegible letters.

July 21/91. Was visited to day by his son.

Nov 1/91. Physical health has not been robust but fair, since last note. Patient has, at all times, claimed that he is well, & that his commitment & detention here is unjust. Scolds the officers roundly for their part in keeping him. — Patient has well marked delusions in regard to the possession of property

and to his marriage with a certain woman and the identity of those about him. Was today taken sick and put to bed against his protests; he claiming that he was well. An examination, imperfect owing to the acts of resistance of the patient, showed some involvement on the left lung, which was considered as probably pleurisy, with effusion, or possibly pneumonia.

Nov 9/91. Refuses to let the Dr. examine him and grows very excited, noisy & loudly abusive when the attempt is made.

Nov 13/91. Patient was visited by his daughter yesterday, and by the priest today.

Jan 3/92. Has been kept in bed almost continuously since the last note, but remains there unwillingly; scolds and abuses the Dr. and refuses to be examined.

Feby 4/92. Has been permitted to be up a little lately, but seems so weak that he was again put to bed.

Feby 5/92. Weight 103½ pounds. Mar 1/92. Patient is still confined to his bed — Diarrhoea has set in lately & resists treatment. Mar 4/92. Visited today by the Priest. March 17/92. Visited yesterday & today by his daughter. Mar 24/92. Has failed steadily through the combined influence of his lung trouble and the diarrhoea which has persisted, and to day died.

See attached sheet for details of his condition during his sickness. Remains were removed. —

— Died —

EXAMINATION ON ADMISSION.

PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.	
Height,	5 ft 5".	Mental activity,	Slow.
Weight,	129#. Usually 145 lbs.		
Nutrition of body,	Fair.	Memory,	Not very accurate.
Wounds or abnormalities,	Right inguinal hernia. Scar on left (?)	Perceptivity,	Only fair.
Tongue,	Some coated, moist. Tremulous.		
Pupils,	Normal.	Reasoning power,	Thinks they are going to hurt him by the way they conduct themselves.
Sight,	Left eye only sees light. Right impaired.		
Hearing,	Some impaired.	Emotional state,	Depressed.
Co-ordination,	Feels poorly done.		
Reflexes,	Pat. Normal or aggravated.	Delusions,	Suspicions of personal harm.
Heart,	Bad. Arteries stiff & tortuous		
Lungs,			
Examination urine,		Hallucinations,	None.
~~Gynecological exam.~~,	Suspicions aroused by examination. "Something more coming"	Illusions,	None.
		Conversation, character of,	Deliberate.

Personal and Medical History of Josiah Jaffa.

This man was brought by with the following history. Insanity manifested by idea that he is very wicked. Thinks some one will do him great personal injury. Had a fall at the age of 2 yrs striking on the back of his head. Has a bunch on the upper back part of head now.

On admission: Put in sick ward under constant watch.

May 24-91. Slept only a couple of hours. Appeared too timid to sleep. Thinks some one wants to kill him. May 25/91 Slept quite well.

May 26/91 Often awake. Slept about half the time.

May 27-91. Slept about 5 hrs. Dr. in conversation with Dr says: What are they going to do with me here; they are going to use me hard in a few minutes. That man yonder (pointing to fellow pat) is my cousin', Turns to Dr's foot - & strokes it: 'this is a woman's foot'; to Dr: 'you are a woman; & can tell who you (she) are; this is her foot.'

June 2-91. Has slept fairly well; has hypnotic at bedtime often. Occasionally is wakeful; was so last night & up many times. Dr. says he is some dizzy. Tongue coated; bowels move.

June 3-91. Slept some better but still was restless.

June 5-91. Was afraid last night that some one would carry him off.

June 9-91. For some time, asks Dr & attds if he may stay here to day and if they will hurt him to day; repeats his question "they won't hurt me will they?"

June 22-91. Complains of constipation and dizziness. On examination there was found: some grounds for suspecting the condition of the apices of lungs. Signs not clear. Arteries are tortuous & stiff; right inguinal hernia & incip left. Almost complete blindness of left eye. Suspicions on part of patient aroused by examination when it was suggested by Dr that he was not hurting patient; latter replies "something more's coming". Movements & speech slow. Present wt 129 lbs. - usual wt stated 145 lbs.

July 1-1891. Visited by brother & sister.

July 8-1891. Has become less fearful & ~~more~~ better able to sleep; is occasionally restless; sits about much of the time; head resting on his hand as if fatigued or depressed; has a sad expression of countenance. Says almost nothing unless addressed. Conduct good. Clean & tidy.

July 20/91. Complains of headache. July 28/91. Today visited by a friend.

Aug 11/91. Pulse small & soft. Eats poorly; was ordered to bed. Aug 12/91. Am Pulse 40 Am. pulse regular, soft; takes medicine; food poorly. Is constipated.

Aug 13/91. Am. Pulse 66. Is still constipated. Aug 14/91. Am Pulse 64. PM. Pulse 64. Constipated. Aug 15/91. Is obstinately constipated.

Aug 16/91. Am. Pulse 72. Aug 17/91. Remains in bed. Pulse slow & soft. P.M persists in getting up —

Personal and Medical History of Josiah Jefts

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Aug 18/91. Slept none last night; stays in bed poorly; was ordered to be kept in bed.
Aug 19/91. Am. Pulse 72. Bound to get up but is restrained. Ate no breakfast: drank one glass of milk. Pm. Was fed.
Aug 20/91. Am. Pulse 60. Wont speak this Am. Pm Pulse 60. fed. Talks some.
Aug 21/91. Am. Pulse 60. Ate supper and breakfast
Aug 23/91. Ate his meals
Aug 25/91. Tongue coated; is probably constipated.
Aug 27/91. Am. Pulse 60. Tongue still coated. Eats quite well. Pm. Eats his meals.
Aug 29/91. Remains quietly in bed. Pulse is slow, full, soft. Eats quite well. Wants to get up.
Aug 31/91. Is today constipated.
Sept. 6/91. Eats his meals.
Sept 10/91. Wants to get up and go out this Am.
Sept 13/91. Is up today. Is chilly. Was ordered to lie down.
Sept 17/91. Pulse this Am, is slow & soft.
Sept 19/91. Am. Pulse 60. Pm. Is constipated.
Sept 21/91. Wants to get up: was ordered up.
Sept 23/91. Is up this morning. Pulse slow.
Sept 25/91. Pm. Pulse 60. Is up: chilly; pulse small — ordered to bed: Pm Is in bed. Is constipated.
Sept 26/91. Is still constipated.
Sept 28/91. Pulse slow and soft. Eats regularly, but in small quantities. Is still constipated.
Sept 29/91. Is obstinately constipated.
Sept 30/91. Am. Pulse 63.
Oct 1/91. Pm. Temperature 101.7 (during night).
Oct 2/91. Am. Pulse 100. Pm Pulse 84. In morning pulse was small. Has diarrhoea: given medicine
Oct 3/91. Am. Pulse 60. Has some pain. Still has diarrhoea but probably less.
Oct 5/91. Today was visited by brother & sister
Oct 6/91. Am. Pulse 72, fair. Is thin.
Oct 7/91. Am. Pulse 75. This Am. pulse is rather small.
Oct 8/91. Has diarrhoea. Is thin and wrinkled. Pulse has been some accelerated & poor. Is slower and fuller now. Eats a little better, but only because more urged. Is full of delusions and depression.
Oct 10/91. Am. Pulse 64. Eats some. Still has some diarrhoea.
Oct 13/91. Am. Pulse 68. Eats fairly.
Oct 14/91. Am. Pulse 69. Has an occasional diarrhoeal passage.
Oct 16/91. Am. Pulse 75. Pm. Pulse is accelerated. Had 2 passages this Pm
Oct 17/91. Diarrhoea is less. Pulse about normal; smallish. Eats fairly.
Oct 19/91. Less diarrhoea. Eats some food. Pulse some accelerated. Not very good.
Oct 20/91. Am. Pulse 108. Pm Pulse 105. Am T. 104.8. Pm. T. 103.9. Is pale & feeble. Also pulse is feeble. Coughs up frothy white stuff.
Oct 21/91. Is feebler & failing. Vomited quite often and severely during last night. Steadily

Personal and Medical History of Josiah Jefts

failed: slept none at all. Died on this date.

Patient has been very melancholy, agitatedly so, all during stay here. Has not slept well. Has taken food reluctantly and only on strong urging. Has been fearful and anxious, wanting to go away. Staid in bed unwillingly. Patient was becoming emaciated and weakened by his restless conduct and scanty eating, and, when attacked with diarrhoea recently, was quickly made worse & died.

Relatives were notified of patients failing strength. Remains were removed.

EXAMINATION ON ADMISSION.

PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.	
Height,		Mental activity,	Acts prompt –
Weight,			
Nutrition of body,	Fairly good –	Memory,	Poor –
Wounds or abnormalities,	None – Wounded Eyeballs –		
Tongue,	Good.	Perceptivity,	Quite good in conversation
Pupils,	Blind – Eyes mangled –	Reasoning power,	Fair on some subjects Poor about causes of being here
Sight,	Blind.		
Hearing,	Slightly impaired.	Emotional state,	Quiet – Composed. Cheerful –
Co-ordination,			
Reflexes,	Pat. Rf. Normal. (6)	Delusions,	Wife is here daily – Children also Hears her – Wife poisoned him.
Heart,	Good.		
Lungs,	Good.		
Examination urine,		Hallucinations,	Hears wife & children & talk of conversation.
Gynecological exam.,		Illusions,	—
		Conversation, character of,	Shows mental weakness, but can answer questions on ordinary subjects readily.

Personal and Medical History of Thomas Mulvahill.

This man was brought by Deputy Sheriff Miles with the following history. Insanity the result of injury to brain occuring from an explosion which caused loss of both eyes, was manifested in March 1891 by constant brooding and he said that his wife wanted to poison him and wanted others to do the same. At times is perfectly sane. Is a very inoffensive man but a short time ago during a fit of sudden passion he struck at his attendant at the County Poor Farm.

May. 27 – 1891. Patient answers questions quite well on ordinary subjects – Insists that Hennepin wife on ward most every day however. Children also. Tells what they say – Knows where he is – Said worked in Rochester 8 years ago Says saw the Asylum there – His memory is poor. His general conversation aside from above delusion shows a cheerful but rather weak-minded view of his case & situation on admission put in sick ward. May 26th was quiet all night appeared to sleep well. May 27th 91 claims that his bowels move infrequently P 64 May 30 91 Patient was standing on the floor gesticulating and talking Postures. Has also been noisy. P. M. is quieter June 2 91 is Eating poorly. P 64 June 8th 91 Patient being thin and pale having poor apetite was put on tonics. But refuses medicine June 9th 91 having heard from Patients family the Doctor asked him about them and his wife. Patient says he has no wife. is loudly talkative and gestures. June 24th Patient was examined on this day for which see details on opposite pages also see note above ~~and opposite pages~~. made at this date. July 1st 91 Patient has been quiet at night and slept well. ever since admission, apetite rather poor at first seems to have improved. is pale and thin and face has an unpleasant expression. Partly due to the wounded eyes and powder stained skin. Patient was somewhat maimed and restless Early in stay here but has lately been quieter. Sitting around the greater part of the time. Has delusions such and shown above. is not able to work on acct of blindness.

July 23/91. Has been maniacal this forenoon. Oct 9/91. Remained in bed this morning — refused his breakfast; says he was not feeling well. Is rather ugly and refuses to be examined. Oct 10/91. Remained in bed only part of yesterday & is now as usual.

Feb 5/92. Weight 121½ pounds. During the last 30 days has been somewhat noisy at night on 5 different nights. Mar 7/92. Weight 121½ pounds. Apl 4/92 Weight 122 pounds. During the past two months, has been noisy for an hour or so on 7 different nights.

May 3/92. Weight 117½ pounds. Pulse 82. Patient is pale and has been losing flesh, but will not permit examination even when questioning makes him angry. He sits a great part of the time, while inward, in one place. Goes out walking – Is clean. Ugly & abusive if spoken to.

June 3/92. Wt 119½ pds. Pulse 86. July 6/92. Refused to be weighed. Pulse 80. Aug 3/92 Wt 116 pds Pulse 96. Sept 5/92. Wt 115 pds. Pulse 98. Oct 7/92. Wt 116 pds. Pulse 88. Nov 2/92 Wt 110 pds. Pulse 98. Has lost quite steadily in weight, without apparent cause. Nov 22/92. Is occasionally somewhat noisy at night, but apparently rests & sleeps quite well. When let alone, is comparatively quiet, but when addressed, becomes very angry & abusive, ordering his addresser away, and saying angrily "What do you want?, Get out of here!"; will never acknowledge that he is sick although he sometimes lies down during the day & sometimes refuses food. Is pale & thin.

Jan 23/93. Very infrequently indeed somewhat noisy at night. By day, sits in silence or lies upon his bed, usually irritable & unapproachable. Recently, somewhat more pleasant & communicative. Has fluctuated in weight. — May 21/93. No noticeable change. Appetite is reported as quite poor, at times. Patient does not complain of feeling ill, however.

May 21 93. Appetite good. Bowels all right. Behavior not very good at times being blind. He is harmless talks but little, keeps his bed most the time.
June 6 93. Wt 115 lbs. July 1 93 No change from last month. July 6 Wt 115 lbs.
July 31 93. Seems about the same. Eats well. Bowels all right. Aug 1/93 Mouth good. Bowels all right. Rather quarrelsome at times. Transf to B & E. Aug 1/93. Transf to C & E.
Aug 7/93 Wt 116 lbs P 94. Appetite good. Cough none. Bowels reg. Tries to quarrel at times about minor things. Sept 4/93 Wt 117 lbs P 96. Oct 3/93 Wt 118½ lbs P. 106. Appetite good. Bowels reg: Behavior good but sometimes gets very noisy. Oct 30/93 Appetite good. Bowels reg: No trouble if left alone, but gets mad very easy. Nov 2 93 Wt 120 P. 82. Nov 14 93 Appetite good. Bowels reg: Habits clean. Behavior fair, Very abusive at times about nothing. Dec 2 93 Wt 119 P. 98. Dec 8 93 Had a light fit. Bowels reg.
Dec 20 93 Patient about the same. Jany 1 94 Wt 120 P. 100. Jany 17 94 Gets very angry at times & is quite noisy. Appetite good. Bowels reg. Jany 20 94 Very quiet Does not ~~walk~~ look well. Eats very little. Says he is not hungry. Jany 29 94 Head clean says is not well. Went to bed afternoon. Jany 31. 94 Very easily excited use very abusive language at times when mad. Feb 1/94 Wt 118 lbs. P. 110. Appetite poor. subject to neuralgic headache. Mar 26/94. Fell unconscious to floor in wash room but soon recovered with no after effects.
Apr. 2/94 Wt. 119½ P. 86. Appetite fair habits clean. Apr 30/94 Appetite good. Easily irritated. Is loud and abusive in speech when crossed in any way. May 1/94. Wt 119½ pds. Pulse 78. June 1/94. Wt 120 pds. Pulse 84.
July 1/94 Wt 120 pds. Pulse 88. July 31/94 Not much, if any, change from month to month. Talks to himself, a good deal, when in ward. At times obstinate; does not wish to go walking. Is slightly noisy, also, at times, talking of "People trying to abuse him". Complains, occasionally, of not feeling well, yet of nothing serious. Is hard to please, in the dining-room. Habits are clean. Health apparently good. —
Aug, Sept & to Oct 31/94. During these 3 months, there is little or no change to note. Appetite fair; bowels regular; no cough noticed. Patient is blind & feeble. Sits in one place all day, but takes occasional naps in bed. Behavior is good & quiet, but he is very irritable & quick-tempered. Talks readily & easily. Also talks to himself, at times. Greatly offended. Has delusions; is feeble-minded. Habits clean & he is very neat in his personal appearance. — Weight, (for past 3 months), taken monthly has been about 116 pds. Pulse about normal then, also. —
Nov 94 Wt 117, P. 72. 30th appetite good, bowels reg, no cough. Is blind & occasionally

lies in bed during the day, otherwise is in apparently good health. Behavior good, but is quick tempered, & easily irritated. Bowels free, no cough talks incoherently, habits clean. Dec. 1st Wt 120 p. 96 Jan. '95 Wt 118# p. 84, no change. Jany 31/95. No change noticed, either mentally or physically. Feb 1/95 Wt 115 pds. Pulse 95. Feb 28/95. Appetite poor & perverted. Bowels irregular: no cough noticed. Physical condition weak & his body much emaciated: he has a constant spit of a thick consistency & greenish - yellow color. Patient is generally quiet, but is very bad tempered and most irritable. - Complains occasionally of headaches & feels cold very readily. Talks freely but incoherently, & thinks he is the possessor of great wealth. Is cleanly in his habits. Patient is blind. - March 1/95. Wt 111 pds. Pulse 80. (Is losing in flesh). March 31/95. No special change noted. - April 1/95. Wt 111 " " 80. April 30/95. Keeps about the same for past few months. - May 1/95. Wt 105 " " 99. Is still losing in weight & strength. May 3/95. Appetite poor & capricious; Chief food is potatoes. Difficult to plead him, two meals in succession. Bowels slightly costive. Scarcely any cough but free & prostration. (Sputa of a greenish - yellow tinge & of a viscid stringy character). General condition is very weak. He has lost flesh each month since last December when he was 120 pds weight & he is now much emaciated. Behavior quiet, but he is irritable & quick-tempered; sits in one place, all day; goes to bed to rest himself, a portion of each day. Complains of sick-headaches & sometimes of stomach disturbance. Talks freely & easily - difficult to delusions of grandeur, wealth &c. Habits are cleanly. May 5/95. Patient is becoming much weaker, within the last two days he is apparently sinking rapidly. Pulse 104. R - 2(e) 98 0 to 10 - Transferred to "Infirmary Ward", at 2 P.M. Was then found to be very weak & emaciated; was given bath & put to bed. Is on regular and extra diet. Habits clean. May 7/95. Lies quietly in bed. Appetite good. - May 6/95. Lies steadily in bed. Bowel in fair condition. Complains, at times, of feeling cold & hungry. May 20/95. Complains of pain in all parts of body. Refused dinner, today. May 24/95. Appetite poor; bowels regular. Complains of feeling chilled. May 26/95. Slept scarcely any, last night; had some very severe "Coughing Spells". May 27/95. Sleeps poorly. Refuses meals, at times. May 29/95. 7 P.M. Visited by Rev. Riordan. - May 31/95. Slept scarcely any, all night: Coughed considerable. Has frequent "Coughing Spells", accompanied by raising phlegm. Patient is very weak & steadily failing. Appetite very poor. June 1/95. Slept poorly. Respiration, apparently, quite labored. June 2/95. Refused supper, today. Growing steadily weaker. June 3/95. About in the same condition. June 4/95. Rapidly failing; eats very little; has severe "coughing spells"; sleeps poorly. June 5/95. Last night, seemed very low; was coughing severely & raising phlegm - Refused breakfast, today. Is rapidly failing. Slept none, all night. 6 A.M. Patient Continues to fail, rapidly & at present, breathing with much difficulty. 8 A.M. Is steadily sinking. 9.30 A.M. Died (For attached Record) -

Personal and Medical History of Mary M. Packer

Personal and Medical History of Mary M. Packer

Patient brought here by Dep. Shff. Tucker and wife. Eliz was discharged from St Peters Hospital only three weeks ago Has had many attacks during the last year at menstrual periods, lasting about two weeks. Said to be all right between times. Does not talk much. No disposition to injure others No filthy or destructive habits. Was sent to St Peter March 2, 1891 May 28 1891. Patient quite silent. Had eaten nothing this noon, but on treat of using the tube, she drank some milk. Looks healthy & dull & stupid in manner.

Nov. 2" '91. Patient is this day noted as rather unruly, is up & about.

" 15" " " quite troublesome, although in a silly, half pleasant way. Nov. 16" Moved to B-4 again this day, was noisy in night.

Dec. 1 1891 Still rather hysterical & wild.

Mch. 1" 92. Was in bed for a week on C-2, for a running sore of her ears, which has also accompanied by somewhat of constitutional symptoms. Course of this disease will be noticed upon nurse's record attached.

June 6" 92 Patient on one of the upper wards, although is considerably troublesome at times. Is paid to be worse at time of her menstrual period. Health is excellent. Patient has a mixture of delusive ideas. She follows visitors about, her talk is very irrelevant. Claims to have something to say with them.

Aug. 19" Patient wrote a letter in which she said she was a specific by Is somewhat worse at menstrual period.

Sept 19" 92 Patient became so bad that was moved to C-4 a few days ago, there is kept under discipline. Is, however, very troublesome. Sept. 8" 92 Moved to C-4 yesterday, on account of disturbance, holding to visitors &c.

Sept 28" Sick at stomach & has head-ache, appetite very good, sleeps well, menstruated 16-20", regular & normal, sick in bed one day, seclusive, cleanly habits clean, bowels regular, behavior quiet when watched, when permitted makes herself very disagreeable to physician & visitors coming on the ward, talks little, & is inclined to be foolish & trifling. Complains of occasional pain-fulings, had head-ache & sick stomach the 28th day, Oct 2" escaped Sunday from chapel, found sitting in center dining room.

Personal and Medical History of Mary Packer.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Nov. 30" 92 Appetite good. sleeps well, bowels regular, behavior mischievous. sick in bed one day, complained of headache, is on C-1, & steadily mutters which to keep down her mischievous behavior.

Jan. 2" Appetite good, tidy, does no work, mischievous & noisy at times, sleeps well.

Feb 21" appetite good, tidy in habits, no work, sleeps well, menstruated about the 24. behavior more quiet during menstruation, than previous to it.

Feb. 28" App. good, tidy, no work, noisy & irritable, sleeps well.

March 1 93. Appetite very good. Tidy in habits. Sleeps well. Does no work. Behavior noisy, silly & irritable. Menstruated the 21st & behavior more natural and quiet during the time. Does masturbate. Bowels regular. Talks very silly. In seclusion about 3½ hours during month

Nov 22. Any quiet refractory state. Remains in bed from most of the time, at times talks demurely, but generally incoherently & wildly. [illegible]

May 30 93. Appetite good. Tidy in habits. Menstruations quite painful during the period quite sick in bed. Menstruated about the 24th of present month. June 1st 93 Appetite good. Tidy in habits. Bowels reg: Sleeps well. Talks silly most of the time. Asks to go home. June 10 Very annoying following company. June 17 93 went to sewing room the past fortnight. July 10 93 In spell. Very silly & noisy. July 8th July 17 Has become quiet but talks very silly. July 21 93 Pasted on the face by cold flowers. July 20th Improving again. No sores else on body. July 27 93 Face healing rapidly. Aug 2 93. Menstruating, very silly & irritable. Aug 6 93 Removed to Asylum. Aug 26 Visited by brother. Wanted to go home with him. He gave her $1.25 for money. Oct 21 93 Appetite good. Is quiet. Clean in habits. Talks a good deal about going home. Most of her talk is very silly. General health good. Oct 24 93 Went to bed at 9 P.M. Saying she was sick. Did not desire to have supper she felt bad. Nov 26 93 Remained in bed. Has some trouble with her Ear. Nov 27 93 Upon ward. Ear discharges. Is talkative quiet and dumpish. Dec 1 93 Transf. to A2 Dec 8 93 (Face & swollen discharge from Ear, syringed it. Patient lies quietly in bed, Behavior quiet, occasional deluded talk. Ear improving slowly, felt ill. Health Fair now, seems comfortable. Appetite was very changeable. but always ate something for meal, Sleep always good and after eating a good breakfast obeyed A ward Dec 22 93 For details of disease see nurse record Case — Dec 22 93. Received on A2 Dec 30 93 Has still some discharge from Ear Appetite good. Habits clean but careless about her personal appearance. Talks somewhat incoherently. Also has illusions. Behavior generally quiet. Jany 25 94 Removed to Asylum. Feby 16 94 Has complained of not feeling well for several days. Apr 20 94 Appetite good Clean in habits. Has delusions Ear troublesome yet Some times it discharges a good deal. Goes riding and walking. Gen. health good. July 2 94 Appetite good Clean in habits. Is quiet. Talks incoherently. Has delusions. Will go riding but does not like to go walking. Gen health good.

Oct. 27 94 Appetite good. Clean in habits. but untidy in personal appearance. Acts & talks very silly. Has delusions. Goes riding and walking. General health good. Feb 11 95. Does not like to go walking will go riding. No change. March 30 95 Appetite good. Clean in habits. but untidy in personal appearance. Rather noisy and restless. Talks a good deal and incoherently. Has delusions and acts very silly. Gen health good. Goes riding and walking.

Personal and Medical History of Mary Packer.

William Petrie:- commenced treatment March 19th, quit April 10th. Was given somewhat less of doses than the others on account of general condition. Was able to drink, although with somewhat of discomfort, until toward the last, when mixture of Gold was given. After which he taking considerable drink was made extremely sick for about one day. Before this he had been able to drink and keep it down.

(For general comment concerning treatment see attached Slip, Vol 18 page 295)

Personal and Medical History of Wm. J. Petrie.

This man was brought by Dupty Sheriff Hen Co. with the following history. Has been very intemperate for 20 yrs. 10 yrs ago began a partial paralysis of lower extremities which still exists. Had a skin eruption during the late war which is supposed to have been Syphilis. Has had Delirium Tremens. June 29 - 1891. Patient describes pain in chest or about stomach 10 yrs ago - Says after a few years it got down to his legs - Admits having had syphilis 20 yrs ago - Describes this trouble as steadily & slowly growing for 10 years - Trouble in walking first definitely noted 6 yrs ago - Came gradually - Pupils first noted as small 2 yrs ago - Says spent about $600 on Massage treatment - Has been working as Barber up to time of coming - Hands have only slight incoordination - Legs fly about as if on a pivot. Can stand quite well, by steadying body against the chair - On admission is committed on Inebriate warrant, and put on Ct - May 30th 91 - Patient has slept about 7 or 8 hours a night and is quiet. Claims that he is constipated "is Bilious" he says. June 17th 91 Calls for a Laxative. June 29th 91 was examined on this date, for details see opposite page. also note above made at this date. July 14th 91 Patient has been quiet and composed ever since admission. Appetite not very good Patient is emaciated and pale. has a marked ataxic gait and on admission could not walk the floor except in his stocking feet. He gained some what the control of his legs and is able to walk better on the floor. Can not walk at all in the dark and in consequence retires soon after supper. The Doctor escorted the Patient up the stairway, one portion of which was quite dark, at this portion the Patient demanded assistance and was most pitifully helpless, staggering and thrusting feet aimlessly and was quite unconbolled. has some pains for which he takes ginger with relief. does some barbering on the hall. and does quit well. Aug 13/91. Felt very badly last evening; had quite severe diarrhoea with colicky pains and some bloody passages. Pulse 96. Was put on medicine. Is up this morning & feels better. Sept 23/91. Went away alone today, on trial.

Oct 20/91. Returned today. Has been drinking quite heavily, especially lately & feels nervous. Nov 2/91. Has been on Iodides and feel better while using them: they were again ordered Nov 20/91. Recently learned of his wife's rather sudden death, and went home today, promising to return. Nov 21/91. Returned alone this evening. Nov 23/91. Says he feels nervous and does not sleep very well: was given medicine. Nov 25/91. Now sleeps well, has a good appetite & feels well.

Feb 6/92. Complains of head ache and bad cold & cough. Feb 15/92. The Iodides have been discontinued for some time and patient asks to have them renewed, as he feels better when taking them. Mar 4/92. Weight 134½ pounds. Apl 4/92. Weight 116 pounds.

Personal and Medical History of Wm J. Petrie.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Apl 8/92. Felt badly for a time last night. May 3/92. Weight 127 pounds. Pulse 96. Patient seems to be feeling quite well. Recently received a special course of hypodermic treatment of strychnia &c. Works quite regularly at his trade, thawing some of the officers & others. May 5/92. Is constipated. June 3/92. Wt 123 pds. June 23/92 Asked for hypnotic last night. July 6/92. Wt 123 pds. Pulse 102. July 10/92. Is in bed, sweating quite profusely; complaining of pain in his bowels; seems confused. Has no appetite and is constipated. Pulse 96. July 11/92. Sup & feels better. July 12/92. Has no appetite; feels quite nervous; tongue is heavily coated. Aug 3/92. Wt 120½ pds. Pulse 108. Sep 5/92. Wt 122 pds. Pulse 96. Sep 28/92. Complains of shooting pains in his legs, accompanied by cramps. Oct 11/92. Wt 113½ pds. Pulse 84. Oct 12/92. Went to town today, and got drunk. A bottle of whiskey was taken away from him on his return. Has had a parole, but this was taken away from him. Nov 1/92. Had a yesterday quite severe pains in thighs, wrist, & spasms of the muscles. Is on the iodides & think they benefit him. Nov 2/92. Wt 113½ pds. Pulse 94. Nov. 22/92. Apparently rests and sleeps well, every night. Sometime last Spring or winter, was given parole, and began doing barbering for some of the officers and others; later, began making errands to town; there followed strong suspicions that, at times, he drank. This was definitely proven, at times, and he was shut up on the hall. Under promises of good behavior, was again let out & given parole. Again he got drunk. Since the spell of drunkenness described above, on Oct 12th, has been shut up on the ward, having no parole. His ataxia of gait is still worse than described above, and his unsteadiness & nervousness so affect his hands, especially by spells, that he cannot do a good and safe job at shaving. Bodily health not good. On extra diet.

Jan 16/93. Had quite a severe attack of diarrhoea today, probably due to constipation. —

Jan 23/93. Still remains on the ward. Reads a good deal. Does some work. Has gained in weight.

May 1/93. Says does not sleep well; complains of pain in legs & some headache; ate no breakfast. P 90. T @ 98°. May 2/93. Feels better. Slept well last night — still has some pain in legs. Appetite not very good.

May 8/93. Was permitted to leave today, intending to go to relatives in Iowa. May 10/93. Came back today, having never gone near Iowa, but instead, went to Minneapolis. Says he felt too weak & was unable to work outside. May 11/93. Since his return, has kept on the hall, not going out walking. Gait seems much more ataxic. Has not complained much of ill-feeling, of late. Is not in good health. Spends most of his time in reading & occasionally does some shaving jobs; but at this he is very poor now.

May 31. 93. Bowels regular Cough some. Poor control of legs. Behaves good. Complains of blood disorder. Talk. poorly. Reads a good deal. Stays on ward most of time.

June 6. Wt 124 lb P. 84

July 7/4 Been taking medicine for bowels

July 31. 93. Wt 118 lb. P 72. Bowels regular appetite good Takes medicine for nervousness. Falls down a flow sometimes when he walks. Aug 2/93. Wt 117 & P 88.

Sept 5/93. Appetite fair Bowels constipated. His legs seem to be getting weaker. Takes med Cough a good deal Wt 118. P 86. Oct 4/93 Seems to be about the same Wt 121. P 74

Nov 1/93. Appetite fair Coughs good deal at night some in day time. —

July 31/94. Appetite good, but bowels are irregular; coughs a good deal. Gait very ataxic; seems getting weaker & weaker, slowly; is losing in flesh also. Augs 1/94 Wt 112½ pds. Pulse 90. Aug 31/94 Is quite agreeable. Complains of catching cold easily. does not go out very often. Remains in his room, reading, the greater part of the time. Is careless about his ways and room. Sep 3/94 Wt 111½ pds. Pulse 96. Sep 30/94. No very special change, though he seems to be losing ground. Oct 2/94. Wt 118½ " " 10 st. Oct 31/94. Keeps about the same - finds it rather difficult rises & move about. Gait becoming more & more ataxic. Spends the greater part of the time, in his room reading. Is failing - Nov 1/94. Wt 119½ pds. Pulse 116. Nov 27/94. Patient has continued to fail, during the month. This P.M., he was delirious & talked incoherently - Up to date, appetite & sleep had been good; bowels regular. Nov 28/94. Was transferred to 6z at 10 AM this Am. Was put to bed. Is quite delirious. Ice cap put on & mustard plasters applied to feet. He ate very light dinner, and took 1 pint of milk at 6 PM. 7 30 PM; catheter passed up & about 12 oz of urine, of a dark red color, were drawn. Nov 29/94. Slept only one hour; was restless & delirious, the rest of the night. 8 AM. Passed catheter; about 12 oz. Darkish colored urine drawn - 7 PM. Same done again. Patient has eaten poorly. today; Is quite delirious; talks & mumbles incoherently. Nov 30/94. was very restless, all night - Has also been very restless and delirious, today; out of bed several times, during the day. Appetite fair & bowels active; Talking frequently, incoherently - (See attached Nurse's record) - Dec 1/94. Temp. 103 2 PM (in bed). Has been loosing steadily in flesh. Dec 5/94. Usually sleeping 7 hours, each night, was very restless & slept none last night. Appetite is poor. He lies steadily in bed: talks incoherently. Coughs some. Dec 4/94. at times is very restless & out of bed, considerable. Has been sleeping 4 to 7 hours, nightly. Appetite has improved. Dec 10/94. (Has a bed sore, coming) on back; same bathed with alcohol, daily. Dec 10/94. Was restless & noisy all night: refused breakfast; appears worse this morning). Dec 18/94. Complains of severe cold & of throat being slightly sore. Dec 25/94. Patient has been sleeping, almost every night, 6 & 8 hours. Appetite fair; bowels regular. Is, as a rule, very restless, talking & laughing, at times. Is still in bed. Dec 28/94. (Dr P. notes. Mental state that of a happy quiet delirium; rather paretic in form) Dec 31/94. He lies steadily in bed. (Was transferred to new Infirmary Ward East on 28th Inst), Has been sleeping poorly the last few nights; only about 3 hours on each. He is, at times, quite delirious. — Jan 15/95. Sleeps quite well, at night. Appetite, as a rule, poor. Complains of bowels being active. Bedsores treated, as usual & are doing nicely. He lies continually on his back & in same condition, day after days. Jan 17/95. appetite better of late & bowels more regular. Restless & uneasy by day & slightly delirious, at times. Jan 18/95. More quiet, to-day. Appetite good. Jany 20/95. 10 AM. Passed catheter & drew about 8 oz urine,

Personal and Medical History of Emma Taylor

Patient brought here by Henry Reynolds Sh. and her husband John Taylor. This attack began 3 yrs ago. Has delusions in relation to Spiritualism and kind reading jealousy of husband. Bought a revolver and threatened to shoot him. No disposition to filthy or destructive habits. Has not been under restraint or treatment.

May. 28-1891. Patient is quiet & composed. Says self and husband always got along fairly well. Claims bought revolver 6 yrs ago, because husband was so much away from home. Says never threatened or alarmed anyone with it. Has not used it of late & never except for practice. Says perhaps neighbors even alarmed. Think voices which she continually hears are due to Spiritualism. Never knew much about Spiritualism but think this most probable explanation. Talks well on all other questions. Ladylike & composed. Shows no spite or irritation. Plans about everything in a rational manner. Was told that she would need to obey in spite of the voices. Said she had rather have the voices than obey them too long. Her health seems excellent.

July 6" '91. Patient left 6th day on trial with her husband. Not much of improvement in her mental condition was probably secured, but a caution with regard to future behavior will probably be impressed upon them.

Discharged Oct 31 - 1891

of a dark-red color & slightly ammoniacal. Jany 27/95. Passed urine, regularly today. Jan 29/95: Quite restless & delirious today. Refused breakfast & dinner, but ate a fair supper. Jany 31/95. Still in bed. Ate hearty breakfast; refused dinner & supper. Febry 2/95: Sleeps quite well. Has had to be catheterized at each of past 3 days: bladder also washed out. Eats very poorly. - Febry 10/95: Appetite much improved, of late. Bowels regular. Febry 9/95: Sleeps well & sound nights; nights very poorly. Quite often delirious & shows numerous delusions. Steadily confined to his bed (see attached note). Mar 2/95: W 104½ P 90. Mar 7/95: very troublesome, at times; will not remain in bed, nor keep clothing when in; quite delirious, of late; has many delusions of the "dime-novel" sort. Mar 13/95. Has to be catheterized quite often. Sleeps 5 to 8 hours, every night. - Mar 14/95: Quite troublesome & very destructive, today. - Mar 23/95. During night, was very noisy & destructive; tore screen from door & was generally very troublesome. - Mar 31/95: very restless each night, sleeping only about 2 hours. very troublesome & often destructive. Requires quite frequent catheterization. Still confined to his bed. - (see attached records). April 15/95. Now attached records, it will be seen that patient is, nightly, restless about 5 hours & sleeps only 2 hours or so. Has a regular bed, with 2 tha. Appetite very good, bowels regular. He is very troublesome & destructive: has severe bed sores on hips; (can do nothing for him, as patient is so very restless & troublesome). Is quite filthy & destroys bedding. April 19/95. Bed-sores remain raw & appear very bad. He will not leave any dressing on them. —

April 23/95. 4 P.m. Was put in restraint - April 26/95: Frequently getting out of bed - Slept poorly. April 29/95: 8 Am. Taken out of restraint: April 30/95. No special change is noticeable. - May 1/95. (Wt 3/3. 100 lbs.) Patient has been very restless & at times, it is impossible to keep him in bed. Frequently Destructive, & very troublesome: requires to be put in restraint. Sleeps fairly well. May 16/95. Restless all day (was taken out of restraint at 7 Am): requires continual attention. May 20/95. Requires to be catheterized. May 22/95. Catheterized 3 times a day. May 25/95. Urine very dark & cloudy; also offensive - May 27/95: He has very bad bed-sores. May 28/95: Suffers from a sore finger, on right hand. May 31/95: Lies steadily in bed: quite noisy at times: wets & soils bed. requires frequent catheterization - Otherwise, is about the same, Restless & troublesome &c — June 2/95. Of late, lies in bed most quietly; seems too weak to get out. Bowels regular. Bed sores are growing larger. Sleeps well during night, lately. June 5/95. Patient very weak: also has considerable difficulty in breathing - 10 Am. Is vomiting - Has been steadily catheterized, but it is found impossible to pass catheter, today. 8 P.m. Is rapidly failing. 9.45 P.m. Died (See attached records).

A LIVELY TIME.

Ole Fremstad Gets Smashed Over the Head in a Saloon Row.

Ole Fremstad, who, with his wife, conducts a Scandinavian massage establishment at 720 Seventh avenue south, was very much mussed up yesterday afternoon in a saloon row at Molin's place, corner Washington and Seventh avenues south.

It appears that Fremstad had been in the saloon for some time, and had been drinking heavily. About 3 o'clock Nels Peterson came in, and the two had several drinks together. Finally they quarrelled as to which of them should pay for one round of drinks, and Fremstad, who is much the larger man, made hostile demonstrations toward Peterson, and threatened to "do him up." Peterson became frightened, and, seizing a chair, defended himself so successfully with it that in less than a moment Fremstad lay stretched on the floor at his feet, with a very ugly wound in his head. The patrol wagon was called, and the wounded man was taken to the city lock-up, bleeding profusely, and apparently more dead than alive.

Dr. Gibson arrived about this time, and, upon examination, found that Fremstad's skull had been fractured and that one of the arteries in his head had been severed. The wound was sewed and bandaged, and after the patient had been washed he revived considerably and expressed a strong desire to be taken home.

When the patrol wagon arrived at the Fremstad home the lady of the house was decidedly loth to receive her sorry-looking hubby. She said that he had become an habitual drunkard and had given her no end of trouble, and that she was tired of him. She was finally prevailed upon to take him in, however, and it is thought that under her tender care he will soon recover. Shortly after the trouble Peterson was arrested by Officer Conway. He appeared perfectly willing to go to the lock-up, and declared that he only struck Frunstad in self-defense, and that he used the chair because he knew he would have no chance without it in a fight with Fremstad.

aught by Deputy Martin Crawwick the following history. manifested during the present month (May) by the idea that nd, as a Missionary to China and also thinks his wife is When arrested was laboring under the idea that he was going in China. Confinement has been unemployed during tion. On admission:- put on sick ward. May 28th 91 says he did not sleep inks he drowsed a little. Patient was restless & called the watchman into m that he must go to Minneapolis to day to meet and answer a charge morning told the Doctor there was a charge of rape against him in Co nd wants to go and defend himself. About the rape affair he heard tell him about it. and two or three women came into his room to it. He was sent here for nervousness and sickness. May 29th 91, Patient nd excited last night than on the preceding night. Presisted in ing on the Hall said once that he wanted to find his 15 yr old girl was about the house, slept almost none. May 30th 91 slept 3 or 4 hrs- just had something similar to a fit. Was seen by Dr Phelps, says this morning that he feels much better that this is his best day for a long time. June 5th 91 Patient requires a hypnotic occassionally, does not sleep well. June 6th 91 visited by his wife, has been writing letters. June 9th 91 claims that he has slept none, does not always sleep well June 20th 91 Patient seems to have quite rapidly recovered from his delusions and hallucinations, and to have become quite rational. His delusions have been mentioned above, also some of his hallucinations, another hallucinations was the seeing of his family around the Institution, which he did for some time after coming. Patient began writing letters home, quite rationaly. Began reading, singing, and taking part in conversation and work, was always pleasant and gentlemanly. Patient on this date recd. a telegram from his wife, stating that one of the children was sick with Diptheria and asking him to come home, she had already made similar requests by letter of the Superintendent Home this afternoon alone. July 14th 91 see attached cut from Minneapolis Papers of Patients doings

		Conversation, character of,	Talks freely. Has told idea of becoming a missionary for past 15 years.

Personal and Medical History of Ole Finnstrad.

This man was brought by Deputy Martin Crave with the following history. Insanity first manifested during the present month (May) by the idea that he had been ordered as a Missionary to China and also thinks his wife is untrue to him. When arrested was laboring under the idea that he was going to build a Castle in China. Confinement has been employed during periods of intoxication. On admission:- put on sick ward. May 28th says he did not sleep any, but Watchman thinks he drowsed a little. Patient was restless & called the watchman into his room to tell him that he must go to Minneapolis to day to meet and answer a charge against him. On the morning told the Doctor there was a charge of rape against him viz Con-ht. t false charge and wants to go and defend himself. About the Rape affair he heard a woman up Stairs tell him about it. and two or three women came into his room to upbraid him about it. He was sent here for nervousness and sickness. May 29th 91, Patient was more, Restless and excited last night than on the preceding night. Presisted in getting up and comming on the Hall. Said once that he wanted to find his 15 yr old girl who he declared was about the house. slept almost none. May 30th 91 slept 3 or 4 hrs - about 10 o'clock Patient had something similar to a fit. Was seen by Dr Phelps. says this morning that he feels much better that this is his best day for a long time. June 5th 91 Patient requires a hypnotic occassionally. does not sleep well. June 6th 91 visited by his wife. has been writing letters. June 9th 91 claims that he has slept none. does not always sleep well June 20th 91 Patient seems to have quite rapidly recovered from his delusions and hallucinations, and to have become quite rational. His delusions have been mentioned above. Also some of his hallucinations. another hallucinations was the seeing of his family around the Institution, wich he did for some time after comming. Patient began writing letters home, quite rationaly. began reading, singing, and taking part in conver-sation and work. was always pleasant and gentlemanly. Patient on this date recd. a tel-egram from his wife, stating that one of the children was sick with Diptheria and asking him to come home. she had already made similar requests by letter of the Superintendent home this afternoon alone. July 14th 91 see attached cut from Minneapolis Papers of Patients doings

		Conversation, character of, to talk -	Quiet - intelligent - Willing but a little slow + timid

Personal and Medical History of Selma Simmons

The woman was brought here by mother and brother Symptoms first manifested two or three yrs ago by hystorical spells during menstruation Has grown worse steadily, always worse during menstrual period. Has hallucinations. Very much afraid a crazy one - Imagines if she comes in contact with people she is contaminated - She has threatened her mother frequently when in sudden passion. No disposition to filthy or destructive habits - No restraint has been employed - For the past year her mother has traveled with her a good deal but has been of no benefit Has been under treatment of Doc. Stamm Burnham, Ruhman with little effect - Uterine trouble may be a predisposing cause of Hystoria

May 30-1891. Patient - is quiet or composed - Talks very intelligently only vague in her talk when it comes to giving reasons for her worrying - Can not seemingly give any cause. Remembers distinctly how long she has been troubled as all about it. Would hardly admit that it was in her imagination. Looks very healthy. At present seems only depressed as worried & unable to shake it off. Would not speak of delusions, but may have them, seemed worried & nervous at the taking of some papers.

Nov. 15" '91. Patient - has a cold, has been about the same ever since coming; quiet, rational in her talk, behaves very well, although a little jewish & spiritual at times. Has, however, delusions with regard to men, also, perhaps with regard to They seem more of the nature of fixed ideas. She will not, however, give them up. sometimes think a patient is on the ward or starts at the opening of a door, for fear a man is coming, or something of the kind.

Jan 3rd 92. In bed with Influenza. Has sore throat, also. Says it hurts when she swallows.

Jan 4th Patient up to day, is not however, quite well enough to

" 5th " " has Neuralgic pains.

Feb 4th " recovered quickly & readily, although a little slowly from the Influenza. Has been well ever since. It is very hard to get her to go from the wards or to wish to go anywhere as she seems to have fear of doing so. In talking with her however it is hard to realize this as she never speaks of it rarely to any one & not at all to us. Does not seem afraid of me, or when I bring strangers into the ward. In fact never exhibits to me in any way a delusive idea.

Personal and Medical History of Selma Simmons

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

May 19-1892 Has had uterine treatment quite regularly since her admission. Local condition has improved some. Has taken Galvanic Electricity both internally and externally.

June 29th 92. When patient's mother comes to visit her, she worries her considerably by her talk, seems to be really afraid of men. Is inferior, with them, usually gets along very quietly. Never seems to be afraid of the Doctors. Or even of attendants about her, but is continually afraid, slamming & slamming doors, looking suspiciously out of the windows &c.

July 12th Patient has a eczema upon the hand

" 25th Had some fruit spoil on the way here, seems rather irritable & discontented

July 30th The eczema of the hand is not improving. The treatment applied does not seem to improve it.

Sept 9th Has taken considerable medicine, ointment &c.

Very superior about always wanting something, however & rather uncertain about taking the medicine when provided. General health is good, but has considerable of a disposition to worry. Oct 6th 92 Has been visited by mother daily this past week & has been quite bright & pleasant. Oct 6th Appetite good, quite frequently has to take a laxative, menstruates quite regularly, behavior quite complains quite a good deal at times.

Oct 26th 92 Very rational of late, will not consent, however, to go out, gets anxious at times about having to stay here all of her life. Nov 24th Since last note Patient's mother has died & she went home to attend funeral. She showed some dread of going into her father's house, however, & returned willingly. Nov 30th Patient seemed almost cheerful for last few days, but speaks of being as nervous at times, Appetite poor, not constipated, sleeps quite well,

Dec 31 '92 Appetite not very good, cleanly, does no work. Behavior quiet with occasional crying spells, sleeps poor.

Jan 31st 93 Same as above.

Feb 6 27th Appetite fair, clean, quiet, sleeps not usually good works in D.R. some.

March 30 93. Appetite fair. Cleanly habits. Very nervous & afraid at times. Keeps the worries all the time. Talks rationally. Menstruated the 10th.

April 10 93. Thinks herself she is getting worse. Has for a year or more now in a typically paranoiac state. Always lady-

Personal and Medical History of Selma Simmons

like & natural except for spells of nervousness & depression

Apr. 10 Very much depressed. Inquires fearful at times.

29.93. Has been more cheerful of late.

31 " Appetite fair. Cleanly habits. Behavior timid. Talk natural except for her delusion. Complains of headache and pain in head. Has been quite cheerful of late. Menstruated about the 11th During month of May patient has been more depressed than ever before. So much so that for nearly a week would not speak. Acted at suicide patient, did not sleep well, had headaches &c July 9 93 Has become much more cheerful in past few days. Father visited her last week July 30. 93 Appetite fair. Sleep generally good. Behavior timid. Talk natural. Complains of headache more or less. Menstruated about 5th Aug 24 93 Appetite fair. Sleeps poor. Has been depressed more or less all the time this month. Cries and worries at times. Menstruated about the 5th Aug 24 93. Removed to A. East Aug 31. 93. Appetite good. Usually sleeps well. Behavior quiet seems quite contented. Sept 29 93. Appetite fair. Habits clean. Behavior quite natural. Seemed to be depressed at times & has crying spells occasionally. Talks sensibly. Imagines that she gets out of doors. Menstruated about 15th Oct 30. 93 About the same Nov 15. 93. Rec'd on B. Nov 30. 93. Appetite good. Has been sleeping fairly well since she came in the Bell. Complains of sore throat past few days. Dec 30. 93 Appetite good Sleeps fairly well. Behavior quite natural. Does not worry so much. Is troubled with headache. Menstruated 18 Jany 31 94. Appetite good. Sleeps well most of the time. Has delusions. Menstruated about the 18th Feby 1894 Has been quite blue the past few days. Has been crying most all day today. Menstruated the 20th

Mch 8 94 Has been quite blue the past few days. Cries a great deal of the time. Has delusions.

" 14. Seems more cheerful yesterday & today Mch 27 94. Worried a great deal in the last month. Often said she wished she was dead. Menstr. about 25th Apr 6 94 Has a very bad cold. Has many delusions Behavior quiet. Habits clean. Tidy in appearance. May 7. 94 Appetite good. Sleeps well Gen health good May 28 94 Appetite good, Sleeps well Complains of neuralgia to day. Is menstruating. June 27. 94 Appetite good. Sleeps well. Gen health good. Is inclined to quarrel with the other patients quite frequently. Is menstruating. July 28 94 Was very much provoked the eve at having a new room mate raised & she was literal all this day crying & insisted she was dead. Appetite fairly very good Sleeps fairly well. Is menstruating. Aug 28 94 The room was cross the past few days would not converse when spoken to only as she saw fit & do so. Menstr. 25th Sept 24. 95. Was quite well the first of the month. Appetite good. Slept quite well. Bowels constipated. Has been feeling badly the last few weeks suffering with ear trouble and was sick in bed a few. Was quite impatient at times. Menstruated this last week. Oct 30. 94 Has been quite well some night. Bowels regular. Has been very nervous at times. Inclined to be impatient. Took medicine.

Nov. 28. 94. Quite well first part of the month complained a great deal the last of this week of headache, back ache. Is very nervous & impatient at times. Appetite good. Does not sleep well. At times bowels constipated. Took sick this evening with a nervous chill & had to go to bed. Ate no supper. Nov 29 94 Some better this morning but very nervous at breakfast. Menstruated last week Dec 29 94 Very nervous. At times it is an impossibility to please her. Complains a great deal. Bowels constipated most of the time. Menstruated. Appetite fairly good January 19 95 Very nervous all day. Lying on the bed most of the day. Complains of her stomach, bowels constipated, took a cathartic Feb 95 Menstr. Jany 22 / 25. 95. Complaining of her stomach. Jany 26 95 Was sick, set in bed. 27th Set in bed a.m. up p.m. ate a good dinner and supper. Jany 31 95. Has not complained very much in the last few days. Appetite good. Does not go walking very-

Personal and Medical History of Bridget Sullivan

Patient brought here by Dep. Shf. Kinney & wife - First attack sixteen yrs ago - Twelve yrs ago an attack lasting six months six yrs ago had an attack lasting six months. Three yrs ago one lasting one yr. Since leaving this Hospital has been confined for a time in Asylum of Good Shepherd - Has been in St Peter once and in this Hospital twice

May. 31-91. Patient gives a quite good acct of self. Says was at home doing finely well till 6 weeks ago, when she was taken to St. Paul. Did not control herself then & they sent her here. She insists that she cant control herself at times and recite get noisy and a great trouble, seems quiet now. She is about as at the time of her leaving.

Nov. 1st 91. Patient is quite quiet. talks to herself, however, as formerly

Mch 1st 92. Has remained upon B-1, continued in the same conduct as for the past 6 mo. Sits most of the time quietly in a corner, will however talk to herself, known her condition & inability to stop talking & of the latter to us. Has not, however, been so noisy as to keep people awake or be troublesome as she used to be. Physical health seems good, was visited yesterday & to day by her son.

June 1st 92 Patient remains upon B-1, is usually quiet & without any request. Sits away quietly in some corner or room, & does not care to be talked to.

Sept 9th 92 Patient has had little medicine, except occasional doses of laxative. Her health is good, has been somewhat disturbed a few times, but usually quiet.

Will talk about her own condition as a disposed way. Usually not expressing delusions, recently, however, when aggitated, weeping during all one night & the next day, for fear her son had been cut in two by a razor.

Oct. 3rd 92 Had spell some days ago of melancholia, aggitations & special delusions, usually quiet. Oct. 31st (1st) good (2) does not masturbate. (3) one day. (5) one room. (6) not any (7) constipated at times (8) quiet most of time (9) talks noisy once in while. (10) headache once or twice

Nov. 25th Doing quite well & as clear mentally as at any times Dec. 30 '92 Appetite good, works in sewing room. is invitable, usually sleeps well.

Mch 3rd 93 Appetite good, as work in sewing room this mo. talked a great deal & has been quite invitable. Sleeps quite well.

Mary. Patient complains of pain in left side. Has been in bed today

the heart, this is relieved only partially by Nitroglycerine pills do but little good.

March 30/93 Patients appetite poor. Sleeps quite well. Cares for herself. Helps on the ward. Some of the time Complains of pain in left side. Has been in bed today

Personal and Medical History of [illegible]

displacement—

[illegible] & uncertain way

[illegible] Rough

Personal and Medical History of Augusta Trapp

This woman was brought here by two sisters and brother-in-law. Sister says she had Typhoid fever 10 yrs ago and has been mentally affected ever since. More so at times. Usually quiet. Last March ran away & had she not been found would have frozen to death. Has fractured spells lately. Talks but little Eng. Has shown a disposition to injure others when in sudden pain. Has been restrained occasionally by her family. Has been treated only for acute illness. She is idiotic and unmanageable.

Nov. 14" '91. Patient is feeble minded &

Dec. 11" 91. " calls again for the prescription for her Rheumatism. Does this occasionally, as she seems to feel an access in her shoulder.

Dec. 29" 91 To day in bed, has the Influenza.

Jan 4" 92. Up & about; has, however, a cough & is not feeling very well.

March 4" 92 Asmenal, is of good disposition, works upon the ward & is willing. Does not complain nor inquire about home, nor indeed shows very much intelligence, although is able to answer all questions rationally, & as far as known, has no delusions.

Sept. 9" 92. Patient has been somewhat peculiar in manner, & is at times a little uncertain in mental behavior. Usually, however, she has done very well & quietly, & has been of good disposition, working some, although not going very much. Calls for remedies for Rheumatism very frequently on account of pain in shoulders, which are partially ankylosed. Has mentioned no delusive ideas nor, has she bolted very much in other ways.

Dec 31 Appetite good, sleeps well, quiet most of time, works on ward & in dining room, bowels regular.

Jan 30 '93 Patients appetite not very good, sleeps quite well, complains of pain in left side, works in dining room, habits neat, quiet most of time.

Feb 28" Patient has been sick for 8 ds, complains of severe pain in left side, also in chest & head. Appetite poor, does not sleep very well. Has had several attacks of Neuralgia of the heart, this is relieved only partially by stimulants, Nitroglycerine pills do but little good.

March 31 '93 Patients appetite poor. Sleeps quite well. Cares for herself. Helps on the ward. Some of the time complains of pain in left side. Has been in bed 5 days

Personal and Medical History of Augusta Trapp.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Continued on 2.

What following was written on 7. Oct 1891

Good bye my friend Good bye —
I wish you peace and joy
On your way;
May your path be smooth and bright
Walking by the better light
Every day.
Much of Life is still before,
And the better lights of yore
Shew the way —
Then, as magnet to the pole
With firm dauntless soul,
To its ray.
Then onward where they lead —
For your nobler better friend
Is yourself;
But, even as the worldly wise
Lightly not despise
Place or pelf.

Farewell then from the heart
First this now to the we part -
The last word that I can say
To remember me at and day
By drawing a picture
St Chas distance (miles)
by B Conrey, very busy from now till winter
commences. Take yourself very about
such thing as your elsewise do in your
last letter Or of the other more remote
things mentioned I do appear a little grieved
for Catherine for either one, would I think -
simply ingratitude to those who no doubt
from motive from the best Motives. In look, as
I see in a former letter, the mountains have
shrunk to mole hills, I love to look to
the good that lies here and hereafter

The foregoing is a little triple that I wrote on the 7. Dr, and gave a party that was soon to leave here, The letters are in the signs of the Morse Telegraph & Register. I believe Each sign follows alternating from above & below — separated by the ruled lines Except mistakes I leave it to Correct — in the characters

Insane Asylum, Dec. 29th 1891.

My Dear Wife:- I wrote a short letter to you since I received yours of the 20th inst, I had just sat down and was engaged in writing a Christmas reminder to you all about the ---- the time I received yours. So I kept on changed what I intended to write somewhat and merely sent you my loving regards and acknowledgment of your note. I must try hereafter and not let so long a time elapse without sending you a letter. Preoccupied with reading some and engaged in out door exercise or employment may have been some of the causesathat prevented me from at once and from time to time keeping up a continuous correspondence with you and Theresa. At that time I thought too that you all would be very busy pp paring for winter and that you would not be easily within reach of a letter. But it is easy to multiply words in excusing ourselves. I promise you hereafter, while here to cause you no more anxiety on account of similar neglect in the future. But here I must be permitted to remind you that the tediousness inseparable from the continued separation from those we dearly love is largely aleviated by those little attentions that often come from home. Although we may smile and be even some times amused at the little wilds of the grave and sedate sons of men in their sunniest moods and the alluring magnetism of the daughters too when fun and fancy hold sway, yet we will find then sunny spots of our exsistance here comes from the recurring appearances that our presence at home is--- and our the vacant place ever recalled. -- But it would be a heart less procedure to alarm by contnued neglect or design the fluttering heart of expectation affection or to afflict by studied recrimination or cold neglect hearts to whom our conduct might seem to be a want of confidence. The Christmas Box or Writing Desk as you dall it, which you all join in sending to me then with its stationary I must make a continual monitor to be often used. Lizzie's little present is enoughnand the hint that comes with it can not be too often repeated. It will at least bear repetition. I went to Mass on Christmas day andof course had an opportunity to use it there too. Led her and Johny remember their papa morning and evening as usual. Since writing the foregoing, Miss C.O'Brien called to see me. She hasbeen here a few days, her borther john is not expected to live many days. Her youngest brother (I believe it is) also has been here under treatment some little time. He is 17 or 18 ys of age. ---- as our own happiness must largely be reflected from the knowledge that our children are doing well, so we can not fail to be pleased when we hear that they are seriously at work fitting themselves for some useful occupation. So I am much pleased at hearing that Katie is already engaged in her first venture. I hope that she will be successful. But where we may thus be pleased, at these manifestations of the present and the probable future wellbeing of our children, it would be injustice to them to suppose that they would be indifferent to ours. That they keenly feel for us and are troubled when we are in toruble. That they sorrow when are in sorrow and rejoice when we are joyful we may fairly assume

Can not then we do any thing or is it within our power to cause them to rejoice because we have been made measurably happy, for none are happy but in part" The consideration of this impells me to express a wish that it were possible to see you at no distant day. If you could fnd it possible or convenient (fmI should not go home soon) a visit from you in the near future would be desirable. The foregoing is a little sigle that I wrote on the 7th Dec, and gave a party that was soon to leave here. The letters are in the signs of the Morse telegraphic Register. Each dipn follows, alternating from above to below — separated by the finder lines. Except mistakes I believe it to be correct in the characters

2

I will merely remark to you that if that request was necessary then it is equally so now. For the clothes that I then wore were out the same that I now wear. But the weather in the main ha been unusually mild, and although as just now the changes of weather effect me some, yet in general I have been and am now in fair health. Howsoever, as I require considerable out door exercise, and like to take it flannel under wear I think needful. But I will say no moreon this subject at present. When you receive this write to me as soon after as is reasonably convenient. and after that I will tell you what I may require. But I perceive that the very ___ of the weather might be rendered more tolerable were we moderately protected against its more severe sallies. So you see here I am at last from explanation to express solisitude for you all. And from expressed pleasure and congratulation to some perhaps persuasion and reasonable moralizing. Then to some news that must make heart sad. Suggestions about self and a frail boddy that must some day, we know not when, be conveyed to the common heritage of all, the grave. And now, last, though not least, let me commend to you all to ever serenely remember the immortal part. A communion of hopes, joys, sorrows and prayers, may these be ever ours. If at any time you have an opportunity to write do not mind my tardiness, but just send on without ewaiting for mine. If you had reminded me before I would of course write at once. Although the letters would scarcely contain so many words as this in saying so very little. It snowed some last evening which with the storms of Christmas day is only a shimmer on the grojnd. The day is bright and genial and the snow will soon disappear if it remains warm as at present here. I here will enclose the description of the serene morning sky f the 30th The foregoing was written ---m29th so I kept the date as first written I almost forget to inform you that I would like to have a good pair of glasses to wear permanently as good clear spectacles to be used when reading or writing as my eyes are none the stronger now. I believe that No 15 or 16 would do. If you think that you could get a good pair of wither kid for me, they need not be -- expensive. In the regards of you all, I am yours affectionately,

Nicholas McGrath.

And now before I finish let me send you some impressions of my early morning walk. Some attempts to paint in words the fleeting beauty of the ear y morning. Wednesday Morning Dec. 30th 1891. I hastily write it dn with a pencil e'er the shimmering transient glares of the early morning twilight would forever vanish from fancie's frail and delicate grasp. As usual after breakfast I went out to take the early morning walk. The win d from the east blowing gently and somewhat chilly. A dark segment of a circle of clouds lay low on the horizon to the N.E.and extending to a point where the sun would soon rise, sweeping round by the south some faint glimpsees of light stratified might also be seen from the blended lines of gray and purple that shown from their upper edges. In front of the in front of the wind in the west two irregular shaped clouds came forth from a common center near the dark horizon. The one projected to the N.E. and the other to the S.E. Of a deep purple intimately blended with the ~~deep~~ gray of the cloud or of the morning twilight. Latterly branches from these jagged and irregular with other minute shoots of the same character went from these, becoming bright and more bright as they reached and rounded the zenith. While as in face the east in front and on either side down to the horizon the various shades of rorange, purple and gray fell to the dark circle of cloud first mentioned. Between the upward arms that outward spread from the west to the N.W.& S.E. was the faintest tinge of purple blended with sober gray gleaming through except in the center or

west part

Very neat, calm and pleasant in conversation. apparently rational. not irritable so far as known seems contented here not having complained of being unjustly committed. on the whole while here not having given any unmistakable evidence of insanity.

Aug 7/91. Is complained of by room-mate for being up + around the room at night.

Aug 28/91. visited on 15th inst + today by friends.

Insane Asylum. Minnesota. June 20-91

Some ten days ago I wrote, for you all a hasty note to send as a reminder for especially the little ones? I have not as received any direct communication from any of you but Dr. Baker, the Physician in charge of the ward I am in) informed me that you sent

2nd. Hospital for Insane Rochester, Minn.
Sept. 24th '91.

My Dear Wife:- Making an opportunity this morning of communicating with you through the only medium now open between us. I will begin by expressing the hope again, so often repeated that you and Puss are all that ours l and best interests may require. It may seem a parade and well calculated to provoke a smile in the real intelligent wise one, to remark as I did in a recent letter to you, that the physical and mental was being or liable to be promoted in me by a certain course of exercise. I will now further remark that when the thermometer stands some where in the nineties the mental man should caution the physical to be cautious both being part and parcel of the same individual. I believe it has been said of old, by some one reputed to be very wise, that "A wise man scarce y smiles to himself." But the vast onward waveo of impulsive humanity goes on praying and sorrowing, regardless f the admotions of the luminaries of years agone. But of this no more now.

Leaving the mental and physical considerations aside for the present, let us see if we can not bring in a helper, a solice for many sorrows and a healer of many wounds, and is (daught?) only through prayer and though far away, we"are brought more near."

"Far away we meet in prayer;
You know the temple and the shrine;
Before it bows the brow of care
Upon it tapers dimly shine.
'Tis mercys home and yours and mine."

I take this ittle verse from one the books which I received from one of the sisters of St. Francis, Rochester, which muc better expresses what I wish to convey than any language of mine could. If we have thus been brought near by this means, let us so continue and if we have not let us now begin.

And do with the other means available the mountains of care an d anxiety will dwindle into mole hills. Bringing us indeed far mo re near.

Tell me when you usually go to Faribault, or when it is the handiest time to have letters sent. I think it would not be a bad plan to sow some Rye this fall? Has the corn matured well? You can let me know such things as you deem best. I wrote Sunday last. I will saynno more but send this to you.

My love to Ma. Affectionately,

M. McGrath.

Aug 7/91. Is complained of by room-mate for being up & around the room at night.

Aug 28/91. Visited on 15th inst & today by friends.

Insane Asylum. Minnesota. June 20-91

Some ten days ago I wrote, for you all a hasty note to send as a reminder for especially the little ones? I have not as received any direct communication from any of you but Dr. Baker, the Physician in charge of the ward I am in) informed me that you sent inquiries as to how I was getting on. In the letter I wrote you I mentioned some things which I thought I then wanted and desired to have. The weather has since become very warm and I think that if yu have not already sent them you may not do so untill you hear from me again. Although as I am aware; you will doubtless be interested in my welfare, and duly informed it, a direct communication from you would supply a want that nothing could do. How you all are and where. What you have done and are doing and such other matters as you might think interesting to me. Such as the crop prospect etc. Abundant rain fall there as here has I suppose made things look different since I left. And now as to myself I may say that I feel in a calm unrepining state of mind and hope at no distant day to be with you again. In the mean time let this be a reminder to you as a help to that end to ever remember me when you all assemble at your evening prayers. I hope mama will try andbear this affliction resignedly for a time, when I trust all will be well. If

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Sep. 24/91. Complains of sleeping poorly. (See attached letter of this date).—
Oct 16/91. See attached letters of 14th inst & present date. The former, addressed to a daughter, was kept on account of its curious composition. It is rather the most unusual & the strangest production that he has written.
Nov 1/91. Is troubled with a tickling in his throat and with a hacking cough. Has cold in his head; says he does not sleep well.
Dec 29/91. See attached copy of letter to his wife.
Jan 16/92. Has been sick since 8th inst with a rather light form of La Grippe. Has suffered from chills, pains, sweatings and general ill feeling; has not had high fever. Has been up and down from bed as he felt able. Is troubled with a cough at present.
Jan 25/92. Has had occasional constipation and has been troubled more or less with cough. Is slowly gaining.
Mar 4/92. Weight 166½ pounds. Apl 4/92. Weight 167 pounds.
May 3/92. Weight 162½ pounds. May 9/92. Patient has been quiet, well-behaved, his personal habits good, during almost his entire stay. He has been troubled some with restlessness and sleeplessness at night. Has read considerable and written quite often to his friends. His letters are usually fairly coherent and as a rule are quite rational & sensible, but almost invariably contain quotations of poetry, and the one of Oct. 16th some rather odd hieroglyphics.

Patient went home today, on trial.

Discharged. Nov 9/92.

Medical History of Mary A. Fahey

Mary Ann Fahey, a comely young woman of 20, residing at 3144 Bloomington avenue, was taken before the probate court yesterday afternoon for examination as to her mental condition. Her face was a study—now and then a gleam of intelligence shooting over it and giving it the appearance of a modern Diana in full possession of her faculties. Her tall form was enveloped in a loose-fitting blue calico dress, while her hair, black as night and tangled and twisted into a thousand knots, was nearly hidden from view by a tight-fitting bonnet, covered with a long black crape veil, which streamed down her back and twisted about her shoulders.

While her father and aunts were giving their testimony the unfortunate girl sat perfectly motionless in her chair, her eyes cast upon the floor, and her whole appearance suggestive of some deep sorrow. After a careful examination she was ordered sent to the asylum at Rochester.

Early in April she was attacked by the la grippe, and on the 14th disappeared from her home. Search was made for her, and three weeks later she was found in the woods near St. Cloud in a starving condition. It seems that one of her brothers was at St. Cloud and she had started out to find him. Everything possible was done for her on her return, but her mind did not emerge from the darkness into which it had been plunged by the disease. For some weeks she has not spoken a word to any one and seems to be in abject fear, shrinking from all who approache her. Sudden noises alarm her, and now and then the spirit of a demon seems to take possession of her, making her dangerous in the extreme. Occasionally a light streams in upon her beclouded brain and then she realizes her condition and prays most pitcously to be made well again.

was brought him by Dep Sh. Tucker & wife - ran away from Agnes and was not heard of [illegible] at the end of which time she was found near St Paul in a starving condition - Was taken to the home of an aunt in Mpls - & since had [illegible] perfectly some intervals - She does not [illegible] father or friends - Will answer questions - Afraid constant fear No disposition to injure others - [illegible] habits - No restraint. No treatment, ex- [illegible] Grippe (after which this attack developed - [illegible] rather more quiet & intelligent - than she was during the first mo. or so of her stay. She behaves still, however, rather [illegible], & looks more like [illegible] chronic case.

Dec 17" 91. Visited by her aunt. Finds her better than at her 1st visit - somewhat silly & reckless in manner however, but bright in manner as she [illegible] before.

Feb 10" 92. Has been lately moved up to B-2. Has good appetite, color & general health. Talks only a little, goes walking & riding. Her wt. in Feb. was 142 lbs. Is quite quiet losing her silly manner.

May 28" 92. Patient has an eruption of face & hands. looks as if poisoned in some way.

June 1st Eruption deeper. p. 116. Is not feeling well. Ordered a hot foot bath & put to bed.

June 2" p.m. Is up & about, doing well. temp. 99 3/10.

Aug. 5th 92. Has a cold & is noticed to have considerable of a hacking cough, of a paroxysmal character.

Aug 16" 92. Taken home to-day by her ~~husband~~. Has become rather more quiet although is rather dull & weak mentally. Her general health seems to be good, with the exception of a cough which held persistent to the time of going.

~~Sept 25 93. Patient at times [illegible], appetite good & [illegible] appearance. Weight 93 lbs 7 ounces.~~

Medical History of Mary A. Fahey

This woman was brought here by Dep Sh. Lucken + wife April 14 - 1891 she ran away from home and was not heard of for three weeks. at the end of which time she was found in the woods, near St Paul in a starving condition - When found she was taken to the home of an aunt in Mpls - + since then she has had perfectly clear intervals - She does not recognize her father or friends - Will answer questions - Afraid of the dark - Constant fear No disposition to injure others No disposition to filthy habits - No restraint. No treatment except for La Grippe after which this attack developed -

May 26 '91 Patient rather more quiet + intelligent - than she was during the first two weeks of her stay. She behaves still, however, rather remarkable, + looks more like a chronic case.

Dec 17 '91. Visited by her aunt: Finds her better than at her previous visit - Somewhat silly + reckless in manner however, but - bright - in manner as she used to be before.

Feb 10 '92. Has been lately raised up to 113 - 2. Has good appetite, color + general health. Talks only a little, goes walking + riding. Her wt. in Feb. was 142 lbs. Is quite quiet, losing her silly manner.

May 28 '92. Patient has an eruption of face + hands. looks as if poisoned in some way.

June 1st Eruption deeper, p. 116. Is not feeling well. Ordered a hot foot bath + put to bed.

June 2 p.m. Is up + about, doing well. Temp. 99 3/10.

Aug 5th 92. Has a cold + is noticed to have considerable of a hacking cough, of a peculiar character.

Aug 16 '92 Taken home to day by her ~~husband~~. Has become rather more quiet - although is rather dull + weak mentally. Her general health seems to be good, with the exception of a cough which held persistent to the time of going.

~~July 25 '93 Visited at home. Found her very dejected + appearance slight change for the worse.~~ 93 3 11

Jan. 2/'99 Visited by brother & minister: Has been complaining considerably of late: Has some jaundice. The trouble commenced with one of her usual attacks from which she did not get up: At first it seemed to be a matter of irritability because we would not give her medicine: Later the jaundice appeared: Jan. 22 Transferred to Infirmary (Continued by Dr. R. L. Bibb) Jan. 22 to 31/99 Has been complaining of pain in abdomen: Skin very Lyellow: Bowel movements clay color. Complains of pain in chest and bowels. Temp. slightly elevated: pulse and respiration normal: appetite poor: bowels constipated requires laxatives & enemata: Feb. 1 to 9/99 Appetite gradually improving - skin becoming much clearer: rather restless at times: pulse very weak: sleeps well: bowel movements still slightly clay colored: Seems quite free from pain now. Feb. 8/99 Able to sit up most of day - Mar. & Sept. 99. Quiet - at times very irritable & fault finding: neat in habits & assists some with work. Appetite good. talks quite sensibly: sleeps well. bowels constipated: requires laxatives: Quite frequently goes to bed for few days for different complaints. Frequently complains of pain in chest and around heart. Mar. 27 Transf. to A3 Menstr. Mar. 17. Apr. 12. & May 10/99 Sept. to Dec. Appetite usually good. sleeps well. inclined to be constipated. laxatives given as needed. Quite neat in habits and appearance. Has little use of left arm. Behavior varies: usually answers questions readily & sometimes is very pleasant, but is inclined to be irritable if opposed in any of her wishes: Oct. 5/99 Tooth extracted from left side lower jaw: Asked for extra diet and on being refused became very excited & quarrelsome. Transferred to B2. For two days refused to eat, then began taking her meals - also assisted with work in dining room. Oct. 9/99 Visited by sister. Oct. 10/99 Transferred to A3: Oct. 22: remained in bed complaining of pain in chest. Heat applied: Oct. 24 Up on ward: Nov. 17 Again remained in bed complaining of headache: Nov. 18/99 would not eat meals for two days because she was not allowed to have milk: became cross & irritable.

Dec. 1 - Feb. 28/1900 Sick in bed with pain in chest. plaster applied: coughs. medicine given. Often complains of being sick in various ways. Is hysterical & hypochondriacal. Dec. 1. up on ward: & Quiet: appetite fair: Sleeps well: Bowels regular: Jan. 1. Sick: Given headache: Pain in chest: Jan. 3. up on ward: Jan. 14 159# Feb. 9 Complains of pain again. " up on ward improved. Feb. 26-28 again in bed. does not seem very sick. Mch. 1 - Nov. 30/1900 Patient disagreeable & cross because she does not have extra diet: Appetite good: bowels regular: Sleeps well: Mch. 24 Very disagreable. Trans. to Annex. Mch. 3 Very disagreable: refused to eat. Tried to break dishes. Trans. to B1.

Personal and Medical History of Augusta Trapp.

Mch. 30 Quiet & very agreeable. Helps on ward: General health good: Sleeps well. Mch. 31. Trans. to A1. June. Appetite good. Assists with ward work. Takes outdoor exercise: Occasionally becomes quarrelsome & disagreable & goes to bed & hypochondriacal. July 30 Vaccinated. Aug. 4 Visited by sister & brother in law. Aug. 18 Very disagreable & angry: Struck nurse with slipper. Trans. to B1. for the day Nov. 16 Wt. 159½#. Dec. - Feb. 28 1901 General health good & Appetite fair. Sleeps well: Bowels regular with aid of cathartics: Does some work: Goes riding: Habits & appearance neat. From Dec. 27 to 29 had a slight pharyngitis & bronchitis: Given expectorants & cathartics. Jan. 7. Visited by sister. Jan. 28 In bed complained of pain in stomach & bowels. Cathartic given. Feb. 3 - 4th again sick - pain in lungs & back - medicine given. Jan. 10 Scolding & profane. Feb. 15 Fought to Collins, threw her to floor but received no injury: Put in seclusion for 7 hours. At times agreable & pleasant. Talks intelligently & seems to take interest in work but is subject to hysterical spells & is irritable & agressive if not allowed her own way. becomes violent & profane: During spells becomes mentally weak & loses control of herself. Feb. 16 Trans. to B1. Mch. 1 Wt. 155# Since transfer quiet & well behaved. Mar. 1 - June 1. 1901 Mar. 22 sick in bed with one of her chronic which are imaginary, was given cathartics. Apr. 25 struck one of the other patients. April 27 again in bed. General condition unchanged. May 29 Wt. 146#. June to Sept. Aug. 7. face badly scratched by one of the patients, takes exercise, attends amusements assists with the work, Sept. 2. Wt. 150#. Sept. to Dec. Nov. 5. visited by sister, shows no change in mental or physical condition Nov. 22. Wt. 154#. Patients condition both mental and physical during spring, was about the same as usual on Apr. 23. 1901 went to bed complaining of her bowels had a Temp. of 99 seemed to have considerable stress over area of stomach and heart. liver was somewhat large and the area considerably jaundiced. stooles clay color, There seemed to be some congestion of the liver. Pulse was fairly strong. On the evening of 24 Temp. ran up to 103.8 skin over the whole body seemed considerably congested, patient had in afternoon what seemed to be one of her old hysterical attacks, coughing, trembling and complaining of pain and when touched became quite rigid but would relax upon being requested to do so. She had so many of these attacks before that her condition was not considered a grave one at about 5:50 on Apr. 24 1901 she suddenly collapsed and died a few minutes after. Autopsy was refused by friends, inference that death was caused by congestion of liver and valvular heart disease.

Height,	5 ft 9 3/4".	Mental activity,	Moderate.
Weight,	151/2 #. Years ago 170.	Memory,	Thinks he has been here 5 or 6 days, in real – 17.
Nutrition of body,	Fair.		
Wounds or abnormalities,	Cicatrix vaccine, slight. Some scarred, unnoticed.	Perceptivity,	Not close observer. Seems indifferent to surroundings.
Tongue,	Some Coated, moves not.	Reasoning power,	–
Pupils,	Left seems larger than right.		
Sight,	Good.		
Hearing,	Good.		
Co-ordination,	Good.	Emotional state,	Says he feels sorry. Makes the best of things.
Reflexes,	Pat. Both some diminished. Left most. Response limited.		
Heart,	Pal. Sounds rather faint.	Delusions,	—
Lungs,	Seem fair.		
Examination urine,		Hallucinations,	Can't say much about it. Half acknowledges, but refuses to say much about it.
~~Cerebral exam~~	Occasional twitchings of face noted while talking. Began losing flesh 18 mos. ago. Has not been so light for 15 yrs.	Illusions,	
		Conversation, character of,	Talks promptly and Pronunciation seems fair as far as is possible to test it.

Personal and Medical History of Louis Lanstrom.

This man was brought by Deputy Sheriff O. P. Miller, with the following case history. Insanity caused by masturbation is manifested by hallucinations of hearing and sight. Thinks small animals are on his person, thinks he hears some one speaking to him. On admission – to quiet ward, B. 2 June 2d. 91 was quiet all night and slept about 7 hours. This morning is up in line, quiet, lounges, coated P. 82. Eats well, talks when questioned, says he slept well, one pupil is larger than the other and is dilated. June 5th 91. has been quiet the last two nights sleeping about 7 hours each. June 19th 91. was examined to day. Patient says that one year ago he weighed 170 lbs weight to day 151. Began loosing flesh about 10 months ago. thinks he has not weighed so light for now for 10 or 15 yrs. Pupil was larger than the other in some lights in others about equal. Concordination seems good at times has failed in accuracy, has not worked since January. he felt bad and quit has been laying round ~~ever~~ since he worked for Mr Baxter at the court House. Memory seems inaccurate, thinks this is may, 2 months some. Father and Mother are dead he has one sister whome he has not heard from for many years. has occasionally twitching of the face while talking July 14th 91 Physical health has remained about the same, has been quiet and well behaved ever since admission. sleeps well, apetite is good. Patient is quiet saying very little answers questions and claims to be feeling well. Mar 4/92 Weight 157 pounds. Apl 4/92. Weight 155 pounds. May 3/92 Weight 156 pounds, pulse 68. May 17/92. Patient remained almost without change, both in physical health and mental state during last fall and this winter. He has had quite good physical health; always taking food regularly, sleeping well, and in no respect complaining of feeling ill. His mental manifestations have been those of depression or possibly a mild dementia. He has been almost perfectly silent, never beginning a conversation and even when spoken to, making no reply or saying but a very few words, in a careless, unanimated way. Patient also was idle, sitting apart from the active ones, idly upon the benches, the greater part of the day. During December he is reported as having been ugly at times. In January he began working some. In February he is reported as moving about more. Now recently patient has seemed more active mentally, converses rather more freely, taking more interest in himself and is asking when he can go home. This change, however, is rather slight. Takes care of himself, is clean and tidy. Does not get into trouble. June 3/92. Wt 152 lbs. Pulse 76. July 6/92. Wt 151 lbs. Pulse 82. Aug 3/92. Wt 149 lbs. Pulse 96. — Recently transferred from B. to A. Sep 5/92. Wt 150 lbs. Pulse 84. Oct 4/92. Wt 149 lbs. Pulse 74. Nov 4/92. Wt 149 lbs. Pulse 70. Nov. 25/92. Uniformly quiet, resting & sleeping well at night. Is quiet, saying very little, indifferent to his surroundings, working some, of clean and fairly good habits. Has at times seemed a trifle more active & cheerful & bright.

Personal and Medical History of Louis Lanestrom

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Jan 23/93. Uniformly quiet and well-behaved. Of good personal habits; talks almost none; barely answers greetings & questions. Never expresses a want. May 21/93. For some time past, has become a little more active: playing games, billiards &c and doing a little work on his hall. Is quiet & well behaved. Clean, but tends somewhat to be cloudy in dress. Seems in good physical health.

May 29 93. Appetite fair. Bowels reg. Is very quiet, does not talk to any one, unless spoken to. Does some work when asked to.

June 7. 93. Wt 149 lb. June 30. 93. appetite not very good. Bowels regular. Work none. Plays pool, talks when spoken to.

July 4. 93. Wt 147 lb. P. 84. July 30 93 appetite good. Bowels reg. quiet behavior.

July 31. 93. Transf. to Fergus Falls.

CITY NEWS

DIED IN THE ASYLUM.

Charles Ermantraut Dies Soon After His Arrival at the Asylum.

Charles Ermantraut, of St. Paul, who was taken on Wednesday before Judge Olivier, of the probate court, for examination as to his condition of mind, was committed to the asylum at Rochester Thursday for lunacy. A special to the EVENING TRIBUNE from Rochester received yesterday states the following:

Charles Ermantrout, a lunatic from St. Paul, died in the office of the insane asylum last night within five minutes after his arrival from St. Paul, and before he was admitted to the asylum. An inquest is being held.

Inquiry at Sheriff. Bean's office elicited full confirmation of the above. Deputy Kinney, who accompanied the unfortunate man, states that he took Ermantraut to Rochester Wednesday, leaving St. Paul at 5 p. m. He said today:

"Ermantraut was in a very feeble condition and was taken to the probate court from the city hospital for examination on Wednesday. After reaching Rochester at 8:40 he walked from the carriage to the depot, with only a little assistance. After getting into the carriage, which was to convey him to the asylum, he threw his head back. I thought then that he was dying, and so remarked. On arriving at the asylum we had to carry him into the office, where he expired within five minutes. On the way in the train to Rochester he seemed no worse. Indeed, I thought him fairly cheerful. He partook of a little lunch in the cars.

What was the cause of his sudden demise cannot be stated until after the coroner completes the inquest. The deceased had relatives in this city and at Chaska. He was a widower and left two children, Maggie and Theresa, who reside at Rochester, N. Y. He was about 45 years of age at the time of his death. In his pockets were several letters. One of them is from his brother, Jacob Ermantraut, written at Ashtabula, Ohio. The others are from his children.

was brought by Dapty Sheriff Kinney and John with but little history. The history accompanying its insanity as being manifested by ill health and Further says he was in "hospital" for 3 weeks.

Patient was brought by the Deputy sheriff & this assistphysicians office. Dr Linton who was on duty was absent (in the drug room only a few feet away from it was immediately called & went to the office with - The man was found lying upon the floor and ance recognized that he was dead or expiring marked. Examination proved that such case, life already being extinct.

roner was notified of the above facts and ordered Autopsy was made by coroner and the physicians.

Died -

Medical History of Charles Emrantraut.

This man was brought by Deputy Sheriff Kinney and John McCarran with but little history. The history accompanying warrant puts insanity as being manifested by ill health and Dementia. Further says he was in "hospital" for 3 weeks.

June 3/91 Patient was brought by the Deputy sheriff & this assistant to the physicians office. Dr Linton who was on duty was temporarily absent (in the drug room only a few feet away from the office) but was immediately called & went to the office without delay. The man was found lying upon the floor and the Dr at once recognized that he was dead or expiring and so remarked. Examination proved that such was the case, life already being extinct.

The coroner was notified of the above facts and ordered an autopsy. Autopsy was made by coroner and the assistant physicians.

Died

Personal and Medical History of Josephine Ruecka from P 394

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

May 17- 1892- Rolling about the bed. Tongue seems thick Articulation puny Jean can talk puny little Face flushed -

May 18- 1892- Upon the ward again to day -

May 19- 1892 Today seems bright and sparkling as usual apparently as well as conjunctive

June 24th '92 Patient- visited to day. Seems to be becoming more variable in physical & mental condition.

June 28 Patient- shows nearly a dementia, has had several slight convulsive attacks, is more markedly demented since these attacks began. Is suspected now of a General Paretic condition, though at the time of her admission it was not so diagnosed.

July 2' Failing, incoming exceedingly dirty

Sept 9 Lying quietly in bed. Has a satisfied air. Her pulse shows much more of disturbance than does her temperature Movements are all trembling and uncoordinated- Is now in bed- Has been steadily growing in Paretic symptoms The Paretic state does not seem to have been suspected till the first convulsive attack, though it possibly might have been found by examination subsequent.

Sept 17 Patient talks in a low tone, Eats little- Silly- restless

Oct 8 Still in bed- The same dull, stupid, way- Bedsores forming Is quite fleshy. Difficult now to feed her anything but milk

Oct 31 Died today- Comatose for past 24 hours- Quite stupid for 3 days before- Bed sores severe. Nurses chart of Temp. & condition for past 2 months is quite full and is attached

Personal and Medical History of Ed McCoy.

This man was brought by Capt. Kinney and John McCarran. with the following history. Insanity was first manifested about 1 year ago but it is not stated if it has existed during the intervening time. Thinks his stomach is like glass, has fear of poisoning, "imagines grass appetite." Has a morbid disposition to injure others during fits of sudden passion. Has refused medicine for fear of its increasing his appetite. June 4th 91 was quiet all night, but slept only about 3 hours says he got along miserably last night slept poorly and says his stomach is out of order. June 5- 91 quiet but slept only about 4 hours. Has eaten one meal and missed three. June 6th 91 slept well, eating better P. accelerated. June 10th 91 has been unformaly quiet at night. Has apparently slept better. Patient eats a little at each meal. Tongue is toothed marked, P. 84. Claims he is not sleeping very well, June 11th 91, eats poorly. June 13th 91. was examined to day. Claims that his usual weight is from 145 to 150 lbs now weighs 119. Thinks he began loosing weight about last Jan- says he is weak and nervous. his chest is flat and expansion poor. and there is a question about the health of his lungs, although no desided physical signs. his memory is inaccurate possibly from lack of observation. Thinks he has been here for 3 or 4 days. when he has in fact been here 11. days he has a terrible appetite says it hurts him to eat. sleeps poorly when he eats much. Sometimes sleeps to much says he has been getting nervous for a couple of months. was all right one year ago. he quit work last January. has done nothing since. has lived with his Father and mother. when asked to give his Father's name. Patient hesitates to tell. and when asked why he hesitates. finally says "I dont want to say anything about them." says he is constipated, "bowels moved about ½ dozen times in 7 weeks." thinks his stomach is like glass" he knows it is that way. the food and everything slips around. That's what makes his terrible appetite" has been afraid of people about 2 months ago. was nervous but not afraid that they were going to hurt him. he is not afraid now. June 27th 91 ate nothing yesterday nor this morning. June 28th 91 is eating nothing cook egg now from the Doctor. but objected that it was to cold. July 14th 91 Patient is thin pale, lacks energy in movement and word. takes food irregularly and poorly especially lately. this morning only after attempt at feeding by nasal tube. P. accelerated and frequently poor. Delusions not mentioned. except on questioning. Patient is not improving. Attempted to elope on the 16th ult.

July 25/91. Is fed by nasal tube. July 30/91. Is fed by the tube twice a day. Aug 1/91. Was put to bed yesterday, for the purpose of saving his strength. Pulse about normal. Eats a little, occasionally but insufficient; is fed by tube.

Personal and Medical History of Ed. McCoy

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Aug 4/91. Pulse 60. Ate some this morning. Aug 8/91. Pulse 60. Aug 10/91. Pulse 60, rather small. Stimulants wanted in food. Aug 17/91. Is fed twice daily. Pulse is poor. Aug 18/91. Is fed eggnog and whiskey. Pulse is poor. There is a distinct murmur over the heart, considered of anaemic origin; stays in bed poorly; slept none last night. Aug 21/91. Visited today by his mother. She succeeded in getting him to take a little food. Aug 25/91. Persists in sitting up, unless restrained in bed. Aug 29/91. Is restless, resisting, remaining in bed poorly. Is thin and has a cyanotic hue. Pulse small. Continues to be fed twice a day - once a day on pre-digested milk & eggs.

Sept 24/91. Still requires to be fed by the tube. Pm. Pulse 64. Oct 8/91. Still fed twice a day; is holding his own in flesh, quite well: does not say a word: lies quietly in bed. Was visited today by a friend. Oct 17/91. Does not gain in flesh. Is still fed twice daily: says not a word. Pulse slow & soft. Oct 28/91. Pulse is smallish; Is restless, getting up from bed. Still fed by tube. Oct 29/91. Was let get up & dress on account of restlessness. Nov 2/91. Has eaten 2 good meals: The first for a very long time. Nov 3/91. Am. Pulse 72. T(e) 99.9. Nov 4/91. Nov 14/91 Am T(e) 99. Pm. T(e) 99.7. Nov 15/91. Am. Pulse fair. T(e) 100. Eats well. Pm. Pulse 84. T(e) 101. — Nov 16/91. See attached sheet for continuation of this record.

Jan 25/92. Patient was visited by his sister yesterday. On account of the opinion of the Doctors that her brother was hopelessly sick with pulmonary tuberculosis, she desired to take him home, and did so this morning.

Patient has been, all during stay here, profoundly melancholy and was not any improved in that respect at time of leaving. He has been in poor physical condition ever since last summer, being then emaciated. Diagnosis of pulmonary Consumption was made some time ago —

Lungs,			
Examination urine,		Hallucinations,	None.
Gynecological exam.,	Claims old cuts on knee.	Illusions,	None.
		Conversation, character of,	Pronunciation prompt & quite good, Foreign accent.

This man was brought by Peter Kamps with the following history. Insanity was first manifested early in April 1891, by Suspicions that the workmen in the factory and Cetr. that his friends and family were against him. Was first taken to a hospital in Chicago where he attempted suicide. Friend states that he has been quite violent on several occasions. On admission:- quiet and neat. June 4th 91- slept part of last night. June 4th 91. Has slept in suicidal Dormitory and sleeps well. June 5th 91. Patient says he does not sleep well through the night. but lying still has given the watchman the impression that he slept. Sleeps. June 11th 91 Slept only part of the night, says he feels better, is more contented with the world. June 13th 91. P. 80. Tounge moist and clean. some tremulous. June 16 91. was visited to day by his wife. says he has no feelings of doubts and suspicions. June 25th 91 In examination some days ago Patient stated his usual weight at 125 lbs. says that for the past two years has not weighed over 120. Present weight 115. He acknowledges that he had delusions concerning his fellow workmen. he states that he thought very poorly of them and their work. he was very much depressed because of his belief that they were "down on him." In regard to the more remote History. A letter from Dr. Hewitt states that "Melancholy is in his family on his mother's side and angry passions on the Father's. She (the wife) tells that Mr. J. For years has had fits of Melancholy, lasting for a week. During which he would not speak to her." Mr Jorgenson states that he has given the definite ideas of persecution, and that he is more Contented and happy. Mr. J. however while not so clearly depressed. as not to enter into conversation. has been quite highly Emotional and quite easily moved to tears. Conversation about his Family. Letters from them. and the sight of Friends. Caused him to burst into tears. he made an apparent effort to controle himself but was unable. Mr J. Pleaded very strongly. that to one who was unable to appreciate his surroundings as well as he a continuation of a stay in this Hospital would be detrimental. and urged us and his wife to allow him to go home. although advising against doing so we also permitted his wife to take him home to day. Patient has been quite frequently visited. has been quite uniformly in health. Always scrupulously clean and neat and always quite free in talking.

Personal and Medical History of Ann Knudson

This woman was at St Peter Hospital 20 yrs ago and has not been right since though was discharged lately. Insanity manifested on no particular subject - No disposition to injure others - No disposition to filthy or destructive habits. Has not been under restraint or Medical treatment of late. Nov. 26" 91. Patient is somewhat better, has noisy talks however, silly, & in an incoherent way at times. Is quiet & healthy.

Mch. 10" 92. Patient has been recently moved up from 6 ward. Is in good health, usually more quiet, has taken an interest on the upper ward, helping feed sick patients etc. Is still, however, quite silly in manner. Mc 12886

Apl 2 '92 Patient's mental condition is a chronic one. Health continues good, behavior pleasant, although apt to be mischievous. Has been moved to upper wards, several times, but would gradually grow more mischievous with liberty & finally ended the last time by extreme violence. Is apt to be violent when excited. Her talk is somewhat incoherent & pleasant, but silly.

Sept 30' 92 Appetite good, sleeps very little, inclined to be noisy & violent at night. Menstruation absent, has not been sick nor in seclusion, nor dirty in habits. Bowels inclined to be constipated, behavior very violent, talk very noisy & foolish. No injury or complaint.

Nov. 17 Patient always mischievous, & full of half comprehending - half incoherent talk. Does little but fuss around.

Nov. 30" Appetite excellent, sleeps but little, menstruation absent.

Dec 31" 92 Appetite good, clean, not in seclusion, works very little, will help about; but do no continuous work, Is liable, violent & noisy, sleeps usually well, does not masturbate.

Feb 24' 93 Had been quiet now for some weeks, seemed much pleased over the picture of her grandchildren yesterday. General health good, appetite good.

Feb 28" Appetite good, clean, no work to speak of, not in seclusion, usually singing & wandering around, violent at times, not slept very well this mo.

May 22 93 Very treacherous. At times very violent, when she will fight attds. Gen health good. Very inclined to seclusion 2 hours May 1. Sept 29. 93 Neat in appearance. Habits tidy, works some on ward. Has been quite noisy, also violent at times. Appetite good. Oct 31 93 Has been noisy & violent during the past week. Talk vulgar. Appetite good. Gen health apparently good Nov 29 93 Works

Personal and Medical History of Ann Knudson.

some on ward. Goes walking & riding. Talks noisily at times abusively. Appetite fair. Dec 29 93. Violent & noisy at times. Works some on ward. Appetite good. Gen. health good. Jany 30 94. Works quite steadily on ward. Appetite quite good. Is violent & noisy at times. Febry 94. Extremely noisy at times. Also violent in behavior. Appetite good. Boards reg. Goes riding and walking. Neat in appearance. Habits clean. Talk usually coherent.

Mch 27 94. Works quite steadily on ward. Neat in appearance & clean in habits. Appetite fair. Behavior violent at times. Incoherent in speech. Apr 28 94. Appetite very poor. Bowels constipated. Violent in behavior at times. May 31 94. Works quite steadily on ward. Appetite poor. Violent in behavior at times. June 30 94. Very noisy at times. Works in dining room & hall. Goes out riding & walking. July 7 94. Was sick in bed 1 day, complained of pain in stomach. Appetite not very good. Aug 31 94. Behavior violent at times, also extremely noisy. Works quite steadily on ward. Appetite very poor. Bowels regular, appears to fail fast at times. Sept 28 94. Behavior violent at times. Is also extremely noisy when excited. Appetite very poor, bowels constipated. Works quite well on ward when in mind.

Oct 20 94. Worked in the Center room for days. Goes riding and walking. Nov 30 94. Has been very noisy the past week. Appetite rather poor. Dec 30 94. Noisy at times also violent in behavior. Works quite steadily on ward also helps in Center dining room occasionally. Jany 30 95. Same. Febr 28 95. Works on ward. Behavior violent at times. Ran away from Center dining room. Has been on ward since. Mch 31 95. Extremely noisy, also violent at times. Works some on ward. Appetite good. Bowels regular. Goes riding & walking. Apr 27 95. Violent in behavior at times. Works some on ward. Appetite good. Bowels regular. Goes riding and walking. May 29 95. Behavior very violent at times. Talks very incoherently & is very vulgar & profane. Appetite good. Bowels regular. June 24 95. Works some on ward. Talks very vulgar, profane incoherent. Appetite good. Bowels regular. Goes riding & walking. Sept 28 95. Has been quiet in behavior for some time past. Works quite steadily in laundry. Appetite good. Bowels regular. Oct 1 95. Patient on ward. Does not work in laundry. Nov 18 95. Has been very irritable of late also noisy at times. Appetite good. Bowels regular. Gen. health apparently good. Dec 26 95. Quite violent at times. Works on ward. goes riding & walking. Appetite & general health good. Apr 30 96. Has many delusions & speaks incoherently most of time. Very good worker. Violent. Noisy & profane when temper is aroused but subdues easily on being denied some privileges. Attends most amusements also goes walking & riding. Appetite good. Bowels regular & general health apparently good. Tidy in appearance.

Summary Nurses Notes by Dr. L. L. Phelps:- Aug '96 At times very quiet & well behaved: then has spells of being quite violent & hard to manage: When quiet takes an interest in helping with work: Nov. No change. Feb. '97 Gen. health good usually quiet: works some: at times very violent: no mental change: May '97 no change in any way: July '97 Clean & tidy: usually quiet: violent spells are seldom: but fight hard at times: Gen. health seems good. (Board by Dr. A. M. Phelps) Sept 29 '97 Patient does not change as the years go by. Always talkative & rather restless: Does some work: seems in good health. Dec 10 '97: weight 193: Sept 27 '98 Transf. to W3.: Nov. 17 '98: Transferred to C3. Feb. 17 '99 Visited by sons: Is unchanged during intervening time.

Personal and Medical History of Ann Knudson

Cont. by Dr. P. A. Bell) Mar to Sept 99: Gen. health excellent: appetite good: sleeps well: takes out door exercise: works in dining room: bowels constipated: violent at times: has delusions & talks incoherently: often sarcastic: Apr 29 Struck Mrs. Haggerty in face: May 10 '99 Struck Mrs. Smith: Transf. to W3. Is not often troublesome: only occasionally. Wt. 192 lbs. Sept 1- Feb 28 1900 Patient neat & tidy: General health good: Eats & sleeps well: Cath. ateco given at times. FROM JAIL TO ASYLUM.

An Alleged Embezzler, Upon Examination, Found to Be Insane.

Israel Davy, the late bookkeeper of the Drake company, arrested a few days ago on a charge of forgery to the extent of $700, was not given a hearing in the municipal court yesterday. He was, however, taken to the probate court, and after an examination as to his sanity by Judge Olivier and Drs. Riggs and Stamm, was ordered taken to the Rochester insane hospital. Davy is well connected, and has held several positions of trust, among them being cashier of a Mankato bank. His mother, a fine-looking lady, was present at the examination. The inquiry was instituted at the instance of John F. Merrill, brother-in-law, who testified that Davy has not seemed to act reasonably at all times during the past few years. He has been addicted to an excessive use of tobacco—inhaling the smoke of cigars and cigarettes—and has been a sufferer from rupture and a violent headache. He has talked extravagantly at times of speculation, and in Kansas City two years ago bought several horses at different times, paying small sums down and giving notes for the remainder of the purchase prices. Dr. Shimonek, who has been his physician, expressed the opinion that he has paresis. A letter written from Minneapolis to Col. J. H. Drake confesses his irregularities with accounts of the Drake firm, and states that he had appropriated several amounts of the firm's funds which he estimated to aggregate about $700. The letter was quite lengthy and seems to be the work of a muddled brain. The mother of Davy testified to hereditary mental infirmities in the family. The examining physicians expressed the opinion that he is a fit subject for treatment in the insane hospital, and an order for his commitment thereto was made.

Approved.

GOES TO THE ASYLUM.

A Forger Who Will Be Kept Out of State Prison for a Time at Least.

Israel Davy, cashier, of the Drake mantel and marble company, who was arrested a few days since on the charge of forging the name of his employer to checks, the proceeds of which he said he spent in gambling, is now thought to be insane. The probate court accordingly ordered an examination into his case yesterday, with the result that examining physicians recommended that the prisoner be sent to the Rochester insane asylum, and held under surveillance for the present, as they are not able at this time to pronounce decisively upon his mental condition, although a strong argument in support of the insanity theory was found in the fact that he smoked cigarettes. This was supplemented by evidence showing that he was a sort of "Col. Sellers" in business schemes, and his brother testified to hereditary insanity in the family. Despite this evidence, a letter written by Davy from Minneapolis to his former employer was produced in court, and there wasn't much trace of insanity in it. It was a confession of guilt; told how near he had been to committing suicide; referred to the breaking of his mother's heart, and said he would have run away but for his wife and baby. The letter closed by an appeal to Col. Drake for mercy. This letter was written before the arrest, and would have accomplished its purpose had not Davy returned and resumed gambling.

CHIEF CLARK TALKS.

He Gives His Views of Rev. W. H. Butrick's Criticism of Him.

Chief Clark remarked to a PIONEER PRESS reporter yesterday afternoon that Rev. Wallace Butrick, in his sermon of Sunday upon the Davy affair had mixed up the facts of the case very badly.

"Late last Tuesday afternoon," said the chief, "J. H. Drake came to me and said he wanted me to arrest his cashier for embezzlement. The county attorney and his assistant had gone home, so that if the arrest was made then it must be done without a warrant. I said: Mr. Drake, it is dangerous business for us to arrest under such circumstances without a warrant. The great majority of these cases result in acquittal, and if Davy shall be acquitted it might result in trouble for us. Mr. Drake said he was afraid Davy would get away if he was not arrested at once. I then replied that I would make the arrest without a warrant upon his assurance that he would appear in court and prosecute the man.

"Detective Horan was at hand, and I sent him out to make the arrest. During our conversation Mr. Drake informed me that Davy had been gambling in Waterman's saloon on Third, near Jackson, and lost a good deal of the money there. He said he wanted Waterman's place closed up. I replied that under the high license law the mayor had no power to revoke Waterman's license. The only way to revoke a saloon license under this law is to prosecute the man in the district court, and, if a conviction is procurred, file the transcript of the conviction with the council committee on license. The council may revoke the license. I informed Mr. Drake of this feature of the law, and he replied that he knew better, that was not the only way to revoke the license; the mayor had the power to do it. He went out promising to come back in the morning to make complaint against Davy.

"In the morning Mr. Drake arrived at 8:30. The county attorney had not arrived and Mr. Drake sat in my office to wait. While there he said that he had told Davy to take his wife to Minneapolis, go into the gambling places where he had lost part of the money and insist on having his money back. He said Waterman was in some way related to Davy and ought to help him out. He insisted that Waterman's place should be closed up. I replied: 'I'll bring Waterman in in ten minutes if you'll make a complaint against him.' He said that he would not do that. I said, finally, 'I'll have him brought in anyway, and you can talk to him.' I sent Capt. Cook down to Waterman's place with instructions to bring him to my office. Cook found that Waterman was out to the horse sale on the fair grounds. And so I told Mr. Drake to come back the next morning and I would have Waterman there to see him. Accordingly on Thursday morning Waterman was brought in, but Mr. Drake failed to appear. I, of course, then let Waterman go. I understood afterward that Drake had Waterman come to his office and there they talked matters over.

"I have grave doubts about there being any gambling to speak of in Waterman's place. But if there is, why was Mr. Drake so backward about prosecuting him. I was certainly ready to do my part."

Detective Horan came in while the chief was talking with the reporter, and presently broke in with:

"And yes, I see that the preacher says that when I arrested Davy in Waterman's I found him with six poker chips before him. That is not true; nor did I ever tell any one such a thing. I don't know what Davy may have been doing before I arrived, but he was certainly having nothing to do with cards or chips when I found him."

Pronounced Insane.

The jury in the Israel Davy case went out about noon yesterday. County Attorney O'Brien strongly presented the case in his argument to the jury as to the sanity of Davy. Judge C. E. Flandrau, in arguing the mental disorder of his client, delivered himself an eloquent and masterly discussion on the subject of insanity in general and of Davy's condition in particular. The question submitted to the jury is as follows:

Is the defendant, Israel Davy, in a state of idiocy, imbecility, lunacy or insane, so as to be incapable of understanding the proceeding or making his defense in the charge with which he stands indicted?

It was nearly 9 o'clock when the jury returned into court with an affirmative answer to the question. Attorney Carroll, who was connected with the case, approached the jurors after the verdict and began to express to them his thanks, when he was severely reprimanded by Judge Egan, who insisted that such a course could not be permitted in court.

Davy was remanded to jail, and will be taken back to the Rochester asylum until such time as he is adjudged to be sufficiently restored to mental competency to be tried for forgery.

NO ACTION YET.

Israel Davy

Chief Clark remarked to a PIONEER PRESS reporter yesterday afternoon that Rev. Wallace Butrick, in his sermon of Sunday upon the Davy affair had mixed up the facts of the case very badly.

"Late last Tuesday afternoon," said the chief, "J. H. Drake came to me and said he wanted me to arrest his cashier for embezzlement. The county attorney and his assistant had gone home, so that if the arrest was made then it must be done without a warrant. I said: Mr. Drake, it is dangerous business for us to arrest under such circumstances without a warrant. The great majority of these cases result in acquittal, and if Davy shall be acquitted it might result in trouble for us. Mr. Drake said he was afraid Davy would get away if he was not arrested at once. I then replied that I would make the arrest without a warrant upon his assurance that he would appear in court and prosecute the man.

"Detective Horan was at hand, and I sent him out to make the arrest. During our conversation Mr. Drake informed me that Davy had been gambling in Waterman's saloon on Third, near Jackson, and lost a good deal of the money there. He said he wanted Waterman's place closed up. I replied that under the high license law the mayor had no power to revoke Waterman's license. The only way to revoke a saloon license under this law is to prosecute the man in the district court, and, if a conviction is procurred, file the transcript of the conviction with the council committee on license. The council may revoke the license. I informed Mr. Drake of this feature of the law, and he replied that he knew better, that was not the only way to revoke the license; the mayor had the power to do it. He went out promising to come back in the morning to make complaint against Davy.

"In the morning Mr. Drake arrived at 8:30. The county attorney had not arrived and Mr. Drake sat in my office to wait. While there he said that he had told Davy to take his wife to Minneapolis, go into the gambling places where he had lost part of the money and insist on having his money back. He said Waterman was in some way related to Davy and ought to help him out. He insisted that Waterman's place should be closed up. I replied: 'I'll bring Waterman in in ten minutes if you'll make a complaint against him.' He said that he would not do that. I said, finally, 'I'll have him brought in anyway, and you can talk to him.' I sent Capt. Cook down to Waterman's place with instructions to bring him to my office. This man was brought by Deputy Sheriff Kinney with the following history. Insanity was first manifested 2 years ago in Kansas. So now manifested on financial subjects, characterized by ~~incoherent and~~ irrational and preposterous schemes. Grandfather had Dipsomania, 2 cousins Chronic insanity and 2 Uncles Paranoia. Absinthe habit for two years, opium smoking also gambling, excessive use of alcoholics and tobacco. Had been arrested for forgery, confessed the act upon being discovered. His employer forgave him and reinstated him & he immediately resumed his old habit.

June-8-1891. Patients mother accompanies him and gives the following statements. His father died some 20 years ago, healthy and strong. His Father's father had spells lasting from 2 week to a month, every 6 months or more - Was uncontrollable. His Fathers eldest brother was the same. One of the sons of this last man was insane. A younger brother of his fathers was insane from about 22 till his death at 80 years of age. This last man was a brilliant scholar when young, worked hard and about the time of his graduation was found to be acting peculiarly and dishonestly, had extravagant schemes and was brought home when he was kept in somewhat of close watching for a time but finally got the idea that he was a painter. He went to Spain when he settled down in a small town and lived the rest of his life being known there as the "crazy painter." Another cousin of Davey's was also insane. Of the 9 other sons & daughters of his Grandfather all were presumably healthy, except one who had some Brain disease about the time of his death. Of this mans Davey's immediate brothers and sisters, one brother died of Diptheria and 3 sisters are now living and supposed to be healthy - June-9-1891. Mother further states that he has shown change of character & habits, That he was formerly upright & honorable but now drinks, gambles and is at times irritable. About 4 years ago he would say of such a comrade, "he dont like me" when there was no cause for any such suspicion. This was about the time he went to Kansas. He went there at $100 per month and with no capital. He wanted to build a house after going there and his Mother promised him some money if he would wait. He said he

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

could build for $800 – & went ahead & built on which cost 5000 – The mortgage was foreclosed & his Mother had to settle for him. This was just at the decline of speculation in Kansas, & in the speculative spirit of the time he may have seen some reason for such rashness. He never gave any good reason for this speculation & was rather irritable & disinclined to talk about it. There is one thing which was not known at the time, but which is now told by Judge Tyler who went down to Kansas to investigate to the effect that – he was while in Kansas, continually buying young horses, paying some partial amount of the purchase price. During all this time, he had no capital with which to work. His Mother brought him to Fond du Lac, where he tried several occupations unsuccessfully for a time & was quite depressed, secretive & irritable. No insane acts are noted however. Finally, she secured him this position in St. Paul & did not see him personally until this occurrence. He had headaches from last July, & made this an excuse for taking Absinthe, Opium & drinking & finally began gambling. Recently he wrote to Employer confessing the embezzlement. This he did after walking two nights upon the streets in agitation. The employer was lenient & wrote him to fix up the books & he would see what could be done. But after this he went right to a gambling saloon & spent the whole of the day. The employer was very angry & would listen to no excuses. His employer insists the letter was not at all insane. This information was given by his Mother.

Mr Davey himself to-day in being examined states that he has complained most of headaches. They commenced one year ago in March. Has pain through temples which would come & go. It comes frequently begin two hours after getting up & last through the day, being present all the time in dull fashion, with occasional severe pains. It interfered some with work frequently, but only a few times so that he had to stop work. He commenced using Absynthe & Whiskey

Statements of Israel Davey.
Made in course of examination June 9th 1891.

Has complained most of headaches. Commenced one year ago in March. Had pain through temples which would come and go. Frequently begin two hours after getting up and last through most of the day, being present all the time in a dull fashion with occasional severe pains. Interfered some with work frequently, but only a few times so he had to stop work. Commenced using Absynthe and Whiskey – don't remember when first – used it: had perhaps taken some three or four times before he took it for headaches. Could not say when. Head aches grew worse and more worst in October and November. Three weeks ago or more tried to shut down on both. Some days shut down and some days did not. Head aches gradually disappearing since February. Thinks had three or four in last month. Thinks that likely alcohol drinking and absynthe dulled his faculties to some extent. Never had to give up work however, although work was somewhat impeded. Always was unable to do all that intelligently though he thinks ability was somewhat impaired. Thinks his work has been generally well done. Only for two months has he noticed trouble with forgetfulness and then he would forget entirely something. Would remember the ordinary run of business but would forget entirely some memorandum. That is to say he would not only forget it but would be unable to remember it when reminded of it afterwards. The typewriter for instance, would ask if he had attended to such and such a thing and would say Col. Drake has spoken about it again; and he could not recall ever having heard anything about it. One of these times was some time at Cedar Rapids. He spent two nights and one day in Minneapolis trying to decide what to do. He began to realize what was going on. Col. Drake had talked of an exploit that was coming up to help close up the partnership. At one time he got ready to leave. But he did not know where to go and the thought of his wife and children prevented. Being asked what this realizing meant, he says to realize that he had defrauded his employer and that he did not know where it would lead him to. Fear of this led him to write a letter. Can't tell when first defrauded employer. Can't tell within four months. Can't remember the particular act. Thinks usually kept money out of the cash or currency. Can't remember the first time nor the last. Remembers more distinctly the forging of checks. Says has been reminded of it as many

Gynecological exam.,		Illusions,	—
		Conversation, character of,	Hesitates much. before answering questions or even in midst of sentences.

This man was brought by Mr Braley sheriff with the following history. Insanity was first manifested about Jan 1st 1891 by Melancholy tendency and fear of voices and ideas that every body was after him. Same ideas now present. Was not named who did. Was sent home from Duluth about Jan. June 11th 91 admitted to day. Clean and well dressed & quiet. was put on C.2. P. 90. June 12th 91 was quiet all night said he slept well. when questioned, hesitates quite a while before answering. looking dreamily away from speaker. says he feels all right. June 13th 91 says he slept 2 hrs is more active and livelier to day says he is well, June 22nd 91 was examined to day is about his usual weight, has not worked for the last six months. has passed his time thinking about everything. staid in the house a good deal. never went in society much. acknowledges that he was melancholy and had fears of people, while in Duluth, he used to "roast" people a good deal and they roasted him and he roasted back. (Patient says roast means cussing" and was brother some in Arizona. since coming here. they have not harmed him bodily, but he has feared it. this is a pretty hot place and has a good many combinations they have advised him here by word of mouth. when patient sees 3 talking together will sometimes imagine they are talking about him. acknowledges it is foolish to feel so. memory seems uncertain and judgement of facts not accurate. hesitates before beginning sentences and in the midst. has had gonorrhoea but denies any distinct sore. July 14th 91 Patient has been quiet and apparently slept well seems quite well Physically. Keeps clean tidy and has the appearances of being well behaved. but has been for some time getting into trouble with fellow Patients. he deliberately, and coolly walks up to them and strikes or slaps them. this went to such an extent that it was found necessary to remove him to C. 3, 3. he has behaved well there.

July 22/91. Continues to make disturbance. July 26/91. Struck one of the attendants today. July 30/91. See letter from his mother, of this date, on letter file. Dec 15/91. Patient was visited by his brother today. The brother makes the following statement; The mother is very nervous; patient worked in St Paul until 3 years ago as bell-boy in hotel, probably living fast, went from St Paul to Duluth worked in an hotel there: did not write home much; did not want to do so. Brother knew almost nothing about our patient but thinks he went with fast women. While in Duluth got into trouble with a bar-keeper and got the idea that the bar keeper "had it in" for him. Left Duluth last February — stopping in Redwing to see a sister and then coming home. Brother does

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

not know how long the trouble manifested itself, before patient was sent home. At home, patient helped his mother at work; would work for a while, then stop & stare. Worked a couple of week, doing poorly. Was then idle. At first, went at some; later could not be got out of the house. Refused medicine, even from his mother, spitting it even in her face. Always took a club to bed with him. Memory short; absent-minded.

Was examined recently by Dr. Phelps. The following points were noted. A history of slow invasion, irritability of temper; there is hesitation in being aroused, uncertain memory; mental sluggishness; hesitation of speech; marked exaggeration of patellar reflexes and pronounced incoordination - on these points a diagnosis of General Paresis was made -

Jan 2/92. Visited today by a friend. Feb 6/92. Visited again by a friend. Mar 4/92. Weight 160½ pounds. Pulse 72. Apl 4/92. Weight 154½ pounds. Pulse 82. May 3/92. Weight 160½ pounds. Pulse 80. May 18/92. Physical health quite uniform and good. Sleeps well, never noisy by night or day; sits in one part of the hall; refuses to go out walking. Is clean and tidy. Is contented; never making any requests, wholly unconcerned about himself and of poor memory. June 3/92. Wt 154 pds. Pulse 74. July 5/92. Wt 157 pds. Pulse 87. Aug 3/92. Wt 153½ pds. Pulse 84. Recently moved from B³ to B²; Sept 5/92. Wt 151½ pds. Pulse 80. Oct 4/92. Wt 146½ pds. Pulse 84. Nov 2/92. Wt 142½ pds. Pulse 74. — Has steadily lost in weight since May last; in all about 19 pds, without apparent cause. Today, got into a fight with a fellow-patient, the first for several months. —

Nov 25/92. Is uniformly quiet, resting and sleeping well at night. Conduct for several months past has been quite uniform. Refuses persistently to go out walking, without giving reasons. On the Ward, sits in one part of the hall all day, or moves about from that part of the hall to the wash-room. Has lately been somewhat more active physically, and has talked a little more freely, limiting his conversation, however, to "Good-morning", at the same time coming forward & meeting Dr. & shaking hands with him. Seems happy and Contented. Recently tested for in-coordination, but very little was found.

Jan 23/93. Is uniformly quiet, apparently resting well at night. Spends almost all his time, by day, when on the hall, in one alcove at the end, sitting unoccupied & speaking to no one; invariably, however, when the Assistant Physician goes through, patient gets up, comes forward to meet him, greets him & then returns to his Corner. Feels well. There seems to be no pronounced muscular disturbance. Has lost in weight. May 21/93. At times, is irritable and on 2 occasions lately struck & kicked two of his fellow-patients. Is actively active, walking up & down the hall (while inside) the greater part of the time - When at rest, seems ill at ease. Does some work on the hall. Talks occasionally, but only to ask some trifling question or make some slight remark. Says he feels well. Has made quite a gain in flesh.

May 30. 93. Appetite good Bowels regular Inclined to be ugly at times. Works on Ward. Easily excited & very uneasy.

Since 6.93 Wt 140 P. 80 June 30 93 Seems to be growing more reserved & odd in his

Hearing,	Poor-		
Co-ordination,	—	Emotional state,	Dull- Aloof. Demented
Reflexes,	Pat. Ref. 9.		
Heart,		Delusions,	Cant discover-
Lungs,			
Examination urine,	Yellow Acid. Sp. Gr. 1020- Urea 1.9% Small quantity Albumin Turbid	Hallucinations,	
Gynecological exam.,	Right labia minora much hypertrophied- Vagina stenosed Uterus atrophied- Very sensitive	Illusions,	
		Conversation, character of,	Will not talk except some half intelligible stuff if aroused.

Personal and Medical History of Christina Winter

This woman was brought here by Dep. Sh. Henry Reynolds- Guest of Jordan, Wpk. & his wife- Has been caring for her for about six yrs. No disposition to injure others. Filthy habits- Has well previous to six yrs ago. Eats two meals. Noisy at night- Destroys clothing. Thinks girls will kill her. Has been under restraint and has needed constant watching.

Nov. 29" 91 Patient remains in a dull stay upon the ward, is stupid, eats pretty well, complains occasionally.

Dec. 30" 91 Was in bed to day, although the Influenza is prevailing, it seems to be more a matter of weakness with her.

Dec. 31 Still in bed. Jan. 1st 92. Still in bed, seems no worse.

Jan. 6th 92 Is to day getting up, as there seems to be no especial sickness.

Feb 10" 92. Has been up & about ever since last note & in her usual health. She eats not very well, but is in good color & keeps in about the same health. Patient has a rupture. Is noisy at times, & is usually filthy. Wt. 95. lbs.

May 8" 92. Patient reported to day to have gangrenous condition in one of her toes. It seems that one of them has been noticed as black, for some little time, but the condition was not recognized, or spoken of until to day.

She is lying in bed seeming not much different from usual, although is probably more weak.

Has been up on the ward part of the time & part of the time in bed, since coming here, very dull & demented in mental condition.

May 6" 92. Patient died suddenly to day; probably of heart failure.

Personal and Medical History of Catherine Dolne

This woman was brought here by Mr. Kinney Dep. Sh. and mfr. attack began about a month ago. Symptoms manifest upon Religious matters. Fears that she is lost. Imagines that she is prohibited. No depositions to injure others. No filthy or destructive habits. No consumption. Medical treatment during last four months

Mrs Belmer (Mistake)

Nov. 21st 91. Patient remain upon A-1, still asks occasionally to or daily to go home, has good health, + does not seem in any way to comprehend the reason of her stay here. Is quite demented.

Feb 10th 92 Writes frequent letters, was visited by one of her daughters, who directed me to destroy them, as they were all supplications + of no use. Weight in Feb. was first 100 lbs. Is clean, tidy + takes care of herself. Remain upon A-1.

June 15th 92 Patient continues upon B-2, is usually to be found sitting in the far corner of the room, lying under the bed, with an expression of melancholia upon her face. Will not talk with her, or at least to respond to anything, although behaves very quietly in the way before mentioned.

Sept 9th 92. Patient still as before, will attempt to run away as soon as she is taken out of doors, otherwise behaves and such a way as to make little or no trouble. Is evidently, however, in a chronic state of melancholia, which is verging toward a demented condition.

Sept 12 '92 Patient stays in room, quiet, somewhat depressed

" 13 eats very little, takes care of her room,

" 20 Bowels regular. sleeps little, is quiet. cries most of the night.

Oct 25" 92 Usually in room, dont talk. tries to get away. Has to be taken by force to dining-room,

Oct 30" Menstruates regular, eats little, bowels regular, cries a good deal. Nov. 92 Still has to be taken by force to dining-room, eats + sleeps very poorly, bowels regular. talks a little at times.

Jan 25" 93 Appetite good, talks some, sleeps good, stays in her room all of the time - menstruated 10-13, no work,

Feb. 24 Stays in room most of time, takes care of one of the old ladies on the hall, talks to self, neat + clean.

March 24. 93 Refuses to Eat. At times Restless at times. Stays in her Room most all of the time. Will talk. Cares about herself. Bowels regular.

Personal and Medical History of Catherine Doehne.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

May 31. 93. Appetite poor. Sleeps usually well. Is very quiet & is in her room all day. Talks only when answering questions. Menstruated about the 14-17. Bowels regular. June 3. 93 Appetite good. If meals are carried to her room she will eat only, not go to the dining room. Lies mostly upon the bed & if taken out for a walk, tries to turn away. July 10. 93 Menstruated. (9th?) July 31. 93 Appetite good. Tidy in habits. Same as June. Aug 5 93 Removed to Insane Asylum. Aug 30 Constantly tried to make her escape, while here, hiding behind doors most of the time. Finally broke window brace & was caught in act of escaping. Transf. Back to B2 Aug 30. 93 Sept. 1. 93 Head is still quite sore. Sept 7. 93. The same eruption on her head. Seems to be coming out on the body. Sept 10. 93 Menstruating. Sept. 27. 93 Appetite fair. Habits tidy. Lying on the room most of the time, always has to be taken to dining room & clothes to be put to bed.

Oct. 13. 93. Has a rash broken out on body. Use wash as directed, but will not take her medicine. 23. Pleading for to be killed & allowed to kill herself. Taken hold of several times. Tries very strongly to strangle herself. Oct. 31. 93. Appetite fair. Not very tidy about self. Has to be watched constantly. Nov. 18. 93 Suffering with pain in stomach but will not take any med, lying in bed most of the day. Nov. 29. 93 Appetite fair. Has some trouble at times with her stomach, but will not take any food. so that it is very difficult to do anything for her. Habits clean. Not very tidy in general appearance. Rests well at night most of the time. Mch 29 94 Appetite fair. Habits rather untidy. Talks in English. Has Eczema on arms & also on limbs. Some on the body. Rests well at night. Apr. 8. 94. Out of bed 2 hrs. quite still, vomiting. Complains of pain in stomach. Ill & untouched Apr 30. Not any change. May 10. 94 Same. May 31. 94. Appetite poor. Untidy in appearance. Has to be taken to dining room as she does not want to go. June 30. 94 Very noisy a good deal of the time. Sits in the same place most of the time. Does not eat well. Never wants to go to dining room. July 31. 94 Quite noisy at times. Does not eat well. Goes out walking, but tries to turn away. Aug 31. Noisy at times. Eats quite well. Goes walking riding. Regularly & appeared. Sept. 10. 94 Noisy at times. Appetite poor. Tries to turn away, when out walking. Sept 22 94 Very noisy all day. Appetite poor. Oct 6. Had diarrhoea. Oct 12. 94 Tried to turn away while out walking. Oct 31. 94 Appetite fair. Bowels regular. Complains of nausea. Noisy at times. Nov. 6. 94 Seems sick at stomach. Complains of headache. Nov. 9. 94 Very noisy all day. Tried to turn away while out walking. Nov 30. 94 Appetite poor. Bowels irregular. Extremely noisy this week. Dec 13. 94 Noisy most of the day. Complains of nausea. Does not eat well. Dec 31. 94. Same. Always tries to turn away, when out walking. Jany 27. 95 Resists when going to dining room. Febr 4. 95. Very noisy most of the day. Feb. 28. 95 Does not eat well. Noisy at times. Complains of Nausea. Bowels regular. Untidy in personal appearance. Mch 10. 95 Noisy most of day. Body broken out. Mch 18. 95 Complains of feeling sick and of pain in bowels. Some vomit. Mch 20. 95 Still complains of being sick. Complains of nausea. Mch 31. 95 Appetite fair. Bowels regular. Quite noisy at times. Talks incoherently. Goes walking & riding. April 8. 95 No change in behavior. Noisy at times. May 17. 95 Quite noisy this week. No change in behavior. June 3 Appetite poor. Bowels regular. Quite noisy at times. Some nausea. Goes riding & walking. Runs away when out walking. Untidy in habits. July 13 Quite sick nausea considerable. July 20 Is looking better. Sept. 6 Patient noisy. Has delusions. Sleeps well. Appetite good. Nov. 20 Vomiting. Seems to have pain. In bed. Gave Hyp. of Morphine gr 1/8. Moaning most of time. Temp. 97. Nov 21 In bed. Seems some better. Ginger T. 3ij. Brandy 3iij 3iij

Personal and Medical History of James Kiarce.

This man was brought by ____ with the following history. Insanity was first manifested 8 weeks ago by incoherent talk, profanity, threatening & talkativeness. At present is incoherent, full of general delusions, runs away hides, is suspicious boastful etc. June 16th 91 Slept in suicidal Dormitory. was quiet and slept most of the night. A.M. up in time. talks quite freely. ate but little, tongue is coated, June 17th 91, Patient slept well all night. July 14th 91. Patient was examined some time ago his weight was found to be 116. Claims that he used to weigh 130. his nutrition is poor. is thin and has poor color, heart and lungs seem about normal. Patient is quite talkative, speaking up promptly, and getting quite mixed and incoherent as he goes on. seems at times as if it were due to recklessness, seems to have delusions of fear of danger, said they tried to kill him". he seems quite happy and contented, Patient has been mildly maniacal, somewhat restless and talking a good deal. and following with his fellow Patients. In all his manners and rather foolish. seems to be rather worse lately, at times seemed a little inclined to be ugly, staring in insolence & silence at his addresser. he has been clean and tidy in his habits does no work.

Aug 7/91. Visited today by his brother. Oct 16/91. Complains of a sour stomach & heart-burn. Nov 10/91. Pupils are unequal, left the larger. Dec 18/91. Visited today by his brother. Dec 21/91. Pupils noticed ~~as~~ again as unequal, left the larger.

Jan 12/92. Complains that he does not sleep well. Jan 18/91. Asks, quite often, for sleeping medicine. Feb 1/92. Weight 123 1/2 pounds. Mar 4/92. Weight 120 1/2 pounds. Pulse 68. Apl 14/92. Weight 118 1/2 pounds. Pulse 76. Apl 12/92. Visited today by his brother. May 3/92. Weight 119 pounds. Pulse 61. May 18/92. Is not robust physical health, being pale and thin, having lost somewhat in weight. Does not complain of feeling ill, however. Is quiet, at night, and, with the exception of some rather loud talking, also by day. Is clean and tidy. Does no work. Is inclined to be rather insolent in manner, conversation and behavior. June 3/92. Wt 117 1/2 pds. Pulse 58. July 6/92. Wt 117 1/2 pds. Pulse 72. - Aug 3/92. Wt 117 pds. Pulse 84. Recently moved from C2 to A2. Sep 3/92. Complains that he is bilious and has indigestion. Sep 5/92. Wt 117 pd. Pulse 96. — Oct 4/92. Wt 116 pds. Pulse 82. Nov 2/92. Wt 117 1/2 pds. Pulse 88. Nov 25/92. Uniformly quiet, apparently resting & sleeping well. Goes out walking, moving quite promptly. When at the hall, sits in some obscure corner, away from his fellow-patients, talking none. Usually, will answer greetings; at times, will not. Is rather thin and pale. Is now A2.

DR. FORBES, ONCE PASTOR HERE, DEAD

Methodist Minister Succumbs at Son's Home in Duluth—Funeral in St. Paul.

WAS ILL THREE WEEKS

Survived by Wife and Two Sons—Noted as Orator and Lecturer.

10-26-13

Dr. Robert Forbes, 65 years old, a resident of Philadelphia, and for many years connected with the Methodist Churches of St. Paul, died last night in Duluth after an illness of three weeks.

Dr. Forbes became ill while attending an annual conference of Methodists in North Dakota recently, and was taken to the home of his son, Mason Forbes, in Duluth.

Wife and Two Sons Survive.

News of his death was received in St. Paul last night. He is survived by his wife and two sons, John Forbes of St. Paul, manager for Farwell, Ozmun, Kirk & Co, and Mason Forbes.

Dr. Forbes was a resident of St. Paul for twelve years, from 1881 to 1893. During this time he was pastor of the old Jackson Street Methodist church for four years. It was through his efforts that the Central Park Methodist church was built. Later he was appointed district superintendent of the St. Paul district, which position he held eight years.

Made Extension Secretary.

Then he was stationed at Duluth as district superintendent. After serving there four years he was appointed first assistant secretary of the Home Missionary and Church Extension Society of the Methodist Church, which position he held as secretary while he has lived in Philadelphia.

He was noted as an orator, having made several country-wide lecture tours.

Funeral Services Tuesday.

The funeral services will be held at the Central Park Methodist church in St. Paul at 2 p. m. Tuesday. Bishop Quayle will be asked to preach the funeral sermon. Burial will be in Oakland cemetery.

GOES TO THE ASYLUM.

A Pathetic Remark by Rev. Robert Forbs in the Probate Court.

When information for insanity was filed against Rev. Robert Forbes on Saturday his friends agreed to look after him until yesterday and see that he was in court at the time appointed for an examination, but when the hour arrived the reverend gentleman was not present. Half an hour later, however, a man walked before Judge Olivier and addressed him: "Good afternoon, judge. I guess you don't know me." The judge replied that he did not, whereupon the man said: "I am Rev. Robert Forbes and I am to be examined on a charge of insanity." Mr. Forbes said he knew he was not right, "for," said he pathetically, "I can't write sermons as I used to. It is necessary to rehash the old ones."

Mr. Forbes said that he believed he had been injured by the excessive use of tobacco, but said he had been unable to break off its use. He inquired whether they could cure him at the asylum, to which he said he supposed he would be sent. He said he had hoped to effect a cure of his demention by traveling around the country with the friend with whom he had been lately, but seemed contented to accept the judgment of others as to what was best for him. The examining physicians declared him demented, and it was ordered that he be taken to the Rocester asylum. Mr. Forbes' mind seems perfectly clear except on the one point of his wife's devotion.

Rev. Dr. Forbes Adjuged Insane.

Owing to the fact that public mention had been made of the pending examination for insanity of Rev. Robert Forbes of this city, the gentleman had become aware of the design of his friends and secreted himself where he could not be found at the hour set for the examination. The doctors were notified that the patient was not to be had and all thought of pursuing the examination was given up for the day. Before about 1 o'clock in the afternoon Mr. Forbes walked into the probate court and announced that he was ready to submit himself to the physicians. Some trouble was experienced in getting these gentlemen together again, but an examination was finally made by Doctors Riggs, Murphy and Boardman, which resulted in the commitment of Mr. Forbes to the Rochester asylum. His mental disease is pronounced paranoia, and his delusion is that his wife is unfaithful. He was similarly afflicted about fourteen years ago, but recovered his mental balance again. Mrs. Forbes has the sympathy of a large circle of warm friends in her trial

Personal and Medical History of Robert Forbes.

EXAMINATION OF ROBERT FORBES. JUNE 16TH 1891

In conversation states, has had no disease for 20 years except a slight poison sore upon his hand. For about a year had suffered from insomnia quite constantly. For a year preceding there had been occasional symptoms. He assigns conviction of his wife's infidelity as the cause for this insomnia. States that he is sure that he would not have suffered, had it not been for this ~~xxxxx~~ cause.

He has been out West of late and has been improving her thinks. He came back and his friends put him in here. He has no head aches exce t perhaps one or two in two years. Has no pain. Occasional slight dizziness, of little or no importance. thinks handwriting about as good as ever. Tries to write and thinks is a trifle nervous. Appetite fairly good, has concealed his trouble he says and thinks it impaired his health. When the trouble commenced, and he was convinced of it, he confided it to a friend, and the friend gave it away to the Waseca Assembly and the publicity effected him strongly. Has written no new sermons in the past year. Couldn't do it Lacked interest in it, lacked vigor to do it. Thinks if tried it would be a bad job. Memory has been fairly good as far as he knows; Slept well last night. Says that emotions would break away at times, and he would do all sorts of mean and unreasonable things and swear &c. Would repent afterwards. Couldnot tell why he did it. He wanted to resign on this account. Admits such an abnormal and almost uncontrolable impulse in this respect. Change of scenery helped him some andhe had this outbreak almost never except at home. He thinks it is abnormal. The continual though of this has brought him here. Tobacco habit has also been extensive and he thinks---followed by a -- which he admited to a friend. He admits that he has no legal proof of his wife's infidelity. Goes over the whole ground and the reasons for suspicion, none of which are any where near conclusive. And yet says that he feels-- He also admits of having gone down town with a revolver one night to shoot the man of whom he had suspicion. He says that he accused the man and that he denied it as mildly as he would an invitation to tea. Which he thinks is confirmation of the truth of the accusation. He states that whether this is true or not, he believes that it was right that he come here. Basing it, however, his belief, upon the fact of his emotional tendencies in swearing &c.

And yet says that he feels-- He also admits of having gone down town with a revolver one night to shoot the man of whom he had suspicion. He says that he accused the man and that he denied it as mildly as he would an invitation to tea. Which he thinks is confirmation of the truth of the accusation. He states that whether this is true or not, he believes that it was right that he come here. Basing it, however, his belief, upon the fact of his emotional tendencies in swearing &c.

PHYSICAL CHARACTERISTICS.		MENTAL CHARACTERISTICS.	
Height,	5 ft 8 3/4"	Mental activity,	Very active.
Weight,	195 lbs. (Has been for some years).		
Nutrition of body,	Good.	Memory,	Apparently good by conversation.
Wounds or abnormalities,	Obtld quite heavily. Scars of former movements mon coarse muscular movements.		says good in Sermons.
Tongue,		Perceptivity,	Good.
Pupils,	Normal. Respond to light & accommodation.		
Sight,	Slightly impaired. Left eye most.	Reasoning power,	After long Conversation seems logical in form & no flaw found except that about wife is not sufficiently formed.
Hearing,	Good.		
Co-ordination,	Romberg nose well. Stands extra well. Walks quite well.	Emotional state,	Self is uncontrolable at times chiefly at home. Sworn etc.
Reflexes,	Pat. Reflex. 5-6.		
Heart,		Delusions,	None noted except regarding the infidelity of his wife.
Lungs,	Probably good.		

DR. FORBES, ONCE PASTOR HERE, DEAD

Methodist Minister Succumbs at Son's Home in Duluth—Funeral in St. Paul.

WAS ILL THREE WEEKS

Survived by Wife and Two Sons—Noted as Orator and Lecturer.

10-26-13

Dr. Robert Forbes, 85 years old, a resident of Philadelphia, and for many years connected with the Methodist Churches of St. Paul, died last night in Duluth after an illness of three weeks.

Dr. Forbes became ill while attending an annual conference of Methodists in North Dakota recently, and was taken to the home of his son, Mason Forbes, in Duluth.

Wife and Two Sons Survive.

News of his death was received in St. Paul last night. He is survived by his wife and two sons, John Forbes of St. Paul, manager for Farwell, Ozmun, Kirk & Co., and Mason Forbes.

Dr. Forbes was a resident of St. Paul for twelve years, from 1881 to 1893. During this time he was pastor of the old Jackson Street Methodist church for four years. It was through his efforts that the Central Park Methodist church was built. Later he was appointed district superintendent of the St. Paul district, which position he held eight years.

Made Extension Secretary.

Then he was stationed at Duluth as district superintendent. After serving there four years he was appointed first assistant secretary of the Home Missionary and Church Extension Society of the Methodist Church. Since locating in Philadelphia he has lived in Philadelphia.

He was noted as an orator, having made several county-wide lecture tours.

Funeral Services Tuesday.

The funeral services will be held at the Central Park Methodist church in St. Paul at 2 P. M. Tuesday. Bishop Quayle will be asked to preach the funeral sermon. Burial will be in Oakland cemetery.

Personal and Medical History of Robert Forbes.

This man was brought by Dapty Sheriff Kinney with the following history. 14 yrs ago had an attack of suspicion of his wife. 2 years ago insanity was first manifested by the same suspicions and at times has exhibited fits of sudden passion and has a marked tendency to egotism. Nerve sedatives, tonics & reconstructives have all been given him with no effect. June 16th 91, Patient says he slept well last night, had taken a dose of Sulfonal. (Copy notes taken at examination 2nd P.) Visited by Rev. Mr Doran June 16th. June 17th 91. Slept about six hours. June 18th 91. Slept about 6 hours. Patient wants treatment and wants his Tobacco shut off. June 19th 91. Slept about 6½ hours. June 20 slept about 5 hours. June 21st slept about 6 hours. June 22nd 91. Has a tendency to constipation. given a pill of Aloin. Bella. et Abych. June 24th had slept 6 and 6½ hrs a night. June 25th has slept pretty well last night, when he slept 2½ hrs. was visited on the 18 and 19 instants. July 6th 91 Patient has been in the habit of laying in bed in the morning for a time, trying to supplement his nights sleep. on the 14 inst was visited by his youngest son and Dr Dewart of St Paul. July 11th 91 Permited to spend a few days with an old friend at Byron. July 14th 91. Physicaly Patient seems to be in good condition. he has slept from 5 to 7 hours since comming here with few exceptions. and has at times supplimented this with an extra hours sleep in the morning. Patient was quite restless before comming here. Patient was quite restless before comming here could not sit still 15 Minuts at a time. and very subject to sudded outbursts of passion. since comming here there has been a marked tendency to restlessness. which the Patient has made an effort to control. but no outbursts of passion. has talked freely and pleasantly. always argues his points well. Patient has spent his time between, at work reading playing of games and a good deal of walking. he has been given an unusual amount of liberty. not only of the Grounds but been permitted to go to the City. has never abused the confidence placed in him. he has made an effort to reduce the quantity of Tobacco used. but acknowledges that he uses to much Patient later went with a friend to the Northern part of the State to engage in some out-door work.

Personal and Medical History of Nettie Heinrich

This woman was brought here by sister Mrs. Buntrock and Dep Sh. Daley - For 3 or 4 yrs has suffered from nervous excitement and about 9 mos ago showed symptoms of acute mental derangement She thinks she is persecuted Speech is imperfect - Has almost forgotten English language Memory has failed. Does not recognize her friends. No disposition to injury others - No filthy or destructive habits Has been at St Johns Hospital Winona - Confined to the house - about five weeks at Hospital two or three at home Has had Subfanal at night for insomnia -

Aug-29-1891 - Has been improving some in behavior & condition Walks up & down ward restlessly - Heart beats in a tumultuous way - Very strong in its action & can be seen & heard all over the chest - Heart dilated - Speech so imperfect as to be a mere mumble of sounds - There seems a paretic condition of organs of speech & of limbs as well. Her walk was quite imperfect & consists in a hesitating jerky manner in all her movements - Walks a little stooping. Health seems fairly good -

Oct - 15 - 1891 - Died at 11.57 A.M. Was found in a faint on the floor - Pulse fluttering & ill - defined - respiration gasping - face grew livid in 5 minutes - Was called promptly but only in time to see her breathe twice, her heart having stopped all perceptible action before I arrived.

Died

Personal and Medical History of Josephine Rusicka

This woman was committed to this Hospital June 21-1889
Discharged March 18-1890 cured. Symptoms of insanity manifest
two or three weeks ago. Subject largely Spermiacy matter
and fear of being poisoned. No disposition to injure others
Has tried to commit suicide by drowning and by jump-
ing from top of her house. No disposition to filthy or de-
structive habits. Has not slept since her confinement in
jail. July 29-1891 Very untidy & destructive Noisy Aug 26'91 More quiet
Jan 7 Oct 22-1891 Very troublesome at times. Wanting her own
way. Health good. Eat well. Habits neat.
Nov 9/1891 Habits clean Says she wants to go home
Nov 22-1891 Imagines as that was made up from C.
Nov 24-1891 Very silly in her manner. Eat and sleeps
well. Does no work
Jan 27-1892 No change Named to annex.
Feb 19-1892 Sits quietly eye ready. Smiles and talks
to herself. Read a letter from her daughter a few
days ago in which she seemed to be quite interested
Seemed to be much pleased to hear from home
General health is very good. No work.
Nov upon B-2. Quiet neat & tidy. but quieted down con-
siderably from her former behavior. Talks silly.
Nov. 6.'91 Is violent this morning.
Mch 10"92 Has been moved to the Annex.
Feb 28-1892 Fell from a bench where she was sitting and
seemed helpless in left arm and leg when the attendants
came to her. Seemed unable to speak. When helped up and
put upon the bench seemed to get better and was
able to sit up and went down to dinner. In P.M.
became worse and was taken up to bed with difficulty
Could not talk. Did not seem to have any control
of her tongue
May 16-1892 Recovered after the spell recorded above and
seemed well as usual up to date when she be-
came very stupid. May 16- Has been very dull and
stupid all day. Lack of power & muttering as before
Could not talk. Remained in same
May 17-1892 In bed all day. When addressed raises up
in bed and tries to get up. Does not seem to un-
derstand just what she is or what is wanted of her

times during the past week that he could not help remembering it. Asked if he remembers the act distinctly, says that he remembers the last act, but faintly. The first one remembers distinctly. He came from Minneapolis and went to the office with no intention. Waited around till the Bank opened, remembers getting check cashed & that he signed it; but don't know why he put down any particular amount or any reason. (He seems here to convey the idea that he remembers but very vaguely & did the act with no particular purpose or thought.) Could not pick out any particular acts and remember them, thinks from the amounts gotten him that there must be as many as a dozen of the acts of which he has no remembrance at all. Was in Waltemann's place when found. Was playing Poker. Had played more or less from 2 to 2½ months. Had used the last check to make good the money that was lost there. But before that time, amounts must have come from expense account. Would go around the country doing business, spend a good deal & not be able to remember items when he got back. Would according this account, then take out some money & probably most of it would have been spent & belong to him legitimately from expense account, while part of it would not legitimately belong to him. Has forgotten a good many things in the past two years. Had been off the habit of playing at Waltemann's & lost more than he won at three times mentioned. Had drank more or less for two years & drank more when the headaches came on. He drank some little in Fordulac, mostly Beer. Drank only occasionally in Kansas. Thinks his memory is poor. Says has been surprised from the way things have slipped from his memory in past two years. The wife speaks of things in which she has had an active part & yet he has not had the slightest recollection of them. He says he don't claim that his memory is gone, for it seems to him a fair one, but as above, things will seem to have gone from him entirely. One example mentioned as astonishing him: his wife told him of having kept books for some one & he would take oath even to now that he had never done a stroke of the pen on their books, except that it was proven to him. His wife had often remarked upon things. He would get into hot water by disputing things & afterwards find himself in the wrong. (This on account of loss of memory.) He thinks he gets irritated easily during the past two years especially. Don't know that this irritation had any connection with use of Bromides, 1 or 2 minutes before leaving Waltemann's he got angry & slapped a man in the face. Was angry but immediately after ashamed of it. Remembered no cause for doing so except the man said something which he now can't remember. Asked for a test to give details of this day spent at Waltemann's. He says - "Went down before dinner, went to see Waltemann. Had some business with him. Fifteen minutes later began playing, some men inviting him to play until Waltemann came. There were three men playing with him, played 'till 6 P.M. Asked if there was a fascination in it he said it must be so.

Personal and Medical History of (2)

No one with chances to fix up things with Mr Drake as he had, would have given away under any consideration. Says did not intend to play when he went over. Would you place it as a temptation to an ordinary man? Ans. were:- "My whole future depended upon it as I understood the case, & I don't understand why I did it." Would you do it over again? Ans. (Hesitatingly.) "Not if I stopped to think." Would have given ten minutes before I went in that I would not have done it. About Kansas affairs. He says that he wanted to provide a home, & calculated that the property would be worth its value at any time. Depended on Architects work & failed to build a house for about $7200, that it cost between 6 & 6 thousand & property went down. He built it himself & after getting started had to keep on. About getting horses:- Describes himself as driving about the country on the Bank's business, & while doing this picking up young horses as a speculation. Physical condition - is not as good as 5 years ago. Is not nearly as good. Is not sick & yet for a long time has felt dyspeptic, inability to stand, tired & irritable. Don't think could stand at the desk now. Has had slight pains through the shoulders, which are sometimes sharp. Was not accustomed to have any neck pains. They came on after work. He said his writing was impaired some days. Admits that it was probably on account of his habits & drinking. Describes a pain under right shoulder blade for a few days which sounds like Dyspeptic pain. Comments. During whole of this description or conversation, patient seems to be striving to give an honest & frank account; there is not evident any attempt to prove himself insane. He admits the taking of the money freely, but at the same time says he remembers distinctly only the forging of the checks, & only vaguely one of these. He refers this to having frequently remarked upon his loss of memory. Describes himself as having been irritable without good cause & more frequently of late. As far as questioned describes himself as having gone through great remorse & Exposition, ending in the writing of a letter. Confesses his act & seems to feel vaguely that there was something entirely unaccountable & unreasonable in his going right back to gambling after so doing. It is noticeable that he does not claim ordinary lapses of memory, but that there are certain things proven to have occurred which he has evidently not only forgotten, but which he can not afterward recall up by any act of will or association of ideas. His memory, as he presses it, seems to him quite fair. That is - on things which he does remember (which includes about all the ordinary affairs of daily life.)

Personal and Medical History of Israel Davy.

Fourth conversation June 10th 1891.

Asked about the accusation of his brother in law, proposing that they buy some mining property in the Black Hills, - he denies ever proposing anything of the kind. Dr. says that at least if he did, he does not remember anything about it. He does remember talking something about Deadwood & the gold mining business, but thinks, Asked concerning any claim of his to have control of mining property in Wisconsin, he denies any such claim. He says that he had some vague ideas about the property, and had some talk about it, & had some correspondence with one man about property in that country, but never came to owe any. About the claim that he talked of offering a position to his brother in law in a business in Sioux Falls, & talked about platting certain land & putting in Water Works, he says he never had any property there, & says that he has talked about various schemes for making money at different times, but does not remember any proposition putting any plan. Remembers nothing about any platting of land or putting in water works. Concerning the claim that he repudiated for the purchase of a coal mine, he can not remember ever saying anything to his brother in law about any coal mine. The only business which he remembers concerning coal mines was of Judge Tyler & was about some options owned by Tyler, that he wished him to sell. Concerning the owning of colts in Kansas, being asked more particularly, he with some little hesitation says - that at the time of leaving, he owned some driving horses & 3 colts, & that there were 2 horses in the barn not belonging to him. He remembers buying 2 other colts at one time, making the whole number owned [illegible] 6. All that he is able to recollect. He states, however that he of late had horses at the place taken on Chattel Mortgages at the Bank, & which were kept a few days before the sale.

He declares that he never paid small amounts upon the purchase of colts & then left them. The only instance that he remembers like it, was the paying of a few dollars to a former to find a trade; the colt dying soon after. Time in Kansas engaging for one owned by the Bank, for which he settled personally with the Bank. Asked if he considers the Kansas affair with its failure, a piece of foolishness or only bad luck. Says he don't know where to classify it.

over

Personal and Medical History of Israel Davy.

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Asked if he thinks would forget anything, such as the buying of colts, says that he dont think he would forget anything of the kind. Says so far as he knows has not forgotten business transactions usually. Asked concerning special things that he has entirely forgotten & then afterwards reminded of, that he can remember. He mentions a case 2 weeks ago, in which the typewriter asks if he had delivered a letter to Mr Carey, of the Carey Clay Works, telling him that the letter was put on his desk & that he took it to Col. Drake to sign, & he could recall absolutely no remembrance of any such letter. He did remember however talking with Col. Drake about going up there on some other business, & the absinthe makes him work bitter; guilts his nerves. That it guilts the shakiness. Thinks did not drink so much that Col. Drake noticed it or so much that any one except his wife noticed that he habitually drank. Thought he was intoxicated only one or two times. Says Dr. Schimonick had treated him for scalp trouble & headache. That he saw him professionally 2 or 4 times & incidentally several other times. That he did not examine him thoroughly or ask any questions concerning his mental condition while he was in jail. Thinks that his memory for the past year, taken as a whole, is more vague than for the year before. When told that Judge Tyler said that there were less fresh colts bought & left upon the farm, he denies positively ever having paid anything on horses in that way. Says he knows the farmers too well to do anything like that. Asked concerning the time of writing the letter. Says wrote it upon Friday forenoon. Says he saw Mr Drake in the afternoon & recalls that Mr. Drake said something to him about getting the money back. I asked him if he went to Watermans for this purpose, & he assented to the effect that it was for the purpose of seeing something that he could about it. Was in the office from 8:15 to between 9 & 10 that morning. The question was then asked — "Do you then think that for some time past your memory & mind have been unsettled?" He answers: — "Yes, sir, so. It has worried me considerably."

Says that he has not had good power of attention for some two years. Could not keep thought upon the work well.

49659

Personal and Medical History of Israel Davy.

June 16 1891. Summary. Sleep. During first night, Slept under watch of sick watch man. Is reported some restless and as sleeping poorly (Probably less than one hour). Patient complained of tooth ache as a reason for wakefulness. During balance of stay here, (Sleeping in single room in Dr) patient slept well, as far as watchman was able to judge and according to patients statement at various times. Said once that noises here did not disturb his sleep. Appetite: Good; ate his meals regularly. ~~Bodily functions~~. Bowels seem in fairly good order. Complained of no special physical ailment. On morning of the 9th patients upper lip was some swollen, over the aching tooth, he claimed.

Patient was up in line each morning on Doctors rounds and greeted Dr pleasantly. Always answered questions apparently willingly.

While in ward, spent part time in working in chair; or in reading or in playing cards (Reported by attendants as playing poker with a fellow patient); or in conversation.

Went out walking with others. On grounds, engaged in various sports, jumping, running, catching ball. Complained that in catching ball, he could not accurately estimate place of descent of a high ball; engaged in pitching quoits; in a game of latter seen by Assistant physician, patient pitched well.

Patient claimed at various times to be feeling well and on latter days or two of stay here that he felt better than earlier in stay here. Patient is reported by an attendant as being irritable toward some of fellow patients named. On one instance a fellow patient ~~rudely~~ apparently brushed past Mr Davy when the latter said "he would knock hell out of him if he ever touched his chair".

Patient left the hospital afternoon of this date in charge of Dept Sheriff Kinney, accompanied by his mother.

June 26/91. Returned today by order of Court (or Jury). Was put upon Cr. Ward.

July 5/91. Got quite a severe blow upon the testacles today while out playing ball. was given an application of lead-water & Laudanum.

July 12/91. Visited today by his wife.

July 14/91. Attendant reports that patient "keeps very quiet - is fond of exercise - ball playing &c - health pretty good".

July 16/91. Moved up to B. Has been working upon the ward.

Personal and Medical History of Israel Davy

PIONEER PRESS CO., Printers, Stationers and Blank Book Manufacturers, St. Paul, Minn.

Aug 1/91. Began working outside. On the 23rd inst. is noted by Bl attendant as "a good quiet patient, inclined to be sociable. Takes part in games"
Sept 2/91. Was visited today by his wife. Sept 7/91. Continues to work outside. Is working at the chicken-house.
Oct 30/91. Visited today by his mother.
Nov 5/91. Was examined today. Weight 147 pounds. Pulse 72. Heart sounds quite strong and are clear (at base & apex). Apex beat visible and palpable in normal position. Heart action somewhat irregular at times. Pulse full & strong, and its tension fairly high. There are some fine tremors of tongue today noted but none noted today in cheek - Reading of a paragraph quite well done, tone rather faint but fairly clear. Urine cloudy in passing. Pupils respond to light and to accommodation, tongue quite steady, sight good. Reads (can see) as good as ever. Co-adjustation of hands good; (stands) fairly steady on legs. Patellar reflex sluggish. At first right seems stronger; but later the two seem about equal.

Patient was today discharged by a vote of the board of trustees and taken in possession by the Sheriff of Ramsey County.

Discharged
