N
BOOK

STER
TE
ITAL

PLEASE TAKE NOTICE.

THIS BOOK is made of first-class material and by first-class workmen. In order to insure a good book until used up, observe the following: Do not open in the center, but from either the front or back, running the leaves over until you come to the place you want; and in closing it do just the reverse, running the leaves back to the cover. All new books will be more or less stiff in the back until used a while, and this manner of using will make them limber and still not strain them. When the book is not in use, and at night, keep another book or weight on it so that the covers will not curl, as all new books are liable to do, especially if kept in a very warm room.

Respectfully,

Egbert Gideon & Chambers.

SLEEP, Present Amount and Character, Sound
BOWELS, Present Condition, regular: appetite not good —

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Physical health depressed: decrease in weight: is thin chested: quite noticeable lateral curvature of spine: muscular development rather poor.
No insane ideas discovered: talks rational: says he was always quick-tempered. Has done little during the past year: has little ambition: is of irritable self-willed disposition. Probably has been addicted to masturbation. Mental condition adolescent, — in form: essentially chronic moral & ethical failure.

Personal and Medical History of *Emil Collum*

1901

This Patient was brought here by City Marshall James McCarty, attended by Nicholas Glust, in fair physical condition, with following history of case. There is no history of consanguinity nor heredity: this is not 1st attack; one occurred March 9th 1900 when he was sent to Rochester: condition improved: let out July 5th 1900. First symptoms of this attack manifested two weeks ago: irritable easily: mad: disease increasing at present: variable and with rational intervals, but these not regular. Derangement now shown by unbalanced nervous condition: subject to fits of temper. Is disposed to injure others: threatens to injure others and father, when angry: No filthy or destructive habits: not suicidal: Patient always has been odd; wants to be alone: morose: Patient drank heavily in 1899: Parents temperate: No history of any severe disease, ec or head-injury. As stated, was confined in Rochester Hospital March 1900 to July 1900. Supposed cause of the disease is Intemperance and self-abuse. No treatment at home. On Personal Examination is irritable; nervous condition. N.B. Patient here before — this 2d admission (See Vol 45, page 237 - No 5532): from March 9th 1900 to July 6th 1900 and discharged Nov 7th 1900, as improved — The New diagnosis of case was "Pubescent Insanity"

Oct 1 On admission, was put on B3 (G.H.N.H.P.). Complexion fair: hair, light-brown: eyes brown; condition of Skin good: scar on left side: is clean: teeth: one gone, upper jaw: Behavior good: Examined by S. Blood.)

Oct. 8 Good health; good condition; quite agreeable; clear.

July 5/02 Home with brother; patient slightly feeble of mind & erratic; no delusions; health good.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient somewhat anaemic, otherwise in good physical condition. Complains of Came back. Is depressed: says he has worried over business matters considerably, but is able to earn a good living.
Has a bad heredity & has had previous attack, when he attempted suicide by shooting. Condition is acute Melancholia.

Personal and Medical History of John Teschler

1901

This patient was brought here by Sheriff E. K. Blexrud, attended by Geo. Hopp, in fair physical condition, with following history of case. There is no history of consanguinity. Brother has been confined three different times. This is not 1st attack: others commenced two years ago: (from patient's statement it is over 2 years): has been in Hospital at Dubuque. So: patient states was "cured". First symptoms of this attack manifested 2 months ago, by melancholic attacks: disease seems increasing: variable with rational intervals, but these not regular. Derangement now shown by worry over business and incapacity for work. Disposed to injure others, not known: has attempted suicide: from his own statement, has attempted suicide by shooting thro' mouth: part of left maxilla absent: propensity not now active: no filthy or destructive habits. History imperfect as to any previous peculiarities: no history of intemperance: no severe disease or injury to head, except shooting referred to. Was confined in Hospital two months. Don't know cause of the disease: has had medical treatment and hospital. On personal examination, is anaemic in appearance — melancholic. Commitment recommended because his disease is of such a nature (& such a stage), as to require for his recovery care & treatment while under legal restraint. ———

Oct 4 On admission, was put on T.W. (G.F.N. Kbt. Complexion fair: hair brown: eyes gray: Condition of skin good: mole on back of neck: large scar on left side of mouth: scar on right cheek: 3 on left forearm: scar on first 2 fingers of left hand: scar on right fore arm: scar on left leg: is dirty. Left all gone upper jaw except one, and one old snag: 5 gone, u left upper; one gone, right upper. Behavior good: examined by (Ballard and Stone). ———

N.B See letter on file from Mrs John Teschler, dated Oct 9/01: "husband was very dangerous when I had to bring him away: wanted to kill me and my 2 little children: went for us Wed? (Wednesday): before that, about a week, he said to me, he'll kill himself & after he said, he'll kill me and the children first, because we would be out his family; he was a stranger to us. A year ago last April, he was the same way, but not as bad as this time & he try to do away with himself by using a shotgun. So he got over it all right & every doctor told me I could live with him just as before, that sickness never come back any more & so I did — It is the second time he is insane — It is in the family: his brother is in Insane Asylum; his sister drowned herself, last year, in Germany: from death of his father he never told me anything, whenever I asked him. I am all alone, have no friends, no relatives and nobody. am among stranger folks, because he did not want to stay in place we had, after he try to kill himself × × × × × . Don't let him out before you let me know about it, because I am alone & scare myself to death: stayed all the time with him alone & am very nervous. × × × × If he would die it would be the best for me × × × × because I can never live with him again, unless in danger he might get off again."

N.B See letter of George W. Heer, Rector, Dyersville, Iowa, of Jany 11/1902 (on file): (replying to ours of 7th Inst). "have spoken to Mrs John Teschler, in regard to former life of John, the husband.

Personal and Medical History of John Teschler

1902

1/9 Letter

According to her testimony, insanity runs in his family: as, according to his own statement, a brother was confined to an insane asylum for several years, and a sister, in a fit of insanity, committed suicide, by drowning. You are probably aware that John Teschler made a well-planned & desperate attempt to end his own life, by shooting, in the spring of 1899, whilst living at St. Lucas, Fayette Co. Iowa. Early in the morning of Oct 3. last year, he attempted to take his wife & children at Canton, Minn. Mr. Henry Marohl, whom the Court appointed Guardian of the family, would be able to furnish fuller details. His addresses at Canton Minn. The Court at Preston, Minn, also examined a number of witnesses from Canton. Under these circumstances, the fears of Mrs Teschler seem to be well founded. Anything else I may be able to do, in the matter, I shall certainly do. respty (Sd) "Geo. W. Heer" ———

Oct 4/5 Received on board: put to bed: T. 99 2/5: P. 56: R. 24 — Oct 5. Patient very quiet: talks rationally: neat & clean. Oct 7. Complains of lumbar pain. Oct 8. Up, moves about

7/8 says "he feels much improved." Oct 12. (14 Days recommitted): Patient considerably improved:

17 works around: talks rationally: very agreeable. Nov 1. Wt 153½" — Nov 22 Visited by friends.

Nov 1/02 Visited by 3 friends. Jany 31/03. Has improved very much: appears, now, in quite

Dec 15 normal mental condition. Does not show any delusions. Works around: causes

1902 no trouble: very neat & clean in habits. Aug. 1/02 - 144#. Jan. 1/03 - 154#.

Jany 31 Patient during this period apparently quite rational: however seems to be keeping back some ideas, with regard to his friends & writes letters which are rather different from the manner in which he talks. On account of his suicidal tendency it was deemed best not to let him go too soon.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Health seems quite good. Gives history of syphilis, several years ago. - also of retinitis last winter with loss of vision of left eye. Also says he used to practice masturbation frequently. Refuses to answer some personal questions: is facetious & attempts to evade the subject. Expresses various grandiose ideas: says he was told by God to take the money at a certain time: "that God appears to him": "that he can get all the money he wants": "that he can fly" — Has various powers over pain, sensibility &c. At times, has a suspicious appearance of "shamming" —

Personal and Medical History of William. F. Moody.

1901

This patient was brought here by Sheriff M. J. Luis, attended by Peter Benson, in fair physical condition, with following history of case. There is no history of Consanguinity, not any insane relatives, as far as known. This is 1st attack: first symptoms manifested about 8 days ago: illusions, delusions, hallucinations and visions: sees visions: thinks he has conversations with God: says "he is God's Chosen-Angel on earth": Disease seems increasing: not variable: no rational intervals: Derangement is now shown in that he thinks he is chosen to reform Society: has peculiar theories as to Creation, and as to the manner of the destruction of Earth. Saturday, Octo. 5th/01, he went into the Monona Deposit Bank + up to the Cashier's desk + put several hands-ful of money in his pocket. Says "God directed him to take it." Says that he will take more, as soon as he gets out." Is not disposed to injure others; not suicidal: propensity not active: no filthy nor destructive habits. No previous peculiarities noted: no history of intemperance, nor of any severe disease or head-injury. Has not been confined nor restrained. Cause of the disease unknown, but has had syphilis. Treatment none. On personal Examination, pulse + Temp. normal: physical appearance normal.

Oct 8 On admission, was put on B3 (G. H. N. R/St. Complexion fair: hair brown. eyes gray.— Condition of skin good: bruises on right knee: is dirty. Teeth. 5 gone, in upper jaw: 3 gone, in lower jaw: behavior good). —

N.B. See letter on file from Judge D. C. Vance, dated Oct 8/1901. "Has some remarkable visions. Had had an all-nights conversation with God and has a mission from the All-Mighty. He has a Complete explanation of the manner of the Creation, and of the Coming Destruction of the Earth and all Celestial and terrestrial bodies. Myself + the Doctors are fully Convinced of his Sincerity and Insanity, but many who have heard him talk believe he is Shamming. Last Saturday, at 1st P.M. he walked into the rear of the Monona Deposit bank,— walked into the Banking-room past the clerks, who supposed he was going to speak to the Cashier, who sits just in rear of the Teller's cage; but he passed the Cashier within 2 feet + into the Teller's cage and commenced putting rolls of bills and hand-fulls of Gold into his overcoat pockets. The teller had just gone into the basement + the Cashier supposed he had just returned. One of the clerks who had been watching him gave the alarm: Cashier seized and overpowered him + all the money, Several thousands of Dollars, recovered. The Bank officials were present at the examination + are not thoroughly Convinced that he is insane— and not Shamming. (Have experts here examine &c). He will entertain you for an hour and give you his history and theories, without reserve. If not-insane, he should be in States-Prison. Most of time, for past ten more years, he has traveled with Wheels-of fortune &c, attending fairs. Was once arrested in Iowa — charged with robbery— but was not Convicted — Hoping the truth may be known &c &c."

Feb. 1/02. Wt. 149#. Eloped. returned some P.M. May 1 More demented; does nothing; partially blind; mischievous, steals things from other patients; Dmg. 1 141#

Personal and Medical History of

Jan. 02 31. Still going more feeble mentally; quite clean; rocker paralytic in action; lately has vomited a great deal. There appears to be no local disease. (C.L.)

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient seems very feeble: memory impaired: nervous & restless attack has been gradual, though the symptoms have manifested themselves only recently - Condition is due to Senility: Physical condition generally poor.

Personal and Medical History of *Ole Lindgren*

1901

This patient was brought here by Sheriff P. J. Lundquist, in poor physical condition with following history of case. (Information of Insanity and proof of residence made by Hans Johnson, who states, amongst other things, that said Ole Lindgren resides at the almshouse) - Do not know as to any history of consanguinity or heredity. This is 1st attack; first symptoms manifested Octo 4 - 1901, by great restlessness, excitement, disposition to run away: Disease seems stationary: variable: worse at night: intervals regularly every night. Derangement now shown in that when derangement is active, he constantly talks of some kind of work, such as breaking stone, rolling logs, painting &c. Is not disposed to injure others, no suicidal - Is offilthy and destructive habits. Has shown stubbornness: Don't know as to any history of intemperance: no severe disease or head - injury. Has had to be watched for the last two weeks. Don't know cause of the disease: Don't know as to any treatment. On personal examination, he gives irrational answers; is listless, apathetic, and his head presents a number of bruises; the result of trying to injure himself by striking his head against a brick wall.

Octs On admission, was put on T.W. (G.H. n. 12/pt. Complexion fair: hair gray: eyes blue; condition of skin good: large abrasion on head: small bruises on back: large bruise on forehead: several small bruises on body: is clean: Condition of teeth poor. Behavior good.)

Oct. 18. Patient receives on 8th; feeble; demented restless; on the 15th fell out of bed; fractured hip. He died this day (18th) having failed very rapidly; no rise of temperature; restless; exhausted.

The patient appears depressed: will not answer questions: Stands with head drooping: attention fixed.

Emotion one of melancholia

Personal and Medical History of Otto Kuethe

1901

This patient was brought here by C. M. Wilkinson, attended by Henry Kuethe, in fair physical condition, with following history of case. Were the patient's parents or grandparents related? Yes: cousins. This is not 1st attack: others occurred in August & September; duration, 2 days each. First symptoms of this attack were manifested October 6th: meditating, eating little, and sleep poorly & wanted to quarrel with a lady. Disease seems increasing; variable & with rational interval, but these not regular. Derangement now shown in that he wants to attend school, and then wants to go to heaven: wants to leave home. Is not disposed to injure others, nor suicidal. Is disposed to filthy and destructive habits. Mother is insane. Has shown temper, when corrected. No history of intemperance, nor of any severe disease &c no head-injury. Has been restrained and confined; locks the room and guarded. Supposed cause of disease is heredity. Treatment, none. On personal examination, is excitable: will not answer questions correctly.

Oct 9 On admission, was put on T.W. (G. N. W. Dist. Complexion dark: hair black: eyes brown: has 2 moles on left side of face: mole on left hip: 2 small moles on right arm, hips and right leg: 2 scars on two last fingers of left hand: scar on left thumb. Hips & right leg deformed: his chest somewhat deformed. Behavior good: is very restless). —

Oct 22. Patient rather feeble in mind: very restless at first: quieting somewhat.

Jan 1/03. Quiet; dull; confused.

July 31/02 Stupid & inactive (Dr. R. M. P.)

Nov. 1/02 Wt. 144#. Dec. 2d visited by father: taken to town.

1903 Jan 31. Improving mentally; working on ward; takes considerable interest; reads some. (C. L. C.)

COULDN'T KEEP AT WORK.

Frank O. Lane Is Committed to the Rochester Hospital.

Frank O. Lane, 236 Norris street, a bridge builder, thirty-three years old, was committed to the Rochester state hospital for the insane yesterday by Judge Bazille in the probate court. In June, 1900, Mr. Lane fell from the Rice street bridge over the Northern Pacific tracks, injuring his spine. The injury to his spine, it was stated in court, left him with a mental derangement which resulted in an abnormally irascible temper. He would quarrel with his workmates and quit work, with the result that he worked only fifteen hours in six months. Lane is a bachelor and has lived with his brother, James Lane.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient has had trouble over falling in love with a niece. Thinks his relatives have tried to make him think he is a relative of the girl to get her away from him. "He will not give her up", says "She comes to him, nights, & talks with him". Patient has been a hard drinker; also sustained severe shock from fall, a year ago, which may be the probable cause of present condition.

Patient has been a hard drinker; also sustained severe shock from fall, a year ago, which may be the probable cause of present condition.

Personal and Medical History of Frank Lane

1901

This patient was brought here by Sheriff Johnson, in good physical condition, with the following history of case. There is no history of consanguinity nor of heredity. This is first attack: first symptoms manifested, about one year ago, on account of head-trouble, he refused to work: Disease seems increasing: variable & with rational intervals: but these not regular. Derangement now shown in that he has a love-affair, which distracts his mind from his work: wishes to marry his niece. Is not disposed to injure others: has not attempted suicide, but spoke of suicide: no filthy nor destructive habits: no previous peculiarities noted: patient has been periodical drinker: had injury to head & back in June 1900 — Has not been restrained or confined. Supposed cause of the disease is injury to head & back. Has been given tonic treatment. On personal examination, there was noted injury to head, and back in June 1900: has not been right since: love-affair uppermost in his mind. —

Oct 16 On admission, was put on B 3E (G.H.N.R.W.). Complexion fair: hair dark brown: Eyes blue, condition of skin good: marks, none: scars on muscle of right arm: eruptions, none: is clean: teeth in good condition: Behavior very good: Remarks none). ———

Aug. 1/02 Weight 163#. Jan. 1/12 176#.

Jan 31/03. Patient is restless & uneasy - always asking to go home. Fairly rational in manner & talk; but usually quite dull mentally. Tried to elope at various times. Physical condition good.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient has been a hard drinker; arteries are hardened; circulation very much impaired. Had a cerebral hemorrhage last march, since which time he has been confused + forgetful: wanders away from home. Has various delusions about family + surroundings. Cause of condition brain softening due to hemorrhage — Still has some paralysis of left side —

Personal and Medical History of *Silas Torrence*

1901

This patient was brought here by August Sielaff, attended by Patrick Burke, in poor physical condition, with following history of case. There is no history of consanguinity, nor of heredity, as far as known. This is 1st attack; first symptoms manifested by gradual failing of mental and physical powers. Disease seems increasing: variable with rational intervals, but these, at irregular intervals: mental faculties impaired. Imagines things & conditions that do not exist; tendency to aimless wandering; wants to see wife who is eighty years deceased. Derangement now shown in that he does not recognize intimate friends: imagines he is in some different place than what he is: incoherent talking. Is not disposed to injure others: has not attempted suicide; but once asked for strychnine: propensity not active.- Is despised to filthy and destructive habits. No previous peculiarities manifested: formerly used to drink alcohol to excess, but not recently: had mild attack of hemiplegia, right side, last March: has been restrained & confined; constantly watched & restrained from wandering for seven months. Supposed cause of the disease is senility; Heavy-ment of mental powers. Treatment, so far as known, only for hemiplegia. —

Oct 17 On personal examination, there are noted listless appearance; incoherency in conversation- On admission, was put on Infirmary: (G.H.N.Rpt. Complexion dark: hair gray: eyes blue; skin in poor condition: small eruptions about body: abrasion of skin on left shin. Has a double hernia: 8 teeth out of upper jaw: 2 broken on upper jaw: all teeth found on lower jaw: his back is deformed & his feet are somewhat discolored: cannot use his lower limbs very well) —

Oct. 18. Weak; quiet; abusive in talk: Nov. 1 Still weak and unsteady. Wt. 116#; Dec 1 Wt. 120# Dec. 11 Fell on floor; fractured left hip. Dec. 12 Growing weaker. Dec. 17 Died 7.40 P.M. Slight rise of temperature shown.

Personal and Medical History of John Christianson

St. Paul Dispatch Oct 7/1901

SHOT BY BANDIT

Cause of John Christianson's Mental Condition and His Incarceration in an Asylum.

Dr. Lundholm and Dr. Senkler, in the probate court today, pulled aside the reddish hair of John Christianson at the place on the side of the head to which he pointed his finger, and found the white spot where buckshot had struck.

Six years ago Christianson was in California, and in a train robbery, owing to deafness, when ordered to hold up his hands, paid no attention. Thereupon an incensed bandit fired a charge of buckshot, which wounded him on the head. Gradually the wound has affected his mind. He has served a term in the hospital at Jamestown, N. D., and is now committed to the Rochester asylum in this state.

The unfortunate man imagines himself a diety, and that there is an excess of carnal blood in the world. He is a laborer, 35 years old and unmarried. He has been living on Grove street.

The patient is exalted, confused & talkative: has an idea he has "superior powers" "Can heal others" - Also talks a good deal about religion. About 11 years ago, was shot through the skull, the bullet entering the left parietal bone, near the fronto parietal suture & came out through the orbit, destroying the eye; following this, his hearing became very much impaired. —

Present condition acute mania of a mild type.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient seems rather indifferent most of the time, but has "spells" of depression. Thinks people "put stuff" on him, which "makes his heart & stomach sore." Says "his head gets dizzy." Will not explain anything, only asserts his belief. "People trouble him nights by talking to him, and making him have bad dreams."

Is very nervous & hypochondriacal

Personal and Medical History of Anton Pichota

1901

This patient was brought here by N. J. Steffen, attended by John Maurer, in fair physical condition, with following history of case. There is no history of consanguinity nor heredity - This is 1st attack: first symptoms manifested since last week: hallucinations and delusions of persecution. Disease seems increasing: variable: seems to be rational during the day, attending to his work regularly, but has hallucinations every night. Derangement now shown by restlessness at night; seeing strangers in the house, & feeling that they are there: also praying much. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No previous peculiarities noted. No history of intemperance; uses liquors very moderately: no severe disease or head-injury. Has not been restrained nor confined. Don't know cause of the disease. Treatment, same. On personal examination, claims that, for over 2 years, a neighbor has tried to harm him, and unseen parties are prosecuting him. ———

Oct 21 On admission, was put on B3 (G.H.N.R/t. Complexion medium: hair brown: eyes gray: condition of skin good: slight puff above navel: vermin none; is clean: Teeth: 2 gone upper jaw: 3 gone, lower jaw: very large veins on feet & legs: Behavior good.). ——

Oct. 24 Believes he is persecuted; dull & indifferent; don't want to eat; depressed. Nov. 3 Improving some; some work; more active. Nov. 20 Taken home on trial.

Personal and Medical History of *Jeremiah Mann.*

1901

This patient was brought here by sister, Elizabeth R. Gray, in poor physical condition, with the following history of case. Patient's parents related (Cousins first): no insane relatives: This is not 1st attack: one occurred 3 years ago: 1898: duration 10 weeks: was then sent to Rochester: result of treatment marked improvement. First symptoms of this attack manifested 11 months ago: fears injury from others & wanders away: disease seems increasing: is variable & with rational intervals: patient is always worse at night. Derangement is now shown in that he is afraid of personal injury by others. Is not disposed to injure others: nor suicidal: no filthy nor destructive habits: no previous peculiarities noted: he uses tobacco moderately: no history of any severe disease or no head-injury. Has been confined at Rochester 10 weeks: private hospital 2 weeks: and at "Soldiers' Home (Minnehaha) 1 year. Cause of disease not known. Treatment none, except as given at Rochester. On personal examination, patient is fairly well nourished: has constant tremor, sleeps very little.

Oct 24 On admission, was put on B3. (G.H.N. Rpt. Complexion light: hair, brown and gray: eyes blue: vaccination marks on each arm; scars: has two, of about 2 in. long on right foot: scar on right thumb: small hernia: teeth: has 11 in lower jaw and 12, in upper jaw. Behavior good: remarks none). N.B. 2nd admission: was here before from Aug 22/98 to Oct 29/98 and discharged Feby 8/1899, improved. Form: acute melancholia: had delusions of persecution also hallucinations of hearing: — (see Vol 41 p 37 No 51 ad)—

Oct. 28. Nervous, hesitating manner: talks in a whisper. No apparent sickness. Jan. 1 Wt. 145#; works some. Jan. 14/02. Restless during night; noisy. (Dr. R. M.D.) Feb. 1/02 Wt. 149#; Feb. 11 Trans. to B2. June 27 Trans. to D.W.E. Complains of nothing in particular; but is confused & rather feeble; no fever; quite unsteady on feet; has to be helped about. July 1st Trans. to B2. Much stronger. July 21 To D.W.C. Same trouble as above. Complains of numbness of limbs; falls easily; some involuntary jerking. Oct. 1 Continues about the same. Oct. 22 Improved much during past month. Up on ward. Nov. 26 Visited by sister. Taken home. (C.L.C.)

Personal and Medical History of Charles. W. Leonard

1901

This patient was brought here by Dep. E. Johnson, with following history. There is no history of consanguinity nor heredity. This is not 1st attack: one occurred 6 years ago; duration 8 months. First symptoms of this attack manifested a few weeks ago, with delusions of persecution: Disease seems increasing: variable & with rational intervals, but these, irregular. Derangement now shown in that he fears that people are after him & kill him: restless, nervous. Sleepless. Is not disposed to injure others, nor suicidal; no filthy or destructive habits. As to any previous peculiarities, don't know: father a periodical drinker; Received injury to head in Youth, without unconsciousness. Has not been restrained, or confined. Cause of the disease, unknown: treatment, none. On personal & examination, patient conscious of his own mental difficulty; no stigmata. — .

Oct 29 On admission, was put on B3E (G. & H. Dept. Complexion light; hair gray; eyes blue; Condition of skin good: marks, none: small scars on back of neck: is clean. Teeth in fair condition: 4 stubs in upper jaw; 3 in lower jaw. Behavior good). —

Aug 1/02 Jan. 1/03. During period, health has been good. - has parole - Usually walks about, absorbed in his own ideas - Occasionally quite talkative. Expresses many delusions - nervous & uncertain in manner. Fairly rational in appearance, when not talking of his delusional ideas.

Personal and Medical History of Adam Schneeweise

AGED MAN COMMITTED — Adam Schneeweist of North St. Paul was yesterday committed to the insane hospital by Probate Judge Bazille. He is seventy-eight years old and has a family of twelve children.

NOT INSANE—The state board of control yesterday ordered the release of Adam Schneeweise, sent to the Rochester insane hospital No. 4 from Ramsey county. Dr. Kilbourne and the other hospital physicians sent the board of control a certificate that he was not insane.

Rochester Bulletin

St Paul Dispatch

Nov 11/1901

SOLVED THE PROBLEM

THE UNEXPECTED DEATH OF AN AGED MAN AT ROCHESTER ASYLUM.

Adam Schneeweise, the old man committed to the Rochester hospital, died there Saturday, and will be buried tomorrow at North St. Paul.

The old man was examined in the probate court Tuesday, found to be afflicted with senile dementia, and committed by Judge Bazille on the certificate of Dr. Robillard and Dr. De Witt Clinton Jones.

Almost immediately the superintendent of the hospital, Dr. Kilbourne, notified the board of control that the man was not insane and not a fit subject for the hospital.

There is no doubt at all that the patient was suffering from senile dementia, and the issue raised is whether a patient afflicted in that way is a proper subject for treatment at a state hospital.

Judge Bazille, seen today, said: "What are we to do with these cases? They are found to be breaking up with senility and I do not know what I can do after the finding of the doctors, save commit them to one of the hospitals."

In this case, the patient appears to have unexpectedly solved the question by dying.

Dispatch says: "Dr. De Witt Clinton Jones, who, with Dr. Robillard, examined the man Adam Schneeweise in the probate court last Monday, was seen by the Dispatch today. The patient, an old man of 77, who lived at North St. Paul, was found to be afflicted with senile dementia and on the finding of the two physicians committed to the Rochester asylum. He was promptly discharged by Dr. Kilbourne, as not a proper person for treatment or retention in the hospital, as reported in last night's Dispatch. Dr. Jones says: 'We examined the man and found him undoubtedly a victim of senile dementia and all I can say is that Dr. Kilbourne appears to disagree with our finding. When the respondent was in court something was said of sending him to the almshouse. But, as I say, we found him suffering from senile dementia and considered him a proper person to send to the insane hospital. Dr. Ancker, who happened to come into the court during the examination, saw the man and remarked that the place for him was in the insane hospital and not in the almshouse, confirming our opinion. The man does not so much as recognize his son and daughter, wanders about aimlessly day and night and is filthy in his habits.'"

See other Clippings which Dr. Kilbourne has from St Paul Dispatch and Minneapolis Journal of 11/11-1901

Personal and Medical History of Adam Schneeweise

AGED MAN COMMITTED—Adam Schneeweist of North St. Paul was yesterday committed to the insane hospital by Probate Judge Bazille. He is seventy-eight years old and has a family of twelve children.

NOT INSANE—The state board of control yesterday ordered the release of Adam Schneeweise, sent to the Rochester insane hospital No. 4 from Ramsey county. Dr. Kilbourne and the other hospital physicians sent the board of control certificate that he was not insane.

Rochester Bulletin
Nov 11/1901

Not a Proper Subject.

The case of Adam Schneeweise of St. Paul seems to have stirred up some physicians of that city. The man was committed to the State Hospital here, and soon after his arrival Supt. Kilbourne and the staff physicians discovered that he was not a proper subject for this institution. He was accordingly discharged but on account of his feeble condition could not be sent home immediately. Saturday morning the man died here, heart failure being the cause. This sustains the contention made by Dr. Kilbourne that Schneeweise ought not to have been sent here. The hospital for the insane is not a hospital for the bodily decrepit or a home for the friendless, and it requires much diligence on the part of the local authorities to prevent imposition. Their prompt discharge of this case was more than justified by the subsequent events. Now perhaps the St. Paul doctors believe that something else was the matter with Mr. Schneeweise, besides the dotage of old age Considering the commitment and discharge the St. Paul Dispatch says: "Dr. De Witt Clinton Jones, who, with Dr. Robillard, examined the man Adam Schneeweise in the probate court last Monday, was seen by the Dispatch today. The patient, an old man of 77, who lived at North St. Paul, was found to be afflicted with senile dementia and on the finding of the two physicians committed to the Rochester asylum. He was promptly discharged by Dr. Kilbourne, as not a proper person for treatment or retention in the hospital, as reported in last night's Dispatch. Dr. Jones says: 'We examined the man and found him undoubtedly a victim of senile dementia and all I can say is that Dr. Kilbourne appears to disagree with our finding. When the respondent was in court something was said of sending him to the almshouse. But, as I say, we found him suffering from senile dementia and considered him a proper person to send to the insane hospital. Dr. Ancker, who happened to come into the court during the examination, saw the man and remarked that the place for him was in the insane hospital and not in the almshouse, confirming our opinion. The man does not so much as recognize his son and daughter, wanders about aimlessly day and night and is filthy in his habits.'"

WU'S EULOGY OF LI.
Chinese Minister's Tribute to the Deceased Viceroy.
WAS CHINA'S GRAND OLD MAN.
Only One Who Could Deal With Problems Constantly Arising In His Country, Declares Wu Ting Fang.
Incidents Connected With Earl Li's Visit to This Country—Plants Tree at General Grant's Tomb—Visit to Mrs. Grant.
Wu Ting Fang, the Chinese minister at Washington, was greatly shocked when he heard of the death of Li Hung Chang.
"Oh, this is too bad, too bad!" he exclaimed. "It will be a frightful blow to China. I hope the news is not true. I hope Li Hung Chang will be left to serve his country many years for his country needs him now if she ever needed him, brilliant as have been his services in the past.
"For more than forty years," said Minister Wu, "Li Hung Chang has been in the service of the Chinese government. He is the 'Grand Old Man' of our country. There is none like him. He is the only one who could deal with the problems constantly arising in the field of diplomacy, our other will come up to take his place. There will be generations before another will come up to take his place. I served under the man. I was taught by him. He recommended me for promotion and put me in line for the advancement that finally sent me as minister to the United States.
"His experience was vast, and in all China Li Hung Chang alone of all our statesmen has been the one man who could deal with the problems constantly arising in the field or diplomacy, our civil relations with others and the conduct of our army and navy. He has been progressive and yet conservative. He has of his genius, his foresight and his indomitable will. All the sensible reforms inaugurated in our country are due to him.
"He built the first railroad, the first telegraph. He opened the first mine that gave promise of developing the mineral industries of the empire—the Kaiplin mine.
"He originated the modern navy, the modern drill and improved tactics in the army. It was Li Hung Chang who employed General Gordon.
"In short, it was Li Hung Chang who did everything to make China progressive, and it was his will and his will alone, aided by a few who believe

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient is suffering from a general oedema, which is due to the heart's condition. Is very weak, physically; is in bed.
Mentally, shows an impairment of memory; childishness, aggravated by this physical trouble.

Personal and Medical History of Adam Schneewise

1901

This patient was brought here by Deputy Johnson, attended by J.J. Schneewise, in poor physical condition, with following history of case. There is no history of consanguinity nor heredity. This is 1st attack. Has not been sent to hospital before: first symptoms manifested 2 years ago, by childishness, senile dementia: disease seems increasing; variable: he increases in mental & physical decay. Derangement now shown by loss of memory: sight partial., Confusion of ideas, general slovenness, dirty habits, carelessness. Is not disposed to injure others, nor suicidal; is of filthy and destructive habits. No previous peculiarities noted: is tobacco-smoker: no severe disease or no head-injury: has not been confined or restrained. Supposed cause of the disease is senile decay: ordinary treatment has been given. On personal examination, there are noted Dropsy, weak heart, weak intellect, senile dementia. ——

Nov 4 On admission, was put on T.W. (G.A.W. Apt: Complexion light: hair gray: eyes blue: condition of skin fair: hands discolored & bruised, also swollen: bruise on right knee: bruise on right shin: scar on back of both hands: feet & legs swollen: penis swollen: Eruptions on body: one bruise on small of back: is clean: teeth all gone upper jaw: 5 in front, in lower jaw poor: behavior quite restless & noisy. Examined by E. Ballard.)—
Nov. 5 Restless: difficulty breathing; has to sit up to breathe; irrational: Nov. 9 Died quite suddenly at 11 A.M. No especial failure; but seems to have been a circulatory weakness.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient has always been of a nervous temperament. Says he is of an eccentric nature. Began taking cocaine by spraying the nose, about six years ago. Has not used it continuously. Has "spells" when severely depressed: at present, is elevated, talkative & suffering from a mild form of "simple mania".

Personal and Medical History of Seth. E. Howard

1901

This patient was brought here by Sheriff Vine, attended by W. J. Williams, in fair physical condition, with following history of case. There is no history of consanguinity, but some of heredity; one aunt insane. This is not 1st attack; one occurred 2 years ago: duration more or less for 1½ years: first symptoms of this attack manifested three weeks ago; wild & delirious and insomnia: disease seems increasing: variable: intervals irregular. Derangement now shown by delirium & derangement & cocaine habit; insomnia constant: Is not disposed to injure others: has attempted suicide; wanted to shoot himself: propensity not active now: no filthy nor destructive habits: no previous peculiarities noted; no history of intemperance; no of any acute disease or head-injury. Has not been restrained nor confined. Supposed cause of disease is use of cocaine. Treatment, nothing special. On personal examination, it is ascertained that this derangement is due to cocaine. ———

Nov 5 On admission, was put on T.W. (G.S.N. K/F): Complexion sandy: hair dark brown, eyes blue: condition of skin good: has mole on back: small scar on fore finger of left hand: scar on left knee: scar on calf of left leg: small scar on left side of body: tongue clean: teeth: 5 out on back part of upper jaw: 6 teeth out on back part of lower jaw. Behavior good: Examined by E. D. Ballard and Clawson). ———

Nov 6. Quite restless; discontented. Nov 9 Visited by wife. Dec. 10 Fell; bruised head on floor. Nov. 12 Improving rapidly. Nov. 16 Taken home.

Personal and Medical History of Adolph Munch

Adolph Munch,
St. Paul Pioneer, who died Thursday.

OLD SETTLER PASSES AWA

ADOLPH MUNCH DIES OF PARALYSIS

Came to Minnesota in 1854 and Had Resided in St. Paul Twenty Years.

Adolph Munch, one of the pioneers of Minnesota, died of paralysis yesterday at his home; 653 East Fifth street. Mr. Munch was seventy-two years old, and had been a resident of Minnesota since 1854. He was born in the province of Saxony, Prussia, and came to America in 1850. He remained for a while in the East and came to Minnesota in 1854, settling at Taylor's Falls. He lived there until 1859, when he moved to Pine City. He was proprietor of a store and stave factory.

Mr. Munch came to St. Paul in 1871 and purchased the home on Fifth street. He was at one time president of the Volkszeitung company. He had been secretary and treasurer of the Old Reliable Club of Dayton's Bluff for twenty years, and was one of the pioneer members of the A. O. U. W.

He is survived by eight children, his wife having died five years ago. The surviving are Arthur, Bernard and Emil, Mrs. F. Heinrichs, Misses Teresa, Olga and Ella of St. Paul, and Mrs. Darnehl of St. Louis.

The funeral will take place at 2:30 tomorrow afternoon from the home at 653 East Fifth. The A. O. U. W. will have charge of the ceremonies. The interment will be at Oakland cemetery.

Personal and Medical History of Adolph Munch

1901

This patient was brought here by Deputy Johnson, attended by Arthur Munch, in poor physical condition, with following history of case. There is no history of consanguinity, nor heredity: this is 1st attack: Date first symptoms manifested is not stated by loss of speech; inability to write and read; slight paresis increasing, of right arm:- not variable: no rational intervals: Derangement now shown by general delusions: Is not disposed to injure others; has not attempted suicide, but propensity is now active: no filthy nor destructive habits: no previous peculiarities manifested: no history of intemperance, nor of any severe disease &c, a head-injury: has not been restrained or confined. Supposed cause of disease is atheromatosis: Treatment, General care. On personal Examination, he talks incoherent; calcifications of arteries. ——— ———

Nov 6 On admission, was put on I.W. (5 ft. 11 1/2 in. Complexion light; hair gray; eyes brown; Condition of skin fair; vaccination marks on left arm: scar on left cheek. Small scar at base of penis. Is clean: Teeth all gone, except 2 in lower jaw, in front: 3 gone in upper jaw; bite in good: Examined by E. W. Ballard). ——— ———

Nov. 7 Confused, restless; hard to keep in bed. Nov. 15 Slowly failing; Nov. 25 Died at 12.45 a. m. Temp. sub normal towards the last.

Personal and Medical History of Frank. M. Campbell

1901

This patient was brought here by Sheriff Bruce, in fair physical condition, with following history of case. There is no history of consanguinity, but there is of heredity; two aunts on father's side insanity. This is not 1st attack. one occurred 10 years ago: no full interval: was not sent to hospital. First symptoms of this attack manifested by delusions, Commenced 10 years ago. Disease seems increasing: variable & with rational intervals, but these, not regular. Derangement now shown in that he lays in bed: refuses work: is disposed to injure others, but not suicidal: propensity not active: no filthy & destructive habits. Is a subject of masturbation: delusional in religious questions. No history of intemperance, nor of any severe diseases or head-injury: has not been restrained a captive. Supposed cause of the disease is masturbation: No treatment. On Personal Examination, nutrition poor: is irritable & easily excited: ——— — —

Nov 8 On admission, was put on T.W. (T.K.H. K'pt. Complexion Sandy: hair brown: eyes gray: scars on right wrist: one on left knee: small scars on 2nd finger, left hand: eruptions on back: is clean. Teeth: 5 molars gone, on upper jaw: 4 molars gone, on lower jaw. Behavior good.) Sept. 20/02 Returned from being out on parole - is now dull with staring eyes and stupid manner. Will not talk and refuses to eat. Placed on D.W. Sept. 24. Nov. 18/02 Remained in bed until this date. Has little physical illness, but a mental stupidity & confusion of mind. Today up & on the ward. Still much confused. Dec. 19/02 Much more active but still confused and uncertain.

Jan 31 03 Has improved somewhat.

The patient appears confused & generally depressed. Has been worrying about his financial affairs. Has various delusions: thinks his wife untrue: that he has been hypnotized by his mother: that his neighbors are talking about him & abusing him.

Physically, is weak & anaemic —

Personal and Medical History of James Hopkins

1901

This patient was brought here by E. K. Blewett, attended by J. F. Jones, in fair physical condition, with following history of case. There is no history of consanguinity; but there are insane relatives; grand mother on father's side; father, also, was, at times, slightly deranged. This is 1st attack: first symptoms manifested about a year ago: disease seems increasing, not variable; no rational intervals: has delusions on various subjects: Derangement now shown in that he is suspicious of his wife and mother attempting to poison him. Is not disposed to injure others, nor suicidal: no filthy or destructive habits. No previous peculiarities noted: no history of intemperance, nor of any severe disease or nor head-injury: has not been restrained or confined: Dont know cause of the disease. Treatment, none. On personal examination, has all the appearances and actions of Chronic mania: Commitment recommended because it is dangerous to himself and others to have him at large: his disease is of such a nature, and in such a stage as to require regular aid and assistance while under legal restraint. He is now & has been a resident of Fillmore County for last 23 years past.-

Nov 8 On admission, was put on B 3 (G. H. N. K'pt. Complexion fair: hair brown: eyes blue: Condition of skin good: is clean: teeth in good condition: behavior good. Examined by I. Blood, nightnurse)-

Nov. 9/01 Confused; dirty in habits; very restless; afraid he is going to be harmed. Nov. 21/01 Has improved rather quiet & well behaved.

Feb 1 Wt. 162# Works well on ward daily; quiet; reads considerable; sociable; still expresses delusions. Apr. 3-5 Visited by friends. Apr. 12 Trans. to D.W.C. Temp. 105.4. Severe sore throat. Apr. 17 Recovered; up on ward. Apr. 21 Trans. to B2. May 1/02 Doing well; reads & writes letters; converses rationally as a rule. June 25 & 26 Visited by friends. Lately has been treated for inflammation of the middle ear. July 30 Went out to camp. Aug. 13 Returned from camp. Aug. 15 Visited by family. Oct. 18 Visited by relatives. Nov. 8 Eloped from east barn where he had been doing carpenter work. (C.L.C.)

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient appears somewhat confused & general condition sluggish: no delusions obtainable: has been having some fever: case probably suffering from a simple melancholia.

Personal and Medical History of *Adolph Abrahamson*

1901

This patient was brought here by Geo. N. Freer, attended by O. J. Wick, in fair physical condition with following history of case. There is no history of consanguinity: Father has insane for several years: this is 1st attack: continuous duration: has not been sent to hospital: First symptoms manifested in april 1901: wandered away from home: squanders his money. Disease seems increasing: variable: no regular rational intervals: Derange-ment now shown by loss of memory; confusion of ideas; pressure in head; some-what incoherent in conversation; insomnia apparent: is not disposed to injure others: Threatens suicide, but in what way, does not say: Propensity now active. No filthy no destructive habits: no previous peculiarities noted. Patient a hard-drinker, in the past: injured by blow on face, 5 years ago. Has not been restrained nor confined: — Supposed cause of the disease is Drink, disappointment in love, and injury to head. Slight treatment: no benefit. On personal examination, there are noted, disease of ear, and complete deafness in the ear; pain in head: Confusion of ideas: loss of memory; insomnia persistent. ———————————————

Nov 14 On admission, was put on B.3. (G.H.H. Kfst. Complexion fair: hair dark brown; eyes blue; condition of skin good: birth-mark on abdomen: small scar on right temple, and scar on nose: is dirty. Teeth: 5 gone, upper jaw: 3 gone, lower jaw: behavior good: Examined by A. J. Poapst).

Nov. 20. Patient fairly rational; dull; despondent; has been having slight rise of temperature. Nov. 21 Violent for few hours during night. Nov. 27 Quiet but has delusions. Mar. 26/02 Sent home on trial; very quiet; fairly rational.

Personal and Medical History of Axel Johnson

1901

This patient was brought here by Deputy Johnson, in fair physical condition, with following history of case. As to any history of consanguinity, heredity, or number of attack, do not know. First symptoms of this attack manifested Early in October; had delusions of persecution and enemies; disease seems increasing; not variable; no rational intervals. Derangement is now shown in that he is childish and irresponsible in his methods, conversation. Is given to wandering away, and aimlessly, unless watched. Is disposed to injure others, but not suicidal: no filthy nor destructive habits. Do not know as to any previous peculiarities, nor of any history of intemperance. Had typhoid fever at City & County hospital, from Sept 17th to Sept 30th 1901. He has not been restrained or confined. Supposed cause of the disease is probably hereditary, plus Typhoid fever. Treatment, rest & medicines. On personal Examination, patient answers questions readily; otherwise, is silent and has a vacant stare. N.B. Patient discharged from City & County hospital, after attack of Typhoid fever, Sept 30th 1901. Readmitted, with diagnosis of delusional insanity Octo. 8th. Discharged Oct 14th 1901. Readmitted, on account of mental condition, October 19th 1901. Left Sweden for U.S. March 6th 1901.

Nov 20 On admission, was put on B3 (9 H.N. Ward. Complexion fair: hair light: eyes blue: condition of skin fair: is clean: teeth in fair condition: Behavior good. Ex^d by Raykovsky).

Nov. 23. Talks, laughs to self; does some work, restless.

Dec. 3. Has improved some. Jan. 1902 Deported by state agent Gates. Has been restless and quite easily disturbed.

The patient is excited: talkative: has some temperature. Has various Delusions: Came on suddenly: physically in good condition. Present condition "acute mania, with Delusions" —

Personal and Medical History of Adolph Dolquist

1901

This patient was brought here by Peter Hagstrom, attended by Peter Nord, in fair physical condition, with following history of case. There is no history of consanguinity nor of heredity. This is 1st attack; first symptoms manifested Monday, the 18th Nov. 1901: naked, sleepless; incoherent, wild talk, without cessation. Disease seems increasing: Derangement now shown, (as in 9th paragraph of Commitment papers), as above mentioned. Is not disposed to injure others, nor suicidal: is of filthy and destructive habits: no previous peculiarities noted: no history of intemperance nor of any severe disease &c, nor head-injury: Has not been restrained or confined. Cause of the disease is unknown: treatment, none. On personal examination, there is noted wild, incoherent talk, without cessation.

Nov 20 On admission, was put on T.W. (S.N.N.K.H.: Complexion light: hair light: eyes blue: condition of skin fair: is clean: Teeth: 3 gone, upper right: one, upper left: 3 lower right: Behavior bad: (put in protection sheet)

Nov. 26 Tried to hang himself today; slight rise of temperature; has been in restraint; mildly maniacal.

Dec. 5 Visited by brother; still restless & maniacal.

Dec. 18 Still some rise of temperature & maniacal

Jan 1/02 Temp. nearly normal; still restless & noisy. Feb. 1/02 More quiet. Mar. 12 Taken home by father; very considerably improved.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient is depressed, delusional & somewhat confused: has been using opium; about an ounce a week. Thinks people "Dope his food", causing him the nervous, for which condition he has been using drugs.

Personal and Medical History of Henry C. Rees

1901

This patient was brought here by Deputy Johnson, in fair physical condition, with following history of case. There is no history of consanguinity: Insane relatives, father's sister This is not 1st attack: others occurred in 1894 & 1896: durations, 1½ years, and 3 months was then sent to Rochester[x]: result, improvement in each instance: First symptoms of this attack manifested three weeks ago: delusions & hallucinations: Suicide seems increasing: variable & with rational intervals, but these not regular. Derangement is now shown by delusions of persecution: fixed drug-habit: Is disposed to injure others: threats: is not suicidal: propensity not active: No filthy nor destructive habits. No previous peculiarities noted. There is history of intemperance: father was a periodical drinker: also patient addicted to opium: no severe disease &c nor head-injury: has been confined, and for length of time as (in No 8) above[x]. Supposed cause of the disease is Heredity and Drug habit: Treatment: hospital care as stated above. On personal examination, no further facts learned or brought out.

*N.B. [x] Was here, 1st time, from April 9/94 to Sept 16/95, and discharged Feby 5/96: vacated (See Vol 27 page 161 No 3684): 2nd time, was committed as inebriate, Oct 12/96 to April 30/97 and was discharged Apl 30/97, under general laws of '97 Chap 235. (See Vol 32 page 271 No 4450).

Nov 25 On admission, was put on I.W. (5 ft 11 in. 175 lbs. Complexion sandy: hair light brown: eyes blue: vaccination scar on right arm: scar: sexual at back: scar on little finger of right hand: scar on left knee: ½ clean: teeth: 2 molar gone in upper jaw: behavior good: Surg E.A. Mallard)

Dec. 1/01 Restless; agitated; melancholy; has been vomiting medley every day. Jan. 1/02 Still agitated; melancholy. Mar 1/02 Still confused; melancholy; depressed. June 1/02 Has been steadily quite disturbed and troublesome. July 9/02 Improved quite considerably. (R.M.) Aug 1/02. Wt. 145 lbs. Aug. 20 Eloped from camp at Oconee. (C.L.C.)

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient thinks himself controlled by outside influences: says "the Doctor Editor followed him around & made him do things he did not want to do". Also, believes people talked against him, saying "he is crazy"; & when he asked them about it they did not know anything about it. Has delusions of poisoning also.

Personal and Medical History of Frank Ross.

1901

This patient was brought here by J.C. Johnson Jr, in fair physical Condition, with the following history of case. There is no history of Consanguinity, as to any insane relatives not known: this is 1st attack: first symptoms manifested about 2 months ago: by delusions and a fear that he was possessed by some "power": Disease seems stationary. Variable & with rational intervals, but these, not regular. Derangement now shown in that he thinks people are always talking about him and feels he would be better out of the world, and has threatened to kill himself: has made threats to kill his wife: has not attempted suicide: propensity not active: no filthy nor destructive habits: has violent temper, at times: Thinks religion & Bible "humbug". No history of intemperance. Says that "he was overcome by heat in 1891." Has not been restrained nor confined: Cause of disease not known. Treatment none, except heat ment for Insomnia. At personal examination at present, appears rational: believes, himself, that his mind is not right and that treatment is necessary. Commitment recommended because he needs medical treatment while under legal restraint.

Nov 16 On admission, was put on B3 (G.A.R. Ward): Complexion dark: hair brown: eyes blue: Condition of skin good: one scar at back of head; vaccination scars on both arms: Is clean: Teeth: 2 gone, left upper. Behavior good: (Came in 10th am)
Information of Insanity (filed with papers) given by Carl Grimm. Patient became resident of the State of Minnesota, August 1900: of County of Mower, August 1900.

Dec. 1 Quiet; well behaved; depressed & dull. Talks to self some. Dec. 12 Visited by wife and taken home.

The patient is very much confused & forgetful: not able to appreciate his surroundings. Condition due to sclerotic condition of vessels.
"Senile Dementia"

Personal and Medical History of Olaf Dalbom

1901

This patient was brought here by Charles Lustieg, attended by Peter Dahlbom, in poor physical condition, with following history of case. There is no history of consanguinity nor heredity. This is 1st attack: first symptoms manifested by loss of memory, some four years ago: presents restraint: loses himself: does not recognize relatives. Disease seems increasing: not variable: no rational intervals: derangement now shown as above stated: Is disposed to injure others, but not suicidal: no filthy or destructive habits. No previous peculiarities noted: not intemperate, but a heavy smoker: no history of any severe disease &c or head-injury: has not been restrained nor confined. Supposed cause of the disease is premature senility. Treatment only 2 days ago: nothing done — On personal examination, there is corroboration of facts set forth in 9th (above). Especially from testimony introduced upon examination we find patient is insane.

Nov 29 On admission, was put on T.W. (G.A.H. K.P.) Complexion light: hair gray: eyes gray: condition of skin fair: wart on left hip: slight abrasion on left side of face: abrasion on right elbow: is dirty: Teeth all gone, except one in upper jaw: 4 gone, in lower left. Behavior very noisy. Examined by E. W. Ballard). ——.——

Dec. 5 Restless; violent; scratches; bites; is hard to control; kept in bed. Dec. 10 Died at 9 A.M. failing very rapidly, with few preliminary symptoms, which has been noted as failing for 5 or 6 days.

TRIES TO END LIFE

CHARLES RYSDALE ATTEMPTS TO HANG HIMSELF IN A JAIL

RYSDALE COMMITTED—Judge of Probate Bazille sent Charles A. Rysdale to the insane hospital at Rochester. He was discharged from the hospital last May as cured. He is a native of England and has been in this country twenty years.

Was Demented Once Before, but Recovered—Formerly Owned Hotel Fey on East Seventh Street.

Charles A. Rysdale, at one time proprietor of the Fey hotel, on East Seventh street, who was taken to the county jail early yesterday morning charged with insanity, made an attempt to end his life in the padded cell at the jail about 10 o'clock yesterday morning by strangling himself with his suspenders. He tied one end of the suspenders to the iron grating in the wooden door of his cell and the other end he fastened about his neck. Then he leaned forward with all his weight, and it was in this position that he was discovered by one of the jailers a few moments later. The suspenders were immediately cut and the demented man fell forward on the mattress in his cell. He was none the worse for his experience, as he was discovered before he could do any damage to himself.

Rysdale has been in the asylum before, and was released last March. He came to St. Paul and has been living with his wife at the Fey hotel since that time. He appeared to be perfectly rational until about 3 o'clock yesterday morning, when he became violent and proceeded to tear at everything he could reach in the room, bedclothes included. He also insisted that he was going South to marry a woman who was worth $400,000, and had several other visionary projects on his hands. Officers Hervine and Madden were called, and brought the unfortunate man to the Central police station, where he was booked as insane, and later taken to the county jail, where he was locked up in the padded cell. Nothing unusual happened until he was found hanging to his suspenders at 10 o'clock. From that time on he continued to get more violent, and at 1 o'clock the jailers were compelled to put him in a straight jacket. He was very noisy, and all the afternoon made the corridors in the county jail ring with his yells and weird shouts.

Rysdale is the man who attempted to slay Jailer Nick Herges at the old county jail Sunday morning, June 10, 1900, by throwing an iron cuspidor at his head. The jailer dodged the missile, but Dr. F. P. Berkman, who was standing by, did not fare so well and had his arm cut in shielding his head. Rysdale is well known in St. Paul, and his mental condition is thought to have been caused to a large extent by worry over matters connected with the hotel which he formerly owned and which his wife still con-

Personal and Medical History of *Charles A. Rysdale*

1901

This patient was brought here by Deputy Johnson, attended by Thomas Golvin, in poor physical condition, with following history of case. As to consanguinity and heredity not known: This is not 1st attack: one occurred in June 1900; duration 9 months - was then sent to Rochester and discharged, as cured, May 5th 1901. First symptoms of this attack manifested 2 weeks ago, by excessive gambling: disease pains increasing: not variable: no rational intervals: Derangement now shown by gambling and squandering money. Is not disposed to injure others, but has attempted suicide by hanging & propensity now active: of destructive & filthy habits: was (always) easily angered: as to intemperance &c, don't know: has had Syphilis: was mechanic & confined, during previous attack, in St. Luke's hospital, 3 weeks. Supposed cause of the disease is Syphilis: Treatment, anti-syphilitic. On personal examination there are noted stuttering speech; exaggerated ideas; characteristic of Syphilitic trouble. N.B. This patient was here before from June 11 - 1900 to March 6 - 1901, and discharged May 1/1901, improved: the then diagnosis of case was "Syphilitic Insanity." (For further particulars see Vol 47 page 5 No 5589).

Dec 1 On admission, was put on T.W. (G.H.N. Hpt. Complexion fair: hair brown: eyes blue: condition of skin good: mole on left side: scars on right shoulder: right eye black & swollen: is clean: teeth all gone: Behavior, a little ugly).

" " 3 Received on Ward: put to bed. Dec 3. very delusional; restless & destructive during night 7 Inclined to be pugnacious: has slight Temperature & acceleration of pulse. Dec 7. Up- 8 on ward: very violent to nurses. Dec 8. Transferred to C! Still pugnacious and 1902 destructive & noisy: habits filthy: speech very indistinct & paretic. Jany 2/02 - 150# Jany 9 P80. Continues extremely confused, noisy & restless - Jany 9. Transferred to TW. 10 Is becoming very unsteady: speech thick: appetite poor: Is failing rapidly. 11 Died 3.30 P.M. of Paresis.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient seems somewhat depressed & agitated; has various delusions regarding his children & suspicions of his wife. Thinks she has combined with the minister to work against him.
Physically, fairly well nourished; has a mitral murmur.

Personal and Medical History of *Nels Virak*

1901

This patient was brought here by Deputy Sheriff C. M. Storm, attended by Mrs Lolete Virak and C. C Crandall, in good physical condition, with following history of case. There is no history of consanguinity nor heredity. This is 1st attack: first symptoms manifested about two months ago. Disease seems increasing: not variable: no rational intervals: Derangement now shown in that he has the delusion that the preacher is criminally with his wife: has delusions on other subjects; that he owns land; has money in large amounts. — Is not disposed to injure others, nor suicidal: no filthy nor destructive habits: no previous peculiarities manifested; not lately intemperate: has scar on forehead. — Has not been restrained nor confined. Cause of the disease, dont know: treatment, none. On personal examination, has delusions in regard to the virtue of his wife and in regard to property. Commitment recommended because it is dangerous to the Community to have him at large: his disease is of such a nature and in such a stage, as to require aid & assistance, while under legal restraint. He is now and has been a resident of Fillmore Co. for last 14 years past. ——— . ———"

Dec 6 On admission, was put on B3 (G. H. N. R) Jt. Complexion light: hair light: eyes blue: Condition of skin good: no scar on back of head, and one, on forehead. Is clean. Teeth: one gone, lower right: 3 gone in upper jaw & the rest in poor condition. Behavior good) — Aug. 1/02. 159#; Jan. 1/03. 160#

Jan 31 '03 Has enjoyed good health during period. Worked some tho' somewhat erratically. Rather dull in general mental state and slightly silly in manner.

Personal and Medical History of Doc Atwater
Colored

Doc Atwater, a colored convict at the prison, was adjudged insane yesterday, and was taken to the Rochester asylum this afternoon. Atwater came from Hubbard county in July, 1900, to serve a life sentence for murder, which he claims was committed in self-defense. His mental aberration is due to brooding.

PHYSICAL CHARACTERISTICS.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

This man sent from the Penetentiary: appears in the best of physical health: says he can neither read nor write his own name; but is quite bright. Says he has been in solitary confinement since last may. Recently has heard people talking about his friends &c. "Does not hear them now". Is cheerful, answers quickly: seems perfectly rational: ridicules the idea that he is or has been crazy, but still says that he has heard voices, while in his cell — at first appeared to have hallucinations of hearing, which very quickly subsided — ~~Does not consider his Disease~~.

At first appeared to have hallucinations of hearing, which very quickly subsided — ~~I do not consider him a Insane~~.

Personal and Medical History of *Doc Atwater* (colored)

1901

This patient was brought here by J.J. O'Rourke, (no attendant), in apparently good physical condition, with following history of case. As to any consanguinity, not stated: as to any heredity, unknown. This is not 1st attack: others occurred during past 1½ years: duration not stated. First symptoms of this attack manifested last april; continual talk about persecution and wrongful conviction. Disease seems increasing: variable: Derangement now shown by yelling, incoherent talk, violent. Showed a disposition to injure two Keepers; not suicidal: no filthy nor destructive habits: previously, given to singing religious songs; preaching: as to any intemperance, unknown: has large scar on head: as to any severe disease or unknown: has been shut up, in "Crank Cell", off and on, 5 yr. Cause of disease, unknown: reports heredity. On personal examination, there is confirmation of 9th & 12th questions & answers in Commitment papers.

Dec 6 On admission, was put on Ct. (5 ft 11 in). Complexion black: hair black: eyes brown: condition of skin good: mole on right side: scars on right side of head: 3 on right side of back: hernia on right side: is clean. Teeth: 3 gone, left upper: 3 gone, lower right; 3 lower left: the rest in poor condition: Is inclined to be ugly.

" " Received on Ward (Ct.). Is very noisy; apparently confused & has "hallucinations of hearing". Says he is filled with turpentine". Dec 7. Restless and noisy all night. answers questions well, but is incoherent when "soliloquizing". Dec 9. Talks quite rationally, and is quite well-behaved. Dec 12. Sleeps well: behavior good. Dec 15. Attempted to interfere when nurse had trouble with patient Wm Mann. Does nothing. Dec 17. Became very noisy and threatening: was restrained by holding. Dec 19 for. Weight 201#

Jan 31 "no change of importance. Is rather sullen, and, at times, becomes very noisy: and threatening: has had trouble with other patients: plays cards and will talk fairly rationally, when questioned.

Feb. 1/02 Wt. 200#; Feb. 8 Struck nurse Culver; May 1/02 203#; July 31 Very slight change mentally; noisy & abusive at times: harangues about his detention; Is however quite jolly & agreeable, when not reminded of his conditions. Plays games; does no work.

Nov. 1/02 Wt. 199#;

'03 Jan. 31 No change of importance; continues abusive at times; but as a rule fairly well behaved; plays cards; never goes out with crowd. (C.L.C.)

The patient left this hospital about a year ago; at present, is depressed: cries while telling his trouble: accuses wife of infidelity; is suspicious of his brother: "thinks he is trying to get the best of him"

General physical condition good.

Personal and Medical History of John A. Peterson.

1901

This patient was brought here by J.O. Odman, attended by J.A. Swanson, in good physical condition, with following history of case. There is no history of insanity nor heredity. This is not 1st attack: he accurred in May 1900, duration about 16 months. Was sent to Rochester, Minn: result of treatment, do not know: was paroled in Sept. 1900. First symptoms of this attack manifested in Sept 1900: accused wife of infidelity: "said neighbors were scheming against him": complained of headache. Disease seems increasing: not variable: no rational interval. Derangement now manifested as in answer to 9th (see above): Is disposed to injure others: not suicidal: no filthy nor destructive habits. Shows peculiarities, previously: irritable temper: no history of intemperance: no of any severe disease &c, nor head-injury. Has been in hospital (see 8). Cause of the disease not known: Treatment only as stated. On personal examination, appears nervous; pulse accelerated and intermittent.

Note: 2nd admission: Left before from Apl 17/1900 to Sept 29/1900, & discharged May 1-1901 improved. On his then examination here, was depressed: Showed mental weakness: Condition perhaps developing: Had been a hard drinker: Showed some motor degeneration. On admission, showed delusions of persecution & expressed them. At end of the 7 weeks, was quite improved & began work outside: (vaccinated successfully 7/20) Made steady improvement, up to time of leaving: worked with the gardener.— (See Vol. 45 page 305 No 55249). Diagnosis then, "acute melancholia."—

Dec 13 On admission, was put on B3 (G.H.N. Rpt. Complexion dark: hair brown: eyes blue: condition of skin fair: is clean: Teeth: 10 in upper jaw: 11 in lower jaw: Behavior good: examined by H. Poapst.)—

Dec. 15. Depressed; quiet; talks of no delusions.
" 27. Quiet: well behaved; works outside.
Feb. 7. Sent home on trial: quiet & rational.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient is in pretty good mental condition, but has an idea that the people about him were trying to kill him. Gives no reason for his belief. Condition due to senility. Arteries sclerotic.

Personal and Medical History of Hugh Reilly

1901

This patient was brought here by Deputy Johnson, in fair physical condition, with following history of case. No history of consanguinity. As to any heredity, previous peculiarities, history of intemperance, severe diseases &c or head-injury, not known. This is 1st attack: first symptoms manifested May 1901: imaginary enemies. Disease seems increasing: not variable: no rational intervals. Derangement now shown by insomnia: delusions of great bodily harm. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. Has not been restrained nor confined. Cause of disease unknown. Treatment none. On personal examination, is talkative, principally on the delusions of bodily harm. ——

Dec 27 On admission, was put on B³. (S.S.H.N.H.) Complexion light: hair gray: eyes blue: condition of skin fair: varicose veins on both legs: large sore on both legs, below knee: small scar on right shoulder: one on back of neck: is clean: teeth in poor condition: 6 stubs in upper and 7 in lower jaw. Behavior good: Examined by Harry Poapst. ——

Aug. 1/02 188# Jan. 1/03 197#.

Jan. 31/03 During period no special sickness. Is careless-demented in talk. Never active-Indolent-somewhat untidy.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient is depressed, delusional very melancholy: has various delusions: thinks people are trying to harm him; are working against him. Is a chronic masturbator. Is worried about his condition. In fair physical condition.

Personal and Medical History of Reinhardt Wiese

1901

This patient was brought here by Sheriff E. A. Vine, in fair physical condition, with the following history of case. There is no history of consanguinity: an aunt was insane: father very intemperate: This is 1st attack: when first symptoms manifested is not stated: shown by delusional melancholy: disease seems increasing: not variable: no rational intervals. Derangement now shown by melancholia, insomnia, pains in head. Delusional: is not disposed to injure others: not suicidal: no filthy nor destructive habits. As to any previous peculiarities, do not know. Had an attack of nervous prostration in 1892. Has been confined in County Jail 2 days. Do not know cause of disease. Treatment, bromides. On personal examination, it is found he suffers from hemicrania: circulation pulse rate increased: restless.

Dec 30 On admission, was put on B.3 G.H.N. Rpt. Complexion dark: hair dark brown: eyes gray: condition of skin fair: scars: one in front of both hips: one on lower part of spine: hernia on right side: is dirty: teeth good: Behavior good: Examined by Howe and Bogart)-

Aug. 1/02 - 144# Jan. 1/03 148#

03 Jan. 31 During period usually inactive - of fairly good behavior. Rather dull. Made one attempt to elope. Does some work.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient seems much confused: Shows marked loss of memory, both for past & recent events. Does not appreciate his surroundings or his condition. Present condition due to senility. Has marked sclerosis of arteries —

Personal and Medical History of *Royal H. Gove*

1901

This patient was brought here by Sheriff E. N. Vinn, attended by E. J. Gates, in fair physical (forage) condition, with following history of case. As to any consanguinity, do not know: No history of heredity. This is 1st attack: first symptoms manifested two years ago: Loss of memory: Disease seems increasing: not variable: no rational intervals: Derangement now shown in that he believes he is away from (home?): is being persecuted: is delusional: is disposed to injure others, "if restrained": not suicidal: no filthy nor destructive habits: no peculiarities previously noted: no history of intemperance, nor of any severe diseases nor head-injury: Has had two weeks' attendance of man, night & day: Supposed cause of disease is senility.- Treatment, use of bromides. On personal examination, is emaciated, dull, listless, fails to concentrate attention; insomnia for 10 years: at times is maniacal. ———

Dec 3 On admission, was put on T.W. (G.F.N. R.P.T. Complexion fair; hair gray; Eyes blue; condition of skin good: large wart on inside of left leg: vaccination marks on left arm: abrasion of skin on calf of left leg; abrasion of skin on left hip: scar on left knee: scar on right knee: scar on chin: is clean. Teeth all gone except 7 in lower front jaw: behavior good: feet badly swollen). ——— " " " "

Aug. 1/02 Weight 143# Patient is very senile and profoundly demented. No conversation of any value can be held with him. Sept. 1/02 150#. Sept. 30/02 Noted as gradually failing. Has been extremely filthy & untidy. Nov. 1, 148# Becoming much more restless and filthy. Dec. 1/02 140# Still failing. Jan. 25/03 Has Erysipelas of the face.

Jan. 31/03 Had to be placed in a restraint sheet on account of sickness. Seems to be doing fairly well.

The patient shows marked loss of memory: due to Senility: is very unsteady. Has sustained several injuries of face & shoulder by falling. No delusions attainable. -

Personal and Medical History of George Brown #2

1902

This patient was brought here by J.B. Thompson, in fair physical condition, with the following history of case. Patient thinks they (parents or grand-parents) were second cousins: No history of heredity. This is 1st attack: first symptoms manifested about one a year ago. Disease seems increasing: variable & with patorial intervals; these, at anytime. Derangement now shown in subject of loss of property (by being deeded to son) & other domestic trouble: Is not disposed to injure others: not suicidal: is of filthy habits. No previous peculiarities noticed - No history of intemperance, nor of any severe disease &c, nor head-injury. Has not been restrained nor confined. Supposed cause of the disease is loss of property & domestic trouble, and senile debility. Treatment none. On personal examination, there are noted several contusions about face, due to fall: has dizzy spells: (gets fainting spells): no valvular lesion: senile debility. On admission was put on TW. (5 Ft 8 1/2 pt. Complexion fair; hair dark gray: eyes blue: scars, on forehead over left eye: scar on 3 fingers of right hand: slight cut on left ear: Bruises on nose; one under each eye: bruise under left shoulder: and left shoulder lame: is dirty: Teeth: 3 in lower jaw: all old stubs in upper jaw - Behavior good: very unsteady on legs). Aug. 1/02 - 129#. Jan 1/03 139#

Jan 31/03 Patient's mind is failing - Plean but feeble - Childish weak; unsteady on his feet. Gets dizzy at times. Has probably internal fistula, which discharges from the rectum. Patient seems too feeble to stand an operation. During the period has been somewhat sickly. Has swollen feet, and a general Atheroma prevails.

Personal and Medical History of *Marcus Mayer*

1902

This patient was brought here by Deputy Johnson, in fair physical condition, with the following history of case. There is no history of consanguinity nor heredity. This is 1st attack - first symptoms manifested two months ago; believed that he was being bewitched and that people were trying to do him harm. Disease seems increasing; variable and with rational intervals, but these not regular. Derangement now shown in that he believes that people are trying to get him out of his work, and destroying things in his house, and that his marriage was false, and he claimed the bride at the wedding of a friend. Is not disposed to injure others, nor suicidal; no filthy nor destructive habits. No previous peculiarities noted; no history of intemperance. Had an attack of fever, lasting, a week, about a month ago. Was confined at St Joseph's Hospital, one week. Supposed Cause of the disease unknown. Treatment has been sedative & nourishing. — " —

On personal examination, crosses his fingers, to keep away witches. — " —

Jan 6 On admission, was put on P.3 (G.H.D. 2/pt. Complexion dark; hair dark brown; eyes brown; Condition of skin good; brown mole on right breast; hairy mole, right side; scars on forehead; 2 on left knee; one on left hip; one on waist, on left side; 2 on right knee - scar, back of right hand; Eruption on upper part of body. Is clean. Teeth: 2 gone, upper jaw; 1 lower jaw. Behavior good. Examined by John Dingham). —

Aug 1/02 170#

Jan 03 31. Patient has been quite and reserved during the period. Evasive as regards himself. Sits about in a dull quiet way. Health is quite good.

The patient is depressed worries a great deal about his condition – Has been a masturbator & now feels that he is going insane over it. Says he was in love with several girls but they would not marry him, because of his practice". – Has bought some property and has no money to pay for it. Case is one of melancholia with transitory delusions –

Personal and Medical History of Godfried Nelson

1902

This patient was brought here by Frank Collins, attended by S. Everson: appears in good physical condition. The following is history of case, as to any consanguinity, don't know. no insane relatives. This is 1st attack: first symptoms manifested July 1901: had violent attacks of temper. Disease seems increasing: variable & with rational intervals, but these, not regular. Derangement now shown in no one subject in particular, but talks considerably about money matters. Is disposed to injure others, but not suicidal. no filthy nor destructive habits. No peculiarities previously manifested: no history of intemperance, nor of any severe disease &c, nor head-injury. Has not been restrained nor confined. Cause of disease is unknown. Treatment, none in particular. On personal examination: rather indefinite: his answers to questions are incoherent. Commitment recommended because we believe it is not safe to leave him at home with his aged parents, and that such commitment will contribute to his recovery. ——— ..

Jany 10 On admission, was put on B3 E (G.H.N.Hpt. Complexion light: hair brown: eyes brown: condition of skin good: small scars on right leg, above knee, and on calf of left leg: is dirty: has 9 teeth in upper jaw and 9 in lower jaw. Behavior good: no remarks)—

Sept 20/02. Received on ward (Had been out on parole).

Jan 31 03 During this period, his health has been fairly good. but patient is filthy as well as demented. Dull & stupid.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient seems confused & forgetful: Son says "he wanders away from home, & at times becomes very obstreperous, especially if any one attempts to restrain him" — No special delusions obtainable. Is very feeble, physically..

Personal and Medical History of Benjn. B. Smith

1902

This patient was brought here by Deputy Geo. Tucker, attended by M. G. Smith, with the following history of case- _____. Parents & grand-parents not related. No Insane relatives. This is 1st attack: first Symptoms manifested about 2 years ago: General loss of mental power. Disease seems increasing: variable, rational intervals not regular. Derangement now shown in all subjects. Is disposed to injure others, but not suicidal: no filthy nor destructive habits. No history of any previous peculiarities, nor of intemperance. Received fall on head. Some restraint has been used for 6 months. Supposed cause of the disease is fall on head. Has had general treatment. On personal examination, patient suffering from senile dementia, probably hastened by injury to head. Commitment recommended because he cannot be properly treated at home.-

Jany 10 On admission, was put on T.W. (G.A.R. Ward). Complexion dark: hair gray: eyes blue: vaccination marks on left arm: has double hernia: is clean: slight discoloration on right shin: teeth - one out in lower left. Behavior good.

Aug 1/02. 113th. Patient very senile in both mental & physical behavior - habits filthy - Is very confused. Aug 18. Falls occasionally when asleep - part of the time kept in bed to prevent this. Aug 30/02 Has again another sore from falling. Sept. 9/02 Received an abrasion over left eye by falling out of chair when asleep. Has been in bed since the first, chiefly to protect him. Occasionally it is necessary to tie him to the bed. Has several boils - Infected wounds - Sept. 18/02 Has another infected wound on right hand. Sept. 30/02. Again fell out of bed. Hurt his forehead He has been failing quite rapidly of late. After some consideration the patient was taken home by his son - with the idea of caring for him & having him die at home.

Personal and Medical History of John S. Lundvall

1902

This patient was brought here by Deputy Johnson, attended by E. H. LaDow, in poor physical condition with following history of case. There is no history of consanguinity: father's sister was insane. This is 1st attack: first symptoms manifested about 2 years ago, by seeking solitude. Disease seems increasing: not variable: no rational intervals: Derangement now shown by seeking solitude; remaining out night. Is disposed to injure others. Has not attempted suicide, but propensity is now active. Is inclined to be filthy and destroys dishes at table. No history of any previous peculiarities, nor of intemperance, nor of any severe disease etc, nor head-injury. Has not been restrained nor confined. Cause of disease not known: Treatment, none. On personal examination, is talkative upon all subjects, and does not answer questions correctly: actions and appearance not normal. —

Jany 10 On admission, was put on B3 (G. H. N. Kpt. Complexion light: hair brown: eyes blue: Condition of skin fair: is dirty: teeth good. Behavior good: Sd by H. E. Poapst) —
Aug. 1/02 Wt. 149# Jany 1/03. 151#

Jan. 31 03 During Period the patient behaved well — very quiet - rather dull, listless, — has worked some. Was visited by mother Oct. 22/02.

This patient was brought here by J. P. Gisin, attended by J. Wogoner in poor physical condition, with following history of case. Dont know as to any history of consanguinity, or heredity, or intemperance. This is 1st attack: was not sent to hospital, before. — First symptoms of this attack manifested about 2 months ago; by talking more than usual, and without any sense to what he said; Sleeplessness & wandering about, at night. Disease seems increasing; variable; rational periods not at regular intervals. — Derangement now shown in that he believes other people are crazy; & that he is being followed and abused by his friends and by strangers: disposed to injure others: he threatened to beat & shoot his family; not suicidal; propensity not active: no filthy nor destructive habits. Became violent at times & endeavored to drive his wife out of the house. Has not been subject to any severe disease or any head injury. Has not been restrained nor confined, except at his home, where he was watched by his relatives. Dont know cause of the disease. Treatment: none that we know of, for mental trouble. Mr Kessel Gunnison claims that he was held up by two men and robbed, and that his grandson and stepson are crazy; and that his head is dizzy, and stomach bad. Commitment recommended because he is unable to receive proper treatment at home, and because, in our opinion, treatment is necessary for him, in his present condition, and because restraint is necessary. — .

Jany 10 On admission, was put on B3 (G.P.N. 2pt. Complexion light: hair brown; eyes blue; condition of skin fair: hands scratched in several places: 2 scars about 1 inch long on head: several small scars on body: Teeth in poor condition: 3 old stubs in upper jaw and 5 in lower: Behavior good: Examined by H. E. Poapst). — Aug 1/02 146#. Jan 1, 03 151#.

Jan 31 '03. Patient is very quiet, works some, rather dull in manner. but understands fairly well. Upon the whole appears mildly demented.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

The patient seems quite rational: speaks little English. Is a Chronic Alcoholic. When on a spree, gets violent & Destructive: believes his wife unfaithful. Says the Policemen join to see her, as soon as he goes away. Physical Condition good. —

Personal and Medical History of Laurence Gromowski

1902

This patient was brought here by Sheriff M. J. Luis, attended by Frank Smee, in fair physical condition, with following history of case. There is no history of consanguinity, nor heredity - This is not 1st attack. Others have occurred, at intervals, for last 16 years: duration about 2 to 3 days: was sent to Rochester, Minn, Hospital & Discharged Nov 30/1901 as recovered. First Symptoms of this attack manifested about Sept 1st 1901: intemperance, Extreme violence & abuse of family: threats, accompanied by sleeplessness: attempts assaults. Disease seems increasing: variable and with rational intervals, but these irregular. Derangement now shown in that he is extremely vicious: believes wife unfaithful: charges her with being a prostitute & with having improper relations with chief of police & mayor. Shouts his charges for continually for hours at a time. Is disposed to injure others, but not suicidal: no filthy nor destructive habits: no peculiarities previously manifested. Patient was excessively intemperate. Was struck on head by policemans club, nine years ago: was not knocked down; was not sick afterwards. Has been confined in County Jail 12 - 14 times, and once in Rochester Hospital, June 6th - 1898 (to July 5/1901) was then discharged Nov 30-1901. - Don't know Cause of disease. Treatment, none but restraint here. On Personal Examination, is tremulous: reflexes exaggerated: very excitable.

N.B. - Patient here before, for above period: Has had several attacks: always very intemperate. (For further particulars see Vol 39 Pg 265 - No 5055).

Jan 13 On admission, was put on 93 / 97 F. T. R. Pt. Complexion dark: hair brown: eyes gray: condition of Skin fair; first finger on left hand crooked: 2 small scars, left side of forehead: scar on left leg: is dirty: Teeth: 6 gone lower jaw: 2 gone upper jaw Behavior good) Nov. 10/02 Returned from parole today. Jany 1/02 167#.

Jan. 13/31 Always indifferent; melancholy; dull & somewhat silly; Is however quiet & well behaved.

Personal and Medical History of Ralph Stubbard

1902

This patient was brought here by Deputy Johnson, in fair physical condition with following history of case. There is no history of consanguinity, nor of heredity. This is not 1st attack: others occurred Aug 99, transient after fits. First symptoms of this attack manifested since Scarlet fever at age of 10 years. Disease seems increasing: not variable: no rational intervals: no regularity. Derangement now shown by constant contemplation of suicide, but has not attempted it; mental enfeeblement: neglect of person. Is not disposed to injure others: filthy habits. Previously was very stubborn. No history of intemperance. Subject to Epilepsy since age ten. Has not been restrained nor confined. Supposed Cause of the disease is Scarlet fever and ear disease - Treatment none - On Personal Examination, nothing further stated -

Jan 14 On admission, was put on B3 (E.H.N.R.P.t. Complexion light: hair light brown: eyes blue: little finger on left hand deformed: 2 small abrasions on back of left hand: scars: one on right wrist: small scar over right eye. Is clean: teeth: 6 out in upper and 6 in lower jaw: Behavior good. Examined by H. E. Poapst). ———

Jan. 16 1902 Epileptic; dull; confused; various delusions.
" 27/02 Quieted down somewhat, still rather dull & quiet.
Feb. 1 Wt. 136#; Mar. 27 Trans. to B2; continues to have convulsions quite frequently - 10 or more per month. Habits tidy; does nothing; quite rational; stubborn; easily excited; stutters badly.
Aug 1 Wt. 133#. Aug 28 Trans. to D.W.R. Severe cold.
Aug. 31. Trans. to B2. Sept. 1 Visited by brother; considerably improved; fits only occasionally. Jan. 31
Jan 31 1903 Fairly quiet & peaceable; converses quite intelligently but is stubborn & refuses to work. CLL

PROBATE COURT ASKED TO APPOINT GUARDIAN

Henry Galvin, the Common Council's Sergeant-at-Arms, Said to Require a Custodian.

James Louis Galvin has petitioned the probate court to appoint him guardian for his father, Henry Galvin, now sergeant-at-arms to the city council, and for many years a member of the city police force.

The petition states that Mr. Galvin, Sr., who is possessed of real and personal property worth about $4,500, is afflicted with senile dementia, and has developed a desire of late to make entire strangers presents of property and money without apparent cause.

Galvin is almost eighty years of age. He resides at 331 Ramsey street, and has two sons, the petitioner and John H. Galvin, both residents of St. Paul. There will be a hearing on the petition Jan. 20.

Rochester, Jan. 18, 1902.

old friend did you think that there was anything rong
payed you my dues say my advice to you not have anything
he is no good he think no one wnows anything but him say
t back I am going to take the Engine 14 back. Just as
you said Jack tell Bill Lewis that told Mr. Ellis to give the Engine
229 to him he said that Bill could not run over thair. I told him
that it would be better to pay that old at five mounth and get it back
Say Jack this one of the hardes things to make out how to get along
with out being sin is some thing tell Bill to keep all the old papers
for me I will be back some day tell Mack to tell littel Jack to kepp
away from Mike he is no good. Jack an old Just asked for the I was
righing with and if course I had to give it him.

Rochester is a hard place to get out of but I dont think I will
be heare long this time.

Charley Johnson is hear yet John Howe and a man by the name
of Vokes he was the man that took care of me the last time I am the
same floor but thing are all changed Jack try keep out sin we will all
ways be good friends. Jack I consider one of theas places are a hell
on earth but if in vent Would is not any worse for some good men they
will not be very bad of they might be in heven some day. Jack the old
man that got pin to wright with looks just like my old Father. Jack
I am in queer fix but I will trust God hee see all and nowes all
things.

WOUNDS, Abnormalities, old haematoma - L Ear - Condition of Skin, good

Rochester, Jan. 18, 1902.

J. A. D.

Dear old friend did you think that there was anything rong with me when I payed you my dues say my advice to you not have anything to do with D. he is no good he think no one wnows anything but him say Jack when I get back I am going to take the Engine 14 back. Just as you said Jack tell Bill Lewis that told Mr. Ellis to give the Engine 229 to him he said that Bill could not run over thair. I told him that it would be better to pay that old at five mounth and get it back Say Jack this one of the hardes things to make out how to get along with out being sin is some thing tell Bill to keep all the old papers for me I will be back some day tell Mack to tell littel Jack to kepp away from Mike he is no good. Jack an old Just asked for the I was righing with and if course I had to give it him.

Rochester is a hard place to get out of but I dont think I will be heare long this time.

Charley Johnson is hear yet John Howe and a man by the name of Vokes he was the man that took care of me the last time I am the same floor but thing are all changed Jack try keep out sin we will all ways be good friends. Jack I consider one of theas places are a hell on earth but if in vent Would is not any worse for some good men they will not be very bad of they might be in heven some day. Jack the old man that got pin to wright with looks just like my old Father. Jack I am in queer fix but I will trust God hee see all and nowes all things.

John Joseph Scanlan.

Copy of a letter written by John Joseph Scanlan to John Deveny, East St. Paul, Minnesota.

Money from S- in law Ought to Come (a share of it) to his Children.

Talks quite accurately, though slight exaltation is notable.

Personal and Medical History of John J. Scanlan

1902

This patient was brought here by Emanuel Johnson, attended by E.A. Ladow, in good physical condition, with following history of case. There is no history of consanguinity: but father was insane - This is not 1st attack: one occurred in 1894: duration ten months: was at Rochester Hospital: condition improved. First symptoms of this attack manifested two weeks ago: became violent: punishing children without cause. Disease seems increasing: variable + with rational intervals, but them not regular. Derangement now shown by violent temper: delusion of persecution: disposed to injure others, only by threats. Is not suicidal. No filthy nor destructive habits, except, on one occasion, broke dishes. No previous peculiarities noted - no history of intemperance. Had injury to ear in 1894. Has not been restrained nor confined - Supposed cause of the disease is Overwork & heredity. Treatment, none - On personal Examination, nothing further mentioned. -

N.B. Here before from 16th July 1894 to June 2nd 1895, and discharged Nov 6th 1895, as improved - Cause for that attack, the "General R.R. Strike" - Duration 2 weeks: (after leaving the Institution, patient was taken out about the Country for several months, by James Miller, a nurse of this hospital, whose services were paid for by patients family). (For further particulars see Vol 27 Page 325 No 3778)

Jan 17 03 On admission, was put on B3 (G.A.N.Kpt. Complexion dark: hair brown: eyes blue: Condition of skin good: small scar on right wrist: scar on left hand: small scar on Calf of right leg: is dirty: Teeth: one gone, upper right. Behavior good: L.J. H.E. Baptist)

Dec. 1/02 165#. Has improved very much & is well behaved. Talks with a fair degree of intelligence

Jan. 31 03 Is now on A2. Very anxious to go home of late. Well behaved. Fairly well recovered; but his ideas not very clear as regards his mental condition.

Examination of a patient, named Chas. Simon, Jan. 23d, 1902.

How long have you been in Minnesota? I don't know - for five years. Did you live in Iowa? No, I don't know (patient's answers are hesitating and at times rather uncertain) He guesses that his father and mother are living. How long have you been over? Don't know - eight years. States that he has been in New York and in Wisconsin, states that he had eight thousand marks from the sale of a farm, it was his father's farm, had had it a long time, his father gave it to him, carried with him. Asked when was the last time he saw it said four or five weeks ago, they took it away the robbers in the resturant. He was boarding there. Said that he did'nt work. Asked how much he paid for board said he had to pay $10.00 for everything - didn't know what street the boarding house was on. Said the money was taken away in the night when he was sleeping - at the resturant in the night - he slept there - it was a bunch of paper money - don't know who took it - couldn't catch him - don't know who they were some burglers- had been carrying it around for eight years. Asked about his work says he didn't work - he preached. Asked about preaching in Blue Earth - didn't know - was in Wisconsin before - was in Chicago - got money by preaching - no don't preach in the church, on corners. Did you ever preach on the corners in Blue Earth? No, in Chicago - had a sunstroke in Chicago.

Don't know Blue Earth. Admits to have a brother in this counrty in Chicago - he had a store - his name was Jacob Smith - says his own name is Christ Smith - has five sisters in this country - don't know their names Asked how long he has been in this house - says since last year. What is this house - a hotel - resturaunt. How long ago did you come? Last year. What month? Before last Mickelmas - in December - Where were you before? In Minneaota - in Minneapolis - what street in Minneapolis - dont know - it was in a resturant. What was the name of it? Don't know. How long were you there? Two years. Was preaching there on the streets. Where were you before going to Minneapolis? In Chicago. How long in Chicago? Don't know. What street - Broadway. What number? Don't know. What kind of a house? A boarding house. Who kept it? Don't know - was there a few days. Was going from house to house looking for something to eat - was preaching on the way from Minneapolis to Chicago - was carrying the money all the time wouldn't change it. What ship did you come over on? Don't know - Elizabeth. Denied that he preached in the Old Country, Asked what made him preach here said "I was a Boer". Was married - married before I went away from Dutchland - wife's name Mary. Did she go with you- no she is by the old place. How long since you heard from her? Two years.

Questioned concerning Blue Earth and denies that he was ever there claims that he came here from Minneapolis - that this is a hotel - that the men who came with him joined him on the train - was never in jail- and was never arrested.

Comments - The patient is very evidently evading anything which tends to incriminate himself or to give us any information concerning relatives or friends, or indeed any information by which we can look up Probably hardly any of the statements are correct

Hamilton Home
Jany 27/02

The follwing is an account of a patient, Charles Simon, brought here by the sheriff of Faribault County, as related to Dr. Kilbourne and Dr. Heyerdale. The sheriff said that this man Simon had been in jail for sometime on a charge of murdering a girl, and that on the morning of the murder Simon had gone to the hotel and asked for breakfast. He was told by the father of the girl that he could have breakfast but must wait a while. In a short time he walked into the hotel again where two girls were sitting, and carried in his hand a sharp iron . He rushed at the girls and as they started to run away he plunged the iron into one of the girl's back. The other girl ran but Simon caught her & wrenched a butcher knife from her hand, but she finally got away from him and ran into the barn. At the door of the barn this girl's father grappled with Simon and was severely cut with the knife before Simon was overpowered by others coming to the assistance of the old man.

During his time in jail he made several attempts, as the sheriff said, to kill him. At one time he attacked the sheriff with a heavy piece of wire which he had sharpened on the floor, the sheriff declaring that Simon was a very dangerous man. The sheriff said that up to within about a month of the man's trial he had been a very intelligent prisoner, but for the last few weeks had acted in a very insane manner.

The sheriff states that this man Simon is known to be "a very mean man" as he said it. He also states that there was not much known of this man, and that he came from some place in Iowa.
Dictated by Dr. Heyerdale, January 25th, 1902.

Personal and Medical History of Charles Simon

1902

This patient was brought here by Geo. W. Freer, Sheriff, Blue Earth County & L. C. Perkins. The following papers accompanied patient here - (1) Order to Sheriff to convey and deliver to the Superintendent of the Rochester State Hospital for the insane the body of said defendant Charles Simon, and order to said Superintendent to receive the body of said defendant into his custody and keeping &c (2) Proceedings under section 3472 of General Statutes of Minnesota, to determine as to mental condition of said Charles Simon. (3) Affidavit of H. L. Bullis, Attorney at law, and acting as Attorney for said Charles Simon, by the direction and order of the Court, for purpose of having mental condition of said defendant inquired into by this Court. (4) Certified Copy of Indictment for Murder in first degree. (5) Certificate of John. F. Mundale, Clerk, as to papers being correct. -

Jan 21 On admission, was put on T.W. (G.H.N.R.)pt. Complexion sandy: hair brown: eyes blue: Condition of skin fair: face and neck badly scratched: "1895 and O.S." tattooed on left arm: 1 scar on back of head. 2 scars on left side: 3 scars on back of left hand: small scar between shoulders: one large bruise and several small ones on right arm, and one small bruise on left arm: one small bruise on right leg: right eye badly discolored and bruised: left eye slightly discolored: small bruise on left knee - one small abrasion on back of left hand. 3 large scars on back of right hand. Is forty — Teeth good. T 101. P 96. Very much excited and trying to bite). — .. — .. —

*Note by Dr. Phelps: Was very noisy resistive and struggling (on admission): Continually asked for a "Rope" and called out "Robbers" - Pulse about 95 - Skin appeared normal and moist - Some bruises and scratches - Behavior that of "acute mania"

Jan. 22. Patient admitted, after having become suddenly maniacal during a trial for murder; he having killed someone he had never seen before and without any premeditation: talks answers all questions, manages to give very little information. Feb. 3 Recently refused to talk; confused; twitching motions to one side of body. Apr. 1/02 Has been noisy & maniacal. (R.M.P.)

May 1. Wt. 135# Is quite noisy; attempts to take keys from nurses. May 29 Visited by friend. Is much more stupid. Scarcely moves without assistance from nurse.

July 1 Treated with electricity; visited by sheriff. July 2. Visited by friends; July 24 Visited by friend - Is improving somewhat; works on ward. July 30. Trans. to B. Aug. 1 Wt. 165#. Aug. 31 Became suddenly violent and attacked nurse. Nov. 11 Visited by friends.

Jan. 31 '03 Continues with little change; stubborn; talks little; habits neat. (C.L.C.)

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is typical choreic mental state: Seems feeble in mental action & sluggish, as well as in physical use of tongue & lips. Was knocked down by train Nov 18: came to DH— asked police to show him Hospital: took him to jail & sent him to Work House for 30 days: after coming back took him to Hospital (C & County): was there 1 month. Dropped an egg & then they cut off his eggs & meat & potato, leaving him oatmeal & coffee. He got mad, swore & tried to get out. They then tied him down — last Sunday — they sent him down here —

Personal and Medical History of Lee Pablow

1902

This patient was brought here by Sheriff Johnson, in fair physical condition, with following history of case - No history of consanguinity; as to any insane relatives, no history obtainable. This is 1st attack: first symptoms manifested 5 days ago: violent mania: status of disease not stated: variable and with rational intervals, but these not regular. Derangement now shown by improper care of person, profanity, partial loss of memory, resentment to proper care - not disposed to injure others, nor suicidal: disposed to filthy and destructive habits. As to any previous peculiarities, or history of intemperance, do not know: Had Typhoid fever Dec 1900. & has been in C & C hospital since Dec 21st 1901. Cause of the disease is not stated. Treatment, none, except restraint as above - On Personal examination, shows choreic movements: irregular gait.

Jany 21 On admission was put on B3 (Gr. Ath. Dpt. Complexion light; hair brown: eyes blue: slight discoloration around left eye: lower lip sore: scars on right instep. Is clean. Teeth: 6 gone in upper jaw: 7 gone, in lower jaw - Behavior good: Examined by Harry Rogers)

Jan. 25/02 Patient quite choreic; but very general; involving muscles of swallowing & talk as well as rest of the body; appears as if tipsy. (R.M.P.)

Mar. 1 Wt. 133#. Tries to help with work on ward but is too choreaic to do much. Mind quite clear - some difficulty in talking; habits tidy; Apr. 30 Trans. to B2; May 30 Eloped. May 31 Returned to B2. July 3 Eloped. July 4 Returned. Nov. 1 Wt. 133½#. Has had slight illnesses; but in general, no mental change. Dec. 1 More stubborn & depressed; talks of killing self; refuses food at times. Jan. 5 Trans. to B. - destructive in D.R. Jan 16 Transferred to B3 - Jan. 31

Jan 31 '03 Gradually growing more feeble. C.L.C.

Patient says: mother was here. Has bright & fairly intelligent manner, but is full of firmly fixed ideas, about the gang & the voices & talk that he continually heard, while in city. The delusions are not well systematized; talk is some confused, at times.

Health seems good. The mental state seems to have been a gradually growing one

Personal and Medical History of Michael Naughton

1902

This patient was brought here by Sheriff Johnson, attended by brother Jno. Naughton, in fair physical condition, with following history of case. There is no history of consanguinity or hereditty. This is 1st attack: first symptoms manifested about 3 months (ago): Disease seems increasing; not variable; no rational intervals: Derangement now shown by his being garrulous on the subject of imaginary persecution. Is disposed to injure others but not suicidal: no filthy nor destructive habits. As to any previous peculiarities, unknown. No history of intemperance, nor of any severe disease &c nor head-injury. Has not been restrained nor confined. As to cause of disease, there is indefinite specific history: has had general treatment. On personal examination, there is a confirmed belief in imaginary persecution by friends and relatives.

Augs On admission, was put on D3 (G.A.N. Rpt. Complexion dark: hair dark-brown: eyes gray: condition of skin fair: abrasion on right wrist: scar on buttock: Eruptions on upper part of body: is dirty: Teeth: are gone left upper jaw: behavior good: Examined by John Meighan-Aug 1/02 146#.

Jan 31 Patient has always been quiet & well behaved during the period. Occasionally somewhat untidy. Works some. (Visited Sept. 28/02 by sister).

Patient rather confused, + slow in thinking + talking: says they tried to have him put down as insane 3 - 4 years ago". Says "I must have been insane, but I don't think I was" —

Talk is sluggish: answers are long delayed - and very vague - appears scared + apprehensive of some trouble —

Personal and Medical History of *Archibold B. Rockwell*

1902

This patient was brought here by Dr Sadden, in fair physical condition, with following history of case. Parents Cousins: acto insane relatives, father Committed to Asylum July '97: also grand father insane. This is not 1st attack: Others occurred in '95 & '96. Duration 3 or 4 months: was not sent to hospital: First symptoms of this attack manifested December 1901: religious mania: Disease seems increasing: Variable and with rational intervals: if these are regular is not stated: Derangement is now shown principally on religion: "thinks if he should die, would go to hell": Not disposed to injure others: has attempted suicide, by cutting throat with knife: Propensity is now active: no filthy nor destructive habits: previous predominant passions &c &c Masturbation, religious mania, threatened to kill others of the family & also himself. No history of intemperance, nor of any severe disease &c, nor head-injury: has not been confined nor restrained. Supposed Cause of the disease is Masturbation. Treatment, none. On personal examination, has scars on each side of throat, caused from Jack knife. Is despondent: listless. Commitment recommended because he needs treatment, while under legal restraint ——— . ———

Jan 23 On admission, was put on B.3. (G.A.N.R.W.) Complexion fair: hair brown: eyes blue: Condition of skin fair: Scars on back of left hand: bruises on left leg: is clean: Teeth in good condition. Behavior good: Examined by Dr Blood. ———

Jan. 29. Restless & confused since coming here tries to run away; depressed & restless.
Apr 1 Still despondent; worries a good deal. May 14. Hypochondriacal & quiet; taken home on trial.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient realizes his insanity. Says he wandered up + down the rooms in a confused + half-mischievous way. In the preceding attack, he wandered away from home - Is quite clear, today -

Was brought here on 22nd. He came from his home directly, + the house was quarantined on account of Scarlet fever, among his children - He was, on coming, taken to "Brick-House"; stripped of clothing; given a bi-chloride bath; new clothes put on + brought over to single room + put in bed + in seclusion - Is there now. —

Personal and Medical History of Bernhard Sackreiter

1902

This patient was brought here by M. J. Leis, attended by W. H. Rohweder, in fair physical condition, with following history of case. No history of consanguinity, nor of heredity. This is not 1st attack: others occurred in 1898 (?); duration about 2 weeks: was sent to Rochester, Minn: discharged recovered. (Committed from Olmsted Co). First symptoms of this attack manifested about 4 weeks ago: restless, insomnia, nervous, illusions and hallucinations: disease seems stationary: variable & with rational intervals, but these not regular: forgets common events: recognizes that his own mind wanders. Derangement now shown by delusions, illusions and hallucinations (as set forth in answers to questions 9 and 11). Is not disposed to injure others or suicidal. No filthy nor destructive habits. No previous peculiarities noted: No history of intemperance (?): No history of any severe disease &c, nor head injury. Has been confined only twice in Rochester (State) Hospital. Cause of the disease undiscovered. Treatment, none, except the hospital treatment in 1898 (?). On personal examination, there are noted sluggish circulation, dullness of comprehension, general apathy. N.B. Here before from March 21st 1899 to April 8th 1899, and discharged Oct 31/99, as recovered — (Was then committed from Olmsted County): Remained only 15 days: sometimes, disrobed to excess. Form then "acute melancholia": Had attempted suicide. Was then 2nd attack: Did not then realize his condition & surroundings but rapidly recovered from that attack. (See bol 43 page 1 — no 5266)-

Jany 24 On admission, was put on T.W.(G.H.N. Dkt. Complexion fair: hair brown: eyes brown: condition of skin good: vaccination mark on left arm: is clean: Teeth, 2 gone, lower jaw. Behavior good. T 101.2 P 104 R 24). ——— .———

Jan. 25. Restless; maniacal; delusional; mild acute mania; Jan 29 Quieter; fairly rational. Feb. 22 Sent home on trial.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient now (3.30 P.m.) lying quietly in bed: answers quite clearly, though with some reserve: has rational appearance. Was most extremely violent + resistive this morning: took 6 nurses about 10 min: this can be put on a chart: resisted to every possible extent, crying meantime, in a noisy way: did not have facial expression + appearance of typical acute mania, but struggled + resisted, just as did nurses, who were controlling him. Insane probably, at present, a semi-hysterical character this behavior. He denies any known cause. Says "felt well before this". Says "would be well now, if at home".

Personal and Medical History of Charles Seeman

1902

This patient was brought here by Sheriff Luis, attended by father, Carl Seeman + H. J. Heuck in fair physical condition, with following history of case - There is no history of consanguinity, nor heredity. This is not 1st attack (seemingly the 2nd): one occurred in June 1901; duration 10 days was not sent to hospital. First symptoms of this attack manifested four days ago: woke up, in middle of night; began to pray violently: tried to run out of house - (this was last Sunday night). Jumped down stairs, next night. Disease seems increasing: variable + with rational intervals: but these, not regular: after raving for a time, he will become quiet +, to all appearances, rational. Derangement now shown in that he is religious; prays loud; calls for God to help him; - disposed to run away for home: attempted suicide. Is not disposed to injure others. Has attempted suicide, by hanging: propensity now active - no filthy nor destructive habits. Previously, was intemperate, at times: no predominant passions manifested. No history of any severe disease &c, or head-injury. No restraint or confinement has been employed - Cause of the disease, not known: Has had no treatment. On personal examination, he is stolid + unconcerned: sits with hands clasped: is somnolent; lassitudes, answering questions.

Feb 17 On admission, was put on Cl (G.H.A.R.H. Complexion light: hair light: eyes brown: condition of skin good: scars: one on left hip: 1 on chin: 1 on back; and 1 on back of left thigh: bruised: one on back of left hand: 1 on left elbow: + several minor bruises: is clean: teeth: 4 gone, upper jaw: 3 gone, lower jaw: Behavior very bad: was put in Sheet). ———

Feb. 25. Patient has been restless; needed special nurse; rise of temperature; condition is result of excessive drinking. May 16/02 Taken home on trial; has become fairly rational, tho still somewhat dull and depressed.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient mild case "acute mania". Talk incoherent & rambling. Behavior restless. Temperature to 101° & was put to bed. Warm baths ordered. No history or information can be obtained from his rambling talk. His father is a patient here.

Personal and Medical History of Henry Ellerbush Jr.

1901

This patient was brought here by J.B. Thompson, attended by L. Ellerbush, in fair physical condition, with following history of case. There is no history of consanguinity, but there is of heredity: father is in Asylum now, at Rochester, (Henry Ellerbush Sr). This is not 1st attack; one occurred 8 years ago; duration 6 weeks: when he was sent to Rochester; has been sane, until this attack. Last Sunday, symptoms were first noticed. Disease seems increasing; not variable; no rational intervals; these not regular. Derangement now shown by ideas of Grandeur, wealth &c. Is disposed to injure others. Shot at a man, Monday: is not suicidal: no filthy nor destructive habits. No previous peculiarities noted. Father was intemperate &c. so is patient: no epilepsy, but has had rheumatism &c. Was confined but only last night: case of Sheriff Bresher. Cause of the disease is unknown: treatment, none. On personal examination, nothing except as stated. Note. 2nd admission. Was before from Sept 5-'97 to Nov 6-'97 & discharged May 3-'98 as recovered. Form then, was "mania acute". Insanity then stated to be not hereditary-had some drink-habits, then. (For further particulars see 20 Vol 133 page No 3119)

Feb 14 On admission, was put on B3 (Complexion light: hair brown: eyes blue: Condition of skin good: small scar on right eye: is dirty: Teeth: 4 gone, upper jaw: 3 gone, lower jaw: behavior is noisy: examined by Harry Toapst.).

Feb. 19. Has a case of Acute mania - quite typical.
Mar. 1 - Not much improved. Apr. 1 Still maniacal. May 1/02 Still destructive & maniacal.
June 1/02 Rather maniacal still. Today gotten out of bed. Aug. 1 Wt. 137½ lbs. Has improved very much; quiet; works in D.R. & on ward.
Aug. 14. Visited by brother; Aug. 15 Trans. to B2.
Sept. 6 Taken home by brother; has been working in store room.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient talks quite intelligently. Says "is only nervous". Denies excessive drinking: Has Temp 101° - Been sick 5 3/4 months - First had sudden pain: pains in heart: had to run for trains: swore somebody stabbed him. 3 week later, in Fresno Cal, had another stroke: again felt as if stabbed: was feeling badly for 2 days: but continued at work. At Portland (Dec 2 months later, had same stroke - none since - Quit work 2 wks ago.
Brought down here by brother on advice of Dr Riggs - for nervous. Never anything said about missing. First is quite sure it is July - afterward Fresno Sept. Later Feb. Thinks Flagstaff 15000 - Occasionally makes inaccurate statements - very positively - But state always the same -

Personal and Medical History of Paul Boshell

1901

This patient was brought here by Val. Boshell, in apparently good Physical Condition, with the following history of Case. There is no history of consanguinity, nor heredity. This is 1st attack. First Symptoms manifested two weeks ago; acted at hotel & saloon & was arrested in Cincinnati, twice. Disease seems increasing: variable & with rational intervals, but these not regular. Derangement now shown and manifested by Queer (Ideas), in which he sees nothing wrong, but thinks Everyone else Connected therewith mistaken. Is disposed to injure Others; has not attempted Suicide: has destroyed furniture. Previously, very irritable in temper, and tenacious of his own opinions. No history of intemperance, nor of any severe disease &c, nor head-injury: has not been restrained nor confined. Supposed cause of disease not given. Treatment, if any, not stated. On personal examination, feels everything about him first-class: reflexes plus: slight difficulty in articulation & slight tremor of lips.—

Pelyn

On admission, was put on T.W. (T.H.K.P.t. Complexion light: hair light: eyes blue: condition of skin good: 3 vaccination marks on left arm: scars: one on left buttock: Is clean: Teeth: one gone, lower left: one gone, upper right: one gone, in front. Behavior good: Dr'ly (W.B. Barnard)—

2/27/01

Note by Dr. Phelps: Brother, accompanying patient, states as follows: Patient had been travelling for a Minstrel Company; as advertising Agent: was out of work in Cincinnati afterwards, and commenced to behave somewhat oddly: got into a quarrel with a party over the buying of a cigar, for little or no cause, & was arrested: was released through influence of Minstrel Company, but, soon after, got into further trouble, without any Special Cause, and was arrested again. His brother was telegraphed that patient was either insane or drunk, and came for him: brought him back to St Paul. After brother got him, patient did several queer things. Jumped out of train, as it was about to start off, under pretense of buying cigars. Seemed to have no idea of time: extremely forgetful: got away from brother, several times: once, seemingly, for purpose of getting liquor: tried to buy tickets in Chicago, though they had no need of them. Arriving in St Paul, was usually quiet, but seemed unreliable. At theatre, one night, during intermission, he went out and returned, and took seat of another man beside his wife, and seemed firmly to believe it was his own seat: created a disturbance, and was put out by force. Even then, he went back to that man's seat for overcoat he said was his, while it was that man's. Pocketed several things, at various times: once in drug store, going after medicine for himself, he stole quite a number of articles, of which he had no need: one of which, a box of brilliantine, he went around with, trying to put on peoples' Clothing, calling their attention to the odor. On advice of Dr. Riggs, was sent down here.—

Feb. 27 Mildly confused; appears intelligent; memory poor. absent minded. Apr 1. Considerably improved; June 26, Home on trial. Apparently rational; but still defective mentally.

Patient is quiet: some depressed: dont talk freely - Continually Complains of stomach: Complaint very vague & always says "pain goes down L. leg". Talks low & somewhat reluctantly -

Personal and Medical History of William Schreiner

1902

This patient was brought here by M. J. Lins, attended by J. P. Nytes, in poor physical condition, with the following history of case. There is no history of consanguinity, nor heredity. This is 1st Attack: Showed symptoms years ago; duration continuous: was in Winona General Hospital, 3 weeks ago: no improvement: gradually growing worse. First symptoms of this attack manifested about 3 years ago: quit work and has done nothing since: constantly wandering about streets & drinking heavily: no regular place to stay: talking to no one, for about one year. Disease seems increasing. Not variable: no patronal intervals. Derangement now shown by delusions, melancholia, and apathetic: "thinks relatives after his money": avoids strangers and talks with no one. Is not disposed to injure others: Has not attempted suicide, but threatens to drown himself, four or five times, during last week: no filthy nor destructive habits. Previously, was always very quiet; not inclined to go in company. Patient drank heavily for one year; about 2 years ago: was then taken to Murray Institute, Minneapolis, and treated for liquor-habit: Has drunk nothing since. Last year, has not been outside of his own door-yard. No severe diseases &c, nor head-injury: no physical restraint employed, but has been kept at home, through moral persuasion: no inclination to leave. Supposed cause of the disease is that he has had chronic stomach-trouble for years, over which he has brooded. General medical treatment & at Winona General Hospital, 3 weeks. On personal examination, he is melancholic & appears dejected: apathetic: tremulous: Pulse 120. Temp. 101. Tenderness in region of gall-bladder and liver; chronic constipation.

Jelgrs On admission, was put on I.W. (S.H.R.Pt. Complexion dark: hair black & gray: eyes gray: condition of skin fair: dark spots on shoulders; one scar on forehead: vaccination scar on left arm: is clean: teeth, all in fair condition, except 1 snag in lower right jaw: behavior good).

Mar. 1. Patient melancholy; quiet, refusing to eat; emaciated; Mar. 10. Wt. 114#. Poor condition. Mar. 29. Put to bed; unsteady on feet; ankles swollen. Temp. sub-normal.
Mar. 30. Temp. down to 92. Body cold. 92.4 evening.
Mar. 31. Temp. 93.7 & 93.4. Patient catheterized; failing: Died today at 6 P.M.

Patient lies quietly in bed now; was noisy + excitement, on admission. Is quiet + apparently rational, today, with a mild, cheerful + talked mood. Answers questions easily + accurately. Don't know what made him excited before. —

Personal and Medical History of Fred Neumann

1902

This patient was brought here by Geo. Hopp, attended by Hermann Sommer, in fair physical condition, with following history of case. There is no history of consanguinity. Two brothers were insane; one died in Rochester. This is not 1st attack: one occurred in 1892: duration about 2 months: was then sent to Rochester (Hospital)[x]: First symptoms of this attack manifested this morning (1st March). Disease appears to be increasing: variable with rational intervals, but these, not regular. In what way derangement now shown, is not stated. Is not disposed to injure others, no suicidal: no filthy no destructive habits. There is no history of any previous peculiarities &c, nor of intemperance, severe disease &c, nor head-injury. Has not been confined nor restrained. Dont know cause of the disease: treatment, none: On personal Examination, is very nervous & irritable: Has violent paroxysms at times, with no provocation. Commitment of said Fred Neumann recommended because his disease is of such a nature, and in such a stage as to require medical aid and assistance, while under legal restraint. He is dangerous to himself & others, to have him at large. He is now, and has been, a resident of Helena County since 1895. [x] Note. 2nd admission: Has been from May 11-'92 to July 3 '92. and discharged Nov 9th '92, as recovered. Form, on that admission, was: Acute Mania — Cause of attack was stated to be overwork and anxiety. Insanity manifested by violent conduct and religious frenzy: Destructiveness: (See Vol 19 Pp 193 No 3022.)

Mar 3 On admission, was put on T.W. (G.H.N. Rlst. Complexion fair: hair, brown-gray: eyes blue. Condition of skin good: marks on abdomen & back, caused from mustard-plaster. Scars on right shoulder. Is clean. Teeth: 3 sore, upper right: 2 sore, lower right. Prognosis — 2.00 P 98 R 24.

Mar. 9 Maniacal; in restraint; temp. slightly elevated; Mar. 16 Quiet; has become fairly well behaved. Apr. 1 Wt. 140#. June 5 Home on trial.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient talks quite freely: answers seem quite correct and clear. Has been singing onward, this, morning. Has been seen to waken & fall on floor, several times. (Nurse thinks an hysterical manifestation): Is a large strong laboring man.

Personal and Medical History of Thomas Cahill

1902

This patient was brought here by N. J. Steffin, attended by Warren Madison, in fair physical condition, with following history of case. There is no history of consanguinity; and as to heredity, don't know. This is 1st attack: has not been sent to hospital before. The first symptoms of this attack were manifested about 2 weeks (ago): by delirium of persecution. Disease seems stationary: not variable: no rational intervals. Derangement now shown in that he believes that his wife and his brother-in-law want to poison him. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No previous peculiarities manifested. Occasionally drunk: no history of any severe disease or head-injury. Has been watched, for one week: confined & restrained: don't know cause of the disease. Treatment has been bromide & morphine. On personal examination patient nervous; tremor: thinks that his wife & brother-in-law want to kill him: refuses to go back home, and to see his wife again, or child. Commitment recommended because we believe he can derive great benefits by proper treatment, and that such care and treatment is necessary in his present condition.

Mar 5 On admission, was put on B3 (G.H.N. 12/04) Complexion light: hair brown: eyes brown: condition of skin good: vaccination marks right arm: small scars on each thigh. Is clean: Teeth: 4 out, in upper jaw: 5 out, in lower jaw: Behavior good: eyes sore & weak:

Mar. 18. Patient restless, sullen, occasional hysterical dizzy spells: has been violent.

Apr. 1 Wt. 168#. Apr. 22. Has been quite erratic in behavior; stubborn & surly; restless, getting up often at night. Often refuses meals, at other times eats ravenously. Became very violent today, attacking nurses. Received sprained ankle; was in bed two or three days following. May 1 Wt. 167#. June 1 Visited by relatives; receiving treatment for chronic inflammation of eyelids. July 3. Continues same mentally, stubborn; walks about restlessly; confused. Aug. 1. Wt. 173½#. Oct. 1 Wt. 180#. Improving in physical health - but not mentally, except that he is more quiet. Often expresses delusions. Jan 1/03 Wt. 174#.

Jan. 31 Still little changed; does no work; occasionally violent; talk abusive; very delusional.

Admits Drinking a good deal & very hard, of late years. Answers questions promptly & with seeming intelligence, though slow, on account of foreign language. Says "Never was crazy" - Was at Workhouse 10 Days, then in City Hospital. Admits Delirium - tremens, a couple of times. Admits hallucinations, for a time, due to tremens. That is all he admits. Does not admit having any Delusions now. —

Personal and Medical History of Andrew Holmgren

1907

This patient was brought here by Deputy E. Johnson, in good physical conditions, with the following history of case - There is no history of consanguinity nor of heredity. This is the 1st attack. First symptoms manifested by hallucinations, six months ago. Disease seems Stationary: variable and with rational intervals: but these, not regular. Derangement now shown in that he hears voices threatening to do injuries. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. As to any previous peculiarities, not known. Is addicted to intemperance. No history of any severe disease or no head-injury. Has been confined at Workhouse, 2 weeks. Supposed cause of the disease is Alcoholism. Treatment, none - On personal examination, there is noted, tremor with the lips - (note. Patient was, on Feby 13/07, Committed to the "Detention Hospital", St Paul; and from there, duly committed here: Certificate dated 7th March 1907).

May 7 On admission, was put in 1-3 [G.P.W.K.W.P. Complexion fair: hair black: eyes blue: Condition of skin good: Is clean. Teeth: 6 gone, in upper jaw: 6 gone, in lower jaw. Behavior good. (H. Probst) -

Mar. 20. Patient uniformly quiet; well behaved answers questions; willing; somewhat indifferent works some; has delusions. May 1. Wt. 172#. Works some on ward; converses quite rationally; seems anxious to get away - doesn't think he should be kept here. May 27 Was to be sent home today but said he was sick and unable to go. June 14. Says he hears people talking at times - doesn't know what they say - think about himself. Behavior quiet - Trans to B2 - Aug 1 Wt. 165#. Continues to have hallucinations of hearing. Aug. 7 Went to work on lawn. Nov. 1 Wt. 165#. In good health; habits neat; quiet & peaceable. Still has hallucinations & delusions of persecution. Does nothing now.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient came in dull, depressed & confused: would hardly speak. About a week later, he suddenly, for a day, seemed comparatively bright: seemed to just realize that he was away from St Paul &c, but he relapsed and now, though quieter, is yet very dull & depressed.

Personal and Medical History of Raphael Michael

1902

This patient was brought here by Deputy E. A. LaDow, in fair physical condition, with following history of case. Do not know as to any consanguinity nor heredity. This is 1st attack: first symptoms manifested about 2 months ago: symptoms of melancholia, and delusions. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he claims he cannot swallow. Is disposed to injure others, but not suicidal: no filthy nor destructive habits. No previous peculiarities noted. Do not know as to any history of intemperance. Has had no severe disease &c, no head-injury. Has been confined at Jerry & County hospital since March 1st. Do not know causes of disease. Treatment has been rest & attempted nourishment & sedatives.

On personal examination, patient is non-communicative. ——— .

Mar 7 On admission, was put on TW. (G. H. N. Pt. Complexion dark: hair black: eyes blue: condition of skin good: Scars: on left leg: mescar under right shoulder: several small scars on back and neck. Is clean. Teeth: one gone, in upper jaw. Behavior good: Fly Bernard & Maricle).

Aug. 1/02 150# Jan. 1/03 169#

'03 Jan. 31 During first part of period patient was very stupid. Would not go to the closet unless taken there. Will retain urine until catheterized and was in rather a poor physical condition.

admits drinking a good deal & thinks the accusations of insanity refer to times when drunk. Answers questions fairly well, but appears dull and it seems chiefly about a gonorrhoea he seems to think he has.

The relatives describe a gradual dementia, with persistent dirtyness and stubborn behavior generally.

Personal and Medical History of John A. Johnson #2

1902

This patient was brought here by Chas. Iverson, attended by James. A. Johnson, in fair physical condition, with following history of case. There is no history of any consanguinity nor of heredity. This is 1st attack: first symptoms manifested about 3 years ago; violent: Kleptomaniac. Disease seems increasing: variable + with rational intervals: but these, not regular. Derangement is now shown by being violent, filthy: Kleptomaniac. Is disposed to injure others, but not suicidal: Is of filthy and destructive habits. No previous peculiarities noted. Is addicted to intemperance. No history of any severe disease + o, nor head-injury. Has not been pertained nor confined. Supposed cause of disease is Alcoholism. Treatment, none. On personal examination, discrepancy in statements.

Mar 8 On admission, was put on B.3 (G.H.N. R/t. Complexion light: hair light: eyes blue: condition of skin good. one scar on forehead: eruptions on thighs: is dirty: teeth: + ant. upper jaw: Behavior good.

03
jan 31 Patient varies somewhat in behavior - becomes fairly quiet + rational at times - and at other times will be delusional + restless, laughing in a silly way. For about a month at one time would pick sores on his body, having the delusion that there was rust on him, of which he must rid himself.

Can talk only in German. Appears fairly well, and (through interpreter) could give no delusions - He says "had no cats, nor any of his neighbors." Was not able to find the lack of memory charged. He told how he helped take his wife to Hospital Later they came back & took him.

Personal and Medical History of John Wyman

1902

This patient was brought here by Dep. Johnson, in fair physical condition, with following history of case. There is no history of consanguinity nor of heredity: This is 1st attack: first symptoms manifested about 2 months ago: in what way, is not stated. Disease seems stationary; variable & with rational intervals, apparently, but these, not regular. Derangement now shown by lack of memory on important facts: unusual & strange behavior. Not disposed to injure others, or if suicidal, doubtful: propensity not active now. No filthy nor destructive habits. As to any previous peculiarities, unknown. No history of intemperance. Had sunstroke last summer. He has not been restraint nor confined. Cause of disease unknown: treatment, none. On personal examination, Witnesses testify to peculiar actions; chasing chickens: running about half-clad; chasing imaginary dogs & forgetting important events. Note. Patient was, on Feby 28/1902, Committed to the Detention Hospital, St Paul, and from there duly committed here; certificate dated 11th March 1902). ——— ———

Mar 11 On admission, was put on B3 (G.H.N. R.H.). Complexion fair: hair brown: eyes blue: has vaccination scars on right arm: small scar on right foot; eruptions on back arms & thighs: is dirty: teeth: 4 gone in upper jaw: 1 gone in lower jaw: behavior good: (H.G. St. Peter)

Mar. 13. Quiet, well behaved - talks little English, could not discover delusions. Apr. 10 Becomes suddenly restless, noisy; confused. May 1. Continues to be confused. May 3 Wt 157#. Transferred to B'. May 20. Has been very restless sleeping poorly at night. At times noisy; tries often to get away. Trans. to D.W.E. May 29 Up on ward; improved. Trans. to B'. June 1 Wt. 158#. July 1 163#. Continues restless, noisy at night. Destructive; tries to escape. July 29. Visited by wife. July 31 Several teeth extracted. Sept. 1. Wt. 168# Tries to run away when outside; violent at times; restless; does not talk much. Oct. 4. Escaped down fire escape, unlocking screen. Oct. 8 Returned from West Ponded. Dec. 1 Wt. 169½#.

'03 Jan 31 Does not improve; restless nights; stubborn habits untidy; frequently in trouble with other patients; tries to escape. (C.L.)

Personal and Medical History of Herman Strutz

VERY PECULIAR INSANITY CASE.

5/14/11

Young Man Has a Mania for Writing Letters, Which He Mails to Himself.

Special to the Pioneer Press.
Stillwater, March 14.—One of the strangest insanity cases that has come before the probate court of Washington county for several years was heard today, when Herman Strutz, the son of Julius Strutz, a farmer residing in the town of Grant, was examined by a commission of physicians. Strutz, who cannot be more than twenty-four or twenty-five years of age, has a letter writing mania, and for weeks has been writing letters to himself. The letters were rambling and referred to nothing of any importance. He would send them through the mails, and as soon as he received them would write another lot. On all other subjects his mind seemed to be rational enough, but the physicians concluded that he was a subject for treatment, and he was ordered committed to the asylum at Rochester, whither he was taken this afternoon.

PHYSICAL CHARACTERISTICS.

Personal and Medical History of

1902

This patient was brought here by Frank Jungquist, in fair physical condition, with following history of case. There is no history of consanguinity, nor of heredity. This is 1st attack: first symptoms manifested four or 5 years ago: Strange, inexplicable actions. Disease seems increasing: not variable: no rational interval. Derangement now shown by incoherent letters, strange actions: terrified the whole neighborhood. Is not disposed to injure others, no suicidal: no filthy nor destructive habits: no previous peculiarities, habits &c. Q. abstainer & tobacco freely: no history of intemperance, nor of any severe disease &c, no head-injury. Has not been restrained nor confined. Cause of the disease not known. Treatment, same. Facts learned in personal Examination, very little. ——

March On admission, was put on B.3 (G.H.A. 6pt. Complexion fair: hair light-brown: eyes blue: condition of skin clean: small scar on back of neck. Teeth clean. Teeth: 2 gone, upper jaw: 2 gone, lower jaw. Behavior good: Examined by A. E. Poorest).

Aug 1/02 162#. Jan 1/03 - 165#.

Jan. 31 '03 Patient has been very reserved during period - is indifferent. Never makes any requests, altho answers with fair amount of accuracy. Occasionally found laughing & motioning by himself.

Personal and Medical History of *Louis Bayones*

Personal and Medical History of

1902

This patient was brought here by Emanuel Johnson, attended by W. C. LaChapelle, in fair physical condition, with following history of case. There is no history of consanguinity nor of heredity. This is 1st attack: first symptoms manifested February 5th 1902: unable to follow his usual work. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he talks incoherently. Is not disposed to injure others, nor suicidal: Is destructive of clothing. Previously, showed violent temper. No history of intemperance, nor of any severe disease &c, nor head-injury. Has not been restrained nor confined. Cause of disease is unknown: treatment, none. On personal examination, is unable to govern himself. ——— ——— ———

Mar 19 On admission, was put on T.W. (C.T.K. R/t) Complexion light; hair dark-brown: eyes blue: condition of skin, rough and dirty: vaccination marks on left arm: large scar on back, small scar on right nipple: small scar on right knee: small scar on right hand. Is rather dirty. Teeth: one gone, on each side of lower jaw: all upper teeth gone, except 5, in front. Behavior noisy & maniacal. Examined by Bernard). ———

Mar. 23. Patient has been noisy, restless, maniacal. In restraint sheet some. Mar. 30 Improving very slowly. Apr. 18 Becoming more quiet. Apr. 21 Gotten out of bed. May 14 Went home. In good mental condition.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient rather confused - Is somewhat hypochondriac in subject of his physical condition & has actual delusive ideas concerning himself. Thinks people read his mind - His thought two elements, one trying to kill him, the other, to get him well, were working in him -
Admits masturbation.

Personal and Medical History of Earl Yarnell

1903

This patient was brought here by George Krueger, in fair physical condition, with following history of case. There is no history of consanguinity, but some of heredity, as Maternal uncle died in an Insane Asylum. This is first attack: was sent to City and County Hospital & improved. First symptoms of this attack manifested about 2 months ago: delusions of persecution. Disease seems stationary: variable and with rational intervals, but these not regular. Derangement now shown by apprehension, delusions and confusion. Is disposed to injure others, but not suicidal. No filthy nor destructive habits. Five years he has been queer: at times, acted irrationally. Father a drunkard. At five, fell and struck ahead, and leven, fell and struck ahead. Has been in B & C Hospital, since February 20th: ran away, one night while there. Supposed cause of the disease is heredity. Treatment has been rest and constructives. On personal examination, no further facts brought out.

Mar 19 On admission, vaccination B 3 (U.S.N. Rt. Complexion dark: hair dark brown: Eyes hazel: condition of skin, light brown: vaccination marks on left arm: mole on left hip. Eruptions at back of shoulders. Is fairly clean: teeth good: behavior good: F'ly (John Brigham) —

Mar. 23. Patient silly; mentally unreliable; confused; dull; Mar 30 Improved somewhat. May Troublesome. Attacks others without cause. Sutton D.W. for treatment of infected toe. May 24 Trans. to B'; quite confused, troublesome; violent; July 1 Wt. 121#; Continues about same. Sept. 126½ Appears permanently demented; Goes about in a confused way; irrational; often in trouble. Nov. 1 Health fairly good; otherwise as before.

1903 Jan. 31 Can see no marked change; listless, indolent; no work; inclined to be pugnacious. slouchy in habits

Remembers at Albert Lea. "Thought went with brother to Minneapolis to "Keeley Cure". remembers injections in arm, 3 to 4 times a day: Doctor there was an Oldish man. Dont quite know of this: is all a dream. When he waked up here, thought was in a "Keeley Institute" till told." seems a little dazed, even now. not quite sure of himself. —

Personal and Medical History of Anton B. Hanson.

1901

This patient was brought here by C. M. Wilkinson, attended by Martin Olson, in fair physical condition, with following history of case. No history of consanguinity, but some of heredity: Sister in hospital at Rochester, Minn. This is 1st attack: First Symptoms manifested March 10. '01, Destroying household furniture. Disease seems increasing: variable with rational intervals, but these not regular. Derangement now shown in no particular subject: violent, at times. Is not disposed to injure others, nor suicidal; is of filthy and destructive habits. No previous peculiarities noted. Self addicted to intemperance. Has not been subject to any severe disease &c, nor head-injury. Has not been restrained nor confined. Supposed cause of the disease is intemperance. Treatment, none. On personal examination, patient silent; uncommunicative. ——

Mar 17 On admission, was put on T.W. (3 St. A. Rpt. Complexion light: hair sandy & bald: eyes blue: condition of skin good: one large mole on left arm: several small scars on left hand: is clean: teeth in good condition. Is noisy & maniacal: fed by Gavage). —

Mar. 15/02 Restless noisy maniacal Mar 20 Quite well for awhile. Mar. 23 Fairly rational. May 20 Home on trial, having been fairly rational since last work.

Says "Played on them to avoid 90 Days in workhouse". Had been arrested twice before & sent to City Hospital, where he was placed to work for his board —

Personal and Medical History of Andrew Knutson

1902

This patient was brought here by Sheriff Johnson, attended by Wm. Laffrapelle, with the following history of case - If any consanguinity, not stated: if any heredity, not known. This is not 1st attack: one occurred 4 months ago: duration not known: has been in C & C Hospital, St. Paul: under treatment, improved. When first symptoms of this attack were manifested is not known. Disease seems stationary: not variable: no rational intervals. Derangement now shown in that he tries to bite attendants and to injure himself: will answer no questions: constantly muttering & pointing. Is disposed to injure others. If suicidal, not known. Is of filthy and destructive habits. As to any previous peculiarities or history of intemperance, not known. Has many scars on the scalp. Has been confined in County Jail 4 days. Cause of disease is not known. Treatment none. On personal examination, is in constant motion: continual muttering: points at imaginary objects. D. Phelps's note: "patient was kept under observation 4 days, but nothing could be learned: kept noisy: but would not talk." ——

Note. 6th admission: Here before at 5 different times: thrice as an intricate and fierce case of insanity. Has frequently been supposed to have been "shamming", and on last occasion (May 29-1901) remained here only one day, when he was taken back by the Sheriff and was discharged as a "Malingerer". Patient has also been committed here under name of "Knud Anderson" and has also been at St. Peter Hospital. —

Mar 21 On admission, was put on B3 [Left Rft. Complexion dark: hair gray (bald): eyes hazel- condition of skin fair: scars on left elbow: 3 small scars on head: is dirty: teeth all gone- Behavior Good: Examined by Harry Probst. —

Mar. 22/02. Rational; neat; well-behaved. Apr 9 Sent to Lake Mills, Iowa.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Talks German, and it is difficult to get much information.

Personal and Medical History of Herman Heine

1902

This patient was brought here by Jno. Leostrand, in fair physical condition, with following history of case. There is no history of consanguinity, nor of heredity, any previous peculiarities, nor intemperance. This is 1st attack: first symptoms manifested, cannot state when: over 5 years ago: melancholy, irritable, quarrelsome, and by epileptic fits. Disease seems increasing: variable: rational intervals not regular. Derangement now shown as no subject in particular. He is melancholy and takes no interest in affairs about him. Is disposed to injure others, but not suicidal: propensity not active: no filthy or destructive habits. Has epilepsy: has not been confined nor restrained. Supposed cause of the disease is Epilepsy: has been treated by several physicians, without success. On personal examination, appears listless, melancholy, and to lack interest in everything going on about him. On admission, was put on D^3 (P. Stalpt. Complexion fair: hair brown: eyes blue: condition of skin fair: no marks, scars, bruises &c noted: Teeth: 9 sound upper jaw: 8, lower jaw. Behavior good: Examined by Harry Poapst.)

Mar 11

Aug. 1/02 148#. Jan. 1/03 147#.

Jan. 31 03

During past 6 months appears to have had about 8 convulsions. Always dull and well behaved. Asks no questions & takes apparently no interest, altho is intelligent in appearance.

Personal and Medical History of Andrew Trumbo

1902

This patient was brought here by Sheriff Johnson, attended by Wm LaChapelle in aged condition, with following history of case. Of any consanguinity, heredity, previous peculiarities, intemperate habits, unknown. This is 1st attack: first symptoms manifested about a week or ten days. Insomnia. Disease seems increasing: variable with rational intervals, but these, not regular. Incoherent in talk; occasionally violent. Derangement now shown by numerous delusions; principally about money coming to him. Is not disposed to injure others, no suicidal. Is of filthy and destructive habits. Is subject to nephritis: this have been employed. Confinement to room & restraint by members of family, for one week. Supposed cause of disease is senility (?) Treatment has been cathartics, nourishment, hypnotics. —

On personal examination, insists on nudity. ——— — —

March On admission, was put on 7 W. (G. A. R. Dpt. Complexion light: hair gray: eyes blue: condition of skin fair: vaccination marks on left arm: second finger of left hand deformed at first joint: small scar on left knee: scar on right side. Is dirty: teeth: one gone upper left jaw: the rest in fair condition: behavior rather restless).

Mar. 28. Mildly restless since coming; confused in manner. Mar. 29. Visited by son. Apr. 2 & 3 Visited by daughter. Appears weaker. Apr. 5 Aged & childish; circulation poor. May 1 Last few days has been quiet, has therefor failed little. June 1/02 Failed rapidly; restless agitated condition during whole month. June 2. Patient died at 5.20 P. M.

"Patient thinks was hypnotized", & not having been "dehypnotized", has done some foolish things — Dont think he is insane, at all —

Personal and Medical History of Henry Evans

1902

This patient was brought here by F. H. Evans, attended by W. T. Evans, in fair physical condition, with following history of case – No history of consanguinity, nor heredity. This is not 1st attack: in January 1901, the first, and several since: duration, 3 days to 2 weeks: was not sent to hospital. First symptoms of this attack manifested a week ago; but in what way is not stated. Disease seems increasing: variable: Derangement now shown on subject of hypnotism: thinks people are trying to cause some spell over him. Makes threats to injure others: has attempted suicide, tried to cut his throat: propensity not active, now. No filthy nor destructive habits. No previous peculiarities noted: no history of intemperance. Had brain fever when about 16 years old. Was confined in jail 5 days, at Davenport, Iowa. Supposed cause of the disease is loss of property in 1893. Treatment, none. On personal examination, the following facts learned: Very nervous temperament: hypnotism: delusions. Commitment recommended because of Sec. 17. No 1 + 5.

March On admission, was put on B3 (G.H.N. Rpt. Complexion fair: hair gray: Eyes blue: Condition of skin good: 1 wart on third finger of left hand: small scar on each side of throat: is clean: teeth: 6 gone, in upper jaw: 4 gone, in lower jaw. Behavior good).

Aug. 1/02 Wt. 155# Oct. 30/02 Rather silly in manner. Is continually trying to escape. Health good.

Nov. 24/02 Eloped. Dec. 2/02 Returned from near La Crosse.

Jan. 13/03 Visits by brother.

03 Jan. 31 Does not change in any respect.

Seems moderately demented. Cannot give very good account of himself. No delusions brought out in this talk. —

Personal and Medical History of John P. Horst

Personal and Medical History of

1902

This patient was brought here by G. M. Mosier, in fair physical condition, with the following history of case - No consanguinity nor heredity. This is 1st attack; when other occurred, do not know. Patient found wandering in woods. When first symptoms of attack was manifested or in what way, do not know. Status of disease, or if any rational intervals, not given. Derangement now shown by fear of bodily injury. Is not disposed to injure others, nor suicidal; no filthy nor destructive habits. If any peculiarities manifested, do not know. (Inquire of St. John's College, St Cloud, where patient worked ten years). - No history of intemperance, nor of any severe diseases &c no head-injury. Has not been restrained nor confined. Cause of the disease, not known. As to any treatment, do not know. On personal Examination, this found he has Cataract on right eye, and appears nervous. ——

Mar 27 On admission, was put on B3 (G.St.N.R.Pt. Complexion dark: hair dark gray: eyes blue. - Blind in right eye: vaccination scars on left arm. Identity. Teeth: 2 gone, in upper jaw: 2 gone, in lower jaw. Behavior good). ——

Mar. 30. Answers hesitatingly; disinclined to talk; sluggish. Apr. 1 Changes little. May 1 Wt. 138#; does not change much; neat & tidy; no work; indifferent in manner; fairly rational, but talks a good deal about money matters which may be delusion. June 14 Trans. to B2. Aug 1 Wt. 138#. Little change; says some one tried to poison; still no work. Nov. 1 Wt. 137#. Jan. 31

1903 Jan 31. In all respects has remained stationary for last three months. Talks of money & being poisoned - somewhat incoherent. Wants to get out but makes no attempt to escape (C.D.C.)

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient dull & Sluggish - Denies knowing why sent down. Said his wife wondered, too". Can understand but little English - No delusions were obtained from him. Health fairly good: body very lazy: quite fat. Heart intermits, but no very definite alteration otherwise -

Personal and Medical History of *August Matthews*

1902

This patient was brought here by Geo. M. Freer, attended by Chris. Matthews. in fair physical condition, with following history of case. There is no history of consanguinity, nor heredity, previous peculiarities, intemperance, severe disease &c, nor head-injury. This is not 1st attack: one occurred 24 years ago; duration, a few weeks: was not sent to hospital; was treated and benefitted. First symptoms of this attack manifested 1st Sept. 1901. Refused to talk much: wanted to attend church, all the time. Disease seems increasing: variable. rational intervals not regular. Derangement now shown on religious subjects. Thinks he has the power of God: Thinks one of his children, that is dead, has come to life again. Is disposed to injure others, but not suicidal. No filthy nor destructive habits. Has not been restrained nor confined. Dont know cause of disease. Treatment slight: without relief. On personal examination, pulse slight intermittent; incoherent speech & religious subjects.

Mar 25 On admission, was put on B3. (G. & N. Rft. Complexion fair: hair gray: eyes hazel: small lump on forehead: 3d & 4th fingers of left hand gone; others are stiff: one scar on left side of forehead: scar on left elbow: scar on right groin: swelling inside left knee & clam. Teeth: 3 gone, upper jaw: 3 gone, lower jaw. Behavior good. (Ely Harry Poapst) —

Apr 8. Patient senile; rather quiet May 1 Confused & silly; but not threatening. June 24 Taken home on trial.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient states that was arrested once before: admits being hard drinker. Says it was workhouse or Reform School, when, and they sent him here, though he can't see why, as nothing was the matter mentally. He had evidently expected to go to Reform School.

Was evidently a defective, as it is stated that he always was peculiar & stubborn and of bad temper. He is said to have hallucinations, but did not betray any at examination —

Personal and Medical History of *Bartley Devine*

1902

This patient was brought here by Deputy Johnson, in fair physical condition, with the following history of case. There is no history of consanguinity, nor of heredity, nor of intemperance. This is 1st attack. Has always been peculiar, but has been worse, last 3 months. Disease seems increasing: variable & with rational intervals, but these not regular. Derangement is now shown in that he believes he is persecuted by his parents, brothers and sisters: "his brain talks to him and tells him to do things". Is violent, at times. Is disposed to injure others, but not suicidal: no filthy nor destructive habits: From childhood, has been stubborn and uncontrolable: was subject to violent outbreaks of temper. Had spinal-meningitis, 3 yrs ago: Was sick for 6 months: blind and partially paralyzed. Has not been restrained nor confined. Supposed cause of the disease, Defect. Treatment, none. On personal examination, he is abusive and violent: assaulting his parents & the children. Is impelled, by voices, to sing & talk to himself, at night, and while at work. ——— ——— ———

Mar 29 On admission, was patient B.3 (G.H.N.R.H. Complexion fair: hair light brown: eyes gray: condition of skin, good: discoloration under left eye: scars on right leg: scar on tip of 3? finger of left hand. Is clean. Teeth: one gone, lower jaw. Behavior good. (Dr. by John Brigham)

Apr. 1/02 No special delusions or hallucinations. Evidently something of an inebriate. Apr. 21. Sent home.

SLASHES HIS THROAT.

Temporary Inmate of an Insane Asylum Commits Suicide.

Rochester, Minn., Special, June 25.—C. G. Wilsey of Chatfield, temporarily an inmate of the insant hospital here, committed suicide in the outskirts of this city this forenoon by cutting his throat with a pocketknife. His mental condition had not been considered serious, and he had been allowed considerable liberty, with the prospect of soon returning to his home. His family resides in Chatfield.

June 25/02

COMMITTED SUICIDE.

C. G. Wilsey Ends His Life by Cutting His Throat With a Pocket Knife—Found Lying in His Life Blood.

Lying in the field only a short distance from the home of Mr. P. C. Keel Wednesday morning was C. G. Wilsey, in a pool of blood, the result of having committed suicide by cutting his throat with a pocket knife. The case is as follows:

Mr. Wilsey was committed to the State hospital over a year ago from Chatfield, where his family now reside. His condition was not considered serious, being temporary insanity consequently he has always been allowed to go about the hospital drives and walks and occasionally to come into the city, often driving Superintendent Kilbourne's ponies.

Wednesday morning he had gained possession by permission of the horse belonging to Mr. Roy Bird, superintendent of the laundry department at that institution, saying he was coming to the city on business. He did so, and before 11 he started back, going south. Passing by the residence of Dr. W. W. Mayo he drove to the land of P. C. Keel, and upon reaching a corner, a place where there is considerable brush he drove into the field a distance of about ten rods. Seeing Mr. Keel at work he returned to the road, and going a short distance farther he entered the field, this time going about thirty rods. From appearances he cut his throat while sitting in the buggy, as the robes, lines, and the buggy box were completely covered with blood.

He turned the horse around and drove back a short distance to a tree and got out and tied the horse with one of the lines. At the former place were two or three pools of blood upon the ground, but it is evident that the blood had stopped flowing by the time he had reached the tree, as nothing could be traced to this spot.

After the horse had been securely tied he returned again to the field near where he had first cut his throat, and here the second time used the knife, cutting several gashes deep and long, just below the right ear, severing the large blood vessel. He closed the knife and threw it some feet away, and fell to the earth, and when found was laying in a pool of his own life blood.

Mrs. Keel had been to the city doing some shopping and was returning to her home about 11 o'clock. Passing by the place she saw a horse tied to a small tree, and looking farther saw a man lying in the field. Hastening to the house she notified her husband of what she had seen, and in a few seconds time Mr. Keel was upon the ground, and his eyes met the terrible sight. Returning to the house he telephoned to Coroner Mosse, who at once went to the scene of the tragedy. When Mr. Keel left the man he was still alive, but by the time that Dr. Mosse arrived, which was about 12:30 o'clock, life had passed from the body and he lay dead.

Upon investigation it was found who the man was and where he was from. The coroner found upon his person a watch, $11.10 in money, and two letters, one being written by his wife when she was visiting in Pleasant Grove on the 25th of May, and the other from his daughter, written at Chatfield on the 18th of this month. In the letter the writer advises her father to remain in the hospital, thinking that that was the better for him. Supt. Kilbourne was at once notified and sent a team for the unfortunate man, conveying him to the morgue at the hospital.

Mr. Wilsey was a man about 50 years, and had a family residing at Chatfield. He has been showing signs of improvement for some time, and only yesterday he asked the authorities at the hospital if he could not return to his home, and was given much encouragement. A few weeks ago Wilsey purchased a few acres of land near the golf grounds and said that he would make that place his future home.

He seemed to be a man of harmless disposition, and it is not believed that he would commit such a rash act, but it is believed that he was in a melancholy state, for a few minutes, and was not realizing what he was doing.

Buried Friday.

Messrs. L. P. and C. C. Case of Chatfield, has come to Rochester to obtain the remains of the late C. G. Wilsey, which will be taken to Chatfield this morning, where the funeral was held at 1 o'clock from his late home. Mrs. Wilsey is a daughter of the late C. L. Case and a sister of C. C. Case and a cousin of L. C. Case. They in connection with all acquainted with the deceased mourn his untimely death.

ROCHESTER, JUNE 25, 1902.

Rattleton

SUICIDAL MANIA.

Suddenly Developed by Patient With Fatal Results.

C. G. Wilsey, a patient at the State Hospital, committed about three months ago from Chatfield, took his own life this morning in a fit of melancholia. When examined by the coroner the body presented a horrible spectacle. The demented man had cut his throat inflicting a number of gashes, and severing the large arteries of the left side of the neck. The body was drenched with blood welling from these wounds.

Wilsey has never been in confinement at the hospital. His insanity was of a mild type and never by word or deed did he show a tendancy to self-destruction. He has enjoyed driving Dr. Kilbourne's pony about the hospital farm and has shown some signs of mental improvement. Only yesterday he asked the superintendent about returning home and he was encouraged by the news he received that he could go to Chatfield soon.

This morning he started out with Gustav Berg's pony to have the animal shod in town. But he never drove back. As Mrs. P. C. Keel was returning about noon to her home near the hospital she saw a man lying in the field a rod from the road. She informed Mr. Keel that someone, either drunk or sick, was in the brush about 20 rods from the house and he made an investigation. The patient was alive when found but could not talk.

Mr. Keel telephoned for Coroner Mosse, M. D., but before medical attention could arrive the man passed away. There is no doubt but the case is clearly one of suicide. The bloody knife had been closed and thrown away by the madman after inflicting the last cut. The impulse to suicide had evidently seized the man while he sat in Mr. Berg's buggy, for the lines and wagon track showed bloody marks. Wilsey had, however, failed to accomplish his purpose and after driving for ten rods, he tied the horse to a piece of brush and went into the field to finish the bloody deed. The number of gashes indicates the strong desire to this end.

Dr. Mosse and Supt. Kilbourne arrived quickly upon being notified, and Marshal Fowler was also in attendance when the body was examined. A letter from Mr. Wilsey's wife and a postal dated June 18 from his daughter were on his person. His watch indicated five minutes after 1 o'clock when taken from his vest. The sum of $11.10 was found untouched in his pocket.

C. G. Wilsey was 50 years of age and was considered a harmless patient. His wife and daughter evidently bore him much affection and the deed will cause them real sorrow. The body was taken in charge by Supt. Kilbourne and is now at the hospital awaiting word from the relatives.

Personal and Medical History of C. G. Wilsey

Rochester Post-record June 27/02

COMMITTED SUICIDE.

C. G. Wilsey Ends His Life by Cutting His Throat With a Pocket Knife—Found Lying in His Life Blood.

Lying in the field only a short distance from the home of Mr. P. C. Keel Wednesday morning was C. G. Wilsey, in a pool of blood, the result of having committed suicide by cutting his throat with a pocket knife. The case is as follows:

Mr. Wilsey was committed to the State hospital over a year ago from Chatfield, where his family now reside. His condition was not considered serious, being temporary insanity consequently he has always been allowed to go about the hospital drives and walks and occasionally to come into the city, often driving Superintendent Kilbourne's ponies.

Wednesday morning he had gained possession by permission of the horse belonging to Mr. Roy Bird, superintendent of the laundry department at that institution, saying he was coming to the city on business. He did so, and before 11 he started back, going south. Passing by the residence of Dr. W. W. Mayo he drove to the land of P. C. Keel, and upon reaching a corner, a place where there is considerable brush he drove into the field a distance of about ten rods. Seeing Mr. Keel at work he returned to the road, and going a short distance farther he entered the field, this time going about thirty rods. From appearances he cut his throat while sitting in the buggy, as the robes, lines, and the buggy box were completely covered with blood.

He turned the horse around and drove back a short distance to a tree and got out and tied the horse with one of the lines. At the former place were two or three pools of blood upon the ground, but it is evident that the blood had stopped flowing by the time he had reached the tree, as nothing could be traced to this spot.

After the horse had been securely tied he returned again to the field near where he had first cut his throat, and here the second time used the knife, cutting several gashes deep and long, just below the right ear, severing the large blood vessel. He closed the knife and threw it some feet away, and fell to the earth, and when found was laying in a pool of his own life blood.

Mrs. Keel had been to the city doing some shopping and was returning to her home about 11 o'clock. Passing by the place she saw a horse tied to a small tree, and looking farther saw a man lying in the field. Hastening to the house she notified her husband of what she had seen, and in a few seconds time Mr. Keel was upon the ground, and his eyes met the terrible sight. Returning to the house he telephoned to Coroner Mosse, who at once went to the scene.

Bulletin ROCHESTER, JUNE 25, 1902.

SUICIDAL MANIA.

Suddenly Developed by Patient With Fatal Results.

C. G. Wilsey, a patient at the State Hospital, committed about three months ago from Chatfield, took his own life this morning in a fit of melancholia. When examined by the coroner the body presented a horrible spectacle. The demented man had cut his throat inflicting a number of gashes, and severing the large arteries of the left side of the neck. The body was drenched with blood welling from these wounds.

Wilsey has never been in confinement at the hospital. His insanity was of a mild type and never by word or deed did he show a tendancy to self-destruction. He has enjoyed driving Dr. Kilbourne's pony about the hospital farm and has shown some signs of mental improvement. Only yesterday he asked the superintendent about returning home and he was encouraged by the news he received that he could go to Chatfield soon.

This morning he started out with Gustav Berg's pony to have the animal shod in town. But he never drove back. As Mrs. P. C. Keel was returning about noon to her home near the hospital she saw a man lying in the field a rod from the road. She informed Mr. Keel that someone, either drunk or sick, was in the brush about 20 rods from the house and he made an investigation. The patient was alive when found but could not talk.

Mr. Keel telephoned for Coroner Mosse, M. D., but before medical attention could arrive the man passed away. There is no doubt but the case is clearly one of suicide. The bloody knife had been closed and thrown away by the madman after inflicting the last cut. The impulse to suicide had evidently seized the man while he sat in Mr. Berg's buggy, for the lines and wagon track showed bloody marks. Wilsey had, however, failed to accomplish his purpose and after driving for ten rods, he tied the horse to a piece of brush and went into the field to finish the bloody deed. The number of gashes indicates the strong desire to this end.

Dr. Mosse and Supt. Kilbourne arrived quickly upon being notified, and Marshal Fowler was also in attendance when the body was examined. A letter from Mr. Wilsey's wife and a postal dated June 18 from his daughter were on his person. His watch indicated five minutes after 1 o'clock when taken from his vest. The sum of $11.10 was found untouched in his pocket.

C. G. Wilsey was 50 years of age and was considered a harmless patient. His wife and daughter evidently bore him much affection and the deed will cause them real sorrow. The body was taken in charge by Supt. Kilbourne and is now at the hospital awaiting word from the relatives.

Personal and Medical History of C. G. Wilsey

1907

This patient was brought here by Elmer Clayton, in fair physical condition, with following history of case - There is no history of consanguinity. Mother is now in hospital for insane in Michigan, and one brother of father died in hospital for insane in Michigan. This is not 1st attack; has had several, during last 2 years: duration several weeks. First symptoms of this attack manifested Last June; became depressed over condition of crops. Disease seems increasing: variable with rational intervals. Irrational at the time, except the delusion that he is sick. Derangement now shown in that he has delusions in regard to his health: in regard to his coming to want, & has been depressed over the idea that he was going insane. Is not disposed to injure others: has attempted suicide by poison, and propensity active now: no filthy nor destructive habits. Has been depressed and melancholic for years. No history of intemperance, nor of any severe disease &c, no head injury. Has not been restrained nor confined. Don't know cause of disease. Treatment, none. On Personal examination, is much depressed over his health, financial condition and over the idea that he is going to lose his mind. Commitment recommended because his disease is of such a nature, and in such a stage, as to require regular and assistance, while under legal restraint. This dangerous to himself & have him at large. He is now and has been a resident of minnesota 29(?) years, and Fillmore Co. for last 5 months past —

Mar 28 On admission, was put on B³ (G.H.N.R.)Pt. Complexion Sandy: hair brown: eyes blue; - Condition of skin good: Scars on left side of head: one on left wrist: small scar on left elbow: small scar just above right knee: scar on right foot, just back of great toe. 8 clean teeth false: Behavior good. ——

Apr. 1/12 Answers rationally; is hypochondriacal; condition chronic. May 11 Continues rational Well behaved June 1 Has parole; works at the barn. June 25 Committed suicide by cutting his throat about 11 A.M. today.

SLEEP, Present Amount and Character,

BOWELS, Present Condition,

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient here before: is not much changed: Dull: rather silly: speaks in monotone: not very active. Answers some simple questions well, but gives no very valuable information. Says "ran away from Hastings": "Works out for a time, & later, went home" —

Personal and Medical History of William Gleason.

1902

This patient was brought here by W. E. Hibbard, attended by J.B. Thompson, in fair physical condition, with following history of case. There is no history of Consanguinity nor hereditty. This is not 1st attack: others occurred July 7th 1884 to 1888-duration 1884 – 1888: was sent to Rochester Hospital: improved. First symptoms of this attack manifested January 1902: became absent minded and quarrelsome. Disease seems increasing: not variable: no rational intervals: Derangement now shown about women. Is not disposed to injure others, nor suicidal. No filthy nor destructive habits. Has habit of masturbation. No history of intemperance, nor of any severe disease &c, nor head-injury. Has been confined in hospital as above. Cause of disease, masturbation. Has been under treatment with W.a. Jones of Minneapolis. On personal examination, is incoherent-

Note. 4th admission here: Cause, previously given, masturbation, from "Chronic melancholia" – was here, last time, from July 30 – 1889 to Apl 26 – 1900, at which latter date he was transferred to Hastings State Asylum. (for further particulars see Vol 12 P 144. No 2124).

Apl 1 On admission, was put on B3. (G.H.N. Rpt. Complexion fair; hair brown: eyes blue: condition of skin fair: several small abrasions on face: small scar on third finger: scar 2½ inches long on back of head: vaccination marks on left arm: scar on right ankle: scar on left shoulder-blade: dislocated joint. first joint of 3d finger, right hand: is dirty: teeth: 4 gone upper jaw: 1, lower jaw: behavior good: Examined by Harry Poapst).

Apr. 14. Mildly bewildered; indifferent; makes queer motions; mental condition about the same as at previous admission.

May 1 Wt. 164#. June 30 Trans. to D3; no change; makes motions; talks & laughs to himself; rather dirty in habits.

Aug 1 Wt. 162#. Nov. 1 Wt. 156#. Has worked some on farm; unchanged.

1903 Jan 31 Now works at soap-house; chronic demented case; quite incoherent; behavior unreliable; untidy. (C.d.C.)

Personal and Medical History of Elwood D. Wilson

1902

This patient was brought here by Sheriff Vine, in a semi-comatose condition, with following history of case. No history of consanguinity, but father insane, two weeks before death, at Independence, Iowa. This is 1st attack: was not sent to hospital before. First symptoms of this attack manifested April 1st.; acute maniacal. Disease seems increasing: not variable; no rational intervals. Derangement now shown by Acute Mania. Is not disposed to injure others, nor suicidal. no filthy nor destructive habits. No previous peculiarities noted. As to any history of intemperance, do not know. Has been a paralytic and has otitis-media. Has been confined two days at City Jail. Cause of Disease supposed to be alcoholism. Treatment, bromides and morphia. On personal examination, the following notes.- Heart weak; irregular; temperature subnormal; acute delirium.

After On admission, was put on T.W. (G.S.R.P.St. Complexion light: hair gray: eyes blue: condition of skin good: right ankle deformed: no recent scar on forehead: vaccination mark on left arm: a watery discharge from left ear: small bruise on each elbow: large bruise on right knee: tongue clean: teeth: one gone upper right: good condition. Was in unconscious condition. Temp. 100.2 P 76 R 26.)

Notes of examination by D. Phelps: Patient was brought to hospital on a cot just before noon - was quite completely comatose. It was stated that he was picked up from street, in the morning of the day before: had lain in Jail all that day, half-stupid, restless, delirious, unable to give any account of himself. This morning he seemed more active and restless, and was committed: first getting 1/4 gr. morphine. - no signs of injury. On admission, no signs of injury found: paretic condition of right hand noted. running at left ear, of bloody fluid, which, later, seemed watery, with tinge of blood. Some cerebral attack seemed evident, but no hemiplegia. Temp. about normal, but going up. By 4. P.M. temp. was about 103, and Meningitis seemed evident. His wife was asked to come at previously, and a very bad prognosis given.

Temp. and distress increased: coma more profound: Cheyne-stokes respiration evident from time of admission. Died 4:40 Am. (Temp. having reached 108°, a few hours before).

The Meningitis was secondary to a previous brain lesion, which the fluid, from ear, would indicate to be middle-Ear disease, and perforation, though we have not confirmatory evidence.

Patient was, for years, a hard-drinker.

Apr. 2/02. Received 12 o'clock at noon: comatose; rapidly failing. Temp. on Ad. 100.8.; 2 P.M. 101.°; 3 P.M. 104.; 7 P.M. 105.8; 8 P.M. 106.2.; 3 A.M. 108°.; 4.40 A.M. Died. Has discharge from ear; and developed Cheyne-stokes breathing. Died of Meningitis supposedly due to some trouble in the ear.

Patient comes with considerable impairment of health. Is very nervous. Sleeps poorly: No insane ideas noted.

Is victim of morphine & cocaine. Says he has been taking about 10 grs. morphine and 2 or 3 grains cocaine, daily: hypodermically. Pupils widely dilated under influence of cocaine.

(See history of former Commitments) –

Personal and Medical History of *Stephen Halpin*

1902

This patient was brought here by Sheriff Johnson, with following history of case.— There is no history of consanguinity: but father insane 14 years; now in Rochester: This is not 1st attack: others occurred in 1898. 1900 & 1901: duration about 3 months, each time. Has been sent to Rochester & discharged. First symptoms of this attack manifested shortly after last discharge; again began using morphine & cocaine. Disease seems increasing. Variable & with rational intervals, but these not regular.— Derangement now shown in that he uses morphine and cocaine, and has delusions and hallucinations of people chasing him. Is not disposed to injure others, nor suicidal: propensity not active: no filthy nor destructive habits. No previous peculiarities noted. Patient intemperate (in use of narcotics): father hard drinker. Has not been subject to any severe disease &c, nor head-injury.— Has not been restrained nor confined. Supposed cause of the disease is morphine & cocaine. Treatment none.— On personal examination, is nervous: twitching movements: has delusions: hears voices: and becomes wild & uncontrollable in the absence of drugs. ——— ·———

Apl 4 On admission, was put on T.W. (G.H.N. R/pt. Complexion light: hair black & bald: eyes blue: condition of skin fair: large wart on second finger of right hand— both arms & legs sore & swollen, in bunches: caused from using hypodermic needle. Teeth all gone, except 3 roots. Behavior good: Temp 98 P 78 R 20.) ——

Note. 4th admission: here last time from June 20— 1901 to Aug 23 - 1901 & discharged, as recovered, on November 22 - 1901. Patient usually recommences use of the drugs about 2 months after leaving here, each time. (See Vol 49 P 201. No. 5869) —

Apr. 10. Patient here for opium eating-as before; Is getting along fairly well. Apr. 17. Complains much but is doing fairly well. May 31. Sent home on trial.

Patient has history of a paretic senile dementia, tho' is not very old - He does not seem quite like General-paresis, tho' is very paretic - Denies any venereal Disease - Mental state dulled, though answers promptly but unreliable —

Personal and Medical History of Stephen F. Sherwood

1902

This patient was brought here by M. J. Luis, attended by Max Brozinski, in fair physical (except for age) condition, with following history of case. No history of consanguinity nor of heredity. This is 1st attack: first symptoms manifested about four years: loss of memory, incoherence, melancholy, and illusions, gradually increasing. Disease seems to be increasing, not variable: no natural intervals. Derangement now shown by loss of memory, incoherence, melancholy and illusions: wanders away from home. Is not disposed to injure others, nor suicidal. Disposed to filthy habits. No previous peculiarities noted. Patient is intemperate: has not been subject to any severe disease &c no head-injury. Has had constant care at home, and confined in a room by himself. Supposed cause of the disease is dissipation. Treatment has been tonic and laxative. On personal examination, the following noted: Pulse & Temp. normal: facial expression dull: melancholy & depressed.

Apl 7 On admission, was put on T.W. (G.A.R. Hosp: Complexion fair: hair dark gray: eyes blue: condition of skin good: vaccination marks on left arm: 2 scars on inside of right thigh: one small scar on back: several small bruises on right leg below knee. - Is clean: teeth all gone. Behavior good.

Apr 13/02 Fairly healthy; rather stupid; unsteady on feet; untidy. Apr. 20/02 Still dull & sluggish. May 1 Still in bed; unsteady in walking. July 1 Quite dull, stupid, unsteady & weak. July 12 Became weak but walking. Put to bed. Temp. found to be 104°. July 14. Died at 3.30 A.M. Has been comatose since last note.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Says – has had fits for 3 years or so. Light spells, first one did not fall: for 1 year, has had falling fits. At first, would merely wander in mind, for a few minutes". Gives a fair account of himself, but he does not seem to be quite accurate, at times. His mental state is like that of Epileptic, but not so demented, as in late stage.

Personal and Medical History of Carl Bock

1902

This patient was brought here by Wm Wahlquist in fair physical condition, with the following history of case - There is no history of consanguinity nor of heredity. This is 1st attack & warrent to Rochester (about 3 years ago. Epilepsy) - First symptoms of this attack manifested 3 years ago; uncontrolable impulses - Disease seems increasing: variable with rational intervals: prior to convulsions, apparently sane: but, following convulsions, he acts automatically; threatening to kill people & acting without reason only in. On what subject or in what way, Derangement now manifested is not stated. Disposed to injure others, only following Convulsions. Is not suicidal: no filthy nor destructive habits. Was always hot-tempred: persistent masturbator, at all times - No history of intemperance - Has early attacks of epilepsy: has had to be tied in bed, every night. Supposed cause of the disease is Epilepsy: Sedative and tonic treatment. On personal examination, has attack of fury, after attack of convulsion and realizes his uncontrolable temper, after convulsions are passed. ——— . ———

Apl 8 On admission, was put on B³ (G.H.N. R'ft. Complexion dark: hair brown: eyes brown: Condition of skin fair: abrasion inside of right heel: a lump on base of skull: 7 vaccination scars on left arm: small scar on forehead: several small scars from neck down spine: 2 small scars on right thumb: small scar on little finger of left hand - eruptions on back. Is clean. Teeth: one out on lower right side: one out on lower left side. Behavior good: Examined by Harry Poapst). ——— . ———

Note. Records do not show anyone of this name committed here before - Patient denies having been here -

Apr. 14 Appears well; feeble of mind; convulsion every day. May 1 Has had convulsions about every day. Sept. 8 Taken home. Not especially improved.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient rather dull; walks listlessly, up and down ward: Expresses no delusions. Has, seemingly, no anxiety or care, about having been placed here. Is quiet and says "is all right." —

Personal and Medical History of John. A. Turnquist

Personal and Medical History of

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case - No history of consanguinity nor of heredity. This is 1st attack: first symptoms manifested by uncoordination of thought, worry and melancholia, for about one year. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he believes that he is being persecuted. No disposition to injure others - not suicidal: no filthy nor destructive habits. No history of any previous peculiarities, nor of intemperance, severe disease &c nor head-injury. Has not been restrained nor confined. Don't know cause of disease. Has been treated in Bethesda Hospital, about one year ago: improved. On personal examination, Looks morose and melancholic.

April 11 On admission, was put on B3. | G.S.H. Diet. Complexion fair: hair light brown & bald: Eyes blue - condition of skin fair: varicose veins at both legs: Scars: 2 on top of head: 1 on right hand: several on lower part of back; (caused by cupping): Eruptions on back. & chest: Teeth: six gone on upper, 3 lower jaw: Behavior good: Examined by H. Paetzel. —

Aug. 24/02. Patient taken home today by a friend of his. During the month had been quiet, well behaved & had become quite rational in manner.

Personal and Medical History of Wm. J. Bolter Jr.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient a young boy, with a face suggesting that he was, perhaps, previously not very bright. Came in in a mildly maniacal mood; talking happily and busily and in a tipsy, half silly way. Wanted to join Buffalo Bill's boys.

Today, is quieter & some, but still talks of "having fun" (referring to his present behavior) & his talk is somewhat silly & incoherent. Health is good.

Personal and Medical History of Wm. J. Bolter Jr.

1902

This patient was brought here by Ignatius Fessenden, attended by Geo. J. Aulbauch, in fair physical condition, with following history of case. There is no history of consanguinity, nor of heredity, intemperance, nor previous peculiarities. This is not 1st attack: one occurred 2 years ago: duration about one week. First symptoms of this attack manifested about one week ago: Disease seems increasing. Derangement now shown by cutting his clothing, incoherent talk, illusions, excessive masturbation. Is not disposed to injure others, nor suicidal. Destroys clothing. Has had either typhoid fever or pneumonia. Has not been restrained nor confined: Course of disease is unknown. Treatment, 2 prescriptions. On personal examination, no further facts learned. ———

April 17 On admission, was put on B 3/4 (G.A.H. R/pt. Complexion fair: hair brown: eyes gray: condition of skin good: vaccination marks on left arm: small scar on upper lip: two small scars on first finger of right hand: small scar on first finger of left hand: small scar on left side. Is clean: Teeth: are gone, on upper jaw: are gone, on lower jaw: Edwards pastes: Examined by Harry Soapst). ———

Apr. 18/02 Occasionally violent: mildly maniacal; confused; has improved some. May 1 Has improved a good deal. Aug. 23 Home on trial. Quite well recovered.

Patient old & very feeble minded & silly; can give no good account of his condition. Heart is weak & he is, body, quite weak —

Personal and Medical History of Thomas Maley.

1902

This patient was brought here by J. Turner, attended by Chris. Schletty, in fair physical condition, with following history of case - There is no history of consanguinity, heredity, filthy or destructive habits, previous peculiarities, intemperance, nor of any severe disease or no head - injury: This is not 1st attack: one occurred in Feby 1902: duration 2 or 3 weeks: first symptoms of this attack manifested one week ago: (in what way, is not stated): disease seems stationary: variable: rational intervals not regular. Derangement now shown in subject of his son's death. Made threats to injure others - but is not suicidal. Has been restrained & confined home: (been confined at Poor-Farm) - Supposed cause of the disease is old age. Treatment none - Nothing further brought out at personal examination. Committment recommended because of his tendency to become dangerous, and the disposition to injure another inmate of the County-house - (said Thomas Maley is partially insane) -

Apl. 15 On admission, was put on B3 (G.H.H. Rft. Complexion fair: hair dark-gray: eyes blue: condition of skin good: varicose veins in both legs: one bruise on back of right hand. - hernia on right side. Is clean - Teeth: 8 in lower jaw: 6 in upper jaw, in poor condition. Behavior good. Very unsteady on feet.) ——— .. ———

Aug 1/02 Wt. 123# Jan 1/03 121#

Jan 3 03 Very demented, dull & somewhat restless & noisy. Is noted as being very feeble; but does not seem to be failing.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Periodical: Gets a fit of nervous impatience and an intense restlessness, without any special physical Shaking or pains or sensations: mostly mental, as far as known: comes on about once in 2 — 3 months. If visits for 48 hours, it goes away. Sometimes, does this. Has contemplated Suicide, at times, after brooding over his condition. Once, 2 years ago turned on gas, but it did not work. Once, recently, with pen knife. Did this when came to free from "Spells". Says when under influence of the restlessness, he drinks: he, after getting 3 or 4 drinks, loses all recollection of what happens, till sobered up, next morning. Then, if gets out, will drink again, until, in 3 or 4 days, he is so sick & exhausted that he stays in & quits. —

Personal and Medical History of Alfred S. Hall.

1902

This patient was brought here by A. E. Horn, in fair physical condition, with following history of case. No history of consanguinity, no insane relatives. This is not 1st attack: this occurred for 15 years; duration 3 days to one week: was not sent to hospital before: first symptoms of this attack manifested about April 7th 1902; attempt at suicide: Disease seems increasing: variable with rational intervals: not regular: about every 4 months. Derangement now shown in that, before drinking, has melancholic attacks: then drinks to excess for 3 or 4 days. Is disposed to injure others. Has attempted suicide, by stabbing: propensity active during attacks. No filthy nor destructive habits. Shows nervous impatiences at intervals. Patient's father drank: has not been subject to any severe diseases nor head-injury: has not been restrained nor confined. Supposed cause of the disease is heredity. Treatment, none. On personal examination, it is learned he is always very dependent upon others: lacks self-control: now has scars resulting from his attempt at suicide.

Apl 17 On admission, was put on T.W. (G. Ha. R'pt. Complexion light: hair gray: eyes blue: condition of skin good: vaccination marks on right arm: one scar on right temple: one long scratch on inside of both wrists. Sclean. Teeth all gone in lower jaw, except one filled & crowned: four of upper filled. Behavior good: Ed by C. Maricle).-

Dec 22/02. Patient was sent home to St. Paul on trial. Had given quite a good account of himself - Given a quite clear account of periodical melancholia. He would drink until he is thoroughly unconscious of what he does for a number of hours. Will find himself in some strange place & in 2 or 3 days the the desire & effects will taper off. He describes his suicidal attempts as voluntarily & not during the unconscious stage. Unlike ordinary inebriates he realizes the danger & peril in a very rational way.

Personal and Medical History of George Uerling

1902

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case - No history of consanguinity, nor of heredity. This is 1st attack: no improvement from treatment. First symptoms of this attack manifested about 6 months ago. (See 23 section of Commitment Papers; acts of facts learned on personal examination ⊗): Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he is apathetic: thinks his Step-father ought to be Killed. Disposed to injure father: not suicidal: no filthy nor destructive habits. Patient has been given to excess, venery & alcohol: (neither patient nor parents addicted to intemperance. See). Subject to Syphilis ?. Has not been restrained nor confined. Cause of disease supposed to be Specific Cause: has had anti-specific treatment. ⊗ On personal examination it is learned that he apparently had a slight cerebral haemorrhage, six months ago: for seven weeks, did not know where he was: slept night & Day, during that period: unsystematized delusions etc. —— " ——

Aug 1/02 On admission, was put on B3 (U.S.N. Rpt. Hair dark-brown: eye gray: condition of skin good: vaccination marks on left arm: small scar on forehead: small scar on right thumb. Teeth clean: Teeth: 28 gone, in lower right: 3 gone, upper left: 1 gone upper right: behavior good: Ely Wm Pattison) Aug. 1/02 135#.

July 31 Does some work. - rather dull - Sept. 21/02 Has improved mentally. Is more active. Oct. 10 Patient noticed as failing. - Dull. emaciated & weak. Oct. 22 Transfered to S.W. on account of this increasing weakness. Oct 28/02 Visited by mother. Nov. 10/02 105#. Nov. 12/02 Was sent home at the request of his mother, as he seemed steadily failing in health.

Patient has a melancholic mental state. This has been growing for several years. At times, is more clear than others. Appears dull and listless, most of time: Health fair.

Personal and Medical History of Thomas F. Elliott.

1902

This patient was brought here by J. E. Elliott, attended by Mary Elliott, in fair physical condition, with following history of case. No history of consanguinity nor of heredity — This is 1st attack. When first symptoms of this attack were manifested is indefinite; gradually progressive. Disease seems increasing: variable: rational intervals not regular — Derangement now shown in subject of persecution: melancholia, during past year: imagines voices and persons. Is disposed to injure others: has not attempted suicide, but has asked people to buy poison: he begs for death: threatens to kill himself. Destroys clothing and furniture. No previous peculiarities manifested: formerly excessive cigarette smoker — subject to hip-disease: has not been restrained or confined. Supposed cause of disease is tubercular. Treatment, none. On personal examination, nothing further is mentioned — Especially, from testimony introduced upon examination, patient certified to be insane —

1/18 On admission, was put on B3 (G. Hall). Complexion dark: hair black: eyes brown: condition of skin fair: left leg short & deformed: scars: one on forehead: one on right side of face: scar on left hip: vaccination marks on left arm: & clean. Teeth: 10 in upper jaw: 13 in lower: Behavior good: Examined by Harry Poapst). ——————

Aug. 1/02 - 113#. Sept. 1/02 132#- Jan 1/03 119#

Jan. 03 3. During period patient stood by himself most of the time. Rather obstinate & dull. Occasionally expresses melancholy ideas - fear of being killed - etc.

Mildly Melancholy: Talks over his losses: & his folly in working himself sick. Gets to crying, when talking of it. Is mildly senile also: mind feeble —

Personal and Medical History of Ole Carlson

1902

This patient was brought here by Dep. Sheriff N. Nicholsen, in fair physical condition, with following history of case. If any consanguinity, or heredity, not so known. This is 1st attack. First symptoms manifested one month ago; in what way is not stated: disease seems increasing, constant: Derangement now shown in that he thinks others are robbing him, and melancholy from financial losses: broods over condition, and talks of suicides, he has known of. Is not disposed to injure others. Has not attempted suicide, but is always on mind, as above—(propensity active?). No filthy nor destructive habits: no previous peculiarities noted: Has been, himself, a heavy drinker. No history of any severe disease &c, nor head-injury. Has not been restrained nor confined, except at County Farm, 10 days. Cause of disease not known. Treatment, none. On personal examination, is melancholic, restless, muttering & crying. Commitment recommended because his disease is of such a nature as to require, for his recovery, care and treatment, while under legal restraint. ——

Apl 21 On admission, was put on B3 (G.A.A. Dpt. Complexion fair: hair gray: eyes gray: condition of skin fair: several small scars on small of back: is clean: Teeth: one gone, in lower jaw. Behavior good: examined by J. O. Sisson). ——

Aug 1/02 135#. Jan 1/03 143#.

03
Jan 31 Works a good deal. Somewhat dull. Behavior good. Is somewhat demented.

Has been farming: claims that was overworked. but he also claims "finest home in the County" re — So mildly maniacal: rather talkative and rambling —

Personal and Medical History of Edward Johnson #3

1902

This patient was brought here by C. P. Storch, in fair physical condition, with following history of case - No history of consanguinity: one brother committed suicide, while insane. This is not 1st attack, (has had several): Last one 1899: duration about 2 years: sent to Rochester Hospital & recovered: First symptoms of this attack manifested 3 months ago: began by talking incoherently: wanders away from home: Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he has the symptoms and the actions of one suffering from chronic mania. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No previous peculiarities noted. No history of intemperance, only great amount of tobacco: has had injury: was kicked by colt when a child. Has been restrained or confined at hospital for insane, 3 times. Last time, about 2 years: recovered. Don't know cause of disease. Treatment, only at Hospital at Rochester. On personal examination, patient talks continually, in a rambling and incoherent manner. Commitment recommended because it is dangerous to himself and others to have him at large. His disease is of such a nature and in such a state, as to require regular aid and assistance, while under legal restraint. He is now, and has been, a resident of Fillmore County for last 25 years past. ——.——

Note. Here 1st time from Dec 6 - 1894 to November 13 - 1895: was duly discharged -
" 2nd " " Aug 23 - 1897 to March 11 - 1899. " " " "
" 3d " " Oct 5 - 1899 to May 27th 1901 & Discd. Nov 27/01, as recovered -
See Vol 43 p 333 No 5712. Form, last time, diagnosed as "Pubescent Insanity"

Apl 11 On admission, was put on B3 (G.St.N.Rft. Complexion dark: hair black: eyes gray: condition of skin fair: scars over right eye: several small scars on hands: scar on left foot. Is rather dirty: Teeth: one gone, upper jaw: 2, lower jaw: 1. Behavior good: (examined by H. Doapst). ——.——

03
Jan. 31 Patient worked out during whole period. Behaves well & is quiet. During last part of period no delusions have been noted. He is rather more quiet than is natural to him.

Personal and Medical History of Fred. Halverson Rud.

1902

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case. Many consanguinity, not stated: no insane relatives: this is not 1st attack. One occurred 10 years ago: May '92 to Aug '95: was then sent to Rochester Hospital: discharged (was Committed as "Fred Halverson"). First Symptoms of this attack manifested Jany 1902: Convulsive seizures and apathetic: Disease seems Stationary: patient, at times: Derangement now shown in that he refuses to talk: Is not disposed to injure others, nor Suicidal: no filthy nor destructive habits. No previous peculiarities noted: not intemperate: has had Typhoid fever: has been *Confined in Lutz & County Hospital Rice Jany 10th 1902: Don't know cause of the disease. Treatment has been, tonics, hydropathy, nutrition. On personal examination is apathetic, non-Communicative. Note. *Patient came to C & C Hospital in Sept 1901: with Typhoid fever: was here 10 weeks: developed neuritis (in left arm), which gradually cleared up: after leaving hospital about a month, he grew worse, gradually, as to dizziness, staggering &c. Polyspo. Had repeated convulsive seizures, difficulty in breathing &c. (Diagnosis Petit-mal) – Organic brain lesion – possibly abscess: no localization. Apl 6. Patient restless: marching back & forth, at rapid pace; greater part of time: Does not notice anyone, or answer when spoken to, unless you stop him, &c: apparently sees nothing of what is going on about him. – (memo. from Clinical history sheet: services of Dunning and Riggs) –

N.B 2nd admission: here before (as Fred Halverson) from May 6 – 1892 to July 22 – 1895: and discharged aug 14 – 95, as recovered. See Vol 19. p 173 No 3017. From then diagnosed as "Primary Dementia".

Apl 22 On admission, was put on B3 (G. A. N. Pt): Complexion fair: hair brown: eyes blue: Condition of skin fair: Scars on left knee: Eruptions on arms, shoulders, and back. Is clean: Teeth: 2 gone, upper Jaw: 1, lower Jaw: behavior good: Ex'd by Harry Poast) –

Aug. 1/02 130# Jan. 1/03 135# During August patient was quite restless, making queer motions & quite excited. During Nov. has changed somewhat & has worked some with painter.

Jan 03/3. Has reached quite a fair mental condition.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient in quite good health: says "he is heavier than usual" - has been here 4 times before: "acute mania Confusional": Patient maniacal: confused: no special subject: no insane ideas noticed: talks about his condition - says he knew when it came on" - When here last, was very maniacal - and disease said to have been due to sunstroke - no cause known -

Personal and Medical History of Mathias C. Peterson

1902

This patient was brought here by Ole P. Tasson, attended by Anton Olson, in fair physical condition, with following history of case— There is no history of consanguinity, nor hereditary. This is not 1st attack. 5 others occurred: 17 years ago (?) he was sent to Rochester Asylum and 4 times after that: appeared to recover, each time. First symptoms of this attack manifested about a week ago, and appeared with the same symptoms as before. The disease seems increasing: not variable: no rational intervals: derangement now shown on no particular subject. Is not disposed to injure others, nor suicidal. Is of filthy and destructive habits. No previous peculiarities manifested only he is not right as anything. His father was intemperate, but the patient is not. Not been subject to any severe diseases or nor head-injury. Has been restrained or confined for a day or two. Cause of disease, don't know: no treatment, at home. On personal examination, appears well nourished.

Note: 6th admission: Here before 5 times: (then recorded as Mathias Petersen Nov.) — Here last time, from June 8 – 1896 to Nov 24 – 1897 and discharged May 4 – 98 as much improved. Form then diagnosed as "Acute Mania": (for further particulars see last Commitment Vol. 33 Page 213 No 4416.).

April 29 On admission, was put on Cl. E (G. H. N. 12/pt. (cya) Complexion sandy: hair light: eyes blue: slight scars on right arm: is very dirty: enlargement of right ankle: behavior fairly good: was hand cuffed to hands and feet).

May 13. Quieted down quite rapidly after coming; fairly well behaved; quite silly. June 5. Becoming silly again; stops in works. June 23 Was quite bad; but has improved again. July 31. Fairly rational. Aug. 1 Still 1948; Aug. 11 Has been rational & agreeable; good worker; sent home today.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient a little sober, but fairly normal in emotional State. Is quite clear & composed, on most subjects, but, at times, has thought himself poisoned. Now thinks so, but is not quite sure. —
Was on parole from State Prison, where he gave himself up, on account of his delusions. —

Personal and Medical History of Mike Stewart

1902

This patient was brought here by John. S. Glennon, in fair physical condition, with following history of case. Family consanguinity or heredity unknown. This is not 1st attack; first symptoms of this attack manifested, even since commitment, during past 2 years. Disease seems increasing: variable: Derangement now shown by food poison: Threatens great bodily harm for those responsible for poisoning. Is disposed to injure others, but not suicidal: no filthy nor destructive habits. Previously, was easily angered. Is a moderate drinker. If he has been subject to any severe disease or head-injury unknown. Has not been restrained nor confined. Cause of disease, unknown. On personal examination, confirms delusions as to food poison. Especially from testimony patient certifies to insane.

April 30 On admission, was put on B3E (G.H.N. Ref (C.A.). Complexion fair: hair brown: eyes blue: scars on left temple: small scar on back: several small scars on hands. Is clean: has one false tooth in front, upper jaw: rest of teeth in good condition: behavior good. (N.B: Patient is inmate of prison: time nearly out: Conduct while on parole, shows probable delusion as to food poisoning and persecution).

May 1/02 Restless; fairly rational; does not talk about delusions. May 13 Easily irritated Quarrelsome. July 1/02 Occasionally thinks he is dosed by poison (R.M.P.) Aug. 1. Wt. 155#. Aug. 31 Attempted to elope. Is constantly watching an opportunity. Oct. 1 Wt. 152#. Attempts to run away. Sly in manner; talks quite rationally as a rule; but has the delusion of poisoning and other forms of persecution. Nov. 1. Wt. 152#. Nov. 20 Has improved somewhat; seem rational; but not considered well; morose & rather irritable. Thinks we have no right to keep him longer; works some on yard. Sent home to day. C.L.C.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient a Young, Slightly Silly man: not especially maniacal or melancholy. Leads toward Dementia. Condition been coming on indefinitely, but only especially notable for 1 — 2 years. Has an idea parents have been too strict & harsh on this idea constantly. Has abroad diffuse goitre, that his people think is connected with his mental trouble. His physical state seems fair except for pallor & goitre. His Mother says he was always weakly.

Personal and Medical History of *Aaron Wolter*

1902

This patient was brought here by Sheriff Jos. Tucker, attended by Lant Eoyers, in good physical condition, with following history of case. If any consanguinity, unknown: no history of heredity: This is not 1st attack: others occurred about one year ago and several since: duration variable: was not sent to hospital before. First symptoms of this attack manifested about one year ago: various delusions. Disease seems increasing; variable with rational intervals, but these not regular. Derangement now known is that he thinks he is under too much restraint by parents. Is disposed to injure others, but not suicidal: no filthy nor destructive habits. No previous previous peculiarities manifested. No history of intemperance, nor of any severe disease &c, nor head injury. Has not been restrained nor confined. Cause of disease unknown. Treatment, 6 weeks in Chicago – Dr. Parkin: and Dr. Ransom, Lodge Center. On personal examination, shows tendency to violence, when questioned as to restraint by his father. Commitment recommended because he is liable to do violence to his parents on account of his delusions, in regard to undue restraint.-

May 3 On admission, was put on B 3 E (G. H. N. Kpt. (Cegu) Complexion fair: hair light brown: eyes blue: Condition of skin good but dirty: slight eruption on body: is dirty: Teeth: 5 missing on upper and one missing on lower, Jaw. Behavior good: Ed by Nurse H. E. Poafpet)-

May 7/02 Rather childish & silly: talks quite well; thinks has been wrongly treated May 14 Somewhat quieter; maintains same hypochondriacal ideas. Aug. 11/02 Taken home on trial - Improved.

Went to Montana Feb 6-1901 to visit uncle. Remained with uncle & was employed at Lumber yard, later, in adjoining town. Later, had pneumonia: was in hospital 2 days: One month later, at Warm Springs Insane Asylum for 2 months. Don't know why was sent. Don't know why was sent here. They said insanity, but know of no reason for it" — no quarrel or trouble" — Got at several places, because of disputes - Talks intelligently & at work but slight dullness as compared with a sane man. Does not refer to any Delusions. —

Personal and Medical History of Charles W. Hodgson

190v

This patient was brought here by M. J. Luis, in fair physical condition, with following history of case. No history of consanguinity: father very peculiar. This is the 1st attack: continuous for last 3 years: if sent to hospital, no certainty of this: (Patient says that he was sent to Warm Springs Insane Asylum, near Helings, Montana) — First symptoms of this attack manifested about 3 years ago: melancholia: Delusions of persecution. Disease seems increasing: variable: rational intervals not regular. Believes he is persecuted: that he is engaged in numerous speculations, making millions of money: Believes that all conditions are wrong, and that it is his mission to correct them. Disposed to injure others, but not suicidal: propensity not active: No filthy nor destructive habits: was always dissatisfied & envious: no history of intemperance, but history of injury to head when child: disease of rectum: — Restraint or confinement none, except his statement as to confinement in Montana. Cause of disease not known: treatment, none, as far as known: On personal examination is incoherent & persists in his delusions: Easily excitable. ——— ——

May 3 On admission, was put on B.3.E. C.9a Gt. N. R.R.: Complexion fair: Hair brown: eyes blue: Condition of skin fairly good: one scar on back of skull: Scar on back of left hand: — vaccination scar on left arm: has had fistula for about 4 years: is clean: Teeth: 2 missing in upper & one missing in lower jaw: behavior good: Ex'd by A. E. Poaps).

May 7/12 Has been garrulous; confused; mind slightly maniacal. July 1 Improved some. Talks more quietly & rationally. Aug 13 Sent home; still boastful & inclined to be garrulous.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says had first fit at age of 18, since which they have gradually grown more frequent, though, usually, only once in 2 or 3 weeks. The last time at home, he was left confused & out of his mind & was sent here.

While here, was for a few days, quite maniacal, but soon quieted and became clear & has been so since. Had 2 fits early in his stay here.

Personal and Medical History of Paul Pitzke

Personal and Medical History of

1902

This patient was brought here by Charles Misgin, attended by C. F. Finley, in fair physical condition with following history of case. No history of consanguinity, nor of heredity. This is 1st attack: first symptoms manifested three weeks ago: violent and attacking other persons. Disease seems increasing: not variable: no rational intervals: Derangement now shown as nothing special: violent. Is disposed to injure others, but not suicidal: no filthy nor destructive habits: no previous peculiarities manifested: no history of intemperance: subject to Epilepsy: no injury to head: has temperature & confined for 24 hours. Supposed cause of the disease is Epilepsy - began at the age of sixteen. Treatment, bromides and Phosphates: effects none. On personal examination - no intelligence: violently insane.

May 3 On admission, was put on IW. (G.A.R.Rpt: Complexion light: hair brown: eyes gray: condition of skin good: vaccination marks on left arm: one cut over left eye: left eye discolored: one bruise on right arm: one over left eye. Teeth: 6 gone out, upper jaw: one gone in lower right jaw. Is noisy and maniacal: came here in "cuffs."

May 16 Fourteen day record up; Is epileptic; confused; stupid; but improving.

May 28 Trans. to B3; June 5 Visited by Mother. July 1 Wt. 170. Quite agreeable if not crossed; Stubborn & easily provoked; occasionally has trouble with other patients; Works willingly. July 18 Cut upper lip badly during convulsion. July 28. Made desperate attempt to escape (with other patient) - struck nurse Balcom on head with club. Caught by other nurses; very ugly; put in C. Sept. 1 Wt. 179#. Ill natured; threatening; has several severe convulsions per month, followed by confusion. Nov. 1 Wt. 184#. Good physical health; still troublesome & disagreeable.

1903 Jan. 31 Had 5 convulsions during month; continues very ugly and pugnacious at times, especially at times of convulsions otherwise quite peaceable & agreeable. (CL.)

Patient Epileptic: fits began at age of ~~34~~: had one in October: next on next July: gradually becoming more frequent. Was struck on head, quite a blow by a falling iron. Did not make him unconscious. Don't know if it was the summer before the fits came on or the next following. Is now rather stupid, dull & at times depressed. and his face & manner show it.

Personal and Medical History of Andrew Landolf

Personal and Medical History of

1901

This patient was brought here by M. J. Luis, attended by M. Goergen, in fair physical condition, with following history of case. No history of consanguinity nor of heredity. This is 1st attack: this has been coming on for 5 or 6 years: gradually growing worse. First symptoms of this attack manifested by convulsions: gradually increasing in frequency & severity: falls down & lately becomes delirious after attack. Disease seems increasing: variable & with rational intervals: following these deliriums, after the convulsions, sometimes a few days & months: sometimes a few hours. Derangement now shown by incoherence, and delirium, and thinks people wish to injure him. and afraid he might commit some crime himself. Is not disposed to injure others: has not attempted suicide, but liable & become so: no filthy nor destructive habits. No history of any previous peculiarities, nor of intemperance. Was struck with iron ring on head, shortly before his first convulsion. He has not been restrained nor confined. Supposed cause of the disease is injury to head: has had usual treatment for Epilepsy. On personal examination is in Good physical health. ——.——

May 13 On admission: was put on B3. (G. H. N. R. Ft. Complexion dark: hair black: eyes brown: Condition of skin good: cut over left eye 1½ in. long: small scars on hands: is dirty. Teeth: 2 missing in upper and 4 missing in lower jaw: behavior good: has convulsions).

May 19. Is epileptic; has been very dull & confused. Improving. May 27 Confused; dull; sometimes fighting. June 1 Wt. 175#. June 27 Trans. to C. Has been very violent; July 31 Improved some during past month; more rational; less trouble; few fits; habits neat. Is dull & slow mentally. Sept. 1 Wt. 177#. Four convulsions during Aug. Sept. 19 Fell in fit cutting over left eye. Nov. 1 Wt. 178#. Continues in good health; except for convulsions; stubborn dull; rather vindictive in talk.

Jan. 03 Jan. 31 Continues same; indolent; stubborn; very confused & pugnacious after fits; very excited when other trouble occurs on ward. CLL

Patient has the Typical Epileptic Dementia: Irritable: Dont realize his Condition well: Dont realize must stay here: has had right-sided paralysis: Says "this was from birth-injury" - later says "had a stroke at 15 years old"; right side face is shorter: right arm is shrunken & has spastic contractures: right forearm will not supinate. Right leg is shorter & smaller. Says "was able to work, though

Personal and Medical History of William R. Wallis

1907

This patient was brought here by Sheriff M. J. Leis, in fair physical condition, with following history of case. No history of consanguinity nor heredity. This is 1st attack: first symptoms manifested about 17 years ago: epileptic seizures: & between attacks, irritable & weak-minded: Disease seems increasing: if variable & there are rational intervals, partially so: at times, his mental condition is better than at others, but never quite rational. Derangement now shown in that he has delusions: thinks children are mocking him: chases them & threatens to kill them: goes out, with a club, looking for Polanders & threatens to kill them: hears voices talking to him, when no one is near. Is disposed to injure others, but not suicidal. No filthy nor destructive habits: no history of any previous peculiarities nor intemperance. When about 7 years old, he had a severe fright: resulting in meningitis: at 13 years, had first Epileptic attacks: a year later, was attacked by a tame bear, and severely bitten in head, face & arm & throat. Has been restrained or confined, at home: parents had to watch him, for many years. Cause of disease, most probably meningitis: has had all kinds of medical treatment, for 17 years. On personal examination, Physical condition normal, except for a partly paralyzed right arm & leg: mentally, irritable, easily excited & inclined to be noisy.

May 9 On admission, was put on B³ E. (G. & N. Rpt. Complexion fair: hair light brown: eyes gray: condition of skin good: vaccination marks on right arm: small scars on right shoulder: large scar on left fore-arm: small scars on knees, on back of head, on right wrist. Is clean: right arm and hand paralyzed, & right leg also affected: Teeth, two missing, and two on lower jaws. Behavior good: Examined by Nurse T. O. Sisson.

June 2. An erratic epileptic; fairly well behaved as a rule; but very excitable, becomes pugnacious on slight provocation. Necessary to put in muffs. Has not improved.

July 2. Wt. 155#. During June showed little change in general condition - noisy at times & pugnacious; had several convulsions. Seems to have hallucinations of some one calling him and is more confused than usual then. July 30 Four teeth extracted; continues troublesome & abusive; contrary & delusional. Oct. 1 Unimproved. Tries often to run away from crowd; fights viciously when caught; extremely troublesome Oct. 5 Visited by Mr. Gove. Nov. 1 Wt. 154#; Has convulsions frequently; mental condition more feeble & delusional;

Personal and Medical History of

Dec. 30 Sixteen convulsions during month. Unimproved.
Jan. 5. Trans. to D.W. Swelling of leg, which is not serious. Put to bed for a few days, dressings applied. Jan 8 Trans to C. Leg improved.
'13 Jan 31 Condition same mentally. C.L.C.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient was stuporous + inert, on coming in: a cold spray waked him up some; atonic, +, during yesterday, he got to talking freely +, today, seems quite normal. Was sent to Workhouse, for 30 Ds: on 21st april: don't know when he dropped into stuporous state: don't remember anything about it: says: had been on 3 weeks spree, when sent to Workhouse: says "he is the only inebriate in the family".

There is a probable adolescent tendency: neck is slightly protuberant.

Slight goitre —

Personal and Medical History of John Mack

1902

This patient was brought here by Geo. Krieger, in fair physical condition, with following history of case. If any Consanguinity, or heredity: if 1st attack: all is unknown: First symptoms of this attack manifested May 15th 1902: attempt to cut his throat. Disease seems increasing: not variable: no rational intervals: Derangement is now shown by his being non-communicative; violent: attempts to destroy his life: has to be restrained. Is not disposed to injure others. Has attempted suicide, by cutting throat: propensity now active: is of filthy & destructive habits. Previously, disposed to melancholy. Patient, said, drinks. If he has been subject to any severe diseases or a head-injury, not known. Has been confined & restrained, by hand cuffs, one day. Supposed cause of the disease is melancholia & confinement in work-house. Treatment, none. On personal examination, the following noted: Staring, fixed gaze: non communicative: wound on left side of neck.

May 26 On admission was put on B3 (C. H.A. Aft: Complexion fair: hair brown: eyes blue: — Condition of skin good, but dirty: vaccination marks on left arm: small wound on left side of neck: eruptions on back. Sore on left knee: hernia on left side: is very dirty. Teeth: has 8 in upper, and 7 in lower jaw. Pupils a depressed: Fd'g H. E. Poapst).

May 26. Stupid & dull on admission; does not seem to know how he got here; fairly rational; but rather depressed & uncertain: Inebriate

Aug. 11/02 Sent home on trial; rather uncertain in manner & odd in behavior.
