MILANDER IS MISSING

Pioneer Press Oct 7 1902

CROSSES ST. CROIX TO WISCONSIN.

Valley Creek Man Who Cut His Wife's Throat Secures a Gun and Disappears.

Stillwater, Special, Oct. 6.—Sheriff Smith returned late last night from Valley Creek, Washington county, but had been unable to capture Olaf Milander, who is wanted for having made an attempt upon the life of his wife yesterday morning. Following the assault upon his wife he went to the home of his father, where he procured a shotgun and said he expected to go hunting. He was seen going toward Afton, a little village on the shores of Lake St. Croix, but since that time he has not been seen. Some people incline to the opinion that he crossed the lake and went to Wisconsin, others think he committed suicide, and still others think he has hidden in the woods and will not come out until he is starved out.

Mrs. Milander is in a serious condition, but the surgeons hold out some hopes of her recovery. Milander, who came to her home from his father's house Sunday morning, slashed her throat with a razor and she also received bad cuts on the back and across her hands. He told her that he purposed killing her and he evidently believed that he had done so. Bleeding from half a dozen wounds she managed to reach the home of neighbors, living across the road from her home. They dispatched messengers to this city for the sheriff and also sent for surgical assistance.

Milander had not been living with his wife during the past three weeks. She had him arrested early in September for an assault upon her, and at the examination held in this city, he promised to leave for North Dakota. He forgot his promise, however, and went to the home of his father, where he since resided. He has been partially demented for several months, but at times was perfectly rational. Some weeks ago he threatened the life of Dr. J. H. Haines of Stillwater, because he had not prescribed properly for him, and Dr. Haines said that the man must be insane, because he had never given him any occasion to threaten him. The search will be kept up for him in his accustomed haunts and Sheriff Smith expects that he will soon be able to apprehend him.

George Walton, formerly of South Stillwater, died Friday of heart failure at Menomonie, Wis., where he had resided only a few days, and the body was brought to this city for burial. Funeral services were held in St. Michael's church this morning and the remains were taken to South Stillwater for burial. Mr. Walton, who came here prior to 1850, was seventy-two or seventy-three years of age and resided at South Stillwater up to five years ago, when the family removed to Cumberland, Wis. He leaves a widow, his third wife, and one son, John H. Walton of South Stillwater.

The funeral of Dr. H. Runge will be held at 2:30 to-morrow afternoon and will be conducted by Rev. P. Boyeson, under the auspices of the local lodge of the Sons of Herman.

There is a large crew of men employed at the St. Croix boom and many logs are being turned out. There are more logs in Nevers dam than can be turned out this season and early work on the river will be insured for next spring.

DANGEROUS DEMENTIA.

Pioneer Press Oct 6 1902

Valley Creek Man Said to Have Cut His Wife's Throat.

Stillwater, Special, Oct. 5.—Sheriff Smith left this afternoon for Valley Creek to arrest Oluf Milander on the charge of assaulting his wife with a knife this morning. Parties who were here after a warrant did not know how seriously Mrs. Milander was injured, but said they had been told that her throat was cut, and were asked to hurry here after the sheriff. Milander was arrested three weeks ago on the charge of assaulting his wife, but was released at that time upon promise of leaving for Dakota. He is partially demented.

MILANDER IS CAUGHT

Pioneer Press Oct 8 1902

CLOSE CALL FOR A DEPUTY.

Man Who Cut His Wife's Throat Had the Drop on a Searcher but Did Not Shoot.

Stillwater, Special, Oct. 7.—Olof Milander, the Valley Creek farmer who on Sunday made an unsuccessful attempt to end his wife's life with a razor, now occupies a cell in the county jail, having been rounded up this morning at a farmhouse about two miles north of Afton by Deputy Sheriff Fazendin, assisted by Thomas Hanlon, Conrad Claytor and Mr. Rheinhardt. Milander had been hiding in the woods and brush near Valley Creek and Afton ever since Sunday forenoon, and after being captured he told the deputies that they had frequently been within a few feet of him, but that he had kept concealed in the thick underbrush and behind trees.

Conrad Clayton, one of the deputies, got the first glimpse of Milander yesterday morning, a short distance from the old mill at Valley Creek. Claytor had started through the woods unarmed, and he was startled by seeing Milander lying on the ground covering him with a double-barreled shotgun, cocked and ready for action. The men having been intimate friends in their younger days, Clayton urged Milander to give himself up, but this Milander refused to do and told Claytor not to come a step nearer or he would fire. While Claytor started after the deputies Milander went to the home of his father, where he procured his breakfast and again disappeared. He next appeared on the Valley Creek road, where he halted Henry Myers, the Valley Creek storekeeper, and engaged him in conversation. Myers could not get near him, however, and he again started for the woods.

Late last evening Deputy Sheriff Mazendin learned that he had been seen near a farmhouse a short distance north of Afton. The house was surrounded, and Milander was induced to surrender. He said that he was sorry that he did not succeed in killing his wife and that he had been looking for others whom he wanted to shoot. He is evidently insane.

Mrs. Milander was brought to the city hospital in Stillwater last night. There is some chance of her recovery provided blood-poisoning does not set in.

Mrs. Matilda Holzheid, formerly of Stillwater, died this morning at White Bear of senile debility. She was seventy-five years of age and lived with her only son, August Holzheid.

There will be no saloons in the village of Marine when licenses now in force expire. At an election held yesterday the no license element won out by the narrow margin of two votes.

Patient is melancholy, all the time, at times, is very agitated & tries to harm himself. Always fears that his children are being murdered here, in the hospital: Has rather weak, at first; later, is kept in bed & improves —

Personal and Medical History of John Worzalla

1902

This patient was brought here by Dr. J. Sims, attended by Anton Worzalla, in fair physical condition, with following history of case: No history of consanguinity, nor of any insane relatives, except his mother suicided by hanging. This is 1st attack: first symptoms manifested about May 1st 1902: Hallucinations, pain in head and loss of appetite. Disease seems increasing: as to being variable & with rational intervals partially so; but these are not regular: is sleepless: believes he is going to die & become blind. Derangement now shown in that he says "the Devil commands him to kill his family": attempts to escape. Is disposed to injure others: has not attempted suicide, but has threatened: propensity now active: not disposed to filthy or destructive habits: no previous peculiarities manifested: no history of intemperance, nor of any severe disease &c, nor head-injury. Has been constantly watched for three weeks— Cause of disease unknown: treatment, tonic & sedative. On personal examination, May 30 On admission was put on B3E (G.H.N. Kpt. Complexion fair: hair brown: eyes blue: condition of skin good: sore on right buttock: scars over right eye: Double hernia: is clean: teeth: two missing in upper jaw: behavior good: Ex. Hy. H. Vorys)

Aug. 1/02. 126° — Melancholy, confused, cries is hysterical.
Sept. 11/02 Taken with severe Diarrhoea. Sept. 13/02 Is noted as having passed a good deal of blood.
Sept. 15/02 Some fever noted. Sept. 17/02 Temp. about normal. Is improving. Was to catheterized.
Dec. 14- Patient has been in bed all the time - mostly however on account of his mental state, complaining of symptoms, which do not exist at all. It is hysterica and melancholy.
Jan. 31 '03 Has been up & about. Is doing quite well.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient came in rather agitated & fearful: at once, resisted everything & everybody in a restless, fearful way. His brother visited him several times, but did not quiet him. He continued restless: in incessant restless motion: Was in restraint-sheet, part of time. Fever rose & kept up, though always most, after struggling. Was destructive when out of restraint. Friday Morning 6/6 he was quite exhausted & in PM. had a sudden "sinking spell". Friday evening, had another. Then gradually sank, till his death at 10th Saturday Am.

His Patient had exhaustion, from incessant excition, but also some meningitis - The behavior was half delirious & not typically manical -

Patient came in rather agitated & fearful; at once, resented everything & everybody in a restless, fearful way. His brother visited him several times, but did not quiet him. He continued restless: in incessant restless motion: Was in restraint-sheet, part of time. Tore rags & slept up, though always moist, after struggling. Was destructive when out of restraint. Friday morning 6/6, he was quite exhausted & in P.M. had a sudden "sinking spell". Friday evening, had another. Then gradually sank, till his death at 10th Saturday A.M.

This patient had exhaustion, from incessant exertion, but also some meningitis. The behavior was half delirious & not typically manical.

Personal and Medical History of Herman Haugge

1907

This patient was brought here by Sheriff John L. Johnson, attended by brother George Haugge, in poor physical condition, with following history of case. No history of consanguinity nor of heredity. This is 1st attack: first symptoms manifested on April 15th: Commenced to complain of continuous headache: later, excitable and delusional. Disease seems increasing: variable: becomes rational for a few minutes at a time, several times, daily. Derangement now known in that he imagines he is under Divine Guidance. Is not disposed to injure others, nor suicidal, no filthy nor destructive habits: previous peculiarities, none noted: No history of intemperance, nor of any severe disease &c, nor head-injury. No legal restraint has been employed - Cause of the disease is not known: Treatment has been mild restraint at home: use of hypnotics to quiet him and produce sleep. On personal examination, is very nervous & excitable: thinks he is under Divine Guidance. Commitment recommended because it is dangerous for him to be at large: for treatment, while under legal restraint. ——

May 31. On admission, was put on T.W. (G.H.N. Hpt: Complexion light: hair dark-brown: eyes brown: Condition of skin good: one scar over forehead: is clean: No bodily peculiarities noted: is very stubborn & very much afraid of everyone: (Dr. W.E. Bernard)
May 31. Restless; stubborn; temperature 100.2°; restless put in restraint sheet; struggles extremely: exhaust himself. June 1 Restless; noisy; visited by brother. June 2. Visited by brother; restraint part of the time; Temp. 103.4½° after being put in restraint sheet. June 3 - Temp 102.3° Restless; visited by brother. June 4 - Temp 101.4 to 103.4 in the P.M; becoming sore from struggling. June 5 Temp. 104° all day; delirious; ate little. June 6 Temp. 103.8° & 103.2° - failing - weak - out of restraint sheet - exhausted. June 7. Temp 104.6°. Died 10.20 A.M.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says had Syphilis in '95: the attack seems gradual and is confused mentally - D. therefore, more like dementia, than otherwise. Nevertheless, motor signs of General paresis are quite lacking - there is, perhaps, slight incoordination. -

Personal and Medical History of Joseph C. Croft.

1902

This patient was brought here by Frank Collins, attended by Frank Ayer, in fair physical condition, with following history of case. As to any Consanguinity Don't Know: no history of heredity: this is not 1st attack: one occurred 2 years ago. Duration unknown: first symptoms of this attack manifested about 2 weeks ago. melancholy attacks with hallucinations. Disease seems increasing: variable and with rational intervals, but they do not occur at regular intervals. Derangement now shown by brooding over physical conditions, melancholy, delusions, and hallucinations. Is not disposed to injure others, nor suicidal: propensity not active: no filthy nor destructive habits. Is addicted to masturbation— Father was intemperate. There are indications of specific disease - has had temporary confinement in County Jail. Cause of the disease is unknown. Treatment has been sedatives: no effect. On personal Examination, it is learned that patient, at times, is in a melancholy mood with periods of excitement and fear of being injured. Shows evidence of loss of sleep—

June 2 On admission, was just on B.3.E (G.H.N.Kpt. Complexion light: hair dark brown: eyes blue: condition of skin clear: vaccination marks on left arm: scars on large finger of right hand: hernia on right side: is clean: Teeth: 4 missing in upper jaw: 3 missing in lower jaw: Behavior very good: Edly D. Nissen).

Aug 1/02 142#. Jan 1/03 139#. Was transfered to A' Aug 18/02 but moved to D.W. Oct. 9 as he had become melancholy + dull.) During Nov. was quite melancholy whispers to himself + ete. During Dec. + Jan. improved

Jan. 03 somewhat.

Patient seems somewhat dulled and quiet: no delusions were noted in examination: Is rather indifferent and quiet. Is quiet and seems well disposed —

Personal and Medical History of George B. Cooper

1902

This patient was brought here by Dep. Emanuel Johnson, in fair physical conditions with following history of case. As to any consanguinity, do not know: no history of heredity: This is 1st attack: first symptoms manifested six weeks ago. — Talked incoherently, and delusions. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he is apprehensive, delusional: demented: caused by continued use of morphine. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits: did not manifest any peculiarities until he quit work, six weeks ago. Patient takes morphine. No history of any severe disease &c, nor head-injury. No restraint or confinement. Supposed cause of the disease is the "Morphine habit". Treatment: none — On personal examination, of patient non-communicative & without memory.

June 6 On admission, was put in B3 (G.H. N.R. 1st. Complexion fair: hair brown: eyes blue: condition of skin good. 2 small scars on back of neck: 2, right knee: one on back right hand. 1 on thumb & third finger, left hand: no ulcers, bruises, hernia or vermin noted: is very dirty: behavior quiet: (slept 8 hours, first night).

June 19/02. Behavior quiet; indifferent; dull; fairly rational in speech.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient does not admit gross drinking: Theirs was always able to attend to his work - A few weeks ago, while starting to drive away, some one said to him "to take his whip" - The whip was not his, though lying near by; but he took it. It, at once, began getting him into trouble, he thought & still thinks &c.

Personal and Medical History of John Nelson #2

Personal and Medical History of

1902

This patient was brought here by Sheriff A. B. Lundquist, attended by Chas Hector, in fair physical condition, with following history of case. No history of consanguinity: no insane relatives: This is 1st attack: has been in Redwing City hospital: no noticeable results from treatment. First symptoms of this attack manifested May 29-1902: by hallucinations: said "that people wanted to kill him". Disease seems stationary - not variable: no rational intervals. Derangement now shown in that he says that his whip was poisoned": "that it made him trouble to hold it", and "that he fled to the Country to escape being killed by his persecutors". Is not disposed to injure others. Not suicidal. Propensity not active: no filthy nor destructive habits: has previously exhibited peculiarities: has drank to excess, and has, at such times, been irritable: father drank. No history of any fevered disease &c, nor head-injury: Has constantly been watched for the last week. Cause of disease, perhaps inebriety: Has received general hospital care and sedative treatment: no noticeable effect. ——

On personal examination, the following noted: accelerated pulse: trembling: haggard appearance and stolid look. ——

June 6 On admission, was put on B3 (G.P.N. Dpt. Complexion fair: hair brown: eyes blue: condition of skin fair: scars on left knee, second finger, right hand: Eruptions on body & lower extremities: ulcers, no: bruises, no: hernia, right side: no vermin: but rather dirty. Little finger on left hand taken off at 1st joint: fingers on both hands somewhat stiff: 6 teeth gone, upper jaw: 5 gone, lower jaw. Behavior quiet: (Slept 8 hours, first night). ——

June 19/02. Nervous & restless on coming; afraid of being killed. Has improved much. July 26 Sent home on trial. Has been quite well for past month

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is said to have had convulsions 6 years ago, and to have had quite a number of series since, so that, now, he has a series every few months, after which he is confused & hard to manage. After the first series, he was quite well; but now, in between attacks, shows some feebleness of mind.

This feebleness is quite slight now. The condition is judged to be from atheroma of brain arteries & not from kidney trouble.

Personal and Medical History of Henry DeGroot.

1903

This patient was brought here by Mr. Harry Semple, attended by Mrs. H. Semple, W. A. Viall, Leila Stevens & others, in fair, except for age, condition, with following history of case. No history of consanguinity, nor of heredity: This is not 1st attack: first was in 1896. (3 yrs.): since then 8 or 9 attacks: duration from 3 to 6 weeks: Was not sent to hospital: (D. P. note: Had a fall about '93, but not of special note): First symptoms of this attack manifested about two months ago: began by convulsions: then became very violent. Disease seems increasing: variable & with rational intervals; - these occur at any time. Derangement now shown in that he has illusions in various subjects: is very violent: disposed to injure others, but not suicidal. No filthy nor destructive habits. No previous peculiarities noted. Father drank some, but was not a drunkard. No history of any severe disease or head-injury. Has not been restrained nor confined. Don't know cause of the disease: Has been under the care of several physicians, but without any result. On Personal Examination, patient has all the appearances of chronic mania. Is very violent and restless. Commitment recommended because his disease is of such a nature, and in such a stage, as to require regular aid and assistance while under legal restraint. He is now, and has been, a resident of Fillmore County, for last 43 years last past.

June 9 On admission 10:30 am, was put on T.W.E (G.H.N. R'ft: Complexion medium: hair gray: Eyes blue: Condition of skin, fairly good: Vaccination scars, left arm: No eruptions or ulcers noted: large bruise below left knee: hernia left side: Movements: is clean: Deformity of left wrist: Teeth very poor: nearly all stubs: behavior (first day) quiet: Examinations made by W. E. Bernard) — * See below

*Oct. 27/02 Received on ward from parole - noisy & restless. Oct. 31/02 Has been in restraint sheet more or less each day. Nov. 7/02 Has been quite restless but is quieting down somewhat now. Nov. 14 Up & dressed. Has been improving rapidly. Nov. 19 Visited today by sister. Dec. 27./02 Having improved quite rapidly patient was today taken home on trial.

*I June 9/02 Received on L.W. rather restless & confused. June 15/02 Has quieted down a good deal but is very unmanagable. June 22/02 Up & about today. June 24/02 Very stubborn - had to be forced to go to bed. June 30/02 Struck with a baseball. Received a black eye. July 5/02 given parole. Aug. 9/02 Taken home by friends - has quieted down & is in fairly good condition.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says "was sick with Stomach-trouble" & "headaches", recently, more or less. Had Erysipelas in winter. His description of Stomach-trouble is very vague: seems to consist of vague pains: - Admits having gone out to shoot gophers & thought a stranger came along & he shot him. Says "he now knows this was an hallucination: knew it "as soon as he came to this hospital". Says "only had this idea twice last Monday".

Vague & dull, in some ways. —

Personal and Medical History of Irving H. Comstock

1902

This patient was brought here by F. H. Townsend, attended by Henry O'Marow, in fair physical condition, with following history of case. No history of consanguinity. a cousin, on mother's side, has been insane. This is 1st attack: thinks that he killed a man" and first symptoms was leaving home, to escape arrest. Disease seems stationary: not variable: no rational intervals. Derangement is now shown, in that he is rational on all subjects, except the delusion that he killed a man. Not disposed to injure others, nor suicidal: no filthy nor destructive habits. No previous peculiarities noted: is a heavy smoker: has not been subject to any severe disease &c, nor head-injury. Has been restrained or confined for past few days, to avoid from running away. Cause of the disease not known. Treatment, Sedatives. On personal examination, appearance natural & rational as other subjects, but under delusion that he killed a man & shows worry of same. Commitment recommended because he needs medical assistance, while under legal restraint.

June 12 On admission, was put on B^3 (G. H. N. D'pt. Complexion fair: hair brown: eyes blue: condition of skin good: vaccination marks, right arm: small scars at base of spinal column: no eruptions, bruises &c noted: S clean: Teeth, all & good: Behavior good: quiet: pathetic sad: crying: (1st Day): Examination on admission H. Loaps).

June 25. Has been quiet; good health; well behaved fairly rational; dull.

June 30. Taken home by cousin.

July 5. Returned. Aug 11 Taken home on trial.

Personal and Medical History of William H. Daw

1902

This patient was brought here by Emanl. Johnson, in fair physical condition, with following history of case. No history of consanguinity: but grandmother on father's side was insane. This is not 1st attack: one occurred in april 1900: duration unknown: was sent to Rochester Hospital - There 4 months & discharged. First Symptoms of this attack manifested May 2 - 1902: not able to transact business. Disease seems increasing: not variable: no rational intervals. Derangement now shown on business. Hallucinations. Is not disposed to injure others, nor Suicidal: no filthy nor destructive habits. No history of any previous peculiarities, nor of intemperance nor of any severe Disease &c, nor head - injury. *Was confined at Rochester, Apl 1900. Supposed cause of the disease is Business. Would not submit to treatment. - On personal examination it is learned he does not sleep & must be Continually watched.

June 12 On admission, was put on B3 (G.H.N.Dft: Complexion fair: hair light brown-gray: Eyes blue: Condition of skin good: no marks, Scars, bruises &c noted: is fairly clean: has six teeth in lower jaw: is rather Emaciated: very excited & talkative: Ex^tn on adm^n by W.J.K)

*Note. 2nd admission: here before from April 18 - 1900 to Augt 14 - 1900 & discharged Feby 5 - 1901, as recovered: Form then diagnosed as "Acute Melancholia": Cause Given as "Business reverses". (For further particulars see Vol 45 page 313 No 5711).

Aug. 9/02 Patient gotten up today & given his clothes. Still noisy & talkative - incoherent & excitable.

Sept. 25/02 Has changed to a slightly melancholi- condition - transfered to A. Dec. 29/02 Sent home today after correspondence with his people. He had improved slowly up to the time of going.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Note: Patient came in, in a strap harness: was acutely maniacal, and was incessantly struggling, according to accounts: was quiet on admission, but soon struggling again, & was put in restraint. Examination has been impracticable. He wont talk: wont eat: & has beenfed by tube. Seems in rather poor flesh, but, otherwise, fairly normal, though blue & congested, the first day, from his incessant straining & struggling. Some exhaustion is apparent. —

Personal and Medical History of Edward. B. Woods or Wood

1902

This patient was brought here by N. J. Steffen, attended by E. C. Irish, in fair physical condition, with following history of case. Many consanguinity or heredity, do not know. If first attack, don't know. First symptoms of this attack manifested on Monday, the 16th 1902, at mid night. Disease seems increasing; not variable: no rational intervals: he has quiet intervals, but not rational. Derangement now shown in that he is intensely interested in religion: incoherent, rambling: very profane and vulgar in conversation, at times: is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No previous peculiarities manifested. Do not know as to intemperance: as to any severe disease &c, or head injury, none that we can ascertain. Since this attack, has had constant care. Do not know cause of the disease, but suppose it to be family trouble: no special treatment. On personal Examination, is violent, restless; constantly talking; alternately crying: says "he is troubled on account of his sins" Has not lived with his family, for some years. Commitment recommended, because of the necessity of confinement and treatment, & because his condition is such that he needs constant care and restraint. ——— . ———

Jan 19 On admission, was put on T.W. (G.F.N.Rft: Complexion fair: hair brown-gray: eyes blue: condition of skin good: vaccination scars, left arm: several small bruises on shins: is fairly clean: several teeth out. (patient very stubborn & unable to ascertain correctly). Is very much disturbed & maniacal, by spells, on admission.

Patient answers very clearly, at most times. Says however, that the women kept saying insulting remarks to him by little children: that he went to sucker: She refused: he attempted to sit down & wait for her to come out, and was arrested. —

Personal and Medical History of Ed. Cash (Colored)

1902

This patient was brought here by Dep. E Johnson in fair physical condition, with the following history of case. No consanguinity: as to heredity unknown. This is 1st attack: - when first symptoms were manifested is not stated: he was apprehensive and disposed to injure others. Disease seems increasing: variable & with rational intervals, but these, not regular. Derangement now shown in that he believes that a woman is sending him insulting messages, and wants to kill her. Is disposed to injure others, but not suicidal: no filthy nor destructive habits. If any peculiarities previously manifested, or if any history of intemperance, severe disease or head injury, is unknown. Has been at City & County hospital several weeks. Cause of disease unknown: Treatment, none. On personal examination, is delusional & apprehensive.

June 20 On admission, was put on T.W. (S.T.A.N.R.)t. Complexion, negro: hair black-gray: eyes brown: Condition of skin fairly good: Tattoo, right fore-arm: Scars on right buttock: bruises on shins: is dirty, but no vermin; thumb, left hand, amputated: Quiet & well-behaved: (Kept q hours, first night).

June 26/02. Received on ward. Couple of vague pains & stomach trouble - No special illness noted. June 27/02 Quiet & dull - sits around in an inactive way. July 31 - No change noted. Aug. 1/02 128# Sept. 2/02 Thought himself quite sick - put to bed on D.W. Sept. 9/02 No special illness apparent. Patient is up & about. Oct. 1/02 130# Complains of stomach trouble & various minor things. Continually teasing to go home.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient, in Converse view. Claims to have learned well readily, as long as at School: Learned to drink Early & has had some sprees of late years: has drank rather hard: Claims to have worked well, until this spree: and that he, while drunk, tried to avoid meeting some people, who, seeing him, had him followed up and wrecked. Declares he did not oppose himself, this time, & make any trouble, though owning up to having done it before his first Commitment, when drunk. Declares he has never had any trouble except on account of getting drunk: his general health is good.

Personal and Medical History of Charles G. Olson
a Charles Olsen #3

1902

This patient was brought here by A. G. Smith, attended by J. P. Adolph, in fair physical condition, with following history of case. Parents or grand parents, no relations: no insane relatives: This is not 1st attack: others have occurred at variable periods, during the past 9 years: no definite duration: was sent to this, (Rochester), hospital temporary improvement, with subsequent relapse. First symptoms of this attack manifested within the past 24 hours: indecent exposure: looking in windows of houses. Disease seems decreasing: variable & with rational intervals: No regular intervals, but manifestations come on, when gets intoxicated. Derangement now shown, when under the influence of liquor, he is likely to expose himself indecently look in windows of houses, and frighten women and girls. Not dis posed to injure, but to insult others: not suicidal: has destructive & habits, when intoxicated, and his disposition to filthy habits increases with the length of time, he has been drinking. As to any peculiarities manifested, not immediately before this last attack. Patient drinks: father drank to some extent: had severe illness, when 10 years old: don't know exactly: no epilepsy: superficial scar on forehead: Was confined in County Jail 30 days, 2 years ago: & in Rochester asylum, for 3 months, one year ago. Supposed cause of the disease is Intoxication & sexual perversion Treatment has been Confinement in Jail & at Hospital for Insane, at Rochester. - Temporary improvement: not a cure. On personal examination, he does not deny charges, but claims that he does these acts, only when drunk. Physicians certify that he is insane to the extent of a sexual pervert, when under influence of liquor. - Note 2nd admission: here before from July 25-1901 to November 5-1901: & discharged May 13/02 as recovered: Form then diagnosed as "Alcoholic Insanity" - Cause, Sexual Perversion had had sexual attacks: (for further particulars see Volume 49 page 289 No 5885)

June 7/3 On admission, was put on B3 (G. H. N. Rft. Complexion medium: hair brown: eyes blue: Condition of skin, fairly good: vaccination marks on right arm: several small scars on abdomen & small of back: large scar on right temple: Teeth dirty: Teeth: 3 missing, upper: and 1, lower: Quiet, on admission: (Remarks by nurse Nissen) -

June 25/02 (Dr. Phelps) Received on ward - talks rationally has slight rise of temperature. June 27/02 Is up & about. Has seemed in fairly good health & condition. talks quite rationally. July 4/02 Sent out on trial. has been quite rational - Describes himself as having gotten along quite well, except when drinking. Is a trifle confused as to what he did when he had been drinking.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient will not say a word: seems to understand readily acts promptly & willingly, in ordinary ways. looks down usually in a mildly depressed way. Is quiet and rather inactive.
Said to have been grouing this way for 6 - 7 years: 3½ years ago, went away from home and was not seen for 3 years, when was found in a town in Dakota. How was supported is not known, but, possibly, he carried funds with him. (Over $10 is found on him at missoula). Is quite deaf.

Personal and Medical History of Peter Doran

1902

This patient was brought here by Wm Bathke, attended by James Doran, in fair physical condition, with following history of case. No history of consanguinity, nor heredity - Attack is chronic: has existed several years: no definite attack, as to time: has not been sent to hospital. First symptoms of this attack manifested about 5 years ago. Disease seems increasing: not variable: no rational intervals. Derangement now shown as nothing definite: chronic melancholia: seldom speaks, & expresses himself - Is not disposed to injure others, nor suicidal: no filthy nor destructive habits: No history of any previous peculiarities, intemperance, severe diseases &c no head-injury - Has not been restrained nor confined. Causes of disease unknown: Treatment, none - On personal examination patient is indifferent, expressionless, morose, bordering on melancholia. Note by Dr. Phelps: No work for 3 - 4 years: seemed not able: gradually stopped: mental trouble 6 to 7 years: growing deaf also: growing worse: Never active: Has been away: Went away about 4 years ago. Found recently, in Dakota, in a town 10 - 12 miles from a farm of 160 acres, which he owned there. ——— ——

June 24 On admission, was put on B[3] (E.H.N.Pst. Complexion dark: hair brown: eyes blue. Fair condition of skin: Scars: several on back of neck: one on right shoulder: two on right shoulder-blade: several on lower part of back: one small, on calf of each leg: one, small, above left knee: is very dirty: two teeth missing, upper jaw: one gold crown: others in good condition: Is very quiet: will not talk: Remarks by H. Pratt) -

June 24/02 (Dr. Phelps). Received on ward. Appears quite dull. Exceedingly despondent - Will not say a word - apparently does not hear, but obeys when motioned to. Has resumed rise of temperature. Aug 1/02 138#. Oct 1/02 137#. Very quiet & dull. rarely moves unless forced to do so.

Nov. 1 Wt. 137#; Nov. 27 Trans. to annex. Very silent; inactive; quite tidy in habits.

Jan. 31 Continues same - never speaks; sits quietly all day. Little change - no interest; eats & sleeps well; physical condition - fairly good.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient admits having Syphilis, but can't give date. Is very evidently paretic, with incoordination, grandiose ideas of wealth, tremors & stammering speech. Typical & well marked symptoms.

Personal and Medical History of Otto R. Fox

1902

This patient was brought here by Emanuel Johnson in fair physical condition with following history of case. No history of consanguinity or heredity. This is the 1st attack: first symptoms manifested 6 months ago, by delusions. Disease seems increasing: not variable: no rational intervals. Derangement now shown by his believing he is worth millions. Is not disposed to injure others, no suicidal: no filthy nor destructive habits. No previous peculiarities manifested. Patient intemperate: no severe disease &c or head-injury: has not been restrained nor confined. Supposed cause of the disease is intemperance. Treatment, none.—
On personal examination, the following noted: viz: talk about his millions going the President &c &c. (This is a pure case of Paresis).

June 25 On admission, was put on 1 W.C. (G. & U. Hosp: Complexion light: hair black.—eyes blue: condition of skin good: vaccination marks, both arms: no bruises &c noted: is clean: slight scratch on thigh: Large & distended abdomen. Remarks by Barnard)—
June 30 Not improved; has slight fever; very restless during day. Sleeps fairly well; confused & delusional; remembers nothings; thinks he is rich; does not know where he is; speech somewhat paretic; but walks quite well; will work on ward. Trans. from B 3 (no 27 ♯) to B. Tries to get out of windows & will walk away from crowd. July 4 Visited by wife. July 6 Trouble with St. J. Hope. Aug. 1 Wt. 186 ♯. Quite clean in appearance & habits; but very restless. At times noisy & destructive; noisy, confused; Sept. 17 Visited by friend. Oct. 7 Trans. to L W 6. Inflamed cheek & eye resulting from a blow received; dressing applied; Oct. 15 Kept in muffs to prevent picking face. Trans to B. Nov. 1 Wt. 197½ ♯ Nov. 5 Visited by friend. Nov. 27 same.
Jan. 31. During past two months quite troublesome; pugnacious; talks to self very demented; C.L.C.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says "was in Clarinda Hospital for 2 years, Leaving gone to Iowa to send his daughter home — from there, was to his nephews & was taken "weak" at once & sent here." Admits they talked of sending him to Fergus Falls from Brainerd (previously), but denies that he went.

Has the persistent idea that he is "Governor of the Sun a of the planet" & argues volubly but rather incoherently in support of this idea. Though illogical in this line he is fairly clear on ordinary subjects.—

Personal and Medical History of Warren W^m Cole

140

This patient was brought here by C M. Johnson, in fair physical condition, with following history of case. No history of consanguinity: This is not 1st attack- Others occurred in 1897 states: duration not stated: Has been in Hospitals at Fergus Falls and Clarinda, Iowa: result of treatment, not known: When first symptoms of this attack manifested is not known: says "that he is the Son of the Sun and owns the Planet." If disease is increasing, decreasing or stationary, is not stated- If variable, or if there are rational intervals, not known. Derangement now shown in that he has "delusions of Grandeur". Thinks he is the same as Christ and the Son of the Sun &c: Not disposed to injure others, so far as known: if Suicidal, not known: As to habits, Sobriety, &previous peculiarities, not known: his father was intemperate. Patient claims to have had a sunstroke about 5 years ago: has been in hospitals of Fergus Falls & Clarinda (Iowa). Cause of the disease, not known: only hospital treatment, as above. On personal examination, seems to be rational in most subjects, but has delusions in regard to his personal powers of control over Sun, Moon &c. Commitment recommended, because his disease is of such a nature, that he needs, for his recovery, care & treatment, while under legal restraint.

June 26 On admission, was put on B^d (G. H. N. Pt. Complexion dark: hair dark brown: eyes brown: Condition of skin, fairly good: vaccination marks, right arm: small scars on shins: scar below right ankle: is fairly clean: varicocele, left side: Quiet on admission.

June 26/02 (Dr. Phelps) Received on ward. behavior is fairly good. Insists however that he is the ruler of the earth. July 1/02 Talks to himself occasionally & is positive with regard to his delusions. July 31/02 Taken to Iowa by State Agent Gates. Has been in a fair condition; but his mental state has remained unchanged.

POLICEMAN IS ATTACKED 6/24/02

PRISONER AT RONDO STATION ASSAILS BOERNER.

Strikes the Officer With an Ink Bottle and Then Beats and Chokes Him — Boerner Jumps From a Window and Other Officers Come to His Rescue.

St Paul Pioneer Press

Lieut. Boerner of the Rondo police station had a desperate struggle with a prisoner yesterday morning, and was severely beaten. The furnishings of the office where the encounter took place were also demolished, and the walls and ceiling bespattered with ink.

David Keating, who had been employed in Nic Weller's bowling alley at Dale and University avenue, was arrested Tuesday afternoon. It was thought that Keating was suffering from the effects of drink, and he was taken to the Rondo station. Lieut. Boerner called Keating into his office yesterday morning and asked about his health. The prisoner replied sharply, and when Boerner suggested that he see a doctor Keating shouted out: "You'll see one first!"

Keating is said to have thrown an ink well at the lieutenant's head, striking him over the eye and spilling the ink over his uniform. Then

A Desperate Struggle Ensued.

Boerner was knocked down, choked and beaten about the face by the prisoner, who used chairs and everything movable in the office as weapons. Boerner managed to free himself from the clutches of his assailant and escaped through a window into the street.

Keating, it is said, again pounced upon the officer, whose calls for help were heard by Sergeant Daly and Detective McHale. The three officers overpowered Keating and took him to the county jail. 6/24/02

KEATING IS VIOLENT.

Lieut. Boerner's Assailant Sent to Rochester.

Deputy Sheriffs Ladow and Johnson yesterday took David Keating to the state insane hospital at Rochester. Keating, who was an employe at Nic Weller's bowling alley at Dale and University avenue, was arrested Tuesday when he was supposed to be suffering from alcoholism. He was taken to the Rondo station, where on Wednesday morning he attacked, knocked down and choked Lieut. Boerner.

He was transferred to the county jail, and was examined in probate court. While at the jail Keating was more noisy than violent, and gave no trouble to the officers when they started with him for Rochester.

Patient denies any great drinking at time of attack. In this attack, was by marshal & sentenced 30, after admission gradually quieting since, till he today, can answer quite clearly. Has stuck on head by Policeman's Club at age 18. ÷ 14 years ago, began to have Epileptic fits: 2 years later, was trephined for relief of fits. About 8-9 years ago, was sent to Agnews (Cal) asylum, for a similar attack. Stayed 6 weeks. He left Cal. Apl. 1 & worked his way to Minnesota: had not been in Minn. since 5 years old.

Personal and Medical History of David Keating

1902

This patient was brought here by Emanuel Johnson, attended by E. A. LaDow, in somewhat exhausted Condition, with following history of case. If any Consanguinity or heredity; if 1st attack; if any peculiarities previously manifested; any history of intemperance, severe disease &c, or head-injury, all is unknown. First symptoms of this attack manifested June 24th 1902: wandered from house to house, acting irrationally. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he acts with great violence; repeats "Hawk be a God" refuses to answer questions; does not eat or sleep. Is disposed to injure others, but not suicidal: addicted to filthy & destructive habits. Has been confined 24 hours in County jail. Cause of disease is unknown: treatment, none. On personal examination is very violent: Sleepless: does not eat: repeats phrases.

June 27 On admission, was put on I.W.C. (T. H. N. Kft: Complexion dark: Hair dark brown: eyes brown: Condition of skin good: small cut in right hand: small scar on left knee: large bruises on chest & on both elbows: is clean: Is very maniacal (remark by Steward)

June 27/02 (Dr. Phelps). Patient received on board in a maniacal state. Thinks currents of electricity are running through his body. June 30/02 Has quieted down somewhat; but is still exceedingly irritable & hard to manage. July 5/02 Struck Michael Nequeheim. Is very irritable. Aug 8/02 Taken to California by Agent Gates. Had not changed very much - was somewhat less irritable. This irritability is largely due to Epilepsy.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says "last week was slightly confused noises came in his head & he cut toward his heart, getting only a flesh wound"; says "the impulse came suddenly & he has not had it since". "Had some slight ringing in head before, but never so much as at time"; Admits some melancholy feelings.

Personal and Medical History of John Cashman

1902

This patient was brought here by J. J. McCormick, attended by Wm Cashman in fair physical condition, with following history of case. As to any Consanguinity, not that to his insane relatives. This is 1st attack: first symptoms manifested about 4 weeks ago; with fear of impending danger. Disease seems increasing; variable: rational intervals not regular. Derangement now shown in that he is despondent, and suicidal tendency: attempted suicide by stabbing himself, with a knife, June 23rd 1902. Not disposed to injure others: (attempted suicide with Knife): propensity not active now: no filthy nor destructive habits: no previous peculiarities manifested, that we can learn: No history of intemperance. Had measles in march 1902: has not been confined or restrained; but he has been closely watched, since he attempted suicide. Do not know cause of the disease: no treatment. On personal examination, patient depressed: answers questions correctly, yet wanders from subject: nervous: cold hands, quick pulse &c. Commitment recommended, because it would be dangerous to himself to have him at large, and he needs treatment while under restraint: ——— ———

June 24 On admission, was put on B3 (G.H.U.S.Pt: Complexion Dark: hair black: eyes gray: condition of skin fairly good. Birth-mark above navel: scars on 2d & 3d fingers left hand. Scar, upper lip: scar below right eye: scar, small, on back: is clean: teeth in good condition: small wound on chest, just over heart: (nearly healed): (remarks by H. Draper.)-

June 28/02. (Dr. Phelps) Received on ward. July 1/02 Stands around in a dull, despondent manner - sometimes restless. July 15/02 Usually dull & quiet. Aug 1/02 164#. Oct 25/02 Was visited by Sister.

Nov. 1/02 Wt. 187#; Dec 1 Wt. 182#; Is quiet & peaceable; works some on ward - quite untidy - little to say - indifferent. Jan 14. Visited by Mother Jan 26 Trans. to B 2.

Jan 31 Continues same - CdL

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient a young man: mental trouble said to date back for 2 years, during which time, he has not worked much. Says his mind "goes wrong": has to "hold hard" to keep himself straight: his talk is rather incoherent, at times, seems rather demented or feeble in action than of any acute character. Onset was probably gradual. Seems, physically, quite healthy.

Personal and Medical History of Charles Hodum

1902.

This patient was brought here by Emanuel Johnson, in fair physical condition with following history of case. No history of consanguinity: but father disease - This is 1st attack: first symptoms manifested 2 years ago: insomnia, confusion delusions of persecution. Disease seems increasing: variable with rational intervals but these, not regular. Derangement now shown in that he believes women are after him all of the time: forgetfulness: insomnia. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No peculiarities previously manifested. no history of intemperance: had injury to left frontal bone at about 13: has not been restrained nor confined. Cause of disease, not stated. Treatment, sedatives. On personal examination, there is noted dry thin hair: acceptance of unusual conditions, without comment.

July 3 On admission, was put on B3 (G.H.N.K.P.H. Complexion medium: hair brown: eyes gray: skin in good condition: vaccination mark on left arm: small scar left side & small one over left eye: scar, one inch long, on forehead: is clean: teeth: are missing, upper jaw: rest in good condition. Remarks by H. Paafot) July 1/02 (Dr. Phelps) Received on ward. July 6/02 Patient has been quiet - indifferent - rather silly in manner. health good - Aug. 1/02 Quiet & well-behaved - rather dull - but answers questions quite well. Sept. 29/02 Sent home on trial - has improved quite a good deal; altho' occasionally rather childish in manner.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient's sister was here, as acute Insane Mel - in 1888. Has recovered and has since married & left well. His father committed suicide at about age of 50, after having previously been depressed & insane for some time.

Patient is today, fairly rational in manner, though showing a little childishness in talk, that is probably below normal. Admits the depression & the attempt at suicide. In good physical condition, but very hypochondriacal.

Personal and Medical History of Charles H. Lenton

1902

This patient was brought here by Sheriff Vine, attended by Dr. Fawcett & E. J. Lenton. in fair physical condition, with following history of case. As to consanguinity, do not know: father insane: committed suicide at age of 52. This is not 1st attack. one occurred 2 years ago, duration 6 months: have been treated at home. First symptoms of this attack manifested one year ago: (in what way, not stated): Disease seems increasing: rational intervals: the attacks of melancholia are periodic, more, less: attacks are more intense in morning: Derangement now shown in that he fears the loss of property: not disposed to injure others, but is fearful he will: he has attempted suicide, and propensity is now active: no filthy nor destructive habits. no previous peculiarities manifested: no history of intemperance: fell from a tree in 1898 & injured back: has not been restrained or confined. Supposed cause of the disease is heredity: treatment given to relieve insomnia, to relieve obstipation and indigestion. On personal examination, the following facts learned: rational intervals are very clear: mind is then good, but melancholia develops, very acute, and periods of depression lead to contemplate suicide. ——— ———

July 3 On admission was put on B3 (G.H.D. Hosp.) Complexion dark: hair black - gray: eyes brown: 4 vaccinations marks, right arm: scars: one on left hip: one on right hip - Eruptions all over body: is clean: Teeth: 11 good: 4 stubs, upper jaw: 12 good on lower jaw: scars: one on right thigh: one on forehead: cervical small, in abdomen. and several small, on back. (Remarks by H-Boapst.) ——— ———

July 3/02 (Dr. Phelps). Received on ward. Apparently quite rational but rather obstinate & notional. Has been rather despondent, but fairly rational in most of his talk. July 23/02 Visited by sister. July 27 Visited by brother. Aug 10/02 Taken home. Altho he does not seem fully recovered yet is disposed to put away his despondent ideas and is much better.

This man seems to have been peddling, till his peculiar talk interfered - He usually refers to himself as a third person named "Michael" and will be heard giving "Michael directions to do so & so. The effect is sometimes very peculiar.

Personal and Medical History of *Michael Brofey*

1902

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case. No history of Consanguinity or heredity. This is 1st attack: first symptoms manifested month ago: imagines he hears threatening voices. Disease seems increasing: not variable: no rational intervals: Derangement now shown by delusions: "thinks people want to injure him": Not disposed to injure others, nor suicidal. Is destructive of clothing. Don't know as to any previous peculiarities. No history of intemperance, nor of any severe disease &c, or head-injury. Has been confined in County Jail, one week. Cause of the disease is unknown. Treatment, none. On personal Examination, there are noted the following: rambling Conversation; meaningless answers to questions. ——— .———

July 7 On admission was put on B3 (G.H.N. R'ft. Complexion Sandy: hair Sandy (bald)- Eyebrows. Condition of skin fairly good: 2 vaccination marks, right arm. Is everybody scarred, about arms and legs: (patient claims to be the result of a boiler explosion): also several small scars on back. Hernia: very large operation-scars. Is very dirty. Teeth very few + all stubs. Right arm amputated about 4 inches below Elbow: 4 fingers of left hand amputated. (Is talkative and delusional). ——— .——— .———

July 7/02. (Dr. Phelps) Received on ward. July 21/02 During the 14 days just passed, patient has been mildly incoherent - has peculiar notions & delusive ideas. Aug 2/02 Weight 178#. (C.H.C.) Aug 21 Trans. to B'. Noisy, restless; talks to self; At times pugnacious; refusing sleeping medicines. Sept. 1 Wt. 180# Nov. 1 Wt. 179# During Sept. & Oct. restless nights; noisy; talks, very profane & abusive. Dec 1 Wt 185# Continues as above.

Jan 31. Very little change. Restless at night. Noisy & abusive.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient has been teaching music in town. For a few days, before admission, seemed a little Eccentric excitable: but, on day of admission, became rapidly more maniacal & confused: was slightly hysterical in manner, at this time, and passed into a fairly typical acute mania.

Personal and Medical History of Lucius W. Anderson

1902

This patient was brought here by Sheriff E.H. Vine in fair physical condition with following history of case: As to any consanguinity, do not know. No history of heredity. This is not 1st attack: in May 1900 1st attack: 2nd in May 1901: duration of 1st, one month; of 2nd one year: during 1st attack was sent to City Hospital, St Pauls & during 2nd, was at Rochester Hospital for insane: benefitted by treatment. First symptoms of this attack manifested July 10-1902, by maniacal excitement. Disease seems increasing; variable: Derangement now shown in that he is incoherent irritable. Is disposed to injure others, but not suicidal: no filthy or destructive habits. Do not know of any previous peculiarities: is intemperate with tobacco. Says he suffered from nervous prostration. Has been confined for one year. Cause of disease not known: treatment not known. On personal examination, is delusional, irritable and irrational. Note. 2nd admission here: was here before from May 16-1901 to May 24-1902, and discharged on latter date, as recovered: Form then diagnosed as "Simple Mania". (See Vol 49 p137 No 1821)

July 10 On admission, was put on T.W. (G.H.N. Rpt) Complexion medium: hair brown: eyes brown: condition of skin good: small mole on cheek: is clean: Teeth: one gone, left upper: one gone right upper: one, right lower: bodily peculiarities, none noticed: behavior excited, and incoherent; at times: seems to have lost considerably in flesh, since having been admitted 6th inst (7th)

1902 July 10/02 Admitted on Ward. Temperature slightly elevated.- Is restless and noisy. July 24/02 During the period just past, has been restless and disturbed. Aug. 21/02 Has been in bed most of the time. Given clothes today and is up - Behavior is very uncertain. Sept. 25/02 Still uneasy - Removed to B° Nov. 1/02 Wt. 153#. Has become rather dull in manner, untidy & careless. Does not move unless forced to do so.

1903 Jan. 31 Patient is in bed most of the time - dull, listless and inactive.

Personal and Medical History of Judson Lettell

1902

This patient was brought here by Sheriff G.G. Dickman, attended by Robert Ross, in fair physical condition, with following history of case. No history of consanguinity nor of heredity. This is 1st attack: first symptoms manifested June 20-02: he imagined enemies were going to hurt him; attempted suicide by cutting throat. Disease seems increasing: variable & with rational intervals: but these not regular: part of time only, is rational. Derangement now & hours in that he imagines some one will hurt him; that some one is after him. Is not disposed to injure others: attempted suicide by cutting throat: propensity not active, now: no filthy nor destructive habits. Previously, was under impression that people supposed him a mind-reader & would injure him: Talks & drank: No history of any severe disease &c, or head-injury: Has been watched for 4 weeks. Supposed cause of disease is family-troubles. Treatment, none. On personal examination is nervous, and does not wish to keep quiet: Cannot to occupy himself.

July 15 On admission, was put on T.W: (G.H.R.P.St: Complexion medium: hair gray: eyes blue: Condition of skin, fairly good: several small scars on knees: is dirty: Teeth, poor condition: one missing, lower: two crowns: Wound on right side of neck, from attempted suicide. Behavior quiet, on admission. Remarks by (O.E.B)—

July 15/02 (Dr. Phelps) Received on ward- seemed very quiet and inactive.- rather melancholy – answers questions quite well.- Has sore on his neck, which has been dressed daily. Aug. 1/02 Patient is quiet & well behaved. Oct. 15/02 Talks to himself and is rather despondent. Jan. 27/03 Patient now talks so much to himself as to considered noisy in character.

HENRY GALLICK,
COURT COMMISSIONER,
RAMSEY COUNTY,
26 COURT HOUSE.

ST. PAUL, MINN. July 16 1902

Dr Kilbourne
Dear Sir, I am sending in
day Louis Gotlick to the hospital -
Please give him all the freedom
you can as his parents are known
to me.
Any thing you can do for him
will be appreciated by me.
I beg to remain
Yours very truly,
Henry Gallick

Patient will talk very little: talks English very imperfectly: at any rate, seems depressed. Seems to have recently come from California: seems dull, absd. Lies quietly in a sluggish, indifferent fashion. No delusions noted, but seems afraid to eat.

Personal and Medical History of Louis Gottlieb

1902

This patient was brought here by Emanuel Johnson, in fair physical condition with following history of case. No history of consanguinity, nor heredity. This is not 1st attack: one occurred four months ago: duration 3 months: was sent to hospital at Stockton California, 3 months; result of treatment, improvement. First symptoms of this attack manifested four months ago by depression. Disease seems increasing; not variable: no rational intervals. Derangement is now shown by mental depression; sluggish reflexes. Is not disposed to injure others. Has attempted suicide by hanging: propensity not active now: no filthy or destructive habits: No previous peculiarities manifested: No history of intemperance, nor of any severe disease &c, nor head-injury. Has not been restrained or confined. Supposed cause of the disease is heredity. Treatment has been home care only. On personal examination no further facts seem to have been brought out.

July 16 On admission, was put on I.W.E. (G.H.A. Dpt. Complexion medium; hair dark-brown: eyes gray: condition of skin dirty, rough: 2 vaccination-marks (right and left arm)- pimply rash on arms & legs. Is dirty: 3 large warts middle finger, right hand: one large wart, palm left hand. Teeth in good condition. Is quiet and rather stupid.—

1902 July 16/02 Received on ward. Seems to have ideas of a religious character. Is able to answer some questions quite well. Aug. 1/02 Wt. 134#. Is rather dull and melancholly most of the time. Jan. 1/03 Rather more confused than he was. Somewhat silly in his manner.

1903 Jan. 31 No special change has been noted.

Personal and Medical History of Ole Peterson #2

1902

This patient was brought here by Dr. J.L. Millett, in fair physical condition, with following history of case. As to consanguinity, not stated: if any insane relatives unknown. If 1st attack, not stated: Duration, since entry to prison: First symptoms of this attack manifested about 1½ years ago: imaginary trouble: persecution: Disease seems increasing: not variable: no rational interval. Derangement now known on the subject of "Electricity running in head". Is not dis posed to injure others. Has attempted suicide, by cutting wrists: propensity active now. Is of filthy and destructive habits. If any previous peculiarities manifested, unknown: if any history of intemperance, unknown: if he has been subject to any severe disease &c or head-injury, unknown. Has been confined in Prison Hospital 4 months. Cause of disease unknown. Treatment by prison Physician. On personal examination, there are noted General imbecility: restless fingering of head: is non communicative. ———

July 8 On admission, was put on B3 (G.H.N. R/pt. Complexion medium: hair brown: eyes blue: Condition of skin fairly good: vaccination mark, left arm: small scar: right breast: small scar, left instep: Is clean; Complains of sore penis: Same slightly discolored and inflamed. Behavior, very quiet: non-communicative. — two scars also noticed, across left wrist). ——— ——— ———

July 18/02 (Dr. Phelps) Received on ward. Urinates on clothes & himself. Aug. 1/02 Is daily untidy — laughs in a silly way. Talks very little. Oct. 12/02 Continues to be filthy & inactive.

Nov. 1 Wt. 116#. Dec. 1 Wt. 112#. Eats poorly; inactive; no talk; habits filthy. Dec. 18 Trans. to Annex.

'03 Jan. 31 No change noted.

Patient talks quite freely, at time of examination. Is anxious to go right home. Insists is all right now. Was depressed, at home: Can't give good reason for so being. Varies some in mental state: while here, is more clear, at times, than at others.

Personal and Medical History of Frank Barry

1902

This patient was brought here by Chas. Mesgen, attended by Mrs. Leehy, in fairly good condition, with following history of case. Don't know as to consanguinity or heredity. this is not 1st attack; one occurred about nine years ago, following typhoid fever. Duration about six weeks. was not sent to hospital. First symptoms of this attack manifested about one week ago. disease seems increasing. variable & with rational interval, but these, not regular. Derangement now shown by delusions: believes that different people wish to injure or kill him. hears voices. Is not disposed to injure others, nor suicidal. no filthy nor destructive habits. No previous peculiarities manifested. Patient temperate. Don't know about the parents. Don't know if he has been subject to any severe disease or, or head-injury. Has not been restrained or confined. Don't know cause of disease. Treatment, none. On personal examination, facts learned, negative. ——— ——

July 23 On admission, was put on T.W. (S.H.N.R.R.). Complexion dark. hair dark-gray. Eyes blue. Condition of skin good. vaccination marks, left arm. small scar over left eye. bruise on great toe, left foot. is fairly clean. Teeth. has 5 on upper jaw and 10, on lower jaw. Was quiet on admission (slept 3 hours, the first night). —

July 23/02 (Dr. Phelps). Received on ward. Aug. 5/02 During the two weeks has been quite maniacal. Threw himself about and was very restless. Aug 23/02 Has quieted down — given his clothes. Aug. 29/02 Was visited by sister. Patient has become very melancholy. Oct 10/02 Has been very inactive — uncertain in behavior. Jan. 1/03 Weight 142#

1903 Jan. 31 - Is not so depressed but, at times, is very silly in manner.

Patient quite sensitive: seems fearful & confused. very sluggish about answering, but seems to comprehend questions. seems to claim that "head is wrong & confused", but "that he can't help it" —
Mental state shows a gross confusional state.

Personal and Medical History of William Mc Laughlin

1902

This patient was brought here by Deputy Wm Laird, attended by W. H. Ellis, in fair physical condition, with following history of case. No history of consanguinity nor heredity. This is 1st attack: first symptoms manifested about four months ago: by nervousness, and loss of memory &c. Disease seems increasing: not variable: no paternal intervals. Derangement now shown by hallucinations, and tendencies to self destruction. Is not disposed to injure others. Has attempted suicide, in various ways & propensity active now: no filthy nor destructive habits. No history of any previous peculiarities, Intemperance, nor any severe diseases &c, no head-injury. Has not been restrained nor confined, but has had close watching by nurses, for 2 months. Supposed cause of the disease is close application to business. Has been given sedative treatment: nil. On personal examination, is very nervous, and constantly moving around: does not seem to recognize most intimate friends: refuses to answer any questions & in constant fear of some enemy: Commitment recommended because he needs treatment and constant care, while under legal restraint. ———

July 24 On admission, was put on TW E (G H N. R/pt. Complexion dark: hair, black-gray: eyes blue: Condition of skin, scaly, rough: Eruptions on body, shoulders & arms: 2 small boils under right arm: is rather dirty; slightly stoop-shouldered: teeth very poor, mostly stubs: was confused on admission). ———

1902
July 24/02 (Dr. Phelps) Received on ward — quiet and melancholy. Eats only when forced to — will say very little. July 29/02 Was rather noisy for a couple of hrs — Wants to be killed." Is agitated. Aug. 4/02 Was visited by son. Aug 26/02 Patient has been in bed. Was today gotten up — rather more active. Aug. 29/02 — Visited by sister. Sept. 10/02 Visited by wife and daughter. Oct. 18/02 Visited by sister. Nov. 4/02 Visited by wife and daughter. Dec. 18/02. Visited by son. Jan 14/03 Visited by wife.

1903
Jan 21. Still rather mildly melancholy and dull — has agitated spells; but usually quiet & well behaved health quite good.

Patient markedly imbecile: has thick tongue: high arched palate — thuggish speech: hard to understand: peaked face & shuffling gait — Is not able to give us any history of himself —

Personal and Medical History of Olaf Haugstad

Personal and Medical History of

1902

This patient was brought here by Sheriff F. H. Evans, attended by Nels Haugstad in fair physical condition, with following history of case. No history of consanguinity nor heredity. This is not 1st attack; the first, four years ago; duration about 2 weeks; was not sent to hospital. First symptoms of this attack manifested in the middle of May, got restless and sleepless. Disease seems increasing; variable; paroxysmal intervals not regular. Derangement now shown by running away from home; does not sleep unless under influence of strong narcotics; have to be watched all the time; disposed to injure others, but not suicidal; unmodest, destroying clothing & furniture. Has been weakminded from birth. No history of intemperance, nor of any severe diseases nor head-injury. Has been confined; shut up in the room, at night. Cause of disease, unknown. Has been treated by Sulphonol, bromides & Chloralhydrate; a little relief. On personal examination, is stupid; imbecile; slow in conception; talks slow & quits - particularly among strange people. Commitment recommended because of subdivision 2 & 3 in Section 17.

July 29 On admission, was put on B 3E (G.H.N.R.H.). Complexion light; hair light; eyes blue; condition of skin fairly good; no marks, scars or bruises noted. Is dirty. Teeth: one missing and 2 stubs upper; 2 missing, lower jaw; the rest in good condition. Was quiet at admission.

July 29/02 (Dr. Phelps) Received on ward. Slightly despondent very stupid. Imbecile in appearance. Aug 12/02 During the 14 days has changed little. Sept. 2/02 Visited by father and taken home, his father thinking that he now perhaps could get him to mind sufficiently to keep him.

Nov. 4. Returned by father; Nov 5. Visited by father & friend. Nov. 24 - B 2. Quiet; peaceable wanders about aimlessly; imbecile & silly; Jan. 17. As above. Home with brother.

Was at work in quarry, cutting open 3 weeks ago: had a sudden bad feeling in chest or back, & afterward a headache & sounds in the Ears. The next night, while soaring, he thought he heard singing. Was, a day or two later, sent to C&C hospital. After 3 days there, during which he showed certain spells of activity & violence. When out of these spells, can reason about the hallucinations, but can't quite give them up. They keep coming back with force, again —

Personal and Medical History of *Frederick Petersen*

1902

This patient was brought here by [Henry Lang], attended by Lewis Mead, in fair physical condition, with following history of case - No history of consanguinity nor heredity. This is 1st attack: first Symptoms manifested July 28th 1902: Delusive Disease seems Decreasing: variable & with rational intervals, but these irregular intervals. Derangement now shown by Delusions of persecution. Is disposed to injure others, but not suicidal: disposed to destruction of clothing. On certain occasions, manifested a violent temper. History of intemperance in use of alcohol: has not been subject to any severe disease or new head-injury: Has also been confined in County Jail, one day. Supposed cause of disease, Alcoholism. Treatment, none. On personal Examination, no further facts seem to have been learned. Examiners certified that he was a "proper case for Detention Hospital", and he was committed thereto on 29th day of July 1902: and thence duly committed here.-

July 29 On admission, was put on W. & G. A. N. Ward. Complexion fair: hair light brown: eyes blue: condition of skin good: vaccination marks, left arm: Scars: one, right fore-arm: one, right hand: two, left thumb: one, right side forehead: one at top of head.- small bruises on breast, right hip and both legs: is fairly clean: left thumb deformed. Teeth: one missing, upper: and 2, lower Jaw. (Marks) Birth mark in right axilla: wart on left side of neck: was quiet on admission).-

July 1902 29/02 (Dr Phelps) Received on ward. Patient thinks he hears voices calling to him & is rather restless & inclined to be violent. July 30/02 Put in restraint sheet for 10 hrs. Aug. 1/02 Rather more quiet today. Aug. 2/02 Still improving very rapidly. Does some redding. Aug. 4/02 Given his clothes - appears quite rational. Aug. 8/02 Visited by his brother and given parole. Aug. 26/02 Today sent home on trial. Has improved quite rapidly since his attack of Acute Mania.

Personal and Medical History of Albert S. Taylor

A fourth case before the commissioner was that of Albert S. Taylor, a barber at the Ryan hotel, who has been suffering from the effects of a paralytic stroke about two weeks ago. Taylor was brought before the commissioner for commitment on testimony of Doctors W. D. Kelly and John T. Rogers, but owing to the absence of Dr. Kelly the papers could not be made out, and he was sent back to the city institution until to-day. He lives at 984 Idlehart street, and has a wife and three children.

1902

This patient was brought here by Emanuel Johnson, attended by C. A. Storms, in poor physical condition, with following history of case. No history of consanguinity nr heredity. This is 1st attack: first symptoms manifested 18 weeks ago: Epileptiform seizure. Disease seems increasing: variable & with rational intervals: but these, not regular. Derangement now shown in subject of sexual insufficiency & worries of business. Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No peculiarities previously manifested. No history of intemperance. Has had Epileptiform seizure: no head-injury: has not been restrained or confined (?); has been in Detention Hospital since July 15th-02. Supposed cause of the disease is (1) sexual insufficiency and worries over business. Treatment has been rest from business and ~~rational~~ (?) medication. On personal examination, facts learned, none — Note. Patient was, on the 15th day of July 1902, committed to "Detention Hospital": and, not having improved there, is now sent here, for treatment and care —

July 30 On admission, was put on T.W.E. (G.H.N.R.R.). Complexion medium: hair brown: eyes blue: condition of skin good: vaccination marks, left arm: Eruptions on buttocks: Is clean: Teeth good: Behavior quiet: Is weak & unable to walk alone). —

July 30/02 (Dr. Phelps) Received on ward. Aug. 16/02 Refuses to eat, and has to be fed by tube. Sept. 1/02 Refuses nourishment — has to be fed regularly by a tube, altho apparently rational — is extremely obstinate. Sept. 19/02 Visited by wife. Oct 1/02 Still restless - still refuses to eat. Nov. 30 Still fed by a tube — No change in condition tho' losing somewhat in strength. Dec. 31/02 Now has bed sores and has failed a good deal.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is said to have had a series of convulsions, just before coming to have been maniacal, confused & hard to handle. His previous mental state we do not know, but his state now, after the fits, is one of great mental sluggishness. —
Can say very little: one idea is a long time in finding expression.

Personal and Medical History of George Durkee

1902

This patient was brought here by Sheriff Vine, attended by Lon Risley, in fair physical condition, with following history of case. Do not know as to insanguinity: no history of heredity: this is 1st attack: commenced with Epileptic Convulsions, 3 days ago. Disease seems increasing: not variable: no rational intervals: Derangement now shown in that he has had Epileptic Convulsion for a year: was feeble-minded for about two years previous. Is not disposed to injure others, nor suicidal; no filthy nor destructive habits: was feeble-minded for about two years previous to this attack. No history of intemperance. Probably subject to Epilepsy: has not been restrained or confined. Do not know Cause of disease. As to any treatment, do not know. On personal examination, it is learned he has suffered from paralysis of right side, for two years. Is very much confused, at this time: desires to escape from friends. ———

Aug 4 On admission, was put on B3 (G.H.N.R.Ft): Complexion dark: hair dark-gray: eyebrows: condition of skin fairly good: scars, right hip, right arm, over right eye: some small pimples on body: small bruises on left knee and back right hand: no hernia: no vermin; is fairly clean: Teeth: 1 missing, lower: rest good: appears to be slightly affected, right side (paralyzed?): T 100 4/5 88-22)-

Aug 4/02 (Dr. Phelps). Received on ward - rather lame - cannot walk well. Aug. 6/02 Somewhat confused. Up and dressed. - Wanted to go home. Aug 7/02 More confused. - pulled stand to pieces. Dull & irritable. Aug. 18/02 Has been more quiet and stable in behavior. Aug. 20/02 Visited by friend. Sept. 12 Visited by friend. Sept 18/02 Convulsion. Sept. 28/02 Convulsion. Oct. 16/02 Convulsion. Oct 30/02 The patient comes here as an epileptic. From what account we have seems to have been rather quiet and dull in early life; but to have recently had convulsions. They seem rather infrequent. Nov. 1 Wt. 204#. Dec. 1 Wt. 206#. Dec. 12 To B2. Quiet; tidy; no work; converses freely & rationally but slow & dull; stoical in manner

Jan 31 03 No change. Is epileptic but no fits for long time. CLC

Patient answers quite clearly. Says "Drinks a good deal & was sent down here to sober up." He says himself that his family abused him; that dishes were thrown &c.
No delusions are noted, that can be proven such. —

Personal and Medical History of Henry Fehrmann

1902

This patient was brought here by E. Johnson, in fair physical condition, with following history of case. No consanguinity but mother is "queer". This is 1st attack: first symptoms manifested one year: abusive and threatening to family: Disease seems increasing: variable & with rational intervals; but these, not regular. Derangement now shown as subject of family troubles: threatens to kill family: Insomnia: restlessness. Is disposed to injure others, but not suicidal: no filthy or destructive habits. No previous peculiarities manifested: no history of intemperance (?) Has not been subject to any severe disease &c, or head-injury: Has not been restrained or confined. Supposed cause of the disease is alcohol: no treatment has been pursued: On personal examination, there are evidences of alcoholism; tremor.-

Aug 6 On admission, was put on B 3 E (S. & N. R. Ft. Complexion fair: hair, brown gray. eyes blue: Condition of skin fairly good. vaccination marks, left arm: few small scars on hands: eruptions on face: is fairly clean: Teeth: 4 missing upper jaw: has only 2 stubs and 3 teeth, on lower jaw. Quiet & well behaved.

Aug. 6/02 (Dr. Phelps) Received on ward. Talks quite freely. Does not seem especially confused.

Aug. 13/02 Commenced to work in shop with the shoemaker. Sept. 10/02 Sent him to St. Paul on trial; it being judged that his trouble was mostly due to drinking, and of a temporary character. He has been fairly well while here.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient was here before. Is very dull + sluggish, but there is no active trouble + no prominent delusions. Sits about carelessly and indifferently: answers dully + evasively. Can get no very clear account of his past, though he seems intelligent enough to give it.

Personal and Medical History of Gustaf Knudson

1902

This Patient was brought here by Frank Collins, attended by L. Braill, in fair physical Condition, with following history of case - No history of consanguinity: but Some of Heredity; one sister insane. This is not 1st attack: one occurred in 1900. was sent to Rochester Hospital, Minn: First symptoms of this attack manifested in 1899. Disease seems Stationary: not variable: no rational Intervals: Derangement now shown in that he talks to himself, and has threatened injury to others. - Disposed to injure others, but not suicidal: no filthy nor destructive habits. No previous peculiarities noted: father intemperate: has not been subject to any severe disease &c, nor head injury: has confined in Rochester Hospital, 1 year, 4 months. Cause of disease unknown. Treatment, none, excepting in Hospital: On personal Examination, is morose and will not talk. — Note: Here before from July 11 - 1900 to November 9 - 1901, & is charged July 9/02, as Improved. Form, then, was acute melancholia. (See Vol 47 Pag No 1823)-

Aug 11 On admission, was put on B3E. (G. Hn Pt. Complexion medium: hair brown: eyes blue: condition of skin good: 2 vaccination marks, left arm: 2 small scars left knee; one, right knee: is clean: Teeth: 2 missing, upper: 2 missing, lower: rest in fair Condition. Quiet & well behaved, on admission). —

Aug 11/02. (Dr. Phelps) Received on ward. Patient is quiet; stands around in a dull, listless way. Aug. 22, 02 Still stands around in a dull, listless manner. It was transfered to the annex. Oct. 31/02 Is working on the farm.

Nov. 1 Wt. 165#; Jan. 31 No change; works in horse barn; quiet; peaceable; habits cleanly; seldom talks unless urged to do so - then in a half-hearted way. Appears contented with his surroundings. C.L.C.

Patient is of rather mountain temperaments: has nervous & agitated spells: Large & strong: has been kept in bed: talks little & in a sluggish evasive manner; though what he says does not indicate clear delusions, yet he is very dull —

Personal and Medical History of Henry Gentz

1902

This patient was brought here by Sheriff Geo. Freer, attended by Henry Pagel, in fair physical condition, with following history of case. Dont know as to any consanguinity: as to heredity, not as far as known. This is not 1st attack: one occurred about 20 years ago: duration, 2 weeks: was not sent to hospital: first symptoms of this attack manifested (9th question), August 5th 1902: excited, restless: hallucinations: incoherent speech. Took a gun and shells & threatened to kill a person. Disease seems increasing: rational intervals: but three, not regular. Derangement now shown as stated in 9th Question: Is disposed to injure others, but not suicidal: no filthy nor destructive habits. No history of any previous peculiarities &c, intemperance, severe disease &c, nor head-injury. Has not been restrained nor confined. Supposed cause of the disease is Sunstroke. Treatment, none. On personal Examination is very excitable, and restless, and does not know what he is about. ——

Aug 17 On admission, was put on I.W.C: (T.H.N. 1/10. Complexion medium: hair gray: eyes gray: Condition of skin good: one scar on left cheek bone: one over left eye: is clean: Teeth: has 7 in upper Jaw: & four in lower Jaw: Rather confused & violent on admission: quieted, and slept all night, first night) ——

Aug 12/02 (Dr. Phelps) Received on ward. Is rather dull and confused, also stubborn. Aug. 26/02 Given his clothes Sept 10/02 Is noted as being very restless again. Weight 194#. Oct 1st Has been noisy & restless the greater part of his stay here.

Nov. 1 Wt 203. Nov. 11 Visited by wife brother & brotherinlaw. Nov. 12 By wife Nov. 15 By friend. Dec. 1 - Quite noisy & restless during past month - converses sillily & incoherently; peaceably inclined. Dec. 2 To B'. Has become violent & troublesome. Jan. 1 Wt. 202#, Jan. 21. Visited by friend & wife

Jan 31. Little change; talks irrationally; sits about idly - seems to care little if he goes home or not. &c.

Patient talks promptly & clearly. Gives no delusive ideas mental, in answer to questions concerning sleep, he says he does not sleep well, because afraid he is going to be killed. Is quiet & fairly cheerful & seems to have this fear, at time of examination. —

Personal and Medical History of *Philip Lace*

1902

This patient was brought here by J. J. Griskolm, attended by R. B. Christy, in fair physical condition, with following history of case. No consanguinity: but one cousin insane: an uncle, a simpleton. This is 1st attack: first symptoms manifested about one year ago: since, was cross & irritable. Disease seems increasing: not variable: no rational intervals: Derangement now shown by hallucinations: Is not disposed to injure others, nor suicidal: no filthy nor destructive habits. No history of any previous peculiarities, intemperance, severe disease &c, no head-injury. Has not been restrained or confined. Do not know cause of disease. Treatment, none. On personal examination, imagines that some one wants to destroy him and his father & mother. Says "he is troubled with enemies, every night: he is positive he and his parents are going to be killed this fall & that he cannot make his parents realize it." Has dull pains in his head & cannot sleep. Commitment recommended because of the necessity of restraint and treatment & because it is not safe to have him at large: there is danger of him injuring others. —

August On admission, was put on B3-6 (G. H. N. Hft: Complexion dark: hair dark brown: eyes brown: Condition of skin good: no marks noted: is clean: teeth fairly good: 2 missing lower: has a spot of sunburn on left shoulder-blade, about 2½ inches diameter. Quiet and well-behaved on admission. —

Aug 14/02. (Dr. Phelps) Received on ward - quiet, neat and well behaved; rather dull & reserved. Aug. 19/02 Visited by father. Aug. 17/02 Visited by sister & mother. Is well behaved, quiet & dull. Oct. 18, 02 Visited by brother-in-law. Nov. 25/02 Visited by father. Jan 23 Visited by his stepmother — Usually answers questions well but is reserved and indifferent. Is occasionally seen laughing to himself.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient was quite agitated & rather incoherent in talk, at time of coming in. Today, he is fairly quiet & composed. — Answers questions fairly well. Realizes his not well.

1902 Personal and Medical History of *Thomas. W. Campion*

This patient was brought here by Sheriff Vine, in fair physical condition, with following history of Case. No consanguinity nor heredity. This is 1st attack. Duration 2 years: was not sent to hospital. First symptoms of this attack manifested 2 or 3 years ago: (in what way, is not stated): Disease seems increasing? Variable with rational intervals, but these not regular. Derangement now shown by inordinate anger: extreme irritability; only threats to injure others: not suicidal: no filthy nor destructive habits. No previous peculiarities noted: Alcoholic intemperance father. No severe disease, only asthma. No restraint or confinement have been employed, but he has been watched. Do not know Cause of disease. Treatment none, only by Dr. Kroeger S. D. On Personal Examination, there are noted Cervical tenderness, passive Congestion of brain. Pulse 100. Intermittes. ——— .. ———

Aug 15 On admission was put on B.3 E. (5 ft 4th Rpt. Complexion medium, hair brown: eyes brown. Condition of skin fairly good: Scars: one on left thigh: one on right foot: one just below left knee: several small scratches about arms & shoulders: fairly Clean. Teeth: has 6 teeth in lower jaw: 7 missing upper jaw: Is much disturbed and frightened) ——— .. ———

Aug. 15/02 (Dr. Phelps) Received on ward. Patient is rather dull and confused as to why he is here and what is the matter. Sept 1/02 Has been visited several times by relatives who live near here. Is careless and dull - irritable - asks to go home. Oct. 6/02 Attempted to elope and was violent. Oct. 27/02 Taken home on trial.

Patient an Imbecile; wont talk this morning; cannot give much account at any time. Does not have the typical Imbecile expression, but has a broad round face.

Personal and Medical History of Louis Boysen.

1902

This patient was brought here by Joel Tucker, attended by John Lee, in fair physical condition, with following history of case. No consanguinity: Father intemp, for a short time, 8 or 10 years ago. Not 1st attack: one occurred four years ago: duration about 2 years: was sent to State Hospital, Rochester, Minn: discharged in February 1900. Cannot ascertain when first symptoms of this attack were manifested: disease seems increasing: not variable: no lucid interval: Derangement now manifested by restlessness: not disposed to injure others, but family are afraid of him. Disposed to filthy & destructive habits: not suicidal: No previous peculiarities noted, that we can learn: not intemperate: has not been subject to any severe disease or a head-injury. Was confined in State Hospital, Rochester, from October 1898 to February 1900. Cause of disease, unknown. Treatment only in Hospital. On personal examination, patient more morose & ungovernable: will not converse: appears sullen & will not answer any questions: From others it is learned he is given to smashing windows and wandering about. (Commitment recommended by Physicians)- Note: 2nd admission: here before from October 21-1898 to November 3-1899; and discharged February 7-1900, as improved. Form then Diagnosed as "Imbecility": accompanying bodily disorder, intestinal indigestion, which was also given as "Cause Exciting": Was then suicidal, by drowning.- (For further particulars See Volume 41 page 137 Number 5164)-

Aug 16 On admission was put on B3E. (G Hn Rpt. Complexion medium; hair brown: Eyes blue: Condition of skin, fairly good: vaccination marks right arm: several small scars on back; one on calf, left leg: is fairly clean: Teeth: one missing, lower jaw: the rest in fair condition: Very quiet and non-communicative on admission).

Oct 1/12 Wt. 142#. Oct. 14. Visited by friends. Has been dirty, noisy, restless; seldom talks. Has gained in weight.

Nov. 1 Wt. 148#. Nov. 22 To annex. Sits about in indifferent way; does not speak; habits filthy.

'03 Jan 31. No change noted. C.L.C.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Says just got back from a visit East: Was in Albert Lea, Wednesday last came to Minneapolis: Went to work Friday, from house to house, repairing. Saturday afternoon went down $50.00 Had been drinking some, some one snatched it away: he got it back: then others got at him: They must have taken it away: got him drunk & put him on board of train. He says he don't remember much, after he snarled over the money. Says "there is a bad gang up there". This the first time he was ever arrested. (This is his account: though this is clearer than yesterday — he is yet not very clear) —

Personal and Medical History of *William Daly.*

1902

This patient was brought here by C. M. Wilkinson, attended by Harry Gelup, in fair physical condition, with following history of case. No consanguinity: acto any heredity, not stated. This is 1st attack: first symptoms manifested Yesterday, as far as known: he now claims he is in Minneapolis. Disease is stationary, as far as known: if variable & with rational intervals, not known. Derangement now known in that he appears lost: does not know where he is: He is a stranger here, and there is no history to the case. Is not disposed to injure others. Do not know if suicidal, if of filthy or destructive habits, if any previous peculiarities manifested, if addicted to intemperance, if subject to any severe disease &c or head injury, or if restraint or confinement has been employed — Do not know cause of disease: probably from long continued use of alcohol — Nothing, by way of treatment, as far as known. On personal examination, is very nervous; deluded. Thinks he is now in Minneapolis, when he lives Thinks he was captured in his room, in Minneapolis, while, in fact, he was found out here, in the Country. Note by Dr. Phelps. Says: left Minneapolis, Sunday night: took meals at Saratoga Restaurant: also says trouble is drink. Says: lived at Charley Lappings, 202 Nicollet Ave, Mpls, over Clothing Store "Hub."

Augs On admission, was put on B. E. (Gen. Hosp. Ward) Complexion dark: hair black: eyes gray: condition of skin, fairly good: vaccination marks, left arm: Scars, one large left groin; one on knee; one on leg below knee; small scratches on shoulders, small fresh wound on throat: sore toe on each foot: hernia, right side: is dirty. Teeth: 3 missing upper: 3 missing, lower. Quiet & well behaved on admission) — Aug. 24. Behavior good; health fair: talks quite rationally. Aug 31 Still continues good in behavior. Sept 2 Sent home to St. Paul. Was confused and lost himself at time of coming. Condition due to Inebriety.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient quite dull; seemingly so, in a chronic way: is quiet and listless. Don't talk good English: has a dull half-comprehending manner. This seems to have been coming on indefinitely but no accurate knowledge seems to be had. Could not get him to talk of the idea of perpetual motion.

Personal and Medical History of James Marek

1902

This patient was brought here by Deputy Sheriff N. Nicholsen, attended by — in fair physical condition, with following history of case. No consanguinity. Insane relatives, none known. This is 1st attack: first symptoms manifested three years past, he has had various delusions. Thinks he has discovered perpetual motion &c". Disease seems increasing: not variable: no rational intervals: — Derangement now shown in that, among his delusions, are those of the bad influence on his health of various innocent objects and foods & hypnotic suggestions. Is not disposed to injure others: has not attempted suicide, but has threatened to. Not addicted to filthy or destructive habits. No previous peculiarities noted: father drank very intemperately. Has not been subject to any severe disease &c, nor head-injury: has not been restrained or confined. Cause of disease not known. Treatment, mechanical. On personal examination, he appears somewhat nervous, and in poor general condition. He insists he has three perpetual-motion machines, but the facts are he never made any contrivance whatever. Commitment recommended for treatment, while under legal restraint. ——— .

Aug 18 On admission was put on B3E. 5 ft. 11 in. Complexion medium: hair, brown - gray: eyes blue: Condition of skin good: vaccination marks, right arm: Is clean: third finger, left hand, slightly deformed. Teeth good: missing lower. Quiet and well-behaved on admission: appears slightly deaf. — Oct 1 Wt. 135#. Neat, clean, rather feeble minded; reads Bible; quiet; Dec. 24 Home with wife on trial.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient had not eaten, as Connie, for some days: put to bed and fed with tube. Quite weak: seems senile, though the history is of a case following a head-injury. He was thrown from a horse, striking back of head: (his wife tells this): He can tell us nothing. His injury was 2 years ago. Lately, the greatest trouble was from his running away. -

Personal and Medical History of John Conley

1902

This patient was brought here by Ignatius Fessenden, attended by John Land, in fair physical condition, with following history of Case - No history of Consanguinity, or Lueority: This is not 1st attack: me occurred about 3 years ago; duration for about 2 or 3 days: was sent to St Joseph's Hospital, St Paul, for 2 months: recovered: March attack. First symptoms of this attack manifested on last Thursday:- irrational actions and talk: restless, uneasy: sleepless: disease appears incessant: variable. Derangement now shown on no particular subject: irrational on every subject: is disposed to injure others: not suicidal: no filthy nor destructive habits: no previous peculiarities noted: no history of intemperance: 2 or 3 years ago, severely injured in back of head: disposed to wander away from home: restrained. Supposed cause of the disease is injury to head. Treatment from local doctors. On personal examination, no further facts seem to have been learned. —

Aug 28 On admission, was put on I.W.E. (G.A.N. Plot: Complexion light: hair gray:- eye gray: condition of skin fairly good: vaccination marks, left arm: small scar, left knee: slight bruises on prominence of both cheeks: rather dirty: slight indentation in back of head. Is slightly stoop-shouldered: teeth poor: has 6 in upper and 9 on lower jaws: Quiet & non-communicative: is rather stubborn. —

Oct. 17. Died at 6 P.M. Semi-comatose several days visited by wife and son. Has been failing for a long time.

Personal and Medical History of John Little

SAYS HE'S A ST. PAUL MAN.

Minneapolis Police Hold Him for Mental Examination.

A man who says that he is John Little, 709 Farrington avenue, was arrested yesterday morning in Minneapolis. Mrs. M. Appleby, 31 Eastman avenue, Minneapolis, says the man and his wife have been boarding with her for a week. People living in the house they heard screams yesterday morning and they found the man abusing his wife. Dr. Sessions, of the city hospital staff, was called and he says that the man tried to hit him with a chair. When Detective Wirtensohn and Patrolman Hillers arrived they say the man was hiding in the cellar. They took him to the central police station, and his mental condition will be examined.

Patient cheerful & smiling: talks brightly & readily, as anyone: does not grumble any: Has the persistent idea, growing for, at least, about a year, that his wife had other men come to the house: seems to have been watching: & have believed he saw them at window &c. Seems fairly normal, aside from these ideas & in fair physical condition.

Personal and Medical History of John Little

1902

This patient was brought here by Mr. Frank. C. Johnson, in fair physical condition with following history of case. No history of consanguinity or heredity. This is 1st attack: first symptoms manifested 2 years ago: suspicious of his wifes fidelity: marked increase of symptoms 4 or 5 weeks past: sleepless: accusing his wife, during night. Disease seems increasing: variable & with rational intervals: Excitable & suspicious, at times: then, is rational & coherent: the attacks of suspicion are mae frequent, the past month. Derangement now shown in that he thinks his wife unfaithful: looks out of windows & doors for imaginary people: threatens life of wife & others with hatchet and revolver: thinks landlord the guilty person. Thinks he smells smoke, at times". Disposed to injure others, yes; by threats by hatchet & revolver. Said "he would shoot his wife, children & himself". Has not attempted suicide, but talks of killing and hanging himself. Propensity not active now: rather homicidal. No filthy nor destructive habits. Was always quick tempered, but, otherwise, was not very different until his suspicions, 2 years ago. Uses tobacco to excess: Snuff rate: Not subject to any severe disease &c, no head injury. Was at Lockups in St Paul for 12 hours. Cause of the disease unknown. "Thinks he has a sexual weakness". Treatment unknown: Refuses to see a physician: ran away when one came. Patient talks rather excitedly about his troubles: laughed at statements & treated his threats lightly: did nothing unusual except talking excitedly. On personal Examination: appearance & manner was suspicious & excited. Other facts, Communicated by others, as follows: Comes in from street, saying "he feared being shot": "that people laugh at him, in the street": Arms himself with revolver & razor: ran away from home, on train, once or twice: but returned voluntarily: "fears poison in his food". Commitment recommended because he has perpetrated acts dangerous to others: it is reasonably certain, by his threats & otherwise, that he has dangerous tendencies, & that he has uncontrollable propensities toward crime: his disease is of such a nature, and in such a stage as to require, for his recovery, care & treatment, while under legal restraint. ——

Aug 30 On admission, was put on T W. (G. H. N. R/pt. Complexion medium: hair dark gray: eyes blue: condition of skin good: vaccination marks, left arm: small scars on nose. "Tattoo" mark, anchor, on left arm: 2d toe missing, right foot. Is clean: one tooth missing, lower jaw: collar bone deformed. Is quiet & well behaved)—

Jan 3 '31 Wt. 158#. Mentally quite clear, tho' a little silly in some way; no definite delusions; works in centre.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient rather dull & confused: quite evidently was never able to learn well: realizes this himself: though can give only a dull & vague account. Is mildly imbecile. —

1902 Personal and Medical History of George Scott Gray.

This patient was brought here by A. S. Schmidt, attended by Peter Ebbers, in fair physical condition, with following history of case. No history of consanguinity or heredity: this is 1st attack. It is a permanent state of mental debility: was never sent to hospital: First symptoms of this attack manifested 3 weeks ago: groundless fears: Disease seems variable: there are rational intervals, but these not regular — Derangement now shown in that he is afraid of being carried away or killed: has threatened to kill himself, if interfered with: has not attempted suicide, propensity not active: not disposed to injure others: no filthy or destructive habits: No previous peculiarities noted: no history of intemperance: 12 years ago, was kicked on left temple by horse: acute delirium supervened, and continued for about 3 weeks — Has never been restrained or confined. As to cause of disease, he has never been mentally right, but has been much worse since injury. Treatment, none. —
On personal Examination, nothing learned, except as stated above: patients expression somewhat that of an imbecile. —

Sept 4 On admission, was put on B3E (G. A. & R) Wt. Complexion medium: hair brown. eyes gray: condition of skin good: vaccination marks left arm: small scars on back right hand; one small, near left ear: is clean: Teeth: one missing each jaw: rest fair: Is quiet and well-behaved: (slept 9 hours, first night) —

Jan 03 Jan. 31 Wt. 160 Dull, quiet, feeble minded.

Personal and Medical History of Nels Kone

SENT TO ROCHESTER—Nels Kone, aged twenty-two, was yesterday committed by Probate Judge Bazille to the Rochester insane hospital. Kone began last week to manifest symptoms of insanity, and when brought before Judge Bazille talked incessantly and incoherently, declaiming about his million-dollar estate. Deputy Johnson took him to the state hospital.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is fairly clear: fairly normal in emotional state and in health; but argues from Bible statements that, being a Christian, he should have anxiety for souls, and that might have callings from God to do certain things. Does not claim exact hallucination but only "calls" to do certain things. Held up hands in prayer-meeting — Quoted statistics re. Is quite closely logical in these ideas.

Personal and Medical History of Arthur R. Palmer

1902

This patient was brought here by Edson Bussett, in fair physical condition, with following history of case: No consanguinity as to any heredity, not known: This is 1st attack: first symptoms manifested about 3 years ago: melancholic: Disease seems increasing: variable & with rational intervals: but these, not frequent. Derangement now shown by being religious: has commands from God & impulses to short &c. Is not disposed to injure others: not suicidal: propensity not active. No filthy or destructive habits: No history of any previous peculiarities, intemperance. Fevers disease &c, or head-injury: Has not been restrained or confined. Cause of disease, not known: treatment, none. On personal examination, he is very melancholic, at times: is persuaded that his movements are directed & controlled by direct commands of God. Commitment recommended because he needs treatment, while under legal restraint. ———

Sept 6 On admission, was put on B 3 E (G.H.U.R.H.): Complexion dark: hair black: eyes brown: condition of skin, fairly good: 3 scars on right knee: one, right instep: Is clean: Teeth: good condition: 1 missing, lower jaw: quiet & well behaved, on admission.

Sept. 7/02 Patients stands making motions: says God tell him: depressed; Oct. 22 Improved slightly. Same general state. Nov. 17 Improved very considerably; works in kitchen; talks to self; sent home on trial.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patients brother accompanied him: he insisted that mental failure was only for one year: that the gross paralysis was only recent: that he went to School till 14 + was well till recently: He comes with two canes, but cannot stand or walk, even with them: has left clubfoot: (the brother denied he had any): his shoulders are far forward from long stooping: has slight power in legs, but not good control of even that.

Is very incoherent, in a silly mischievous way – the whole state would seem to date from SC. fever, though growing much of late –

Personal and Medical History of James York Hershaw.

1902

This patient was brought here by J.B. Thompson & brother Henry Hershaw in weak physical condition; with following history of case. No consanguinity: no insane relatives, but Grandmother once was a little "off", but not long. This is 1st attack: first symptoms manifested about 5 weeks ago: caused by Storm: Emotional symptoms: becoming violent: disease seems increasing: not variable: no rational intervals: he thinks he is after some one, all the time. In what way derangement is now shown is not stated: is disposed to injure others, but not suicidal. disposed to filthy & destructive habits: has shown peculiarities: also failing mentality, during past year: no history of intemperance. Had Scarlet fever at age of 8 years: has not been restrained or confined. Supposed cause of the disease is Shock. Treatment has been sedatives &c.

On personal examination, nothing special further learned. —

Sept 9 On admission, was put on IW (G.H.N. Hosp: Complexion dark: hair dark brown: eyes blue: condition of skin, fairly good: mole on back of neck: scar on right knee: small sore or abscess on lower lip: fairly clean: Teeth: 2 missing, upper: 1 missing, lower jaw: rest in poor condition. Left foot deformed: unable to stand or walk: Speech sluggish & incoherent: is quite stoop-shouldered: was quite noisy, on admission: restless and noisy 3 hours, 1st night).

Sept. 10 Patient weak; spastic gait, hardly can stand alone; noisy & restless Oct. 31 No improvement in walking; dirty & stupid. Jan 27/03 Still noisy, restless and dirty.

SLEEP, Present Amount and Character,
BOWELS, Present Condition,

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient markedly senile in appearance + senile in all his actions - being weak + tottering. Can hardly stand. Is quite feeble + sluggish mentally, without any very active delusions or mania: slow to answer and slow to comprehend, perfectly, anything. Besides double hernia, no special physical lesion is noted. Was operated on recently, for cancer of lip. -

Personal and Medical History of Charles Vaughan.

1902

This patient was brought here by Emanuel Johnson, in poor physical condition, with following history of case - No history of consanguinity or heredity. This is 1st attack: first symptoms manifested Ten days ago, so far as we know. Disease seems increasing: not variable: no rational intervals: Derangement now shown by aimless wandering, at night: and irresponsible acts. Is not disposed to injure others, nor suicidal: no filthy or destructive habits. No previous peculiarities manifested: no history of intemperance, nor of any severe disease &c, nor head-injury. Has not been restrained or confined: - Supposed cause of the disease is senility: treatment, none: No material facts learned on Personal Examination.

Sept 10 On admission, was put on T.W.S. (7th Ward). (G.A.R. Dept. Complexion medium: hair gray: eyes blue: condition of skin normal: scars on left shin: long scar, extending from small of back, around to right side: (about 6 in long) - has hernia: is clean - Teeth: has 6 in upper & 9 in lower: very poor condition. Lower lip scarred & deformed, apparently from surgical operation: feet and ankles swollen. Patient is very old and feeble).

Oct. 11/02 Talk clear; rational; very melancholy.

Oct 16/02. Very restless; agitated melancholia.

Oct 9/02 Has become weak and untidy.

Nov. 1/02 Wt. 107# Dec 1 In bed; dull; melancholy inactive; emaciated.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is young & fairly healthy: not notably defective in any way: no history that is clear, obtainable, as to his early life. He says "was all right" & the history dates his trouble back, about a year.
He hears voices talking to him, at night & day: the trouble evidently came on insidiously & may date further back. —

Personal and Medical History of *Herman Becker*

1902.

This patient was brought here by Sheriff M. J. Lins, in fair physical condition with following history of case. No history of consanguinity or heredity. This is 1st attack: first symptoms manifested about one year ago: heard voices & all kinds of things: feared injury: disease seems increasing: variable and with patches intervals: but these, irregular: Is incoherent: unconscious, at times: Hallucinations: melancholia. Derangement now shown in that he thinks he has been injured: thinks certain persons have taken his mind away. Is not disposed to injure others: Has not attempted suicide: propensity not active: no filthy or destructive habits: no previous peculiarities manifested. Patient occasionally gets interested: Has not been subject to any severe disease or, a head-injury: has not been restrained or confined. Cause of disease unknown: (supposed Masturbation). Treatment, none. On personal examination, is moody, melancholy, and morose. Says "that his mind has been taken away from him". —

Sep 14 On admission, was put on D 3 E / S.H.N. Qpt: Complexion dark: hair, dark brown: eyes gray: Condition of skin normal: Scars on great toe, right foot: fairly clean: Teeth: 2 missing, upper: 2 missing, lower: rest in fair condition: right eye blind: was quiet and well-behaved, on admission). ——— .

Oct. 12 Wt. 144#. Quiet; dull; will talks but little; works some. Jan 1/03 147# Works in kitchen; talks more; behavior better.

Personal and Medical History of Charles J. Hultgren

THINKS HE IS GOVERNOR—Charles J. Hulfgren, 726 Minnehaha street, seventy-three years old, was committed to the asylum at Rochester by Probate Judge Bazille. Hulfgren is laboring under the delusion that he was duly elected governor of the state at the last election, and that Gov. Van Sant is a usurper. Isaac C. Silverstein, aged twenty-nine, was committed to the asylum for the third time.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient, in conversation, says he was at Winona, for a couple of weeks: the rest of the time, in St Paul. Admits getting excited, occasionally, but denies any fights or violence. Has seemingly drifted around & helped a little at home. Is quite demented in some ways: is feeble of mind, in all ways -

Physical condition seems good & can note no change from former examination. —

Personal and Medical History of Isaac Silverstein

1902

This Patient was brought here by Louis Mead, in fair physical Condition, with following history of case. No history of Consanguinity, or heredity. This is not 1st attack: Others occurred in 1899 & 1901: duration 8 and 7 months: was sent to Rochester Hospital & discharged. When first symptoms of this attack were manifested, and in what way, "Same as heretofore": disease seems Stationary: variable & with rational intervals: but these, not regular. —— Derangement now shown in that he is Continuously talking. Is not disposed to injure others, nor suicidal: no filthy or destructive habits. Previously manifested peculiarities: no history of intemperance, use of any severe disease &c, or head-injury: has not been restrained or confined. Cause of disease, unknown. Treatment, none. On Personal Examination, Mentally Dull.

Note: 3rd admission: here before (1st time, from June 15-1899 to October 9-1899.- and 2nd time, from January 25-1901 to March 7-1902; and, in both cases, was discharged as Improved. Diagnosis, on 1st Commitment, "Syphilitic Insanity" and, on 2d admission, "Sub-acute mania." Patient gave history of a specific trouble, which is probably Cause of the disease: (for further particulars, see Vol 43 page 149 No 5339 and Vol 47 page 377 No 5741)

Sept 5 On admission, was put on B3E (G.H.N.Kpt Complexion medium; hair brown: eyes blue: Condition of skin normal: vaccination marks on right arm: 2. large scar, on left arm, and breast near axilla. Teeth: 4 missing, upper and 2 missing, lower Jaw: rest in fair condition: Is fairly clean: Quiet & well behaved as a)

Oct. 1/02 Wt. 158#. Dull; quiet; rather incoherent; good health.

Nov. 1 Wt. 157#. Dec. 4 Is B2

Jan 13, 31 Erratic; at times will work; quite well behaved. Spells of excitement & loud talking. Neat. C.L.C.

SLEEP, Present Amount and Character,
BOWELS, Present Condition,

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is emaciated & has a purulent expectoration, but with little cough. no special fever: although suspicious, yet no definite sputa are obtained — is dull, listless, somewhat weak: has enormous appetite: answers rarely and only a few words, in a low tone.

Personal and Medical History of Gustavus Leathers

1902.

This patient was brought here by A. G. Schmidt, attended by F. C. Frost, in poor physical condition, with following history of case. Not any consanguinity, so far as known: "he says" his mother was insane & sent to an insane hospitals" - This is not 1st attack: others occurred at intervals during the last twenty years: Duration from one to several days. Was sent to Co. hospital twice, during the past year: ran away, each time: no betterment in his condition. "During the years I have known G. Leathers, he has been an imbecile; barely able to earn a scant living" - Disease seems increasing: it is variable: at times more patient than at other times: no regular intervals. Symptoms indicate softening of the brain: there is gradually increasing mental & physical debility: at present, there is total incapacity for labor, either mental or physical: there is morbid introspection on bodily functions: e.g. thinks he does not pass urine and feces enough. Is not disposed to injure others: suicidal —, habits are rather filthy: no destructive propensity. Don't know as to any previous peculiarities: no history of intemperance: no of any severe disease &c, or head-injury, so far as known: has not been restrained or confined. Supposed cause of disease, heredity: no specific treatment: On personal examination it is learned that the person is imbecile and childish, and demented. —

Sep 26 On admission, was put on TN: (G. H. R. Pt: Complexion dark: hair black-gray: eyebrown: condition of skin dark, and spotted: 2 vaccination marks, left arm. Has vermin and is dirty: Emaciated: Teeth: 4 missing, upper: 4 missing, lower: Is much depressed. (Slept 5 hours, first night). —— . ——

Nov. 1 Wt. 117# Rather stupid; dull; coughing some.

Dec. 1/02 Seems failing: slight rise in temperature; kept in bed. Dec. 15/02 Died at 8.10 A. M.

Personal and Medical History of Arthur O. Nepil

SON DECLARED INSANE.

At the Same Time the Father's Will Was Filed for Probate.

While the clerk of the probate court was accepting a petition for the administration of the estate of the late Anton O. Nepil, Judge Bazille of the probate court was in another room with a medical jury examing the son of the decedent on information of insanity. The estate of the father is valued at $100 and an administrator will be appointed in a few days.

Arthur O. Nepil, the son, is twenty-two years of age, and he has been suffering from the affliction for the past six years. He was considered a very bright boy until six years ago, when he had an attack of influenza. His mind was affected by the disease. He has been treated at several institutions, and was recently discharged from Rochester as cured.

The physicians decided that the young man was insane and he was again committed to Rochester.

W Cash

Personal and Medical History of *William A. Murray.*

1902

This patient was brought here by *Mr. Lewis*, attended by *Jno. Lynch*, in fair-aged condition, with following history of case. Consanguinity: acto heredity, an uncle was insane, in Ireland. This is not 1st attack: one occurred about May 1896. Has continued until present time. First symptoms of this attack manifested May 1898; attempted suicide, by cutting his throat & both wrists: disease seems increasing: is variable with rational intervals; but these, not regular. Derangement now shown in that he is eccentric, monancholic & suicidal tendencies, and believes himself to be tormented or persecuted. Is not disposed to injure others: has attempted suicide, by cutting throat, by suffocation & drowning: propensity active now: no filthy or destructive habits. Previously noted as eccentric and seclusive. No history of intemperance, nor of any severe disease &c, or head injury: has been restrained or confined: for last few days, has been watched. Supposed cause of disease is timidity & seclusion. Treatment, none. On personal examination, is very deaf: senile tremor: emaciated.

Oct 10 On admission, was patient in N. (5 ft. 11 in. 2 lbs: complexion light: hair gray: white (considerably bald): eyes blue: condition of skin fair: marks from wearing electric belt: vaccination scars, right arm: has small bunch, like fatty tumor, on left side: is clean. Rather emaciated: very deaf: hears a little in right ear: teeth: has one on upper, and four, on lower jaw: quiet on admission).

Oct. 11. Patient put in bed yesterday; weak; becomes rigid; has spells of convulsion, character Oct. 22. Patient died at 1 A.M. result of gradual failing; with a slight rise of temperature.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient appears quite normal: is clear - headed & cool & collected - Says "they have been trying to do" him, at the prison, by putting medicine in food, and using the X Ray, on him -
on all other subjects, talks rationally: seem appears somewhat skeptical about his first ideas of the X Ray.

Personal and Medical History of *Oliver Smith*

190[2]

This patient was brought here by John O'Rourke, in good physical condition with following history of case: Family consanguinity, a heredity, unknown. If first attack not stated: Lucheon in Prison Hospital. First Symptoms of this attack manifested over a year ago, (in what way, is not stated). Disease seems stationary: if variable or with rational intervals, not stated. Derangement is now shown in that he believes himself continuously subjected to X Ray machine; also being "doped" in his food. Is disposed to injure others, but is not suicidal. Disposition to filthy habits, none. No previous peculiarities manifested. If any history of intemperance, unknown. Has not been subject to any severe disease &c, or head-injury. Has not been restrained or confined. Cause of disease unknown: Treatment none. On personal examination, facts learned conform 12th Question: (relative to X. Ray and the "Doping.")

Note: Certified Copy of minutes of Conviction and Sentence & State-Prison for 3 Years, (on Charges of "Swindling") filed with "Commitment Papers" in case.

Oct 11 On admission, was put on C.E. (G.F.N. Opt.): Complexion dark: hair, brown, dark. eyes brown. Condition of skin good: "Tattoo", left wrist: 3 vaccination scars, right arm; 1 Ditto, left arm: Slight eruptions on back: Scar on left shin: Scar on left side of neck: Scar on left shoulder: In clean bodily peculiarities none: Quiet & well-behaved).

Oct. 25 On admission expresses delusions of persecution; thinks he is worked upon by X Ray etc.; has been quiet & peaceable; inclined of late to talk of delusions, which he probably never had. Neat in habits; intelligent in manner. Nov 1 Wt. 123#.

Jan 1/03 Wt. 127#

Jan 31/03 Worked well; quiet; normal mentally; when asked about X Ray - smiles & says "He won't talk about it." Never interferes in affairs of the ward. C.L.C.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says - was here before with delusive ideas that his wife was conspiring with others against him". Says "he got rid of these & has not had them since". After getting out, he gradually got to drinking & had a bad "spree", just before coming: don't know what he did, but his people say he threatened them". Thinks it was well he came, but only because of the drinking: His mental state seems quite clear now.

Personal and Medical History of Ole A. Gudvangen

1902

This patient was brought here by C. M. Wilkinson, in fair physical condition, with following history of case - No history of consanguinity, or heredity. This is not 1st attack: one occurred November 1900: duration 3 months: was sent to Rochester Hospital: much better from treatment: First symptoms of this attack manifested May 1901: "Had an idea that his wife would harm him." Disease seems increasing: variable, rational intervals not regular. Derangement now shown in that he thinks his wife and neighbors will harm him, and want to get him off farm. He has "spells" of abusing his family and others. Disposed to injure others: threatened life: Has not attempted suicide: propensity not active: no filthy or destructive habits: No previous peculiarities manifested. Not addicted to intemperance(?) - Had an injury to neck 16 years & sunstroke 8 years, ago. Has not been restrained or confined. Supposed cause of disease Chronic - Alcoholism. Treatment none. Facts learned on Personal Examination; is nervous, excitable and irrational in his talk - Note: 2nd admission: here before from November 27-1900 to February 6-1901, and discharged April 30-1901, as recovered. Cause then given as "probably sunstroke." Form "acute melancholia" - Delusions then manifested somewhat similar to those on this 2d Commitment - (See Vol 47 - Page 293 - No 5708) -

Oct 11 On admission, was put on B.T.E. (G.H.N. Rft: Complexion medium: hair gray; eyes blue: Condition of skin normal: Hernia left side. Is clean. Teeth: no missing upper rest, good condition. Very quiet and well-behaved, on admission) -

Oct. 11/02 Nov. 25 Taken home by relatives; Quiet and well behaved since coming; somewhat melancholy at first. Went home fairly well recommd.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient says he was one of twins & that both he and his sister became Epileptic at abut age of 10., and are both living: both were small in size.

Mr R has 6 children. Is said to have been able to work a farm till recently. Had some severe convulsions lately & became stuporous. It is said there was one space of nearly 10 years, when he had no convulsions.

Personal and Medical History of *Dwight Rowley.*

1902

This patient was brought here by Sheriff E. H. Vine, attended by Milton Sharpe, — in poor physical condition, with following history of case. Many consanguinity, do not know; if any insane relatives, not known. This is 1st attack: first symptoms manifested October 11th: by delirium and Epilepsy. Disease seems increasing: there are rational intervals: In what subject or in what way derangement is now manifested, do not know. Is disposed to injure others, but not suicidal: no filthy or destructive habits. Is subject to fits of passion: no history of intemperance. Has been subject to Epilepsy for many years: has been restrained and confined at home, twice attack. — Supposed cause of the disease is Epilepsy. What treatment has been pursued, dont know. On personal examination, has been in acute delirium with Epileptic seizures.-

Oct 14 On admission, was put on TW 8 oz: L.S.N. Rpt: Complexion medium: hair grey: eyes gray: Condition of skin normal: small scratch in corner of left eye: small abrasion, left cheek: small scar on back & left hip: has a large bruise & discoloration on left arm, extending from bicep, up over shoulder: left side of forehead bruised and swollen: is fairly clean: stoop-shouldered & slight deformity of right shoulder: Teeth; has four, on upper jaw: very much confused and stubborn, on admission).-

1903
Jan. 31 Has been about same since coming here; dull mildly so; fits, rather frequent; fairly well behaved.

Personal and Medical History of George. W. Gaslin

STILLWATER.

George Gaslin Is Adjudged Insane by Commission.

Stillwater, Special, Oct. 14.—George Gaslin was examined in the probate court to-day as to his mental condition. He was adjudged insane by a commission of physicians and will be taken to Rochester. Gaslin's parents reside in this city.

Granville W. Smith, sheriff from Stillwater, brought a patient to the State Hospital last night. The patient whose name is George Gaslin, was not a convict but he was a very vicious and unruly man. As a result of his struggles with the maniac, Mr. Smith was so badly used up that he had to remain in bed today at Cook's Hotel. He is under the care of a physician and it is not known when he can return to his home.

Personal and Medical History of George W. Gaslin

1907

This patient was brought here by Sheriff Granville Smith, in fair physical condition, with following history of case. No history of consanguinity nor heredity. This is not 1st attack: Has been "Queer", since a child. First symptoms of this attack manifested in boyhood: never acted right; lately, in a bad way. Disease seems increasing, variable. Derangement now shown by delusions: wakeful, restless nights: visionary talk, at times, about floods & imaginary wealth. Threatens to kill others. Threatens suicide: Has carried a razor for the avowed intention of killing himself: No filthy or destructive habits: Previous peculiarities, none, save always weak-minded. Recklessness: Masturbation. Nothing stated as to intemperance. As to severe disease &c, none. Has not been restrained or confined. Cause of disease, not given. Treatment, none. On personal examination, is nervous, hysterical.-

Oct 14 On admission, was put on D.3.E. (G.A.R. Ward): Complexion medium; hair brown: eyes blue. Condition of skin normal: vaccination marks, right arm. Scars on right wrist, back of neck, and right hip. Is clean. Behavior restless and noisy: (Slept 2 hours, first night.)

1908
Jan. 30 Wt. 144# Feeble minded; silly; speech blurred; emotional; has threatened to kill himself; careless and untidy; a good deal of general intelligence.

SLEEP, Present Amount and Character,
BOWELS, Present Condition,

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient denies any despondent spell, except such as natural to a reverse in business - Has queer, nervous spells of "sing-song" inflection - (this seems a habit): is very shaky, in every way, but no "tremens" - No delusions or hallucinations noted. —

Claims a tendency to bowel trouble - a gastro-enteritis. Is standing up, fairly well. Claims left leg always dragged, so that he could not learn to dance -

Personal and Medical History of John F. Fulton

1915

This patient was brought here by Emanuel Johnson, attended by Geo. Krueger in fair physical condition, with following history of case. No history of consanguinity or heredity. This is 1st. attack: first symptoms manifested 3 years ago by failure of attention & inability to control self: disease seems increasing: is variable & with rational intervals: but these, not regular. Derangement now shows by ideas of grandeur & inability to control himself. Is not disposed to injure others nor suicidal: propensity not active: no filthy or destructive habits. No previous peculiarities noted. Is intemperate: had one convulsion, 2 years ago. Has not been restrained or confined. Supposed cause of the disease is alcohol. — Was at Lake Geneva, for 6 weeks: On personal examination, patient under the influence of liquor (alcohol): does not appreciate his surroundings: Cannot refrain from drinking.

Oct 18 On admission, was put on T.W. (T.H.N.Rft. Complexion medium: hair gray: Eyes blue: Condition of skin fair: Eruptions on fore-arms & elbows: is rather dirty: very muscular: Is quiet and well-behaved: Extremely nervous).

Oct. 18/02 Has been drinking; very untidy; mind much confused; vomits & complains of pain; sleeps two hrs. during night. Oct. 19 Restless; walk is hesitating & unsteady; receives whiskey, valerian and Strychine. Oct. 20 Patient becomes more confused during day, tending toward tremens which in evening becomes quite confused. Oct. 21 Confused in mind; full of hallucinations. Oct. 22 Continues delirious. Oct. 23. Started in sleeping; much better. Oct 24 Fairly rational & quiet. Oct. 31. Is about recovered from tremens; but very nervous & erratic.

Patient seems quite feeble both mentally + physically: Can answer many questions, but is sluggish + probably inaccurate —

Personal and Medical History of Alonzo Keith

1902

This patient was brought here by A. G. Smith, attended by G. L. Keith, in poor physical condition, with following history of case - No history of consanguinity; not any of heredity so far as known. This is 1st attack: was not sent to hospital: first symptoms of this attack manifested last March; by threatening suicide; by drowning, particularly. The disease seems increasing; variable: rational, at times: but, about these periods, no regularity. Derangement now shown in that he threatens to take his own life: seems to be fearful of danger: has delusions of sight: thinks relatives are trying to poison him. Is not disposed to injure others; has attempted suicide, by drowning: propensity has been recently active. Not disposed to filthy or destructive habits. Was, previously, very irritable & quick tempered. No history of intemperance: had apoplexy & apoplectic convulsions in July 1900. Has not been restrained & confined. Supposed cause of the disease is apoplexy and old age - Treatment, none. On personal examination, the following noted: Senile dementia: fear of injury from relatives: sees sights and objects that do not exist: has threatened, often, to drown himself. ——— ——— ———

Oct 21 On admission, was put on TW[G. H. N R/pt: Complexion ruddy: hair gray-dark: eyes blue: condition of skin fair: vaccination marks, left arm: scars under left eye; is fairly clean: Bunch, like fatty tumor, on left side: bent and stoop-shoulders: quiet: slept 6 hours, first night).

Oct. 27. Feeble; walks unsteady; feeble in mind.

1903. Jan 31. Continues same; slight attack of rheumatism during January.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient has been here 3 times before: has been drinking very heavily, since 4th July: says: has been under guardianship for 7 years" - has a good farm etc, seemingly a good worker, when sober. Is slightly silly in manner. —

Personal and Medical History of Ole. A. Paulson

Personal and Medical History of

1902

This patient was brought here by Joel Tucker, with following history of case. patient is in fair physical condition: no history of consanguinity or heredity. This is not 1st attack: others occurred 6 years ago - 2 years ago, (and others since): Duration abont 3 months: has been at Rochester, Minn, hospital: and improved. First Symptoms of this attack manifested July 4 - 1902, by Sleeplessness. Disease seems increasing: variable + with rational intervals, but these not regular. Derangement now shown by nervousness. Is not disposed to injure others, nor suicidal: no filthy or destructive Habits: No previous peculiarities noted: Patient Intemperate: no history of any severe disease &c, or head-injury: Has been confined in Rochester, 2 Different times. Supposed Cause of the disease is Drink. Treatment in Rochester State Hospital. On personal examination, nothing particular Earned, except he is a hard Drinker. - Committment is recommended because he needs treatment. — .. —

Ⓐ Note: 4th admission here, last time, from July 31 - 1901. to October 28 - 1901. and discharged May 31 - 1902, as recovered: From them was "Mania - a - potu" Has had several attacks: See volume 49 page 297 No 1588 (last adm) -

Oct 28 On admission, was put on D3 S (St. H. R. Ppt: Complexion light: hair brown (light): eyes blue: Condition of skin fair: vaccination marks, left arm: Several small scars on hands: birth-mark at back: is rather dirty. Teeth poor: 4 stubs, upper, and 10 fair, lower: quiet, well-behaved: Slept 8 hours, first night). —

Jan 30 1903 Quiet and well behaved during stay; slightly feeble minded; history of inebriety & foolish behavior after drinking.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient very dull mentally: seems to have had his children taken from him, some years ago, because he was not capable of caring for them. Was here before in 1900: Cannot remember, accurately, very simple things. Seems to have knocked in with several other men & to have sawed wood, for a living. -

Personal and Medical History of Andrew Nelson #2

1902

This patient was brought here, in fair physical condition, by Emanuel Johnson, with following history of case. As to any consanguinity or heredity, not known. This is not 1st attack: one occurred in 1900. Duration 3 months: was sent to Rochester and discharged. First symptoms of this attack manifested recently, but not known, by delusions & hallucinations. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he hears voices", "music"; mostly having reference to religion. Is not disposed to injure others, nor suicidal: no filthy or destructive habits. If any previous peculiarities manifested not known. Patient, heavy drinker: if subject to any severe disease &c a head-injury not known. was in jail 14 Days; in St Paul. Cause of disease not known. (previous Commitment Stated "alcoholism") - Treatment, none. On personal Examination, shows insane appearance: talks about "voices": talks incoherently. -

* Note: 2nd admission: Was before from June 29 - 1900 to October 9 - 1900 & discharged April 30 - 1901, as recovered. Form then "Mania-a-Potu". Duration before admission 4 Days: Cause then given was Alcoholism. (See Volume 47 Page 49 No 1608) -

Oct 28 On admission, was put on B³ L (G.H.N.Rpt: Complexion medium: hair brown: eyes blue: Condition of skin good: Scars on left fore-arm: Is dirty: Teeth: 2 missing upper: 2 missing, lower: appears slightly deaf & somewhat confused: Slept 3 hours, last night) -

Oct. 29 Bewildered; poor memory; dull; health fair

Nov. 7 A little more clear; still much confused.

Dec 4. Improved very much; works; talks rationally. Dec. 30 Eloped.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient rather dull & listless: answers questions, however, with fair accuracy and readiness. Does not seem surprised at being here: claims to be only weak and nervous, from shock of Cyclone in New Richmond, 4 years ago. Said that he had to quit work a year later, on account of it. Looks quite healthy.

Personal and Medical History of Leary Keefe

1902

This patient was brought here by Emanuel Johnson, attended by J. Johnston and E. A. LaDow, in fair physical condition with following history of case. No history of Consanguinity or heredity. This is 1st attack: First Symptoms manifested in October 1900: despondent, and talking & laughing to himself: Disease seems Stationary: Variable with rational intervals: but these not regular. Derangement is now shown in that he believes that people are persecuting him, and he is Constantly talking to himself about his troubles. Is not disposed to injure others: has not attempted Suicide: of propensity active unknown: no: no filthy or destructive habits. No previous peculiarities noted: no history of intemperance. Had an injury to head in 1899. Has not been restrained or confined. Supposed cause of disease, traumatism. Treatment none. On personal examination, patient is unkempt: wont cut his hair & beard, nor wash. Silent: does not leave the house: talks to himself.

Oct 29 On admission, was put on 7 W. (G. H. N. R'y): Complexion dark: hair dark-brown: eyes blue: condition of skin good: vaccination marks, left arm: right leg, between ankle and knee, quite badly scarred: Clean: Quiet & well-behaved on admission).

Oct 30 Dull; no delusions; don't realize why he is here lazy, untidy.

Jan 24 '03 Dirty & has been pugnacious.

Personal and Medical History of Thomas N. Mc Watson

1902

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case. No history of Consanguinity or heriority. This is not 1st attack: others occured in 1900 and 1902: Duration two weeks, each time: was sent to "Detention Hospital" & then discharged. First symptoms of this attack manifested a week ago; "delusions of persecution". Disease appears recurrent: variable with rational intervals: but these, not regular. Derangement now shown in that he believes that he has been sold to a butcher, who is after him to kill him. Is not disposed to injure others, no suicidal: propensity not active: no filthy & destructive habits. No previous peculiarities manifested: Patient alcoholic: no history of any severe disease &c, or head-injury. Has been confined at "Detention Hospital", two weeks: Supposed cause of the disease alcoholic? Treatment, none. On personal examination, patient tells of attack in his life.

Nov 7 On admission was put on B.C.E. (T.F.N. Rpt.: Complexion dark: hair black: eyes gray: Condition of skin normal: vaccination marks, right arm: Scars on back of head: Teeth: 5 missing, lower Jaw: is Dirty: left leg about one inch shorter than right: Cross eye, left: Quiet and well-behaved: Talks rationally). ———

Nov. 1 Quiet well behaved; quite rational; sociable & agreeable. Dec. 1 Sent home. Patient was an inebriate. He had a confused spell; during which he could not give an account of himself.

Patient very sluggish in talk: slow to speak: very spastic in talk and muscular actions: tremulous & emotional – Denies any Syphilitic infection positively – repeatedly – (Wassermann evidence found): Says he has been tremulous in preceding attacks & admissions –

Personal and Medical History of Peter W. Bruno.

1902

This patient was brought here by John A. Moak, in good physical condition, with following history of case. No history of consanguinity or heredity: This is not 1st attack: Others occurred June 20-1899, and May 17-1900: Duration of 1st 3 months. of 2nd 5 months: was then sent to *Rochester Hospital: and discharged. First symptoms of this attack manifested 3 or 4 weeks ago; by weakness, forgetfulness & dependency: Disease seems increasing: variable: rational intervals irregular. Derangement now shown in the subject of action of his children. Is not disposed to injure others, nor suicidal: no filthy or destructive habits: No previous peculiarities manifested: addicted to intemperance before previous attacks: no history of any severe disease except injury to head 5 years ago: has been confined and kept in the house 3 or 4 weeks. Supposed cause of the disease is injury to head. Treatment, none. On personal examination, there is noted incoherence. —

*Note. Here twice before: 1st time, from June 20-1899 to September 12-1899 & Discharged Jany 31-1900, as recovered: (See Vol 43 p 161 No 5343): and the second time, from May 17-1900 to September 21-1900, and discharged as November 6-1900, also as recovered: (See Vol 45 p 361, No 5570): Form diagnosed as "alcoholic insanity," in each case.

Nov 8 On admission, was put on B3 6: (S. L. H. Bk: Complexion dark: hair black: eyes dark-brown: condition of skin normal: vaccination marks, left arm: small scars on each fore-arm: small abrasion on left arm: and hand: deep scar on right cheek: scar on top of head: is fairly clean: teeth: 4 missing: rest good: very unsteady and seemed to walk with some difficulty - Is quiet and well-behaved. (Slept 8 hours, first night): - varicose veins on lower extremities)

Nov. 9 Quiet; well behaved; but nervous & unsteady. Very tremulous.

1903
Jan 1 Extremely paretic & unsteady. Mind feeble but quite clear.

Personal and Medical History of Herbert G. Goodrich

1902

This patient was brought here by Dep. Sher. Johnson, in good Physical condition with following history of Case. No history of consanguinity or heredity: This is not 1st attack. He occurred last Summer: dont know duration: was not sent to hospital. First symptoms of this attack manifested last summer, by melancholia: Disease seems increasing: variable with rational intervals: but these not regular. Derangement is now shown by imagining that he is being persecuted. Is not disposed to injure others, nor suicidal: not disposed to filthy or destructive habits. No peculiarities previously manifested: no history of intemperance: had injury to head, 5 years ago. Has not been restrained or confined. Dont know cause of disease: No Special treatment. On personal examination, no further facts seem to have been learned.

Nov 8 On admission, was patient B.3 E. (G.H.N. 1 pt. Complexion medium: hair brown: eyes blue: Condition of skin normal: vaccination marks, right arm: several small pimples on back: and slight infection at back of neck, (probably caused by collar-button): Is clean: Teeth fairly good: uvula filled - Behavior very stubborn: requires considerable persuasion to manage - (Slept 5 hours, first night).

Nov 9 Restless, pugnacious, confused; health good.

Nov 22. Has improved some in behavior. Jan 4

1903 Occasionally fights; dull & stupid.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient's father is here, insane: his wife was here, as Inebriate, before he married her. She taught him the habit, when he was hurt, at one time: has not lived with her lately: lives with his mother —
Has been committed here, Several times.

Personal and Medical History of Stephen Halpin

Personal and Medical History of

1902

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case. No consanguinity: father insane 14 years, now in Rochester. This is first 1st attack: others occurred 1898 - 1900 - 1901 - 1902; durations 2 - 1 - 2 - 1: respectively: was sent to Rochester Hospital & discharged: first symptoms of this attack manifested 6 weeks ago: began getting very nervous and could'nt sleep. Disease seems increasing: rational intervals: but these not regular. Derangement now shown in that he uses morphine and cocaine & imagines people are chasing him. Is not disposed to injure others, nor suicidal: propensity not active. No filthy or destructive habits. No previous peculiarities manifested. Patient intemperate: was father hard drinker. No history of any severe disease &c, or head-injury: has not been restrained or confined. Supposed cause of the disease is morphine and cocaine. Treatment none. On personal examination, the following noted: nervous twitchy movements: has delusions: "hears voices": and becomes wild & uncontrolable in the absences of drugs. Note. This is patients 5th admission here: Cause of disease has always been given as about the same: (morphine and cocaine habit). ——— . ———

Nov 12 On admission, was put on 1/W.c (G.D.N.K.Ff: Complexion dark: hair brown: (bald): eyes blue: Condition of skin, poor condition: 3 vaccination marks, right arm: Arms and legs badly ulcerated and discolored: has 5 large ulcers on right leg and 4 large ulcers on left leg: Is Tha dirty: Teeth: has 3 stubs on lower jaw: very much emaciated and weak: restless & nervous: asking for morphine).-

Nov. 24. Patient had diminishing doses of morphine, the last yesterday. Very sick & complaining: but no serious symptoms Nov. 27 Up & dressed. Dec. 1st Wt. 135#

Jan 1 - 1903 Wt. 157#.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient has bad heart action & murmur: Gross tremor: Gross incoordination: Sensitiveness in hands & feet impaired. Can't stand in dark: No patellar reflex: In late stages of ataxia - Denies any Syphilis - at least, he says he never was treated for it, or had any venereal trouble, to his knowledge - Is mentally somewhat feeble —

Personal and Medical History of John A. Basford

1902

This patient was brought here by E. A. LaDow in feeble physical condition with following history of case. No history of consanguinity & heredity. This is 1st attack. When first symptoms manifested is not stated. He has delusions and locomotor ataxia. Disease seems increasing: not variable: no rational intervals. Derangement now shown in that he thinks his wife tries to poison him by putting acid in his coffee. Is not disposed to injure others. No suicidal: no filthy or destructive habits. No previous peculiarities manifested. Is addicted to intemperance. No history of any severe disease &c, a head-injury. Has not been restrained or confined. Supposed Cause of the disease is Dissipation. Treatment, none. On personal examination, there is noted apprehension: and speaks of delusions regarding his wife.

Nov 12 On admission, was put on IW ½ G. H. H. K. Complexion dark: hair dark brown, gray: eyes blue. Condition of skin fairly good: vaccination marks right arm: scars on back of neck: is very dirty: Teeth: 4 missing, upper: 4 missing, lower: restin poor condition: has peculiar deformity of chest: Deep indentation lower Sternum, upper right Chest very prominent: seems painful to touch: (patient confused & unsteady).

Nov. 13 Unsteady; sluggish speech; ideas that wife is persecuting him; mind confused; untidy.

Nov. 18 Looks some; willing; agreeable; mind somewhat weak.

1903 Jan. 20 Growing in ability to walk; fairly clear mentally, plays checkers much; health good.

Becomes rather confused, in talking, though answers many questions with seeming accuracy. Seems quite sick this AM. though would not admit it, Yesterday. Is depressed & thinks things are conspiring against him.

1902 Personal and Medical History of Peter Hostert

This patient was brought here by Ignatius Fazendin, in fair physical condition. with following history of case. No history of consanguinity or heredity. This is 1st attack: first symptoms manifested in slight degree, 2 years ago. actively, 6 months ago. Disease seems increasing: not variable: no rational intervals: Derangement now shown by delusions as to "persecutions": No friends: every one against him. Is not disposed to injure others, nor suicidal: no filthy or destructive habits: previously, was gloomy: isolated: no history of intemperance, nor of any severe disease &c, or head-injury. Has not been restrained or confined. Cause of disease unknown. Consultation with Dr Riggs and Stevens, both of whom recommend commitment. Dr Personal examination, develops delusion of persecution.

Nov 15 On admission, was put on B3 E (G.H.N. Pt): Complexion medium: hair brown: eyes brown: condition of skin normal: vaccination marks, left arm: mole on left side of neck: on left breast, and 2 on back: is dirty. Teeth: 1 missing, upper: rest fair condition. Is melancholy and expresses delusions of persecution). —

Nov. 16 - Sick & weak; Temp. 101°; despondent. Nov. 20 Temp. nearly normal; melancholy & depressed. Nov. 30. Temp. normal; slightly melancholy. Dec. 2 Wt. 102. Visited by mother. Dec. 30 Visited by cousin - Transfered to B2

Jan. 31 Quiet; neat; dull & lacks interest in surroundings; works well, talks freely. Does not show any delusions. Mentality is rather low grade. C.L.C.

Patient rather dull: mumbles over answers & does not tell much: will talk but little. Seems silly & a little like an imbecile. Seems good health. Very sluggish in all his movements, now. —

Personal and Medical History of Charlie A. Kubista

1902

This patient was brought here by Frank Kubista, attended by Frank Spindler, in fair physical condition, with following history of case. No history of consanguinity or Neurotic. This is 1st attack. First Symptoms Manifested August 1901: did not talk right: slightly incoherent: this increased. Disease seems increasing: not variable: no rational intervals. Derangement now shown by his being irritated in matters of business or work. Is not disposed to injure others, nor suicidal: no filthy or destructive habits. No previous peculiarities manifested: no history of intemperance, nor of any severe disease &c. or head-injury. Has not been restrained or confined. The supposed cause of disease is Masturbation. Treatment none. Personal examination the following learned: is simple-minded: laughs at trifles: disposed to incoherency in his talk & actions: disposed to wander about. Commitment recommended because he wanders about, and is exposed to want of food and shelter and to accident: because his disease is of such a nature as to require legal restraint to insure his recovery.

Nov 17 On admission, was put on 13[3] (G.H.N.R/pt. Complexion medium: hair light-brown: eyes brown: condition of skin normal: Small scars on left fore-finger: Simply Eruptions on back & shoulders: is rather dirty. Teeth good. Is slightly Hoop Shouldered Behavior Quiet: very dull and silly).

Nov. 18 Silly; talkative; indifferent. Nov. 23 Dirty at times; improved none. Dec. 3 Up and about. Jan 31 Health fairly good; behavior very much better.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient aged 42: Seems in fair Physical Condition: denies drinking in past 2 weeks. Says went to Albert Lea to get papers concerning property (town Lots) fixed up: seems to think some one was going to sell it, though it was his own. Is very dull & answers Dr vague as to seem evasive about everything.
Says stopped work 3 days ago, because he felt "chilly" —

Personal and Medical History of *Erik Syverson*

Personal and Medical History of

1901

This patient was brought here by O. P. Fassett, attended by J. G. Huser, in fair physical condition, with following history of case. No history of consanguinity or heredity. This is not 1st attack: one occurred in 1900: duration 4 to 5 weeks: was sent to Rochester Hospital: result, partial recovery. First symptoms of this attack manifested November 20th 1900:- Disease seems increasing: variable: natural intervals irregular: worse after drinking: Derangement now shown on subject of financial difficulties & slightly on religious subjects. Is disposed to injure others, but not suicidal: propensity not active now: no filthy or destructive habits. Peculiarities shown only after drinking: There is a history of intemperance: had fractured nose: has been confined in× Rochester Asylum 4 weeks. Supposed cause of disease is alcoholism. Treatment none, except at hospitals. On personal examination, it is learned he has attacks following drinking.-

× Note. 2nd admission here (was also in hospital at Albert Lea, before first Commitment): was here before, as "Erick Severeen", from November 9-1900 to December 8-1900: and discharged April 30-1901, as recovered: From them given as "Subacute Mania". Use of alcohol exciting cause: Several attacks". (See Vol 47 p 203 No 8697)-

Nov 28 On admission, was put on B. & E. (G. H. N. Rft: Complexion sandy: hair, brown-sandy: Eyes gray: Condition of skin normal: vaccination marks, right arm: Scars on nose & chin: 2 on left thumb: is dirty: Teeth: 2 missing, upper jaw: Behavior, rather dull & Confused: inclined to be pugnacious).

Nov. 29. Restless; hides under beds; confused. Dec 1 Mind somewhat more clear. Dec. 2 Asks what he has been doing; does not remember. Dec. 12 Quite quiet fairly rational; somewhat unreasonable.

1902 Jan 31. Rather unreasonable & cranky about going home otherwise well behaved.

Talkes a silly incoherent way: behaves in a restless + in certain way: Kicks + tattoons over: wont sit still at meals &c.
Mania now indicates some dementia. Patient was here before: has been away for about a year, and, though quiet, has not been much improved.

Personal and Medical History of Rolland. M. Dartt

This patient was brought here by Chas. Mosier, attended by Frank Finley, in fair physical condition with following history of case. No history of consanguinity: but there is of heredity: mother insane (died here: Pa). This is not 1st attack (discharged November 22nd - 1902: from Rochester Hospital): duration continuous: was previously sent to Rochester: not cured: This attack continuous since leaving hospital: destructive last 3 days. Disease seems increasing: variable & with rational intervals, but these not regular. Derangement now shown by his being irritable and destructive. Is not disposed to injure others: has not attempted suicide, since leaving hospital: propensity not active now: disposed to filthy and destructive habits. Previously manifested peculiarities. No history of intemperance: no history of any severe disease. Has had a constant attendant. Causes of Disease, hereditary taint: has had hospital treatment. On personal examination, nothing further seems to have been brought out. — Commitment recommended, because we consider it is not safe for him to be at liberty. — Note. 2nd admission: here before from March 29 - 1901, to January 9 - 1902 and discharged November 22nd - 1902, as unimproved. From them "Adolescent Insanity": Was, at that time, suicidal and propensity active. (See Vol 49 Page 69 No 5788) —

Nov 29 On admission, was put on B.S.E. (G.A.N. 12pt) Complexion medium: hair brown: eyes blue: condition of skin normal: vaccination marks, left arm: scars on throat and left arm, near elbow: is fairly clean: Teeth: 2 missing lower: rest fairly good. Is fairly well-behaved and quiet. (Slept 5 hours, first night). —

Dec. 5/02 Patient has had slight rise of temperature since coming; dirty; noisy; incoherent. Dec. 13 Visited by brother.

Jan 31 03 Stupid; confused; no improvement.

Sleep, irregular Appetite, good Bowels, —

SENT TO ROCHESTER — Bartley Coughlin, who has been under treatment at the detention hospital for some time, was examined yesterday in the probate court and ordered committed to the state asylum at Rochester. Coughlin is a victim of melancholia, and some time ago, it was said, he attempted to end his life by cutting an artery in his wrist. He is thirty-five years old.

TEARS OPEN OLD WOUND.

Insane Man at County Jail Covered With Blood.

Bartley Coughlin, an insane man who was confined in the county jail waiting to be taken to Rochester, yesterday morning tore out half of the eight stitches placed in a wound. Deputy Sheriff Miller summoned the jailer and after a struggle in which all of the men were covered with the blood flowing from the wound, Coughlin was placed in the padded cell and leather cuffs were put on his arms.

Coughlin was sent to the detention hospital a month ago for treatment and seemed to be improving until on atonday, when he secured a knife and hacked his right arm. The wound required eight stitches. Coughlin was tried in the probate court Thursday and ordered committed to Rochester. He was confined in the county jail as no deputy could leave with him for the asylum until late last evening. When Deputy Miller arrived at the cell where Coughlin was confined, he found the man biting furiously at his arm, while blood spurted all over him. A physician was called and the wound dressed. Coughlin was taken to Rochester last evening.

Arthur F. Kilbourne, Med. Supt.,

Rochester State Hospital, Rochester, Minn.

Dear Sir:-

We are sending you to-day one Edward B. Roeber, whom you will doubtless remember as having been committed to your institution under the name of Peterson something like four or five years ago. You will also remember having been summoned with myself before the District Court in St. Paul when on trial as to his sanity and that under the name of Peterson he was deported from your institution to South Dakota. That he returned and was arrested for another crime and after having been declared insane he was commited to your institution again and was immediately deported by State Agent Gates to Milbank, South Dakota. Not long after this incident he returned again and committed another crime, as the enclosed indictement and commitment papers will indicate, under the name of E. B. Roeber and we have had him here ever since.

His sentence will expire on the 11th of this month and not believing him a fit subject to turn at large I have had him examined as to his sanity and he has been again commited to your institution.

I took the matter up with the Board of Control with a view of having him deported again upon his release, but it was found that we did not have time to get his case properly before the South Dakota authorities before his time would expire, and for this reason we concluded to commit him to your institution and deport him later

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient talks confusedly about hypnotism & experts: Claims that Gluck ("Hypnotist") tells him about all people, & that he knows Wolfe & Lemon are criminals &c. Remembers dates & things fairly well, but everything is confused with hypnotism.

Says: went from Fort D. Dakota; then back to St Paul where was arrested and freed: then to Melbank, where was arrested, warned & freed. From there to Chicago; then to Rapids, where he was again in trouble & sent to Stillwater "on suspicion" —

2½ yrs St Paul
4 m Melbank, Dakota Co
3 yrs Fort D. Dak.
Stood + Jump
on four chairs when
Hearing – carried a team
99 & Pressed 5 – 12
for it.

Personal and Medical History of Edward B. Reber

1902

This patient was brought here by C.A. Bloom, in fair physical condition, with following history of case. As to consanguinity, nothing stated: as to any heredity, unknown. This is not 1st attack: warrent to this (Rochester) hospital January 20 - 1898 from Prison, and duly discharged. When first symptoms of this attack manifested, is not stated.: Showed delusions as to hypnotism. Disease seems stationary: Derangement now shown by wearing pads, harness &c, to keep off influence. Is not disposed to injure others, nor suicidal: no filthy or destructive habits. If any previous peculiarities manifested unknown: no history of intemperance, nor of any severe disease &c or head-injury: Cause of disease unknown. On personal examination, delusions confirmed. Commitment of said Edward B. Reber or Peterson recommended, because he need Care & restraint.

NOTE. 2nd admission: here before as "Henry Peterson" (and came from State-Prison then), from January 20 - 1898 to September 20 - 1898 and discharged February 8 - 1899, as unimproved. (See Newspaper-Clipping in previous history Vol 39. p25 No 4919 when he was arrested as "Charles Wideen", but was recognized by Chief Coss as "John Peterson". It was stated he had a "police Record"). On 1st Commitment manifested delusions "that he was hypnotized & oppressed". Patient mistaken from her by Dr. Gates. Copy of Indictment &c & Copy of Warrant of Commitment to State Prison with papers

Dec 10 On admission, was put on D.S.E. (G.H.N. Rpt: Complexion light: hair light brown.: eyes gray. Condition of skin normal: small scar on left cheek: 3 do on forehead: 5th on back of left ear. Small scars, top of head: do on left wrist: 3 do on abdomen: Small scars on right side: several do lower part of back: small sore on back shoulder: Is clean: Teeth: 7 missing, upper: 7 missing, lower: Behavior quiet: Patient is delusional). ———

Dec. 23/02. Since coming quiet in manner; garrulous in talk; many delusions in regard to hypnotism.

Rochester Bulletin Dec 24/02

An Old Acquaintance.

Register of Deeds Kelly is not one of those politicians who shake hands with you during the campaign and then fail to recognize you afterwards. Even if he had seen you but once and that in some previous existence, he would cordially welcome you at his office and should his memory fail to place you, he would inquire under what circumstances he had met you.

A few days ago, a gentleman was conducted before Judge Leonard to be examined regarding his sanity. There was not much doubt of his mental condition, but the formality was necessary, before committing him to the State Hospital. Sheriff Vine accompanied the man, and incidentally dropped into the register's office. Mr. Kelly was there and the sheriff with much gravity introduced the stranger. The register was much pleased and extended his hand for a cordial shake. "How do you do," he said. "I am glad to see you. Now let me see, where did I meet you last fall?" The new comer glared at him a moment and replied: "I am two hundred and ninety years old. My grandfather was three hundred. I have swam across the ocean twice. I have been beheaded three times. I was governor of Germany for seventy years, and have been governor, also, of France. I am at present governor of Washington."

By this time Mr. Kelly had caught his breath and made his escape fearing that the maniac would become violent. But he has not yet escaped from the merciless chaffing of his friends. "Jim" has reason to believe that he met every man in the county during the last campaign, but there is no evidence that he ever saw this unfortunate man before. Mr. Kelly is one of those good fellows who are always glad to see you under any conditions but it is no reflection on your sanity when he shakes you—by the hand.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient is not very clear a coherent. Is rather talkative & irrelevant - Answers questions, but in a vague & uncertain way, at times. - In fair health. —

Personal and Medical History of Andrew Westrum

190?

This patient was brought here by E. Carey attended by Frank Hilebrand, in fair physical condition, with following history of case. As to any consanguinity, do not know: think not. No nuisance relatives: This is not 1st attack: Others occurred 6 years ago last May: duration, about 3 months: removed to hospital, at Rochester, Minn; and very much improved, by treatment. First symptoms of this attack manifested, about 3 months ago: indifference in regard to his business or work: and talking irrationally (?) present status of disease is not stated: variable with rational intervals; but then, not regular. Derangement now shown in subject of religion, and political matters: has many delusions in many subjects: Is disposed to injure others: not suicidal. Not disposed to filthy or destructive habits: no previous peculiarities manifested: Not as far as known. He is, himself, slightly addicted to intemperance: has not been subject to any severe disease &c, a head-injury: has not been restrained a convict: do not know cause of disease. Treatment only at hospital six years ago. — On personal examination, has a wild look: incoherent: appears deluded. —

*Note. 2nd admission: Here before from May 4-1896 to August 10-1896 + discharged February 3-1897, as Improved. Form then diagnosed as "Mania subacute" - Mother reported to have had temporary delusions. (See Vol 33 p 165 No 4390).

See ✓ On admission, was put on B3 (G.H.N. Pk): complexion medium: hair brown: eyes blue: condition of skin normal: scars on right wrist; one inside right hand: one on left wrist: one on first finger, left hand: one, small, on abdomen: Hernia left side: is dirty: Teeth: 4 missing, upper jaw: 1 missing, lower jaw):

Dec. 27 Restless; talkative; continually teasing to go.

Jan. 6. Visited by relatives.

Feb. 3. Taken home by brothers; has improved quite rapidly.

Came over - Pete Olson - in Penn: Lusorg - Rice mill - 5 weeks - (John Clark, Albert Lea - worked 4 m) Walked from Penn. to Albert Lea. No relatives insane - Well, when he came out. Thinks has been ailing about 5 weeks. Admits drinking heavily - admits drinking 3 Days in Albert Lea. & was arrested. —

Patient cannot give much information - Was picked up as Theft: gave various names & addresses, but none availed for information: So was finally committed: Can get only vague information, & that by much teasing, but no delusions appear & it seems as if information given was correct —

1902

Personal and Medical History of Alfred Florin

This patient was brought here by J.B. Thompson, attended by Ed. Johnson, in fair physical condition, with following history of case. Don't know as to consanguinity, heredity, if first attack, duration, if sent to hospital, status of disease, if variable or if there are rational intervals, if any previous peculiarities manifested, if intemperate, if he has been subject to any severe disease &c, or head-injury, if he has been restrained or confined, or if so, for how long; or if any treatment has been pursued. First symptoms of this attack manifested Dec 23d 1902: wandering around depot: acting strangely. Derangement shown shown in that, when asked about father or mother, interpreta states that patient becomes incoherent: uses profane language & slang. Is not disposed to injure others: has not attempted suicide: has said that he wanted to be killed: (possibly suicidal?): not disposed to filthy or destructive habits. Don't know cause of the disease. On Personal Examination, Temperature 99.2 Pulse 90 restless, talkative, nervous, excited, playing with fingers: apparently laboring under some delusions.—

Dec 27 On admission, was put on B.3.E (G.H.N. B.P.): Complexion medium: hair brown: eyes blue: condition of skin, slight eruption: large scars on forehead: small scars, on left thumb, left first finger & right third finger. Is very dirty. Teeth: 3 missing upper jaw: 1 missing, lower jaw, left 3rd bicuspid.)

Jan 1/03. Quiet; dull; stands by himself; answers evasively, does not tell of delusions.

Jan 2/03 About the same.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Came over Dec 29 - 1897. Stockholm: School in Stockholm till 14: Father a gardener. Was running away from some people, a week ago & fell in creek & lay there for 24 hours: froze foot & fingers. Had been out all night: had been afraid because had made tracks, which he thought were Masonic signs, that he had made: He was told that the Masons would kill him for doing it. & this started him in being afraid.

1903 Personal and Medical History of Charles N. R. Anderson

This patient was brought here by P. J. Lundquist, in fair physical condition, with following history of case: As to any consanguinity & heredity, not known. This is 1st attack: first symptoms manifested December 24 - 1902: thought some one was trying to kill him: Disease seems increasing: variable; not at regular intervals: Derangement now shown by "delusions of persecution" - "thinks people are trying to kill & poison him". Is not disposed to injure others, nor suicidal: no filthy or destructive habits. Was hypnotized, one year ago, in Goodhue, and has had a fear of Lodges, since then. No history of intemperance, nor of any severe disease &c, or head injury: Has not been restrained or confined. No apparent cause of the disease. Treatment, none. —

On personal examination, has appearance of anxiety. —

Jan 5 On admission, was put on B 3 E (G. H. N. Rft: Complexion medium: hair brown: eyes gray: condition of skin normal: "H.A." Tattoo mark on left arm: vaccination scars, right shoulder: small scar, left arm: second finger, left hand, deformed (crooked). Is fairly clean: Teeth; 2 missing upper: 3 missing lower: Quiet and well-behaved) -

Jan. 6. Restless; imagines someone is after him.

Jan 18 Still rather melancholy and fearful; health good.

Patient has been in Mendota Asylum for 2 years: of late has been working out: has some relatives in La Crosse. Similar Maniacal & no good history obtainable. —

Personal and Medical History of Phillip Thompson

1903

This patient was brought here by Dep. N. Nicholsen, attended by Chester Johnson in fair physical condition with following history of case. No history of consanguinity or heredity. This is not 1st attack: one occurred 3 years ago; duration 2 years: was sent to Wisconsin Insane Hospital; supposed released cured. First symptoms of this attack manifested about 3 days ago. Disease seems stationary: not variable; no rational intervals. Derangement now shown by crying under delusions of various kinds. Is not disposed to injure others, nor suicidal: propensity not active. Not of filthy or destructive habits. Seems intensely religious. No history of intemperance. Not subject to any disease &c, or head-injury, as known. Was confined in County Jail 24 hours. Cause of disease, not stated. Treatment, none for this attack. — On personal examination, cries while being questioned: thinks himself bullet-proof: keeps eye on McKinley's picture, and cries about his death, when questioned. Commitment recommended because he needs medical treatment, while under legal restraint.

Jany 7 On admission, was put on T.W.S. (10 10 pm) (G.H.N. Plot: Complexion medium: hair brown: eyes gray: condition of skin good: small abrasion on nose: small scratches on face: bruise on small of back, left side: varicose veins on both legs: both thumbs, at nails, have been slightly injured: is rather dirty. Teeth: rather poor condition: several missing: unable to get a good description of them. Behavior maniacal and delusional. Says "he is Jesus Christ" and "that he went down with the "Maine".

Jan. 8 Restless; destructive Jan 9/03 Broke dinner dishes. Jan. 20/03 Still rather maniacal. Jan. 24 Trans. to B; Jan. 25 Destructive of clothing; restless at night.

Jan. 31 Still restless at night; getting up often; delusional; appetite good. C.L.C.

SUBJECT: Thomas Mc Govern

St. Paul, Jan. 8, 1903.

Mr. Christianson,
Judge of Probate,
Rochester, Minn.

Dear Sir:

You are hereby authorized to commit to the State Hospital Thomas Mc Govern, a non-resident insane person, now before your court upon information in insanity, in case upon examination he is found insane, upon the ground that his deportation is at present impracticable; that if deported to his home in Wisconsin he would not remain and his insanity is of such a nature that he could not be committed at that place; that at his home in Wisconsin it would undoubtedly be safe to permit him to run at large, but that at Rochester, if given his liberty, the life of his wife, who has separated from him, would be in danger.

Yours truly,

BOARD OF CONTROL OF STATE INSTITUTIONS

Personal and Medical History of Thomas Mc Govern

1903

This patient was brought here by A. Brown, attended by Marshal Fowler, in fair physical condition, with following history of case. Commitment based on ground that he threatened life of wife: no history of consanguinity or heredity: this is not 1st attack: others accurred in 1883 & 1899: duration 7 months and 9 months: was sent to [x] Rochester State Hospital for 1st attack in 1883: recovered: recovered by home treatment, for '99 attack: When first symptoms of this attack manifested or in what way, not stated: Disease seems increasing: variable: rational intervals irregular. Derangement now shown by violence toward family & delusional: recently assaulted wife: Believes himself to be "Cole Younger". Is disposed to injure others: not suicidal: not disposed to filthy or destructive habits: Has suffered from attacks of melancholy: no history of intemperance, nor of any severe disease &c or head-injury. Has been in County Jail for 2 weeks. Supposed cause of the disease is nervous prostration, debility, indigestion: No systematic treatment has been pursued. On personal examination, the following noted: Enervated Pulse, intermitting 130: Delusional: Violent, attempting

[x] Note: 2nd admission here: was here before from Sept 13-1883 to March 29-1884 & discharged March 29-1884 as recovered.: Cause then given as "Dyspepsia": Form of Disease "Mania Acute". In that attack was violent & attempted to kill a man - (For further particulars see Vol 3 Page 170 no 531.)

Jan 8 On admission, was put on T.W.E. (G.H.N. Dpt.: Complexion dark: hair nearly black: streaked with gray: curly: eyes blue: condition of skin normal: vaccination marks, right arm: scars on right hip and wrist. Small scratches, upper part of back. Is clean. Third toe, right foot, missing: Teeth: Has 8 teeth, on upper jaw: 2 missing, lower jaw. (Quiet & well behaved on admission: converses intelligently)-

Jan. 21/03. Visited by relatives several times: slightly maniacal; easily excited.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Patient dull, quiet, depressed. Lies quietly in bed: seems of fair condition. Says "has worked hard, but no harder than usual, this summer." No special bodily disease locatio: Is somewhat dyspeptic, and hypochondriacal —

Personal and Medical History of *Edmund J. Blanchard*

1903

This patient was brought here by Sheriff E. H. Vine, in fair physical condition with following history of case. No history of consanguinity or heredity: This is 1st attack. First symptoms manifested three months ago: delusional. Disease seems increasing: variable & with rational intervals. Derangement now shown in that he believes he has been poisoned. Is disposed to injure others, but not suicidal: not of filthy or destructive habits. Has always been eccentric. No history of intemperance, nor of any severe disease &c, or head-injury. Has not been restrained & confined. Supposed cause of the disease is intestinal indigestion. Do not know what treatment has been pursued. On personal examination it is learned he suffers from insomnia; delusional & intestinal indigestion. —

Jan 14 On admission, was put on T.W.E; 12th ftm (S. H. H. Rft: Complexion dark: hair black, bald: eyes gray: condition of skin fairly good: vaccination mark, left arm: is clean: is rather emaciated: Teeth: 5 missing, upper jaw:). —

Jan. 27/03 Visited at various times by relatives; quiet; melancholy; rather rational in talk.

BEGAN WITH A SPREE.

Ends by Going to the Asylum at Rochester.

Adolph Muenster, who was found two weeks ago with his feet and hands frozen, was adjudged insane yesterday in the probate court and ordered committed to the asylum at Rochester. Muenster is forty years old, and has resided in St. Paul twenty-four years. He was formerly a stone mason and was a prominent member of several German societies.

He quarreled with a young woman during a spree, it is said, fifteen years ago, and a policeman in trying to part them shot Muenster through the left leg. The ball entered his left leg and lodged in the right one, where it has since remained. The shooting affair was a great blow to him, and after recovering from his injuries he brooded much over it. He left home, and since then, according to the story of his niece, wandered from one end of the land to the other. When picked up by the police two weeks ago he was on the way home from La Crosse, Wis., having walked all the way.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

16 years old, when came from Germany: Married, but can't tell when: Admits Drinking heavily. Patient gives no history of value: Seems clear, but is very vague in his answers. Says "was married": Says "saw his wife 25 years ago": says "is 40 years old &c &c" (Statements seem to have no reliability). —

1903 Personal and Medical History of Adolph Muenster

This patient was brought here by Emanuel Johnson, in fair physical condition, with following history of case. Not known as to Consanguinity: no insane relatives. This is Paranoia: first symptoms manifested two weeks ago: Delusions in regard to wealth. Disease seems increasing: not variable: no rational intervals. Derangement now shown by delusions of wealth. Is not disposed to injure others, no suicidal: not of filthy or destructive habits. Not known as to any previous peculiarities: no history of intemperance, nor of any severe disease &c, nor head-injury. Has been confined or restrained in County Jail two weeks. Cause of disease unknown. Treatment, none. On personal examination, nothing further.

Jan 22 On admission, was put in B3 10:30 pm. (G. H. N. Hpt. Complexion dark: hair and beard dark brown: eyes gray: Condition of skin fairly good: Scars on left fore-arm, scar on left leg, above knee: Bunion on big-toe joint on each foot: both feet slightly swollen, Scabby & blistered: Says "they have been frozen" - is dirty. Teeth: Has 5 teeth, upper jaw, 9 in lower jaw; 4 stubs, upper jaw: 2 stubs, lower jaw. Is quiet and well-behaved on admission. Patient received by night-nurse (Mrs. F. Wood)-

Jan 31-1903- Restless; surly; slightly incoherent; health good.

Give condensed statement of the present Mental and Physical Condition (the nearest type of Insanity, the most probable cause, the degree of invasion, estimate of previous mental grade, and any physical impairment).

Mr. Forman appears quite intelligent, but his statements are so varying & unreliable, that the resulting information is small. It seems, however, that he was walking from town to town N of St Paul: was refused lodging at a small town, & starting out to find accommodation at some farmer's got lost in the woods. —

There is no knowing how long his mental state has been coming on: possibly he has been worse of late, but probably he has been dull for a long time.

Personal and Medical History of John Forman

1903

This patient was brought here by J. J. Grisim, attended by Frank Mather, in fair physical condition, with following history of case. No consanguinity: Arthereditg, do not know. This is 1st attack: first symptoms manifested two a week: do not know in what way. Disease is probably Stationary: if variable & with rational intervals, do not know. Derangement now shown by slow speech & intelectuation: "Claims to be son of Charles XII of Sweden": imagines he owns large properties and is wealthy. Is not disposed to injure others, nor suicidal: not disposed to filthy or destructive habits. Previously, was inclined to be alone and not to have associates. No history of intemperance. Had Typhoid fever, 10 years ago. Has not been restrained or confined. Do not know cause of the disease. Not any treatment we know of. On personal examination, imagines he is son of Charles XII of Sweden. Imagines he is wealthy & owner of properties: Ears, feet and nose frozen. Commitment recommended, because of his vagaries, he is unable to take Care of himself & he needs care & treatment & is apt to wander away, unless restrained.

Jan 23 On admission, was put on TW. 11:30 P.M. (G.H.N. R.N.: Complexion light: hair light brown. eyes blue: Condition of skin fairly good: Scars below left knee, inside: both feet & legs badly scrollen, upto knees: both feet very sore & blistered - says they were frozen - Dirty, very: both ears & nose look as if they had been frozen. Teeth: 3 missing, upper jaw. rest in fairly good Condition. Behavior quiet, but Confused & Delusional, and missing.

Jan. 31 Somewhat stubborn; dull and listless; indifferent; health good.
