Rev. 9-72

ADMIN 1000

STATE OF MINNESOTA

DEPARTMENT Attorney General

Office Memorandum

TO : **Alan Mitchell**
Special Assistant Attorney General
Pollution Control Agency

DATE: **June 28, 1974**

FROM : Michael B. Miller
Special Assistant Attorney General

SUBJECT: Rules and Regulations - **APC 2 and APC 3**

Enclosed directly following this memorandum are the rules and regulations you have submitted for approval. These rules and regulations have been approved by the Attorney General, filed with the Secretary of State and with the Department of Administration.

Upon receipt and before transmittal to your agency, it is IMPERATIVE that you recheck these rules and regulations as to:

1. Are the stamps of the Attorney General, Secretary of State and Department of Administration affixed to the last page of the rules and/or regulations;

2. Are all rules and/or regulations submitted covered by these stamps;

3. Are all pages of the rules and/or regulations included in the approved set?

Directly following the approved rules and/or regulations is a complete set of required documents and transcript which MUST be retained with the approved rules and/or regulations by you or your agency.

Also enclosed are additional documents and transcripts not retained by the Secretary of State; these should also be retained with the rules and/or regulations by you or your agency.

If you have any questions in this regard, please contact me.

MBM/sr

Enclosures

Final Draft May 21, 1974

Minn. Reg. APC 2 is hereby amended to include the following definitions:

CHAPTER TWO: APC 2

Definitions

(1) "Control Equipment": An "air contaminant treatment facility" or a "treatment facility" as those terms are defined in Minn. Stat. § 116.06 subd. 6.

(2) "Emission Facility": Any building, facility, installation, structure, work, equipment, machinery, device, apparatus or other means whereby an emission is caused to occur.

Minn. Reg. APC 3 is hereby amended to read:

CHAPTER THREE: APC 3

APC 3 Permits, Shutdowns and Breakdowns, Emission Source Monitoring, Measurement of Air Contaminants Emission

(a) Installation Permits

(1) Permit Required

No person shall install or construct any emission facility or control equipment without an installation permit therefor from the Agency.

(2) Permit Application

Any person who is required to obtain an installation permit under this regulation shall submit to the Director plans and specifications of the emission facility or control equipment containing the following information:

(aa) Expected composition of the effluent stream, both before and after the installation of an air cleaning device, including emission rate, concentration, volume and temperature;

(bb) Expected physical characteristics of particulates;

(cc) Type of cleaning device, if any;

(dd) Location and elevation of the emission point and other factors relating to dispersion and diffusion of the contaminant in the outer air, and the relation of the emission point to nearby structures, window openings, and other information necessary to appraise the possible effects of the effluent;

(ee) Any other reasonable and pertinent information that may be required by the Director.

(3) Decision

The Agency shall not grant an installation permit unless the Agency determines that the emission facility or control equipment will comply with the requirements of applicable pollution control statutes and regulations.

(b) Operating Permits

(1) Permit Required

No person shall operate any emission facility or control equipment without an operating permit therefor from the Agency. Any person operating an emission facility or control equipment for which an installation permit has been obtained shall be permitted to operate without an operating permit for a period of ninety (90) days following commencement of operation of the emission facility or control equipment. The Agency may extend this time for good cause.

(2) Permit Application

Any person who is required to obtain an operating permit under this regulation shall submit to the Director plans and specifications of the emission facility or control equipment containing the following information:

(aa) Composition of the effluent stream, both before and after the installation of an air cleaning device, including emission rate, concentration, volume and temperature;

(bb) Physical characteristics of particulates;

(cc) Type of cleaning device, if any;

(dd) Location and elevation of the emission point and other factors relating to dispersion and diffusion of the contaminant in the outer air, and the relation of the emission point to nearby structures, window openings, and other information necessary to appraise the possible effects of the effluent;

(ee) Any other reasonable and pertinent information that may be required by the Director.

(3) Agency Decision

The Agency shall not grant an operating permit unless the Agency determines that operation of the emission facility or control equipment will comply with the requirements of applicable pollution control statutes and regulations.

(c) Delegation of Permit Authority

The Agency may delegate to any city, county, or other political subdivision of the State of Minnesota, the authority to issue installation and operating permits required under this regulation.

(d) Exemptions

(1) Installation and Operating Permits

The following emission facilities are exempt from the requirements of paragraphs (a) and (b) of this regulation:

(aa) All fuel-burning installations of less than 1,000,000 BTU per hour input;

(bb) All fuel-burning installations of less than 10,000,000 BTU per hour input burning only natural gas, liquified petroleum gas, or No. 1 or No. 2 fuel oil;

(cc) Comfort air conditioning or comfort ventilating systems not designed to remove air contaminants generated by or released from specific units or equipment.

(dd) Incinerators of less than 100 pounds per hour burning capacity.

(e) Permits for Alterations and Modifications

The requirements of subparagraphs (a) and (b) of this regulation shall apply to any change in, addition to, or extension of any emission facility or control equipment that would materially alter the method or effect of treating or disposing of any air contaminant.

(f) Anti-degradation

Notwithstanding any other provisions of these rules and regulations, an installation permit or an operating permit shall not be issued if the planned construction, installation, reconstruction, alteration or operation would result in emissions of air contaminants causing the violation of the ambient air quality standards established in APC 1.

(g) Permit Conditions

(1) The following conditions apply to all permits issued under this regulation:

(aa) A permit shall not release the Permittee from any liability, penalty, or duty imposed by Minnesota or federal statutes or regulations or local ordinances except the obligation to obtain the permit;

(bb) A permit shall not prevent the future

adoption by the Agency of any pollution control regulations, standards, or orders more stringent than those now in existence or prevent the enforcement of such regulations, standards or orders against the Permittee;

(cc) The Permittee shall install and operate the emission facility or control equipment covered by the permit in accordance with plans and specifications submitted to the Agency and referenced in the permit;

(dd) The Permittee shall not knowingly make any false statement, representation or certification in any record, report, plan, or other document required to be submitted to the Agency under this permit. The Permittee shall immediately upon discovery report to the Agency any errors in such records, reports, plans, or other documents;

(ee) The Permittee shall allow the Agency, or any authorized employee or agent of the Agency, when authorized by law and upon the presentation of proper credentials, to examine and copy any books, papers, records or memoranda pertaining to the installation or operation of the emission facility or control equipment covered by the permit;

(ff) The Permittee shall allow the Agency, or any authorized employee or agent of the Agency, when authorized by law and upon presentation of proper credentials, to enter upon the property of the permittee for the purpose of obtaining information or examining records or conducting surveys or investigations pertaining to the installation or operation of the emission facility or control equipment covered by the permit.

(2) The following conditions apply to all Installation Permits issued under this regulation:

(aa) The Permittee shall submit periodic progress reports to the Agency reciting progress and problems occurring in the installation of the emission facility or control equipment covered by the permit. A time schedule for submission of these reports shall be included in the permit;

(bb) The Permittee shall advise the Agency immediately upon completion of installation of the emission facility or control equipment;

(cc) Installation permits shall expire ninety (90) days after installation of the emission facility or control equipment is completed or twelve (12) months after the day it is issued if installation has not begun. Installation shall be deemed to have begun if a continuous program of construction has been undertaken. Interruptions resulting from matters beyond the control of the Permittee shall be considered by the Agency in determining whether installation has begun;

(dd) Such other conditions as the Agency may prescribe for the prevention of pollution.

(3) The following conditions apply to all Operating Permits issued under this regulation:

(aa) The Permittee shall, when requested by the Agency, submit such information and reports which are relevant to control of pollution regarding the operation of the emission facility or control equipment covered by the permit;

(bb) The Permittee shall notify the Agency immediately of a breakdown of more than one hour duration of the

control equipment covered by the permit and, if the breakdown causes an increase in the emission of air contaminants, of the breakdown of any process equipment included in the emission facility covered by the permit;

(cc) The Permittee shall notify the Agency at least 24 hours in advance of a shutdown of any control equipment covered by the permit and, if the shutdown would cause an increase in the emission of air contaminants, of a shutdown of any process equipment included in the emission facility covered by the permit;

(dd) Operating Permits shall have a fixed term which shall not exceed five (5) years;

(ee) Such other conditions as the Agency may prescribe for the prevention of pollution.

(h) Permit Procedure

The Agency shall follow the procedure set out below on all permit applications for an installation permit for an emission facility or modification which emits a single air contaminant or air pollutant in excess of one thousand (1000) tons per year.

(1) Within thirty (30) days after receipt of a completed permit application, the Agency shall:

(aa) Make a preliminary evaluation of the effect of the emission facility or modification on the air quality;

(bb) Make available for public inspection in at least one location in the air quality control region in which the emission facility is located, a copy of all materials submitted by the permit applicant and a copy of the Agency's preliminary evaluation of the effect on air quality;

(cc) Give notice by prominent advertisement in a newspaper in the air quality control region affected of the location where the information required in subparagraph (bb) is available and of the opportunity to submit written comment on the permit application for a period of thirty (30) days;

(dd) Provide a thirty (30) day time period for submittal of written public comment;

(ee) Send a copy of the notice specified in subparagraph (cc) to the Region V office of the United States Environmental Protection Agency, to State and local air pollution control agencies having jurisdiction in the air quality control region affected, to city and county officials in the region affected, to the appropriate regional development commissions, to the State Planning Agency, to the applicant, and to all other persons deemed by the Director to have an interest in the permit application.

(2) Public comments submitted in writing within the thirty (30) day comment period shall be considered by the Agency in making its final decision on the permit application. All comments shall be made available for public inspection in at least one location in the region affected.

(3) The Agency shall take final action on the permit application within forty-five (45) days after the close of the public comment period. Notice of the final decision shall be made available for public inspection in at least one location in the region affected.

(4) The Agency may extend each of the time periods specified in paragraph (h) of this regulation for a period not to exceed thirty (30) days or such other period as agreed to by the applicant. Nothing herein, however, shall preclude the Agency from extending any of these time periods for an appropriate length of time if it decides to hold a public hearing or public meeting on any permit application, of if an environmental impact statement on the emission facility or modification is prepared.

(5) Nothing in paragraph (h) of this regulation shall preclude the Agency from following this procedure on any installation permit application for an emission facility or modification not described herein, or for an installation permit for control equipment, or for any operating permit.

(i) Reissuance of Operating Permits

(1) No sooner than 180 days nor later than 90 days prior to the expiration of an operating permit issued pursuant to paragraph (b) of this regulation, a Permittee who wishes to continue operating his emission facility or control equipment shall submit a written request to the Director for reissuance of the operating permit.

(2) After receipt of a written request for reissuance of an operating permit, the Agency shall review the request to

determine whether the permittee has complied with all conditions of his existing permit and with all other applicable pollution control statutes and regulations. The Agency or the Director may request the Permittee to submit such information as is deemed necessary to determine compliance. Unless the Agency determines that the Permittee has not complied with all permit conditions and other applicable pollution control statutes and regulations, the Agency shall reissue the operating permit subject to such conditions as the Agency may impose. If the Agency denies the request for reissuance of the permit, the Permittee may reapply pursuant to paragraph (b) of this regulation.

(3) The Agency shall act on a request for reissuance of an operating permit within ninety (90) days after the request is submitted.

(j) Shutdown or Breakdown

(1) Shutdown

The operator of an emission facility shall notify the Director at least 24 hours in advance of shutdown of any control equipment and, if the shutdown would cause an increase in the emission of air contaminants, of a shutdown of any process equipment. At the time of notification, the operation shall also notify the Director of the cause of the shutdown and the estimated duration. The operator shall notify the Director when the shutdown is over.

(2) Breakdown

The operator of an emission facility shall notify the Director immediately of a breakdown of more than one hour duration of any control equipment and, if the breakdown causes an increase in the emission of air contaminants, of a breakdown of any process equipment. At the time of notification or as soon thereafter as possible, the operator shall also notify the Director of the cause of the breakdown and the estimated duration. The operator shall notify the Director when the breakdown is over.

(3) Operation Changes

In any shutdown or breakdown covered by sub-paragraph (1) or (2) above, the operator shall immediately take all practical steps to modify operations to reduce the emission of air contaminants. The Director may require feasible and practical modifications in the operation to reduce emissions of air contaminants. No emission facility which has an unreasonable breakdown frequency of control equipment shall be permitted to operate. Nothing in this regulation shall permit the operation of an emission facility which may cause an immediate public health hazard.

(k) Emission Source Monitoring

(1) All persons responsible for the emission of air contaminants may be required to establish an emission source monitoring system, upon order of the Director, when in his judgment other methods of measurement or calculation do not provide adequate information on the level or variation of emissions

to assure compliance with the regulations. The monitoring system may include the installation and operation of such monitoring instruments as are available and reasonably necessary to assure the accuracy of the monitoring. All emission source monitoring shall be accomplished by the following listed methodology and testing or other methodology and testing as the Director shall require: e.g., as to visible emissions, a photo-electric or other type of visible emission detector and recorder; e.g., as to hydrocarbons, sulfur dioxide, carbon monixide and nitrogen oxides, instruments designed for continuous monitoring and recording; e.g., as to particulate emissions, annually, by ASME--PTC 27. Results of such tests shall be reported to the Director within 45 days.

(2) The accuracy of all such instruments and the adequacy of the monitoring system shall be demonstrated to the satisfaction of the Director prior to the issuance of an installation permit, and at any other time that the Director may request.

(3) All information obtained as a result of such monitoring shall be furnished to the Director at such times and in such form as he may specify. The Director shall publish all such information indicating emissions in excess of those permitted by law. Any emissions data published by the Director shall be presented in such a manner as to show the relationship between actual and allowable emissions. Within ten days of

receipt of a written request from any person, the Director shall provide the available recorded hourly emission or other available monitoring data from any source for a period not exceeding four consecutive days.

(4) In the case of an intended shutdown of any monitoring instruments, the operator shall notify the Director at least 24 hours in advance of the shutdown. In the case of a breakdown, the operator shall notify the Director immediately upon discovery, except that a temporary breakdown of less than 60 minutes duration need not be reported. In the event of either a shutdown or reportable breakdown, the operator shall also, at the time of notification or as soon thereafter as possible, inform the Director of the cause, and the estimated duration of the shutdown or breakdown. The operator shall undertake all reasonable efforts to correct the cause and restore the monitoring instruments to full operation.

(5) An exemption from the requirements of this paragraph (b) shall be granted (i) as to any source utilizing control equipment or fuel of such design or nature as to assure compliance with emissions regulations beyond reasonable doubt, and (ii) as to any source that does not emit particulates, sulfur oxides or nitrogen oxides in excess of 25 tons per year.

(1) Measurement of Air Contaminants Emissions

(1) Responsible Persons to Have Tests Made

Upon order of the Director, all persons responsible for emission of air contaminants shall make or have made tests to determine the characteristics and amount of emission of air contaminants from any source. The Director may specify testing methods to be used in accordance with good professional practice and may observe the testing. All tests shall be conducted by reputable, qualified personnel. The Director shall be given two copies of the test methodology and results in writing and signed by the person responsible for the tests.

(2) The Director May Make Tests

Upon order of the Director, the persons responsible for an air contaminant source shall provide necessary holes in stacks or ducts and such safe and proper sampling and testing facilities, exclusive of instruments and sensing devices as may be necessary for proper determination of emission of air contaminants, and the Director or his agents may conduct tests of emissions from such source.

(3) All owners or operators of stationary sources of emissions which emit more than 25 tons per year of particulates, sulfur oxides, nitrogen oxides, carbon monoxide, or hydrocarbons shall submit on or before January 30th of each year an emission inventory report covering the previous calendar year.

STATE OF MINNESOTA

COUNTY OF HENNEPIN

MINNESOTA POLLUTION

CONTROL AGENCY

In the Matter of the Adoption of Proposed Amendments to Minnesota Regulations APC-2 and APC-3 Including a Permit Requirement for Complex Sources, Permit Conditions for all Permits, Procedures for Public Participation in Permit Applications, and Definitions

ORDER FOR

HEARING

To effectively implement Minn. Stat. §§ 116.07 subd. 4a and 116.081 (1971) and to comply with federal law, the Minnesota Pollution Control Agency deems it necessary to consider adoption of the proposed amendments captioned above pursuant to authority vested in the Agency by law.

NOW, THEREFORE, IT IS ORDERED this 16th day of October, 1973, that a public hearing on the proposed amendments captioned above be held in the Board Room of the offices of the Minnesota Pollution Control Agency, 1935 W. County Road B-2, Roseville, Minnesota, on November 29, 1973, commencing at 9:00 a.m. and continuing until all interested persons, representatives, organizations, or groups have had an opportunity to be heard.

IT IS FURTHER ORDERED that notice of said hearing be given to all representatives of associations or other interested groups or individuals who have registered their names with the Secretary of State for that purpose.

Dated this 16th day of October, 1973.

MINNESOTA POLLUTION CONTROL AGENCY

Harold D. Field, Jr.

Harold D. Field, Jr.
Chairman

Grant J. Merritt

Grant J. Merritt
Executive Director

STATE OF MINNESOTA

COUNTY OF HENNEPIN

MINNESOTA POLLUTION

CONTROL AGENCY

In the Matter of the Adoption of Proposed Amendments to Minnesota Regulations APC-2 and APC-3 Including a Permit Requirement for Complex Sources, Permit Conditions for all Permits, Procedures for Public Particiaption in Permit Applications, and Definitions

NOTICE OF

HEARING

NOTICE IS HEREBY GIVEN that a public hearing in the above-entitled matter will be held pursuant to Minnesota Statutes, section 15.0412 and chapters 115 and 116 (1971), in the Board Room of the offices of the Minnesota Pollution Control Agency in the City of Roseville, Minnesota, 1935 W. County Road B-2, beginning at 9:00 a.m. on Thursday, November 29, 1973, and continuing until all interested persons, representatives and organizations have had an opportunity to be heard concerning the adoption of the proposed amendments captioned above, by submitting oral or written data, statements, comments, or arguments. All testimony shall be given under oath or affirmation. Statements may be mailed to the Agency at the address below for submission into the record at any time prior to closing of the record. The record shall close at 4:30 p.m. on Friday, December 21, 1973.

The Agency's address is 717 Delaware Street, S.E., Minneapolis, Minnesota 55440. After November 12, 1973, the Agency's address will be 1935 W. County Road B-2, St. Paul, Minnesota 55113.

The Agency proposes to amend APC-3 to provide that a permit from the Agency is required to construct or modify a "complex source." A "complex source" is a facility, building, structure, or installation, or combination thereof, which causes or may cause mobile source activity that results in emissions of a pollutant for which there is a State or national ambient air quality standard. Shopping centers, highways, parking lots, airports, and sport stadiums are examples of "complex sources." Exemptions are made for certain "complex sources." The Agency also proposes to adopt permit conditions which will apply to all installation permits, operating permits, and complex source permits.

The Agency proposes to amend APC-3 to provide for public participation in the permitting process. Amendments are also proposed to require reporting of breakdowns and shutdowns of process equipment which may cause a pollution violation. The Agency does not propose to amend present provisions in APC-3 regarding emission source monitoring and measurement of air contaminant emissions.

Copies of the proposed amendments are available from the Minnesota Pollution Control Agency, Division of Air Quality, at the addresses given above. Copies will also be available at the hearing. These amendments are proposed amendments only and are subject to alterations or modifications as the Agency deems necessary and appropriate from its consideration of all the evidence adduced at the public hearing and all statements entered into the record.

Dated this 19th day of October, 1973.

STATE OF MINNESOTA

COUNTY OF RAMSEY

MINNESOTA POLLUTION

CONTROL AGENCY

In the Matter of the Adoption of Amendments to Minnesota Regulations APC 2 and APC 3

FINDINGS OF

FACT

The above-entitled matter came on for hearing before the Minnesota Pollution Control Agency (hereinafter Agency) on the 29th day of November, 1973, at 9:00 a.m. in the Board Room of the Agency offices, 1935 W. County Road B2, Roseville, Minnesota, after proper notice required by Minnesota Statute §15.0412 (1971) was served upon all persons, associations and other interested groups registered with the Secretary of State for that purpose.

After affording all interested persons an opportunity to present written and oral data, statements and arguments, having considered all of the testimony, having considered all of the evidence adduced and upon the records, files and proceedings herein, this Agency finds the following:

1. Minn. Reg. APC 3 presently requires an installation permit to construct and an operating permit to operate a stationary process, fuel-burning equipment, refuse-burning equipment and control equipment. Minn. Stat. § 116.081 subd. 1 (1971) requires a permit to construct, install or operate an emission facility, an air contaminant treatment facility, and a treatment facility, among other kinds of facilities. Incorporation of the definitions in Minn. Stat. § 116.06 (1971) will

remove any inconsistencies between the statute and the regulation. Incorporation of the definition of stationary source in section 111(a)(3) of the Clean Air Act, 42 U.S.C. § 1857c-6(a)(3) (1970) and in 40 C.F.R. § 60.2(d) (1973) will ensure that APC 3 requires a permit for all those sources which are required to be reviewed under 40 C.F.R. § 51.18.

2. APC 3 presently requires the Agency to act upon a permit application within 45 days after receipt of the application. This time period is too short and the Agency cannot act upon a permit application within a 45-day time limit. Whenever a public hearing is held or an environmental impact statement is prepared, an even longer period of time is needed to hold the hearing or write the impact statement before acting on the permit.

3. Minn. Stat. § 116.081 subd. 1 (1971) requires a permit from the Agency to make or to operate any change in, addition to or extension of any existing system or facility that would materially alter the method or the effect of treating or disposing of any air contaminant. Incorporation into APC 3 of language similar to the statutory language will remove any inconsistencies between the statute and the regulation. Federal law, also, 40 C.F.R. § 51.18 (1973), requires a prior review of modifications.

4. In the past the Agency has imposed permit conditions on an ad hoc basis. Many of the conditions which

were imposed were the same in all cases and must be required of all permittees.

5. New facilities often require a start-up period after construction or installation is complete before they are operating normally. A reasonable start-up period, therefore, is appropriate before requiring an operating permit.

6. New facilities must begin construction within a reasonable time after the installation permit is issued. Otherwise conditions affecting the air quality in the area of the proposed facility could change adversely during the life of the installation permit.

7. The Agency must be able to reevaluate the operation of permitted facilities and equipment. An expiration date in an operating permit is a practical means of implementing that review. Discharge permits issued under the National Pollutant Discharge Elimination System (NPDES) permit program will have a fixed term of no more than five years. This is provided in Minn. Reg. WPC 36(m) and required by section 402(b)(1)(B) of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. § 1342(b)(1)(B) (Supp. II, 1972). Five years as a maximum is a reasonable length of time for the life of an operating permit.

8. A procedure for reevaluating and reissuing operating permits which have expired is required. The permitte must be required to request a reissuance of his permit. The permittee

is entitled to a reissuance of his permit if he has complied with all the conditions of his permit and if he has complied with the requirements of all other applicable pollution laws.

9. It is cumbersome and unreasonable to hold a hearing on every installation permit application for an emission facility which will emit more than 100 tons of air pollutants per year. The Agency held public hearings on ten new facilities which applied for installation permits in 1973. Four of these new facilities were estimated to emit less than 500 tons of pollutants per year while only three were estimated to emit more than 1000 tons per year of a single air pollutant.

10. Public input into the permitting procedure can be made without holding a public hearing. Federal law does not require a public hearing but only an opportunity to submit comment. 40 C.F.R. § 51.18 (1973).

11. Installation permits for new emission facilities which will emit a large amount of pollutants generate the most public interest and opportunity for public comment must be afforded in those cases. However, the Agency must preserve the right to solicit public comment on other permit applications also.

12. Shutdowns and breakdowns of process equipment, in addition to shutdowns and breakdowns of control equipment, may cause an increase in the emission of air pollutants. Efforts must be made to report shutdowns and breakdowns to

the Agency and to take steps to reduce the emission of air pollutants.

DATED this 30th day of May, 1974.

Executive Director

CERTIFICATE OF AGENCY'S

ADOPTION OF RULES RESOLUTION

I, Grant J. Merritt, do hereby certify that I am the Executive Director of the Minnesota Pollution Control Agency, an agency duly authorized under the laws of the State of Minnesota, and that the following is a true, complete, and correct copy of a resolution adopted at a meeting of the Agency duly and properly called and held on the 21st day of May, 1974; that a quorum was present at said meeting; that said resolution is set forth in the minutes of said meeting and has not been rescinded or modified.

> "RESOLVED, that amendments to APC 2 and APC 3, dated May 21, 1974, be and they hereby are approved and adopted, pursuant to authority vested in the Minnesota Pollution Control Agency by Minn. Stat. §§ 116.07 subds. 4 and 4a (1971)."

IN WITNESS WHEREOF, I have hereunto subscribed my name this 30th day of May, 1974.

CERTIFICATE OF AGENCY'S

AUTHORIZING RESOLUTION

I, Grant J. Merritt, do hereby certify that I am the Executive Director of the Minnesota Pollution Control Agency, an agency duly authorized under the laws of the State of Minnesota, and that a resolution was adopted at the meeting of the Agency duly and properly called and held on the 9th day of July, 1973; that a quorum was present at said meeting; that the resulution was passed by a majority of those present; that the resolution is set forth in the minutes of said meeting and has not been rescinded or modified; that the resolution authorized the Minnesota Pollution Control Agency staff to call a public hearing for the purpose of promulgating Amendments to APC 2 and APC 3 and to perform all acts necessary to the holding of said hearing.

IN WITNESS WHEREOF, I have hereunto subscribed my name this 30th day of May, 1974.

MY COMMISSION EXPIRES
April 25, 1976

STATE OF MINNESOTA

COUNTY OF RAMSEY

MINNESOTA POLLUTION

CONTROL AGENCY

In the Matter of the Adoption of Amendments to Minnesota Regulations APC 2 and APC 3

STATEMENT OF

NEED

The above-captioned amendments are amendments to existing rules of the Minnesota Pollution Control Agency, entitled Minnesota Regulations APC 2 and APC 3. The last time APC 2 was amended was June 5, 1970. The last time APC 3 was amended was July, 1972.

The need to adopt these amendments arises for the following reasons:

1. Minn. Reg. APC 3 and Minn. Stat. § 116.081 (1971) both require permits for the installation and operation of certain air pollution sources and control equipment. It is necessary to amend APC 3 to remove any inconsistencies between the regulation and the statute.

2. It has become impossible for the Pollution Control Agency to issue permits within the stringent time restrictions in APC 3, and it is necessary to amend APC 3 to provide for more reasonable and realistic deadlines.

3. It is advisable to adopt by regulation certain permit conditions which apply to all installation and operating permits.

4. It is necessary to amend APC 3 to remove the mandatory hearing requirement on certain installation permits and to provide a more useful and manageable procedure.

5. APC 3 needs to be amended to provide a requirement that breakdowns and shutdowns of process equipment which cause an increase in the emission of air pollutants, in addition to breakdowns and shutdowns of control equipment, be reported to the Pollution Control Agency.

6. It is necessary to amend APC 3 to clarify that certain alterations and modifications to existing sources and control equipment require a permit.

STATEMENT OF COMPLIANCE

WITH MANUAL OF RULE MAKING PROCEDURES

I, Special Assistant Attorney General Alan R. Mitchell, do hereby declare that I have examined the proposed rules and all related documents and that, based on them and my personal familiarity with the applicable procedures, the Manual of Rule Making Procedures has been followed in the adoption of amendments to APC 2 and APC 3.
