In the Matter of the Proposed Amendment to
Rules of the State Livestock Sanitary Board,
LSB-4, Importation of Horses

FINDINGS OF FACT

The above-entitled matter came on for hearing before the Minnesota State Livestock Sanitary Board, Dr. J. G. Flint, Secretary and Executive Officer, presiding, on the 5th day of June, 1974, at 10:00 a.m. in Conference Room D, Veterans Service Building, St. Paul, Minnesota, after proper notice required by Minnesota Statutes, Section 15.0412, Subd. 4, (1971), was served upon all persons, associations and other interested groups registered with the Secretary of State for that purpose.

After affording interested persons an opportunity to present written and oral data, statements, and arguments, and having heard and considered all of the testimony and evidence presented, the Department makes and enters the following findings:

1. Authority to promulgate the above-captioned rules is contained in Minnesota Statutes, Section 35.03 (1971). That Section directs the Livestock Sanitary Board to protect the health of the domestic animals of the State by such means as it deems expedient to that end, including the adoption of rules and regulations. These rules are hereby found to come within that authority and, further, are found to be reasonable.

(MORE)

2. There is a definite need for this amendment to this regulation. Individuals and organizations concerned with owning and raising horses have requested equine infectious anemia test requirements to prevent further introduction of this disease. The change to require a negative test for equine infectious anemia recently became practical with the introduction and development of the agar-gel immunodiffusion test. This test, known as the Coggins test, is a practical and reliable method of detecting asymptomatic carriers of equine infectious anemia.

3. This amendment will assure that the policy of the State of Minnesota to protect the health of domestic animals of the State is fulfilled in a reasonable manner.

LSB-4, Importation of Horses

STATEMENT OF NEED

The above-captioned amendments to the regulation governing the importation of horses up-dates the existing regulation which has existed since June, 1948, without amendment.

The amendment provides protection from the introduction of Equine Infectious Anemia from outside the State of Minnesota. This protection was recently made possible through development of a practical screening test for detection of diseased animals. Various horse organizations and horse owners have requested Equine Infectious Anemia test requirements to prevent further introduction of this disease for which there is no vaccination or cure.

Minnesota has experienced 3.3 percent reactors of all horses tested since the test was introduced in October, 1972.

Based on the foregoing information, it is my opinion that the amendments proposed are needed.
