MINNESOTA POLLUTION

CONTROL AGENCY

In the Matter of the Adoption of the Proposed Amendment to Air Pollution Control Regulation APC-8

STATEMENT OF NEED AND EXPLANATION

On August 14, 1971, the Administrator of the United States Environmental Protection Agency (EPA) acting under Section 110 of the Clean Air Act, promulgated regulations for the preparation, adoption, and submittal of state implementation plans to achieve National Ambient Air Quality Standards. Minnesota's Air Quality Implementation Plan was subsequently drafted and submitted to the Environmental Protection Agency in January of 1972. On May 31, 1972, Minnesota's Air Quality Implementation Plan was approved by the Administrator with specific exceptions.

One portion of the State Implementation Plan sets forth that open burning will be controlled to aid in the reduction of air pollutants. Air Pollution Control Regulation APC-8 has been established to attain the requirements established in the State Implementation Plan.

The State of Minnesota is currently experiencing a rapid spread of two tree diseases which are killing large numbers of elm and oak trees. The Minnesota Department of Agriculture has established regulations requiring the disposal of diseased shade trees to prevent the spread of the diseases. To assist in this program and not create significant deterioration of the air quality, the proposed amendment has been drafted. The proposed amendment will allow additional open burning but will control the location of the burning sites and the manner in which the material is burned. Open burning under the proposed amendment would only be allowed in areas where no practical alternative is available and only until an alternative is developed.

Dated this 16 day of October, 1975.

MINNESOTA POLLUTION

CONTROL AGENCY

In the Matter of the Adoption
of Amendments to the
Air Pollution Control
Regulation APC-8.

FINDINGS OF FACT

The above-entitled matter came on for hearing before the Minnesota Pollution Control Agency (hereinafter Agency) on the 24th day of November, 1975 at 9:00 a.m. in the conference room of the offices of the Agency, 1935 West County Road B2, Roseville, Minnesota, after proper notice required by Minnesota Statutes §15.0412 (1974) was served upon all persons, associations and other interested groups registered with the Secretary of State for that purpose.

After affording all interested persons an opportunity to present written and oral data, statements and arguments, having considered all of the testimony, having considered all evidence adduced and upon the records, files and proceedings herein, the Agency finds the following:

1. The Minnesota Pollution Control Agency first adopted an open burning regulation on July 1, 1969. Since then, the regulation, APC-8, has been amended on two occasions and additional amendments were approved by the Agency in November and December, 1975. These amendments are currently being reviewed by the State Attorney General's office.

2. The State of Minnesota is experiencing the effects of two shade tree diseases, Dutch Elm disease and Oak Wilt disease, which are destroying thousands of elm and oak trees each year. The Department of Agriculture in response to this problem obtained specific legislation and subsequently drafted regulations to control the spread of the diseases. Minn. Stat. § 18.023, subd. 1 (1974) and Minn. Reg. AGR 101-108. (These laws and regulations established control programs and requirements for the removal and disposal of "diseased shade trees." (Nov. 24, 1975 Transcript at pp.7)

3. The diseased trees which are removed from within "disease control areas" must be disposed of by burying, burning, chipping or other prescribed methods approved by the Commissioner of the Department of Agriculture. At the present time, there does not exist adequate burying or chipping facilities to handle the problem. Open burning is therefore the disposal method that many persons pursue to alleviate the problem. (Nov. 24, 1975 Transcript at pp. 7-8)

4. The amendments adopted by the Agency in November and December, 1975 allow for the disposal of diseased shade trees by open burning provided specific requirements can be met. However, that amendment applies only to short term disposal of trees on specific properties (PCA Exhibit 6).

5. Diseased Shade Tree Open Burning Sites would provide persons and governmental units in populated areas with a disposal facility when chipping or burning is not feasible. These sites could only be established in those areas where these alternate

disposal facilities are not available, as determined by the Agency. (Nov. 24, 1975 Transcript at pp. 8-9)

6. Even when a fire is to be set for a purpose for which open burning is warranted, there are certain precautionary methods which must be followed. The permittee must be responsible for minimizing the pollution and other risks caused by the fire.

7. The nature of a site used by more than one party requires additional controls in the areas of site preparation, operation and termination. The control requirements necessary for this type of facility have been established by the Minnesota Pollution Control Agency for sanitary landfills. MPCA SW-6 (Nov.24, 1975, Transcript at pp.9-10).
