Office Memorandum

TO : Clarence Joriman, Executive Director
Board of Electricity

DATE: May 19, 1980

FROM : William Halloran, Coordinator

SUBJECT: Electrical Contractor Rate Increase

We have reviewed your proposed rate increase for the electrical contractors and find them to be acceptable on the basis of the supplemental funds appropriated for this purpose. More, specifically, the 1979 Legislature appropriated approximately $1,700,000 for electrical contract fees in 1981. The proposed 15% increase in fees would be adequately covered by the recently passed supplemental 1981 appropriation of $300,000.

Ordinarily our review requires that proposed rate revisions be accompanied by financial statements which forecast the impact on the activity involved. In this instance, this was not considered necessary because your request focused on a specific and clearly identifiable segment within your activities, and a comprehensive review of your rates is scheduled shortly as a normal part of the biennial budget process.

SUBJECT: Electricity Board Fee Rules

Attached is the file relating to amendments to 4 MCAR § 11.004 (Elec 4). These amendments increase the inspection fees for electrical inspections by approximately 15%.

I have previously discussed this matter with Joanne Hinderaker of your office. The procedure followed is unusual in that the rules have been amended without hearing as provided in Minn. Stat. § 214.06, sub d. 1 (1978), as amended by Minn. Laws 1980 ch. 614 § 100. That provision contains no specific procedures to be followed in amending this type of rule without a hearing. Therefore, the agency has followed the procedure set forth in the amendments to the Administrative Procedures Act for adopting noncontroversial rules, insofar as those procedures appear appropriate. The noncontroversial rule amendments, while not yet effective, were used as a guideline for the procedures followed herein.

The Board of Electricity wishes to adopt these rules as soon as possible, because of their unique situation. The inspectors, who conduct electrical inspections in areas of the state subject to the jurisdiction of the Board of Electricity,are independent contractors who derive their total compensation from a percentage of the inspection fees which they generate. The actual inspection fees collected are deposited to the general fund, and the inspectors are paid, based on a percentage of the fees collected, from money appropriated to the Board by the Legislature. The Legislature has increased the appropriation to the Board for this purpose, anticipating that the inspection fees will be raised, thus entitling the inspectors to greater compensation. Therefore, until these rules are adopted, the inspectors will not receive the increase which the Legislature felt was due.

If you have any questions about this matter, please feel free to contact me. Because of the desire to implement the increase as soon as possible, I would appreciate any efforts that could be made to allow the Board to forward this file to the State Register for publication as soon as possible. Thank you for your assistance in this matter.

b) On March 7, 1980, a hearing was held before a Senate Finance Sub-Committee for the Board to explain Senate File #1920 which would have put the inspection fee paid by the electrical contractors and home owners into a revolving escrow account as it was before July 1, 1977.

The committee was not receptive to Senate File #1920 but did offer an alternative method. They asked how much inspection monies had the legislature appropriated to the Board for F.Y. 1980. They were told $1,611,100.00. They then asked as our estimate, how much in inspection fees would be paid into the general fund by July 1, 1980. The Board received $1,151,587.00 from July 1 to February 1, 1980, projecting that rate to July 1, 1980, there would be $1,894,131.00 paid into the general fund by July 1, 1980. They then suggested an additional appropriation of $200,000.00 to complete F.Y. 1980. Also an additional $300,000.00 for F.Y. 1981 was appropriated so that a 15% increase of the inspection fee schedule could be made for F.Y. 1981. The Senate Sub-Committee suggested changing M.S. 214.06 so that all the Board could change fees without a public hearing if the fee increase was approved by the Finance Department.

We respectfully request Board approval to secure approval of the Finance Department to increase the inspection fee schedule by 15% on July 1, 1980.

STATE BOARD OF ELECTRICITY

Proposed Increase in Inspection
Fee Schedule

Statement of Need and Reasonableness

Chapter One Elec 1-10

The State Board of Electricity's independent contract inspectors have not had an increase in compensation since March 15, 1976. The contract inspectors compensation is totally derived from such fees. The fees collected are deposited in the general fund, and the Board, out of its appropriation, pays the inspectors a percentage of the inspection fees they have collected.

It is necessary to adjust the inspection fee schedule to reflect the changes in electrical construction methods and increase in the cost of living.

The increase in the fee schedule was encouraged by the 1980 Legislature who appropriated approximately an additional 15% in monies and changed the wording in Minn. Stat. § 214.06 so that the change could be made without a public hearing. The appropriated money is to be used to pay higher commissions to the inspectors, anticipating that those fees upon which the commissioners are based will be raised.

5. The Information Systems Division (ISD) informs us that they can begin the programming of our license issuance as soon as we obtain a CRT terminal. It will take 60 to 90 days to obtain a CRT terminal which will cost the Board approximately $150.00 rental per month. The planning and programming costs will be approximately $28.00 for the system analyst and approximately $23.00 per hour for the programmer. The first step would be to enter Master licenses on the system upon renewal, then the contractor's licenses, and when the system is functioning to the Board's satisfaction and employees are trained in the use of the new system, other types of licenses would be added.
