Rule as Proposed (all new material)

3 MCAR § 2.062 Official identification tags and brands.

A. Definition. For the purposes of this rule, "official identification tag" means a metal identification eartag conforming to the nine-character alpha-numeric National Uniform Eartagging System, contained in chapter 1, part I, paragraph M, of the Brucellosis Eradication Uniform Methods and Rules, May 1, 1982 edition, issued by the United States Department of Agriculture. It provides unique identification for each individual animal.

B. Sale and application. Official identification tags may be sold only to veterinarians accredited under Code of Federal Regulations, title 9, section 160.1(d.), and may be applied only by or under the direct supervision of an accredited veterinarian. This requirement does not apply to official identification tags issued to artificial insemination technicians, identified as 41XAA through 41XZZ, or issued to the Dairy Herd Improvement Association, identified as 41WAA through 41WZZ.

C. Other tags prohibited. Every person applying eartags to cattle for purposes of compliance with rules of the Board of Animal Health shall use official identification tags.

D. Animals with existing tags. When an animal is already identified by an official identification tag, that tag number must be recorded for official records and another official identification tag may not be applied, except when the owner of an animal already identified by an official identification tag wants the animal identified by an official vaccination identification tag at the time of the animal's vaccination against brucellosis.

E. Removal prohibited; exception. No person may remove official identification tags, market cattle testing tags, or leg bands, or efface brands approved and registered by the Board of Animal Health under Minn. Stat. § 35.822, except that market cattle testing tags may be removed by a veterinarian securing a blood sample for a brucellosis test.

Repealer. Rule LSB 62 of the Board of Animal Health is repealed.

STATE OF MINNESOTA

BOARD OF ANIMAL HEALTH

In the Matter of Proposed
Amendment to 3MCAR § 2.015
Control and Eradication of Paratuberculosis (Johne's Disease)

STATEMENT OF NEED AND REASONABLENESS

The rule needs to be amended to permit accredited veterinarians licensed in Minnesota the use of Johnin so they can test cattle for paratuberculosis by the intradermal and intravenous methods. Large numbers of cattle from the United States are shipped internationally. A negative intradermal test for paratuberculosis is frequently required by the country receiving the cattle. This large-volume testing is difficult to accomplish by the limited numbers of federal and state employed veterinarians. The cattle will be prepared for these international shipments more promptly and efficiently if the accredited veterinarian is permitted to use Johnin.

The proposed amendment will have no adverse effect on the control and eradication of paratuberculosis. The State of Minnesota will save money as the tests required for international shipments will be made at the shipper's expense. State and federal employed veterinarians will be more available for other disease eradication activities when these exportation paratuberculosis tests are made by private veterinarians.

Adoption and need for the amendment falls within the authority of Minnesota Statute § 35.03 (1980).
