Dear Sir:-

We mail you today sample fruit of our new seedling plum. Please test it, and acknowledge receipt, and tell us what you think of it. We will be glad to give you further particulars concerning this plum, if you are interested.

This has been a very unfavorable season for plums. We regret that the samples are below the average in size. We have had samples in the past measuring $6\frac{1}{2}$ inches around.

Very truly yours,

The Jewell Nursery Co.

Dear Sir:-

Your request to Mr. Underwood for original photograph for the Horticulturist has been handed to me. We have never had a photograph of the original Okabena. We, however, have several photographs of young stock, two and five years old. We send you by current mail under a separate cover photograph of a two year old, which we think very fine. If you could use this or anything of a similar nature, we would be pleased to supply them.

We are ~~now~~ having some photographs made for a catalogue which we are now preparing for the press. There may be something among them that would be suitable for you to use. After they are finished, we will send you a copy of the catalogue and if you see anything you want, just ask for it and it is at your command.

Very truly yours,

The Jewell Nursery Co

Dear Sir:-

Replying to yours of July 17th, we will forward the plate to E. J. Mendenhall, as requested, asking him to return it in ten days or two weeks, which will be in ample time for our use.

We have not given the law so very much consideration. We see, however, that you catch the idea, which is to make everybody show up where they grow their stock. We want a law that will antagonize foreign nurserymen as little as possible, but still put the seller on record. We will think this matter over and give you our views later on.

Now one word as to politics and the silver plank. This question is too large for you and I to discuss at long range. We are willing to admit that the silverites are going to do a lot of hustling this fall. Should they succeed, we hope some of their promises may come true. All that we are after is prosperous times and an opportunity to sell lots of nursery stock for which we will receive cash on delivery.

Very truly yours,

Jewell Nursery Co

Dear Sir:-

We acknowledge receipt of your check for \$16.50 in payment of premiums taken at the summer meeting. Please accept thanks.

We expect soon to issue a supplementary catalogue of about twenty-four pages. We would like to use the half tone plate that appears in your July issue, showing general view of fruits exhibited at the State Fair in this catalogue. Would it be possible for us to get the plate for such use?

Very truly yours,

Jewell Nursery Co.

Dear Sir - Those who have Strawberries
expect a fair return - Currants will
not yield over one third crop.
Raspberries of all kinds, also Black
berries, promise an enormous yield.

I think the Apple crop, like my own
will be very slight - while grapes look
very much better than the early spring
gave promise, and where the vines were not
actually winter killed, will bear well.
Yours & June 1. 96
