Dear Mr. Andrew
Sir - Will you kindly
look over & correct, if necessary, the enclosed &
if possible return at once, as I would like
to get it in the July magazine. Will you
also consider yourself as representing our Society?

My dear Sir: Your favors recd. It will probably be a month before I receive any copies of my report in cloth. When I do get them will send you a copy.

In regard to plates, I have several applications for them. They have not yet come back from the printer. I had

so much trouble in collecting same
I wanted last year that I ached de-
cided not to let any more go.
Your truly

Yours with tags &c. recd. - It looks now very doubtful about any fruit being sent from here for exhibition purposes - In fact there is practically no fruit in this part of the State in way apples or plums and you know Winnetonka furnishes the grapes I don't know when I have seen so little fruit as this year. Perhaps Darr can supply it from his girdled trees. Haven't been down here this summer. I want to go down & look it over since the last winter. But we have been so busy I have had no time to get down there but perhaps will soon -

Yours truly

As to making an exhibit at the fair this fall it is out of the question. We have of course no apples, crabs or plums. I hope you will find some part of the State that will be able to supply enough for your show. I will let you know if I find any one who has any thing to exhibit. Wonder if Dart hasn't got a lot of his girdled trees bearing. Howard said the other day that you or Daugherty wrote me some time ago asking if we would have some Peereus to spare this fall if you did it escaped my notice entirely. Will you want some - will have some same age as those last fall 4 y. - cut back last spring the top will be all of this years growth. Yours truly J. P. Andrews

Yours recent
Green Harris Underwood Wedge
& Bush - are all right for the
Seedling Committee - Hope Mr
Harris will live to see the apple
that wins the prize. It is
doubtful if it now in existence
and will probably be many years
before it will be but this is
surely a step in the right direc-
tion.

Say about that B Berry
subject for next winter making
that you assigned to me
Do you ^{expect} me to tell what she can
do with the fruit after it is
picked? (I am no cook) or
do you expect me to tell how the
house wife can care for a patch of

blackberrie that depends on
her motivation. If she is good
she takes the whole care & does all
the work. if Yankee - nit
I dont know what you want

The 1000 reports for school libraries is just the thing Experience 2 yrs ago showed the necessity of getting bills in early & keeping at it. For appropriation should be a fixed thing the same as other expenses of the state so it wont need very much looking after it. must be a big job for the legislative Com. to have so much to do in that line.
