Work for Year.

The work of the office during the past year may be summarized as follows

Macadam roads	1.079 Miles
Gravel "	15.850 "
Graded "	6.251 "
Bridges built and renewed	13
Steel culverts set	2246 feet

New Roads.

New roads surveyed and platted	2.92 Miles

In addition to the above during the past few years there have been located and profiled nearly One Hundred miles of County roads.

Surveys have been made for all important Criminal cases, under instructions from the County Attorneys office, and an extensive Topographical survey made of the territory tributary to Six mile Creek and Mud Lake for the Minnetonka flowage cases, the latter occupying the time of one field party for several months.

County Roads.

There are in the County 605 miles of County road and approximately 1000 bridges of all kinds. These roads have all been numbered, and a description of the line of each road is on file in my Office.

About 250 bridges have been numbered; plans made and photographs taken whenever possible;

This work has been of material benefit to the office and is a great assistance in making repairs and renewals.

Owingnto the fact that a large majority of these bridges were cheap wooden structures built from 10 to 20 years ago, we have a great number constantly in need of repairs, and the number is growing greater every year.

It has been the policy of your Honorable body to renew failing structures with permanent work wherever practicable, and in pursuance of that policy we have reduced the total length of Wooden bridges during the past 7 years by 1216 feet, and substituted Earthwork embankments as follows:-

Under the provisions of the law requiring this report, I am to advise you of the condition and character of the County roads and bridges with such recommendations as may be deemed proper.

As stated before there are in the County 605 miles of County roads: of this amount about 100 miles have been gravelled or macadamized by the County, and since the inauguration of the improved system of highways the Towns have done a large amount of gravelling on the Main thoroughfares and tributaries, So it is safe to assume that at least 125 miles or one fifth of the total mileage of the County roads have been improved. As however there is a greater mileage of Town roads making a total approximately 1500 miles in the County it will be seen that a much larger appropriation than we have been receiving will be necessary, before the condition of our public highways is up to the standard of efficiency to which the people look forward and to which they are entitled

As an indication of the increase of value to the commuunity by a system of Good roads, I will cite the case of road No. 8 generally known as the Osseo Road.

Before this road was improved by Macadam and Gravelling the usual and ordinary load hauled to market rarely exceeded one ton net; Since the improvement net loads of two to three tons are not infrequent, and at one time for several weeks, loads of five tons were easily hauled by one pair of horses over the best portion of this road. It will be seen therefore that on first class improved roads the cost of haul has been decreased by from 50 to 75 per cent.

The average cost of haul in this State has been generally estimated at 25 to 30 cents per ton per mile, and this estimate may now be stated at 10 to 15 cents per ton mile on well improved roads; But this value can only be made permanently available by a system of continual maintenance.

Several years ago and repeatly since, I have called the attention of the Board to the advisability of placing all improved roads under the charge of competent caretakers, who would be given sections of roads from 3 to 5 miles in length and whose duty it would be to keep continually making necessary repairs, thus always having them in a high state of efficiency. These suggestions always met with the approval of the Board but the amount authorized for such purposes has heretofore been so limited that we were not able to carry out the plan.

Chapter 164 of the Laws of 1905 provide that one quarter of the total road and bridge fund may be used for general repairs and maintenance, This will allow the expenditure of $12.500 for that purpose during the year 1906, a sum sufficient to keep continually in good condition all the improved roads in the County. During the latter part of the season of 1905 I did a small amount of work under this proposed plan, on several of the most important roads, and found the results fully equal to my anticipation both in the matter of costs and beneficial results.

I would advise your Honorable body to designate officially by number the various County roads and bridges according to the nomenclature adopted in the books of my office.

According to a resolution of your Honorable body requiring me to take charge of all the Road tools and similar property of the County, I have collected the same at convenient points and the schedule made in accordance therewith will show a complete list and location of everything of that nature acquired during my connection with the office.

In closing I desire to thank your Honorable body for the uniform courtesy which my office has received at your hands and your liberal approval of and cooperation in my endeavours to secure for the richest and most important County in the State an improved system of Good Roads.

Respectfully submitted,

Geo. W. Cooley County Surveyor.
