Memorandum

Date: 08/24/2018

To: Jennifer Shillcox, Ecological and Water Resources
Dan Petrik, Ecological and Water Resources Division
Matt Bauman, Ecological and Water Resources Division

From: Beth Carlson, DNR Rules Coordinator

RE: Conclusion of permanent rulemaking for Mississippi River
Corridor Critical Area (R-04240)

The above rulemaking by the Minnesota Department of Natural Resources is completed.
This memorandum records key information for the file.

Key dates:

12/08/2016..... Order Adopting Rules signed by commissioner

12/19/2016..... Rules filed with secretary of state

12/27/2016..... Notice of adoption with final modification published in State Register (41 SR 799)

01/04/2017..... Effective date of rule

Statutory authorities:

Minnesota Statutes, section 116G.01-14 Critical Areas Act of 1973

Minnesota Statutes, section 116G.15 Mississippi River Corridor Critical Area

I have updated the project webpage with the adoption and effective date information. The DNR must keep the rule changes available to the public and agency staff until the Office of the Revisor of Statutes updates the official rules on its website.

My final task will be to prepare an Official Rulemaking Record and deliver it to division staff for permanent records retention.

**2016 Administrative Rule
Final Rule Form**

Revisor's File No. R-04240

Submitting Agency: Department of Natural Resources Date: October 2016

Rule Contact: Beth Carlson, DNR Rules Coordinator
Jennifer Shillcox, EWR Land Use Unit Supervisor

Title:	Mississippi River Corridor Critical Area (MRCCA)
Chapter number(s):	6106
Comments/controversies received since Notice of Intent to Adopt:	<p>Key comments submitted both orally and in writing during the hearing record period include:</p> <ul style="list-style-type: none"> • Many supportive comments from property owners, local governments, environmental groups, and state house and senate members and U.S. congressional representatives. • Concern by the St. Paul Port Authority/St. Paul Chamber that the rules would restrict property rights, send bad signal to the marketplace, and pose financial risk to cities from inverse condemnation lawsuits (regulatory takings), as well as statements that the DNR skirted requirements to analyze impacts to small businesses because the impacts will occur after the first year. • Comments that proposed bluff standards were not strict enough posing environmental degradation, and that they were too strict thus creating too many nonconforming structures. • Requests to modify districts and/or district boundaries. • Concern by Minneapolis and St. Paul residents that allowed heights in certain districts were too high and that use of a local Conditional Use Permit (CUP) to go higher would harm neighborhood character. • Concern by some property owners that proposed vegetation permit requirements are burdensome, vague, and/or impossible to apply. Cities, in general, were supportive of vegetation standards and permit.
If a hearing was requested explain why and attach ALJ Report:	The DNR chose in advance to hold multiple hearings in order to offer the public every opportunity to give input on these rules. From start to finish, the DNR designed this rulemaking process to be a very public and participatory.
List changes from draft rules proposal:	Please refer to the separate memorandum.

PROPOSED

Minnesota Department of Natural Resources

ORDER ADOPTING RULES

Adoption of Rules Governing Mississippi River Corridor Critical Area, Minnesota Rules, chapters 6106 and 4410; Revisor's ID Number R-04240

BACKGROUND INFORMATION

1. The department has complied with all notice and procedural requirements in Minnesota Statutes, chapter 14, Minnesota Rules, chapter 1400, and other applicable law.
2. The department adopts the Administrative Law Judge's Report dated August 11, 2016, and incorporates the Report into this Order, except as described below.
3. The department made the following modification to the rule as proposed:

6105.0050 Subp. 8.A. Definitions – Bluff (Lines 3.1 – 3.7)

A. a slope that rises at least 25 feet above the ordinary high water level or toe of the slope to the top of the slope and the grade of the slope averages 18 percent or greater, measured over a horizontal distance of 25 feet, as follows:

- (1) where the slope begins above the ordinary high water level, from the toe of the slope to the top of the slope; or
 - (2) where the slope begins below the ordinary high water level, from the ordinary high water level to the top of the slope averages 18 percent or greater, measured over a horizontal distance of 25 feet. See Figure 1; or
- B. A natural escarpment or cliff with a slope that rises at least ten feet above the ordinary high water level or toe of the slope, whichever is applicable, to the top of the slope, with an average slope of 100 percent 75 degrees or greater.

6106.0050 Subp. 39 Definitions – Native Plant Community (Lines 7.7 – 7.9)

“Native plant community” means a plant community that has been ~~mapped~~ identified as part of the Minnesota biological survey or biological survey issued or adopted by a local, state, or federal agency ~~other scientifically based studies.~~

6105.0050 Subp. 68. Definitions – Shore Impact Zone (Lines 11.3 – 11.4)

“Shore impact zone” means land located between the ordinary high water level of public waters and a line parallel to it at a setback of 50 percent of the required structure setback or, for areas in agricultural use, 50 feet landward of the ordinary high water level ~~in areas of agricultural use.~~

6106.0050, Subp. 71 Definitions – State or Regional Agency (Line 12.12)

“State or regional agency” means the Metropolitan Airports Commission, Minnesota Historical Society, University of Minnesota, Department of Natural Resources, Department of Transportation, and the Metropolitan Council and other state agencies

PROPOSED

6106.0050 Subp. 72 Definitions – Steep Slope (Line 12.15)

“Steep slope” means a natural topographic feature with an average slope of 12 to 18 percent, measured over a horizontal distance equal to or greater than 50 feet, and any slopes greater than 18 percent that are not bluffs.

6106.0060 Subp. 3 Administration of Program – Consistent Plans & Ordinances (Lines 15.11 - 15.12)

Local governments within the Mississippi River Corridor Critical Area must adopt, administer, and enforce plans and ordinances consistent with this chapter. Plans and ordinances must be submitted to the Metropolitan Council for review and must be approved by the commissioner before they are adopted as provided under part 6106.0070. For the purpose of this part, “consistent” means that each local plan and ordinance, while it may be structured or worded differently, meets the purpose, scope, and numeric thresholds and standards set forth in this chapter. ~~Plans and o~~Ordinances that are not consistent with this chapter require approval of flexibility from the commissioner, according to part 6106.0070, subpart 6.

6106.0060 Subp. 5(C) Administration of Program – Duties of Commissioner (Line 16.1)

C. ~~be the lead agency to~~ coordinate preparation, submission, review, and modification of plans and ordinances that are prepared by local governments as provided under part 6106.0070;

6106.0060, Subp. 7.D.(3) Administration of Program – Duties of Cities (Lines 17.7)

(3) adjoining local governments within the Mississippi River Corridor Critical Area, including those with overlapping jurisdiction and those across the river, where buildings exceed the height limits specified in part 6106.0120, as part of the conditional use permit or variance process; and

6106.0070 Subp. 6(A) Preparation, Review, and Approval of Plans and Ordinances – Flexibility requests for ordinances (Lines 24.1 – 24.2)

A. Local governments may, under special circumstances and with the commissioner’s prior approval, adopt ordinances that are not consistent with this chapter, provided that the purposes of Minnesota Statutes, section 116G.15, ~~and the purposes and scope of this chapter~~ are met and the ordinance is consistent with the plan prepared by the local government and approved according to this chapter. Special circumstances include the following situations:

6106.0070 Subp. 6(C)(1)(a) Preparation, Review, and Approval of Plans and Ordinances – Flexibility requests for ordinances (after Line 25.9)

(1) make such request publicly available;

6106.0080, Subp. 4(A) Administrative Provisions for Ordinances – Conditional & Interim Use Permits (Line 29.4)

A. In addition to meeting the requirements of Minnesota Statutes, sections 394.301, 394.303, 462.3595, and 462.3597, a local government’s review of conditional and interim uses must consider potential impacts of the conditional or interim use on primary

PROPOSED

conservation areas, public river corridor views, and other resources identified in a local government's plan.

6106.0080, Subp. 7 Administrative Provisions for Ordinances – Accommodating Disabilities (Line 30.16 – 30.19)

Ramps or other facilities to provide persons with disabilities access to the persons' property, as required by the federal Americans with Disabilities Act and the federal Fair Housing Act and as provided by chapter 1341, are allowed ~~by administrative permit~~, subject to the following standards:

- A. parts 6106.0120 to 6106.0180 must be complied with ~~to the maximum extent practicable~~, except as provided in item B below; and
- B. when parts 6106.0120 to 6106.0180 cannot be complied with, the local government may issue an interim use permit to allow ramps or other facilities that do not meet these parts with an interim use permit. Upon expiration of the interim use permit, the ramp or other facilities must be removed."

6106.0100 Subp. 4 Districts – River Neighborhood district (CA-RN) (Line 32.21)

B. The CA-RN district must be managed to maintain the character of the river corridor within the context of existing residential and related neighborhood development, and to protect and enhance habitat, parks and open space, public river corridor views, and scenic, natural, and historic areas. Minimizing erosion and the flow of untreated storm water into the river and enhancing habitat and shoreline vegetation ~~habitat~~ are priorities in this district.

6106.0100 Subp. 5 Districts – River towns and crossings district (CA-RTC) (Line 33.2)

A.and that includes taller buildings.

6106.0100 Subp. 9.A.(1)(d) Districts – District Boundaries (Line 34.15)

A. The physical boundaries of each district are delineated in the Mississippi River Corridor Critical Area District Map, Minnesota Department of Natural Resources (20156 and as subsequently amended). The map is incorporated by reference, is not subject to frequent change, and is available on the department's Web site at www.dnr.state.mn.us/input/rules/mreca/map-draft.html www.dnr.state.mn.us/waters/watermgmt_section/critical_area/index.html. The commissioner must maintain the map and must amend the map as provided in item C.

6106.0100 Subp. 9.C.(1)(d) Districts – District Boundaries (Line 35.7)

(d) ~~be consistent with~~ identify those local comprehensive plans, regional system statements, state park and transportation master plans, and federal plans that apply to the area proposed for a district boundary amendment;

6106.0120 Subp. 1 Dimensional Standards – Purpose (Line 38.17)

The purpose of this part is to establish dimensional standards that protect primary conservation areas and public river corridor views from impacts of development and ensure that new development is sited in locations consistent with part 6106.0020.

PROPOSED

6106.0120 Subp. 2(A) Dimensional Standards – Structure Height (Line 38.20)

A. Structures, including accessory structures; as defined by local ordinance, must be no taller than the heights specified for each district:

6106.0120 Subp. 2.A.(4) Dimensional Standards – Structure Height (Lines 39.9)

(4) CA-SR: height is determined by the local government's underlying zoning requirements, provided the structure's height in the underlying zoning is generally consistent with the height of the mature treeline, where present, and existing surrounding development, as viewed from the ordinary high water level of the opposite shore;

6106.0130 Subp. 8(B) General Development Standards for Public Facilities – Public Recreational Facilities (Line 45.6)

B. Roads and driveways associated with public recreational facilities must not be placed in the bluff impact zone or shore impact zone unless no other placement alternative exists. If no alternative exists, then design and construction must minimize impacts to shoreline vegetation, erodible soils and slopes, and other sensitive resources.

6106.0130 Subp.8(E) General Development Standards for Public Facilities – Public Recreational Facilities (Line 46.2)

E. Public signs and kiosks for interpretive or directional purposes are allowed in the bluff impact zone or shore impact zone, provided they are placed and constructed to minimize disturbances to these areas and avoid visual impacts on public river corridor views.

6106.0130 Subp. 8 Public Recreational Facilities (after Line 46.3)

F. Public stairways, lifts, and landings must be designed as provided in part 6106.0140, subpart 6, item C.

6106.0140, Subp. 5 General Development Standards for Private Facilities – Stairways, Lifts and Landings (Lines 47.17)

(4) stairways, lifts, and landings must be located in the least visible portion of the lot whenever practical; and

6105.0150 Subp. 5 Vegetation Management Standards – Permit Conditions (Line 51.18)

B. soil, slope stability, and hydrologic conditions are suitable for the proposed work as determined by an professional engineer or resource agency;

6106.0160 Subp. 4 Land Alteration and Storm Water Management Standards – Rock riprap, retaining walls, and other erosion control structures (Lines 54.8)

A. Construction, repair, or replacement of rock riprap, retaining walls, and other erosion control structures located at or below the ordinary high water level must comply with parts 6115.0215, subpart 4, item E, and 6115.0216, subpart 2. The work must not proceed unless approved by the commissioner as meeting all requirement for work in public waters.

6106.0160 Subp. 4 Land Alteration and Storm Water Management Standards – Rock riprap, retaining walls, and other erosion control structures (Line 55.6)

C. Repair of existing rock riprap retaining walls and other erosion control structures above

PROPOSED

the ordinary high water level does not require a local government permit, provided it does not involve any land alteration.

6106.0170 Subp. 4(J) Subdivision and Land Development Standards – Design Standards (Lines 61.1 - 61.2)

J. Protected open areas must connect ~~neighboring or abutting~~ open space, natural areas, and recreational areas, where present on adjacent parcels, as much as possible to form an interconnected network.

6105.0180 Exemptions from Setbacks, Height Limits, and Other Requirements (before Line 64.21)

	Set-backs	Height limits	SIZ	BIZ	Standard (the use must comply with standard or referenced parts)
<u>Temporary storage of docks, boats and other equipment during the winter months</u>	<u>E</u>	<u>N</u>	<u>E</u>	<u>N</u>	

4. The modifications to the proposed rule do not make the rule substantially different because: the differences are within the scope of the matter announced and in character with the issues raised in the notice of intent to adopt rules; the modifications are a logical outgrowth of the contents of the notice of intent to adopt rules and the comments submitted in response to the notice; and the modifications do not diminish the fair warning that the outcome of that rulemaking proceeding could be the rules in question.

5. The rules are needed and reasonable.

ORDER

The above-named rules, in the form published in the State Register on April 11, 2016, with the modifications as indicated in the Revisor’s draft, file number AR4240, dated ~~###/###/###~~, are adopted under my authority in Minnesota Statutes, section 116G.15.

CMO ROUTING SLIP — REQUEST FOR COMMISSIONER'S SIGNATURE

Subject: Rulemaking document Commissioner's Order
Division: ENF EWR FAW FOR LAM PAT OSD

Requestor/Contact: **Beth Carlson, DNR Rules Coordinator**

Item(s) to be signed: **Final Rule Form for MRCCA rules**

Signature needed by: **soonest possible**

Subject: Mississippi River Corridor Critical Area rulemaking

ALJ Lipman's review of these rules as to legality found only one minor defect of ambiguous language that we can easily correct, and he approved our other proposed modifications from the rules as originally proposed. The proposed Order Adopting Rules incorporates all of those modifications and we would like to move forward with adopting the rules.

Items in this folder:

1. **Final Rule Form for governor's office (TO BE SIGNED)**
2. proposed Order Adopting Rules (will be signed later on)
3. uncertified copy of adopted rules to be submitted to Chief Administrative Law Judge for final approval (showing the listed rule modifications)
4. copy of the Report of the Chief Administrative Law Judge and Administrative Law Judge

We have further procedural steps with the Office of Administrative Hearings and the Office of the Secretary of State (and a second check-in with the governor's office) before we can publish a notice of adoption.

Minnesota Department of Natural Resources

Division of Waters

REQUEST FOR COMMENTS

Possible Rules Governing the Mississippi River Corridor Critical Area, *Minnesota Rules*, Chapter 6120 and Chapter 4410.

Subject of Rules. The Minnesota Department of Natural Resources requests comments on possible rules governing the Mississippi River Corridor Critical Area (MRCCA). The Department is considering rules that will establish districts within the MRCCA and establish minimum guidelines and minimum standards for development within the districts. The rulemaking will primarily develop new language in Chapter 6120, but also may modify existing language in Chapter 4410 (parts 4410.8100 to 4410.9100) if determined necessary to facilitate administration.

The rules will provide for management of the MRCCA as a multi-purpose resource in a way that: conserves scenic, environmental recreational, mineral, economic, cultural, and historic resources and functions; maintains the river channel for transportation including barging and fleeting areas; provides for continuation and development of a variety of urban uses, including industrial, commercial and residential; uses the river for water supply and receiving water for properly treated sewage, stormwater, and industrial waste effluents, and protects biological and ecological functions of the corridor.

Rulemaking will determine the appropriate number and constitution of districts; in establishing districts, the Department will consider existing plans and policies, existing ordinances and conditions, identified resources and features, and a number of additional factors identified in the law authorizing the rulemaking.

The proposed rules will establish minimum guidelines and standards for development in the districts; and will clarify the intent of each district. The guidelines and standards will address a number of key resources and features specified in the authorizing statute: floodplains; wetlands; gorges; areas of confluence with key tributaries; natural drainage routes; shorelines and riverbanks; bluffs; steep slopes and very steep slopes; unstable soils and bedrock; significant existing vegetative stands, tree canopies, and native plant communities; scenic views and vistas; publicly owned parks, trails, and open spaces; cultural and historic sites and structures, and water quality. The Department may provide exceptions for a number of developments, including but not limited to infrastructure, hydropower, and water access. The rulemaking may address additional items related to the overall authorized scope if the need is identified during rule development.

At the outset of rulemaking, the Department is directed to develop a preliminary map of bluffs and blufflines based on guidelines in the authorizing statute. Following the rulemaking, the Department will prepare a final map of bluff-related features as listed in statute and defined in rule.

Persons Affected. The rules would likely affect the following persons and organizations within the MRCCA: most property owners, institutions, developers, and businesses; recreational facility users; water-oriented businesses, facilities, and navigation interests on the Mississippi River; utility providers; all local governmental units (cities, towns, and counties); state and regional agencies and institutions with facilities or property interests (such as the Metropolitan Council, Department of Natural Resources,

2009
ORIGINAL

Department of Transportation, Metropolitan Airports Commission, University of Minnesota, Saint Paul Port Authority, Minnesota Historical Society, and federal agencies such as the National Park Service, and U.S. Army Corps of Engineers.

Statutory Authority. *Minnesota Statutes*, section 116G.15 (2009), and Laws 2009, Chapter 172, Article 2, Section 5(e), require the Department to adopt rules for administration of the Mississippi River Corridor Critical Area. The Department must commence rulemaking by January 15, 2010.

Public Comment. Interested persons or groups may submit comments or information on these possible rules in writing until 4:30 p.m. on March 22, 2010. In addition to the 90-day public comment period announced in this notice, the Department plans to appoint one or more advisory committees to comment on the possible rules during rule development. The Department anticipates advisory committee(s) would meet 2-4 times over a 9-month period from March to December 2010. Advisory committee(s) will be selected from persons and parties known to the Department as potentially affected by or interested in the rulemaking, persons recommended by local governmental units, and persons who request to participate by contacting the agency contact person listed below. The Department will select advisory committee members to balance a variety of interests, viewpoints, and geographic perspectives.

Rules Drafts. The Department has not yet prepared a draft of the possible rules. When available, preliminary rule drafts and other information regarding the rulemaking will be available on the Division of Waters website <http://mndnr.gov/waters>, or can be obtained by contacting the agency contact person provided below.

Agency Contact Person. Written comments, questions, requests to receive a draft of the rules when it has been prepared, requests for more information on these possible rules, and requests to participate on a possible rulemaking advisory committee(s) should be directed to: Jeffrey Berg at Minnesota Department of Natural Resources, 500 Lafayette Road, St. Paul, MN 55155-4032, 651-259-5729 (phone), 651-296-0445 (facsimile), and MRCCArulemaking@dnr.state.mn.us. TTY users may call the Department at 651-296-5484, or toll-free at 1-800-657-3929. .

Alternative Format. Upon request, this Request for Comments can be made available in an alternative format, such as large print, Braille, or cassette tape. To make such a request, please contact the agency contact person at the address or telephone number listed above.

NOTE: Comments received in response to this notice will not necessarily be included in the formal rulemaking record submitted to the administrative law judge if and when a proceeding to adopt rules is started. The agency is required to submit to the judge only those written comments received in response to the rules after they are proposed. If you submit comments during the development of the rules and you want to ensure that the Administrative Law Judge reviews the comments, you should resubmit the comments after the rules are formally proposed.

Dated: 11/30/09

Mark Holsten, Commissioner
Department of Natural Resources

Minnesota Department of Natural Resources

Division of Ecological and Water Resources

REQUEST FOR COMMENTS

Possible Rules Governing the Mississippi River Corridor Critical Area, *Minnesota Rules*, chapters 6106 and 4410

Subject of Rules. The Minnesota Department of Natural Resources (DNR) requests comments on possible rules governing the Mississippi River Corridor Critical Area (MRCCA). The MRCCA includes the Mississippi River and 5,400 acres of adjacent land along a 72-mile stretch through the Twin Cities metropolitan area. Development in the corridor is currently guided by locally-adopted and enforced MRCCA plans and ordinances that must comply with existing districts and standards and guidelines established in Executive Order 79-19, the order designating the MRCCA. The Minnesota Department of Natural Resources (DNR) is engaged in rulemaking to update these districts and standards. The rulemaking will primarily develop new language in Chapter 6106, but also may modify existing language in Chapter 4410 if determined necessary to facilitate administration.

This rulemaking will provide for management of the MRCCA as a multi-purpose resource in a manner consistent with Minnesota Statutes 116G.15, subd. 2, that: conserves scenic, environmental recreational, mineral, economic, cultural, and historic resources and functions; maintains the river channel for transportation, including barging and fleeting areas; provides for continuation, development and redevelopment of a variety of urban uses; uses the river for water supply and as a receiving water for properly treated effluents; and protects the biological and ecological functions of the corridor.

Persons Affected. The rules would likely affect the following persons and organizations within the MRCCA: all local governmental units with jurisdiction in the MRCCA (21 cities, 4 townships, and 5 counties); property owners, institutions, developers, and businesses; recreational facility users; water-oriented businesses, facilities, and navigation interests on the Mississippi River; utility providers; state and regional agencies and institutions with facilities, property interests, and/or regulatory authority in the MRCCA (such as the Metropolitan Council, Department of Natural Resources, Department of Transportation, Metropolitan Airports Commission, University of Minnesota, Saint Paul Port Authority, Minnesota Historical Society, and federal agencies such as the National Park Service and U.S. Army Corps of Engineers).

Statutory Authority. Minnesota Statutes, section 116G.15, as amended in Laws 2013, chapter 137, article 2, sections 18 to 21, requires the DNR to adopt rules for administration of the Mississippi River Corridor Critical Area.

Rules Drafts. The DNR has developed a working draft of the possible rules and districts for public comment. The working draft of the possible rules, district maps, and other information regarding the rulemaking are available on the DNR website at: www.dnr.state.mn.us/input/rules/mrcca/index.html, or can be obtained by contacting the agency contact person provided below.

REQUEST FOR COMMENTS

Possible Rules Governing the Mississippi River Corridor Critical Area, *Minnesota Rules*, chapters 6106 and 4410

Subject of Rules. The Minnesota Department of Natural Resources (DNR) requests comments on possible rules governing the Mississippi River Corridor Critical Area (MRCCA). The MRCCA includes the Mississippi River and 5,400 acres of adjacent land along a 72-mile stretch through the Twin Cities metropolitan area. Development in the corridor is currently guided by locally-adopted and enforced MRCCA plans and ordinances that must comply with existing districts and standards and guidelines established in Executive Order 79-19, the order designating the MRCCA. The Minnesota Department of Natural Resources (DNR) is engaged in rulemaking to update these districts and standards. The rulemaking will primarily develop new language in Chapter 6106, but also may modify existing language in Chapter 4410 if determined necessary to facilitate administration.

This rulemaking will provide for management of the MRCCA as a multi-purpose resource in a manner consistent with Minnesota Statutes 116G.15, subd. 2, that: conserves scenic, environmental recreational, mineral, economic, cultural, and historic resources and functions; maintains the river channel for transportation, including barging and fleeting areas; provides for continuation, development and redevelopment of a variety of urban uses; uses the river for water supply and as a receiving water for properly treated effluents; and protects the biological and ecological functions of the corridor.

Persons Affected. The rules would likely affect the following persons and organizations within the MRCCA: all local governmental units with jurisdiction in the MRCCA (21 cities, 4 townships, and 5 counties); property owners, institutions, developers, and businesses; recreational facility users; water-oriented businesses, facilities, and navigation interests on the Mississippi River; utility providers; state and regional agencies and institutions with facilities, property interests, and/or regulatory authority in the MRCCA (such as the Metropolitan Council, Department of Natural Resources, Department of Transportation, Metropolitan Airports Commission, University of Minnesota, Saint Paul Port Authority, Minnesota Historical Society, and federal agencies such as the National Park Service and U.S. Army Corps of Engineers).

Statutory Authority. Minnesota Statutes, section 116G.15, as amended in Laws 2013, chapter 137, article 2, sections 18 to 21, requires the DNR to adopt rules for administration of the Mississippi River Corridor Critical Area.

Rules Drafts. The DNR has developed a working draft of the possible rules and districts for public comment. The working draft of the possible rules, district maps, and other information regarding the rulemaking are available on the DNR website at: www.dnr.state.mn.us/input/rules/mrcca/index.html, or can be obtained by contacting the agency contact person provided below.

Public Comment. Interested persons or groups may submit comments or information on the working draft of possible rules in writing until 4:30 p.m. on August 15, 2014. The DNR will not publish a notice of intent to adopt the rules until more than 60 days have elapsed from the date of this request for comments. The DNR does not plan to appoint an advisory committee to comment on the possible rules, but will be convening public information meetings and open houses throughout the summer of 2014 to gain additional input. This process is the continuation of a process that began in 2009. As part of that process, the DNR consulted closely with advisory committees; local governments; federal, state, and regional agencies; and other interest groups in developing the working draft of the proposed rules and districts. The DNR will continue to consult with these interest groups throughout the public comment phase.

Agency Contact Person. Written comments, questions, and requests to receive a copy of the working draft of proposed rules should be directed to: Daniel Petrik at Minnesota Department of Natural Resources, 500 Lafayette Road, St. Paul, MN 55155-4025, 651-259-5714 (phone), 651-296-1811 (facsimile), and mrcca.rulemaking@state.mn.us.

Alternative Format. Upon request, this information can be made available in an alternative format, such as large print, braille, or audio. To make such a request, please contact the agency contact person at the address or telephone number listed above.

NOTE: This rulemaking phase is intended to provide informal feedback on the working draft rules before they are finalized for the last phase. The last phase is a formal process that begins with a Notice of Intent/Hearing to adopt the rules, with a public hearing presided over by an Administrative Law Judge. Therefore, comments received in response to this notice will not necessarily be included in the formal rulemaking record submitted to the Administrative Law Judge. The agency is required to submit to the judge only those written comments received after the rules are formally proposed in the second phase. If you submit comments in response to this notice and you want to ensure that the Administrative Law Judge reviews the comments, you should resubmit the comments after the rules are formally proposed.

Date: _____

CERTIFICATE OF MAILING THE REQUEST FOR COMMENTS

Possible Rules Governing the Mississippi River Corridor Critical Area, *Minnesota Rules*, chapters 6120 and 4410

I certify that at Saint Paul, Ramsey County, Minnesota:

1. On May 30, 2014, I sent postcards to 16,714 property owners announcing the Request for Comments and directing interested parties to the State Register and to the DNR rulemaking website at www.dnr.state.mn.us/input/rules/mrcca/index.html. I accomplished delivery by arranging production of the postcards by MINNCORR and delivery of the postcards to the State of Minnesota's central mail system for United States mail with postage prepaid.
2. On June 2, 2014, I sent an email through GovDelivery to 1,290 subscribers for notices about the Mississippi River Corridor Critical Area (MRCCA) announcing the Request for Comments and directing interested parties to the State Register and to the DNR rulemaking website at www.dnr.state.mn.us/input/rules/mrcca/index.html.
3. On June 3, 2014, I sent an email to all local government staff contacts in the MRCCA announcing the publication of the RFC and the mailing of the 16,714 postcards to property owners in the MRCCA.
4. On June 16 and June 20, 2014, I sent an email to all federal, state, and regional agencies with jurisdiction in the MRCCA alerting them of the RFC and offering to meet with them individually.
5. I submitted a news release for general circulation newspapers statewide.
6. I posted a copy of the Request for Comments on the Department's website at <http://www.dnr.state.mn.us/input/rules/rulemaking.html>.

**CERTIFICATE OF SENDING THE REQUEST FOR COMMENTS TO THE
RULEMAKING MAILING LIST; CERTIFICATE OF ACCURACY OF THE MAILING
LIST**

**Possible Rules Governing the Mississippi River Corridor Critical Area, *Minnesota
Rules, chapters 6120 and 4410***

I certify the following:

1. On June 2, 2014, at least 33 days before the end of the comment period, at Saint Paul, Ramsey County, Minnesota, I delivered or caused to be delivered the Notice of Intent to Adopt Rules by either depositing the Notice in the State of Minnesota's central mail system for United States mail with postage prepaid or by sending electronic links via email to all persons and associations on the department rulemaking mailing list established by Minnesota Statutes, section 14.14, subdivision 1a.
2. The list of persons and associations who have requested under Minnesota Statutes, section 14.14, subdivision 1a, that their names be placed on the Department of Natural Resources rulemaking mailing list is accurate, complete, and current. Copies of the mailing list for U.S. mail subscribers and email subscribers list via the GovDelivery system are attached to this certificate.

This bulletin was sent to the following groups of people:

Subscribers of DNR Rules Notification List (527 recipients)

You are subscribed to Minnesota Department of Natural Resources Rules Notification List.

The Minnesota Department of Natural Resources (DNR) is requesting comments on a working draft of possible rules governing land development in the Mississippi River Corridor Critical Area (MRCCA). A Request for Comments was published today, June 2, 2014, in the State Register. The Request for Comments, working draft of possible rules, district maps, rulemaking schedule, and other information regarding the rulemaking are available to view and print from the MRCCA Rulemaking Project website: www.dnr.state.mn.us/input/rules/mrcca/index.html.

The MRCCA is a land corridor along the Mississippi River within the seven-county metro area. There are 30 local governments within the 72 mile long, 54,000 acre corridor. Land development in the corridor is guided by existing state regulations, which are implemented through local government plans and zoning ordinances. The proposed rules, if adopted, would replace the existing regulations.

This rulemaking will:

- Continue to guide management of the MRCCA as a multi-purpose resource
- Establish new districts and update minimum guidelines and standards for land development in the districts

The rules would likely affect the following persons and organizations within the MRCCA:

- All local government units with jurisdiction in the MRCCA
- Property owners, institutions, developers, and businesses

- Recreational facility users
- Water-oriented businesses, facilities, and navigation interests on the Mississippi River
- Utility providers
- State and regional agencies and institutions with facilities, property interests, and/or regulatory authority in the MRCCA (such as the Metropolitan Council, Department of Natural Resources, Department of Transportation, Metropolitan Airports Commission, University of Minnesota, Saint Paul Port Authority, Minnesota Historical Society, and federal agencies such as the National Park Service and U.S. Army Corps of Engineers)

How to Comment: The DNR will accept comments until **4:30 p.m. on Friday, August 15, 2014**. We encourage written comments. As you review the working draft rules, please focus on the following topics:

- What doesn't work and why?
- What needs clarification?
- What specific changes do you recommend?

It will help us if you can cite specific parts or pages within the working draft document.

Comments may be submitted via e-mail, US mail, or fax to:

1 Minnesota Law Found Containing "**mississippi river corridor**"

Type ▼	Year	Document	Chapter
Session Laws	2009	Chapter 172, Article 2 2009 Session Laws 86th Legislature, Regular Session	Chapter 172 2009 Session Laws 86th Legislature, Regular Session

Omnibus cultural and outdoor resources finance bill

Chap. 172
Art. 2

Sec. 27. Minnesota Statutes 2008, section 116G.15, is amended to read:

116G.15 MISSISSIPPI RIVER CORRIDOR CRITICAL AREA.

Subdivision 1. **Establishment; purpose.** (a) The federal Mississippi National River and Recreation Area established pursuant to United States Code, title 16, section 460zz-2(k), is designated an area of critical concern in accordance with this chapter. ~~The governor shall review the existing Mississippi River critical area plan and specify any additional standards and guidelines to affected communities in accordance with section 116G.06, subdivision 2, paragraph (b), clauses (3) and (4), needed to insure preservation of the area pending the completion of the federal plan. The purpose of the designation is to:~~

- (1) protect and preserve the Mississippi River and adjacent lands that the legislature finds to be unique and valuable state and regional resources for the benefit of the health, safety, and welfare of the citizens of the state, region, and nation;
- (2) prevent and mitigate irreversible damages to these state, regional, and natural resources;
- (3) preserve and enhance the natural, aesthetic, cultural, and historical values of the Mississippi River and adjacent lands for public use and benefit;
- (4) protect and preserve the Mississippi River as an essential element in the national, state, and regional transportation, sewer and water, and recreational systems; and
- (5) protect and preserve the biological and ecological functions of the Mississippi River corridor.

~~The results of an environmental impact statement prepared under chapter 116D begun before and completed after July 1, 1994, for a proposed project that is located in the Mississippi River critical area north of the United States Army Corps of Engineers Lock and Dam Number One must be submitted in a report to the chairs of the environment and natural resources policy and finance committees of the house of representatives and the senate prior to the issuance of any state or local permits and the authorization for an issuance of any bonds for the project. A report made under this paragraph shall be submitted by the responsible governmental unit that prepared the environmental impact statement, and must list alternatives to the project that are determined by the environmental impact statement to be economically less expensive and environmentally superior to the proposed project and identify any legislative actions that may assist in the implementation of environmentally superior alternatives. This paragraph does not apply to a proposed project to be carried out by the Metropolitan Council or a metropolitan agency as defined in section 473.121.~~

~~(b) If the results of an environmental impact statement required to be submitted by paragraph (a) indicate that there is an economically less expensive and environmentally superior alternative, then no member agency of the Environmental Quality Board shall issue a permit for the facility that is the subject of the environmental impact statement, other than an economically less expensive and environmentally superior alternative, nor shall any government bonds be issued for the facility, other than an economically less expensive and environmentally superior alternative, until after the legislature has adjourned its regular session sine die in 1996.~~

Subd. 2. **Administration; duties.** (a) The commissioner of natural resources may adopt rules under chapter 14 as are necessary for the administration of the Mississippi River corridor critical area program. Duties of the Environmental Quality Council or the Environmental Quality Board referenced in this chapter, related rules, and the governor's executive order number 79-19, published in the State Register on March 12, 1979, that are related to the Mississippi River corridor critical area shall be the duties of the commissioner. All rules adopted by the board pursuant to these duties remain in effect

- 53.12 and shall be enforced until amended or repealed by the commissioner in accordance with law. The commissioner shall work in consultation with the United States Army Corps of
- 53.14 Engineers, the National Park Service, the Metropolitan Council, other agencies, and local units of government to ensure that the Mississippi River corridor critical area is managed as a multipurpose resource in a way that:
- 53.17 (1) conserves the scenic, environmental, recreational, mineral, economic, cultural, and historic resources and functions of the river corridor;
- 53.19 (2) maintains the river channel for transportation by providing and maintaining barging and fleeting areas in appropriate locations consistent with the character of the Mississippi River and riverfront;
- (3) provides for the continuation and development of a variety of urban uses, including industrial and commercial uses, and residential uses, where appropriate, within
- 53.24 the Mississippi River corridor;
- 53.25 (4) utilizes certain reaches of the river as a source of water supply and as a receiving
- 53.26 water for properly treated sewage, stormwater, and industrial waste effluents; and
- 53.27 (5) protects and preserves the biological and ecological functions of the corridor.
- 53.28 (b) The Metropolitan Council shall incorporate the standards developed under this section into its planning and shall work with local units of government and the
- 53.30 commissioner to ensure the standards are being adopted and implemented appropriately.
- (c) The rules must be consistent with residential nonconformity provisions under sections 394.36 and 462.357.

Subd. 3. **Districts.** The commissioner shall establish, by rule, districts within the Mississippi River corridor critical area. The commissioner must seek to determine an appropriate number of districts within any one municipality and take into account municipal plans and policies, and existing ordinances and conditions. The commissioner shall consider the following when establishing the districts:

- 54.1 (1) the protection of the major features of the river in existence as of March 12, 1979;
- (2) the protection of improvements such as parks, trails, natural areas, recreational areas, and interpretive centers;
- 54.5 (3) the use of the Mississippi River as a source of drinking water;
- 54.6 (4) the protection of resources identified in the Mississippi National River and Recreation Area Comprehensive Management Plan;
- 54.7 (5) the protection of resources identified in comprehensive plans developed by
- 54.10 counties, cities, and towns within the Mississippi River corridor critical area;
- 54.11 (6) the intent of the Mississippi River corridor critical area land use districts from the governor's executive order number 79-19, published in the State Register on March 12, 1979; and
- (7) identified scenic, geologic, and ecological resources.

Subd. 4. **Standards.** (a) The commissioner shall establish, by rule, minimum guidelines and standards for the districts established in subdivision 3. The guidelines and standards for each district shall include the intent of each district and key resources and features to be protected or enhanced based upon paragraph (b). The commissioner must take into account municipal plans and policies, and existing ordinances and conditions when developing the guidelines in this section. The commissioner may provide certain exceptions and criteria for standards, including, but not limited to, exceptions for river access facilities, water supply facilities, stormwater facilities, and wastewater treatment facilities, and hydropower facilities.

- 54.16 (b) The guidelines and standards must protect or enhance the following key
- 54.18 resources and features:
- 54.19
- 54.20
- 54.21
- 54.23
- 54.24
- 54.25

- ~~54.28~~ (1) floodplains;
.. (2) wetlands;
54.28 (3) gorges;
54.29 (4) areas of confluence with key tributaries;
54.30 (5) natural drainage routes;
(6) shorelines and riverbanks;
54.32 (7) bluffs;
(8) steep slopes and very steep slopes;
54.34 (9) unstable soils and bedrock;
54.35 (10) significant existing vegetative stands, tree canopies, and native plant communities;
55.1 (11) scenic views and vistas;
(12) publicly owned parks, trails, and open spaces;
55.3 (13) cultural and historic sites and structures; and
55.4 (14) water quality.
55.5 (c) The commissioner shall establish a map to define bluffs and bluff-related features
55.6 within the Mississippi River corridor critical area. At the outset of the rulemaking process,
the commissioner shall create a preliminary map of all the bluffs and bluff lines within
55.8 the Mississippi River corridor critical area, based on the guidelines in paragraph (d). The
rulemaking process shall provide an opportunity to refine the preliminary bluff map. The
commissioner may add to or remove areas of demonstrably unique or atypical conditions
that warrant special protection or exemption. At the end of the rulemaking process, the
commissioner shall adopt a final bluff map that contains associated features, including
bluff lines, bases of bluffs, steep slopes, and very steep slopes.
55.14 (d) The following guidelines shall be used by the commissioner to create a
preliminary bluff map as part of the rulemaking process:
(1) "bluff face" or "bluff" means the area between the bluff line and the bluff base. A
high, steep, natural topographic feature such as a broad hill, cliff, or embankment with
55.18 a slope of 18 percent or greater and a vertical rise of at least ten feet between the bluff
55.19 base and the bluff line;
55.20 (2) "bluff line" means a line delineating the top of a slope connecting the points
at which the slope becomes less than 18 percent. More than one bluff line may be
encountered proceeding upslope from the river valley;
(3) "base of the bluff" means a line delineating the bottom of a slope connecting
55.24 the points at which the slope becomes 18 percent or greater. More than one bluff base
may be encountered proceeding landward from the water;
(4) "steep slopes" means 12 percent to 18 percent slopes. Steep slopes are natural
topographic features with an average slope of 12 to 18 percent measured over a horizontal
distance of 50 feet or more; and
55.29 (5) "very steep slopes" means slopes 18 percent or greater. Very steep slopes are
natural topographic features with an average slope of 18 percent or greater, measured over
a horizontal distance of 50 feet or more.
55.32 Subd. 5. **Application.** The standards established under this section shall be used:
55.33 (1) by local units of government when preparing or updating plans or modifying
55.34 regulations;
55.35 (2) by state and regional agencies for permit regulation and in developing plans
55.36 within their jurisdiction;
56.1 (3) by the Metropolitan Council for reviewing plans and regulations; and
56.2 (4) by the commissioner when approving plans and regulations, and reviewing
..

56.3 development permit applications.

56.6 Subd. 6. **Notification; fees.** A local unit of government or a regional or state agency shall notify the commissioner of natural resources of all developments in the corridor that require discretionary actions under their rules at least ten days before taking final action on the application. The commissioner may establish exemptions from the notification requirement for certain types of applications. For purposes of this section, a discretionary action includes all actions that require a public hearing, including variances, conditional use permits, and zoning amendments.

56.11 Subd. 7. **Rules.** The commissioner shall adopt rules to ensure compliance with this section. By January 15, 2010, the commissioner shall begin the rulemaking required

56.12 by this section under chapter 14.

56.13
