## Lakes To Bear Names--

# State Will Honor 2 Native Sons

By FRED NEUMEIER

Two former Minnesotans are going to have state lakes named after them.

They are Raymond B. Allen, chancellor of the University of California at Los Angeles, and S. Clark Beise, president of the Bank of America in San Francisco.

They will be given the honors at luncheons in the two California cities next Thursday and Friday and each will be presented a topographical map showing the location of the two lakes in Northern Minnesota. The lakes are without names.

Gov. Freeman will make the presentation.

The ceremonies will be part of a 2-day trip to Los Angeles and California by some 25 state, labor, industry, and farm organization representatives of Minnesota who will leave for Los Angeles at 6:45 p. m. Wednesday.

On Thursday the Governor and Mrs. Freeman will be host and hostess at a luncheon in the Ambassador hotel in Los Angeles at which some 200 industrial and other leaders have been invited to be the guests of the State of Minnesota.

That night there will be a reunion with former Minnesotans living in California.

The following day, the Governor and Mrs. Freeman will be host and hostess at another luncheon arranged by the state in the Fairmont hotel in San Francisco, to which some 250 persons have been invited. That

**BENEDICTINE SISTERS** Mother Marcelline, left, prioress of St. Paul's priory, and Sister Wilma, priory treasurer, receive a \$1,400 check from Very Rev. George E. Ryan, rector of the St. Paul Cathedral. The money is a gift from the Cathedral parish to be used for a memorial to the late Archbishop John Gregory Murray in the school the sisters are building at Larpenteur and Hwy. 100.

night the Union League and Press club of San Francisco will entertain the visiting Minnesotans.

Purpose of the trip is to advertise Minnesota as a tourist and industrial center. One industry in the San Francisco area is already contemplating moving to this state, it is reported. It is connected with the dairy industry.

### POSTMASTERS OKD

WASHINGTON —(LE)— The Senate Thursday confirmed the nominations of 234 postmasters, among them: Howard J. Wood, Sioux Falls, S. D.; Milton A. Williams, Lead, S. D.; Morris F. Broe, Mobridge, S. D.; Julius C. Sarafolean, Portage, Wis.

### SCHOOL FUND OK'D

WASHINGTON —(LE)— The federal government has earmarked \$130,000 for a special school in Minot to educate the children of parents working on federal projects, such as the Army Force installations, the Veterans hospital and the Garrison reservoir in the Minot area.

## Steps to Rename State Lakes Begun

The state geographic board Wednesday authorized the first steps in its plan for renaming the numerous duplicate lakes in Minnesota.

Meeting with Herman Wenzel, board chairman and Conservation commissioner, members agreed to contact county boards in connection with the mandate of the statute creating the board. It provides that lakes having similar names be renamed.

Other members are Theodore Blegen, superintendent of the state Historical society, secretary, and N. W. Elsberg, Highway commissioner. Elsberg was represented by O. L. Kipp of the Highway department.

### ***Duplicate Lake Name Campaign Is Opened***

The state geographic board Wednesday authorized the first steps in its plan for re-naming the numerous duplicate lakes in Minnesota. Meeting with Herman Wenzel board chairman and conservation commissioner, members agreed to contact county boards to sound out sentiment for carrying out the mandate in the statute creating the board. It provides that lakes having similar names be re-named.

Other members are Theodore Blegen, superintendent of the State Historical society, secretary, and N. W. Elsberg, highway commissioner. Elsberg was represented by C. L. Kipp of the highway department.

## The Interpreter

### RENAMING THE LAKES

IT IS GRATIFYING to note that at last steps are being taken to rename the numerous lakes in Minnesota having duplicate names. The recently-created state geographic board set up by the Legislature and vested with authority to untangle the lake title snarl met this week with Herman Wenzel, board chairman and conservation commissioner, and agreed to contact county boards in connection with the mandate which provides that lakes bearing similar names be renamed. The geographic board is well manned for the task, its members including Theodore Blegen, superintendent of the State Historical society, as secretary, and N. W. Elsberg, highway commissioner.

\* \* \*

THE RENAMING movement began in earnest in May, 1936, when to rectify a confusion typified by 99 Long lakes, Dr. B. F. Ederer of Morris, member of the conservation commission, presented a resolution to the Legislature asking legislative authority be granted the commission to rename lakes and streams. After the resolution was adopted, E. V. Willard, state conservation commissioner, grafted an amendment to a 1925 law granting such authority to the commissioners. Dr. Ederer in the resolution pointed out that "confusion exists and will continue to exist because of the manner in which the names of many lakes, rivers and streams repeat a large number of times."

\* \* \*

AS AN ILLUSTRATION of this confusion in our geographic nomenclature might be pointed out the following astonishing number of repetitions:

- 99 Long lakes.
- 91 Mud lakes.
- 73 Rice lakes.
- 43 Bass lakes.
- 40 Twin lakes.
- 39 Round lakes.
- 36 Clear lakes.
- 32 Sandy lakes.

Occurring 25 more times are such names as Pine, Cedar, Spring, Silver, Turtle, Fish, Duck, Grass, Horseshoe, Island, and Goose.

IT IS EVIDENT from the above that Minnesotans have not exercised a great deal of ingenuity or imagination in christening their 10,000 or more lakes. And here may be the explanation for the confusing repetitions, there was such an abundance of lakes that duplications were bound to happen, particularly in the days of early settlement when, because of the meager communications, a settler who named a lake adjoining his northern Minnesota homestead might not be aware that a like name had been given a lake in some other part of the state or even in the same county. For instance, there are 14 Long lakes in Otter Tail county alone.

\* \* \*

THE TASK NOW before the geographic board may appear an insignificant duty at first sight, but in reality it is an important one and should be quickly reckoned with. The large vacation and tourist crowds which every summer visit this state are helpless before the confusing array of duplicate names. Now that so many lakes are accessible by automobile it is imperative that these duplications be removed. Moreover, it provides the state an excellent opportunity to give its lakes beautiful and historically appropriate names, to give each body of water the benefit of individuality, and to raise the quality of Minnesota placenames in its most representative geographic feature.

St. Paul Dispatch, Jan. 21, 1938

### Renaming Our Lakes

As was to be expected, the project to re-christen many of Minnesota's lakes is attracting attention from both far and near. It is an undertaking which has an interest not only to the native Minnesotan but also to persons living in other states who have visited here as tourists and who, no doubt, have experienced confusion at the widespread duplication which the State Geographical board has set out to correct.

Ideas have been volunteered from points as distant as South Carolina, whence a request came that one lake be named "Poinsett" in honor of the Secretary of War at the period when Fremont and Nicollet explored these regions. Local people have written to ask that certain bodies of water be named for pioneering relatives. Many of the suggestions are perhaps deserving, but the Geographical board acts only in an advisory capacity with the various county commissioners who have the legal power to alter county nomenclature.

The board created to study name changes has a painstaking task before it. Interested persons ought to be apprised at the outset that the job cannot be done overnight.

Mary B.

St. Paul Dispatch, April 30, 1940

### Burnquist O. K.'s Lake Name Change

A move to change the name of Gnat lake in Beltrami county had the approval of Attorney General J. A. A. Burnquist today.

When residents of the section around Gnat lake asked Arthur J. Larsen, secretary of the State Geographic board, whether the 40-year-old name could be discarded in favor of Lake Beltrami, Larsen put the question up to Burnquist. The attorney general said the Geographic board could make the change if the Beltrami county commissioners approved.

Next step, said Larsen, will be to hold hearings in Beltrami county and get the approval of the county board, after which the Geographic board may announce the new name.

Minneapolis Star Journal, April 30, 1940

### Renaming of Gnat Lake Is Requested

Attorney General J. A. A. Burnquist today ruled, on request of A. J. Larsen, secretary of the state geographic board, that Gnat lake in Beltrami county may be renamed Lake Beltrami if the county commissioners approve.

\* \* \*

Residents around the lake had asked Larson whether the 40-year-old name could be discarded. Hearings will be held to obtain commissioners' approval.

From Cook County News Herald (Grand Marais), August 1, 1940, p. 1.

LAKE NAMES GIVE OFFICERS TROUBLE

"The naming of lakes in Cook County has been a problem with the state and federal forestry rangers. . . . To alleviate this condition, however, the Arrowhead Association has been naming a great number of these lakes lately. . . . [Examples] The name Arrowhead river is also disconcerting to many; the North Brule and the South Brule rivers meet to form the Arrowhead. Thus the stream between the forks and the mouth is called the Arrowhead river."

the naming of lakes in Cook county has been a problem with the state and federal forestry rangers. Due to the fact that practically every lake is cut by a section line, map writers have neglected to record the smaller lakes. For this reason lakes have either doubtful names or none whatever.

To alleviate this condition, however, the Arrowhead Association has been naming a great number of these lakes lately. Confusion arises whenever officials in St. Paul request the value of timber on a certain section land which is covered by an unnamed lake. Rangers merely reply, "The land is under water."

Confusion has also arisen from lakes having the same name, such as the two Trout lakes, the two Pearson lakes, and the two Elbow lakes.  
... the name Arrowhead

FOR IMMEDIATE RELEASE  
[Mailed on December 6, 1940]

That the State Geographic Board of Minnesota is by no means an inactive bureau is demonstrated by the results of a meeting of the board held on December 2, according to a statement by Mr. Michael J. Hoffmann, commissioner of highways, who is chairman of the board. The other members of the board are Dr. William L. Strunk, commissioner of conservation, and Dr. Arthur J. Larsen, superintendent of the Minnesota Historical Society and secretary of the board.

The board approved a resolution of the county commissioners of Beltrami County to change the name of Gnat Lake in that county to Beltrami Lake, and a resolution of the Cass County commissioners to change the name of Pickerel Lake, near Hackensack, to Variety Lake.

Besides approving these resolutions, the board took under consideration recommendations for name changes of geographic features submitted by the forest supervisors of the Superior and Chippewa National Forests. Of a total of 264 names recommended, 244 were approved by the board, and a decision on 20 others was postponed for further consideration. The State Geographic Board voted to refer to the county commissioners of Cook, St. Louis, and Lake counties for their approval 79 names of features within the Superior National Forest, and to the commissioners of Beltrami, Cass, Itasca, and Hubbard counties, 37 names of geographic features in the Chippewa National Forest.

A total of 128 decisions were made to standardize spelling and eliminate confusion and misapplication of names of geographic features in the two national forests.

The decisions of the board will reduce materially the duplications of such lake names as Mud, Long, Lost, Bass, Round, Sand, Crooked, Rice, and others that are repeated again and again on the map of Minnesota.

Fergus Falls Daily Journal, Dec.10,1940

Change Names  
Of Many Lakes

No longer when your friends tell you about the nice mess of fish he got in Round or Long lake, must you proceed to crow-question him exhaustively concerning location, shape and color of the water of the particular lake he means.

No longer, at least, when the state geographic board of Minnesota finishes the work it began last week, of whittling down Minnesota's numerous lake-name duplications.

On the board are M. J. Hoffman, state highway commissioner; Dr. William Strunk, conservation commissioner, and Dr. Arthur J. Larsen superintendent of the Minnesota Historical society and secretary of the board.

The decisions will reduce materially the duplications of such lake names as Mud, Long, Lost, Bass, Round, Sand, Crooked, Rice, and many others now repeated again and again on the map.

Detroit Lakes Tribune, December 12, 1940

Names Of Lakes  
Being Changed

When the state geographic board completes its task begun last week, visitors to the lake regions of Minnesota, including the Detroit Lakes area, probably won't be so puzzled.

The board, you see, has begun changing names and reducing the number of lakes with identical.

"Take Pelican lake, for example," says the Fargo Forum. "Now the Pelican lake that is most familiar to Fargo-Moorhead residents is the one where many North Dakota and Minnesota folks have their summer cottages. But there are many other Pelican lakes which adds to the confusion, especially to strangers who are not familiar with the region.

"Robert E. Streich, Moorhead game warden, has received a partial list of names as listed by the board, but none of the more familiar waters are there. It is expected, however, that a number of changes will be made."

On the geographic board are M. J. Hoffman, state highway commissioner; Dr. William Strunk, conservation commissioner, and Dr. Arthur J. Larsen, superintendent of the Minnesota Historical society.

Duplications in names of lakes such as Mud, Long, Round, and others will be eliminated so far as possible.

Farmers Independent (Bagley, Clearwater County), December 12, 1940

Geographic Board Will Cut  
Out Duplicate Lake Names

Whittling down Minnesota's numerous lake-name duplications, is the job recently started by the state geographic board.

The board approved a resolution by Beltrami county commissioners to change the name of Gnat lake to Beltrami lake. They approved another to change the name of Pickerel lake, near Hackensack and one of several Pickerel lakes, to Variety lake.

Of a total of 264 names recommended mostly of lakes, 244 were approved by the board, and decision on 20 others was postponed.

The decisions will reduce materially the duplications of such lake names as Mud, Long Lost, Bass, Round, Sand, Crooked, Rice and many others now repeated again and again on the map.

Brainerd Tribune, January 2, 1941

Brainerd, Minn.

### Renaming Our Lakes

The State Geographic Board is renaming our lakes and other geographic features. One wonders if this is being done "right off the bat," as one might say, or whether the christening occurs after due consideration of all the facts and also after giving some of the people interested in the aforesaid lake a chance to say something.

If the lake in question is a large one and has grouped on it a large number of summer resorts, private homes, etc., the sudden change of the name means a printing bill for the resorts which mounts up to quite a figure. All their literature used in correspondence and other business will have to be changed, to conform to the new name. In other ways the change is felt. Then again, a name may be selected which would out-mode the old designation, but may not suit the people on the lake.

For instance, Round lake eight miles out from Brainerd and near Gull lake, has 100 cottages and a number of resorts and a change in name would have an immediate effect. Look at the resort maps that would have to make changes in location and descriptions.

Mrs. Mary W. Berthel had an article in "Minnesota History" for December, 1940, which classifies and describes the place names of the Mille Lacs region. Such names as Onamia and Ogechie, says the writer, are from the Chippewa, while Wahkon and Kathio are from the Sioux. Other names are translations of the Indian appellation. There are names of French, English, and Scandinavian origin. A large number of place names are derived from personal names, but by far the greater number are descriptive, according to Mrs. Berthel. In this class are lakes named for their shape, their location, and the fish in them, or for animals that once frequented them. Others are named for events that occurred in the vicinity. Mrs. Berthel listed numerous duplications of names in the Mille Lacs area.

TWO HARBORS TIMES, Feb. 20, 1941

Names of Lakes are Changed

The petition of the state geographic board to change the names of 35 lakes in Lake county was approved by members of the county board of commissioners at their last meeting held last week. In its petition, the state geographic board pointed out that a change in the names of a number of lakes would avoid repetition and would be more authentic.

Included among the names of lakes which will be changed are the following:

[Lists names in petition]

ITASCA IRON NEWS, March 6, 1941

State May Change Names of Lakes

At the meeting of the county commissioners Tuesday, the Minnesota Geographic Board asked that the names of 27 lakes in Itasca county be changed, so as to avoid confusion. The matter was placed in the hands of the County Resort Association for investigation before the board takes action. The idea behind the move seems to be to bring back the original names, since the Geographic board suggests that Sugar lake be called by its original Indian appellation, Sissebakwet.

ITASCA COUNTY INDEPENDENT (Grand Rapids), March 7, 1941

State Historical Society Would Change Lakes' Names

Ask County Board's O.K.

A proposition that promises to stir up a lot of controversy and opposition was presented for approval to the Itasca county board at their monthly meeting Tuesday, when the Minnesota Geographic branch of the Minnesota Historical society presented a petition to the board asking that body to approve changes of the names of some 25 lakes in Itasca county. While many of the lake names it is proposed to change are of lakes that are known by more than one name, and the object is to establish official uniform names, there will be strenuous objection to the changing of the names, not only by people directly concerned with said lakes, but by many others who have a sentiment for the old names, because of their historical significance in the territory in which they are located. The matter has been referred to the Itasca County Resort Owners association before approval is given by the county board.

### Still Northwest Angle

This is one of those things which "can now be told."

A couple of months ago we received a letter from the Minnesota Historical Society requesting our opinion regarding the change of the name of Northwest Angle to "Delafield Peninsula." This move was fathered by certain Canadian interests who wished to commemorate the name of one of their notables.

We replied that in the first place the Northwest Angle wasn't a peninsula, that term being defined by Webster as "A piece of land almost surrounded by water and connected with the mainland by a neck called an isthmus," [sic] and consequently such a designation would be a geographical absurdity.

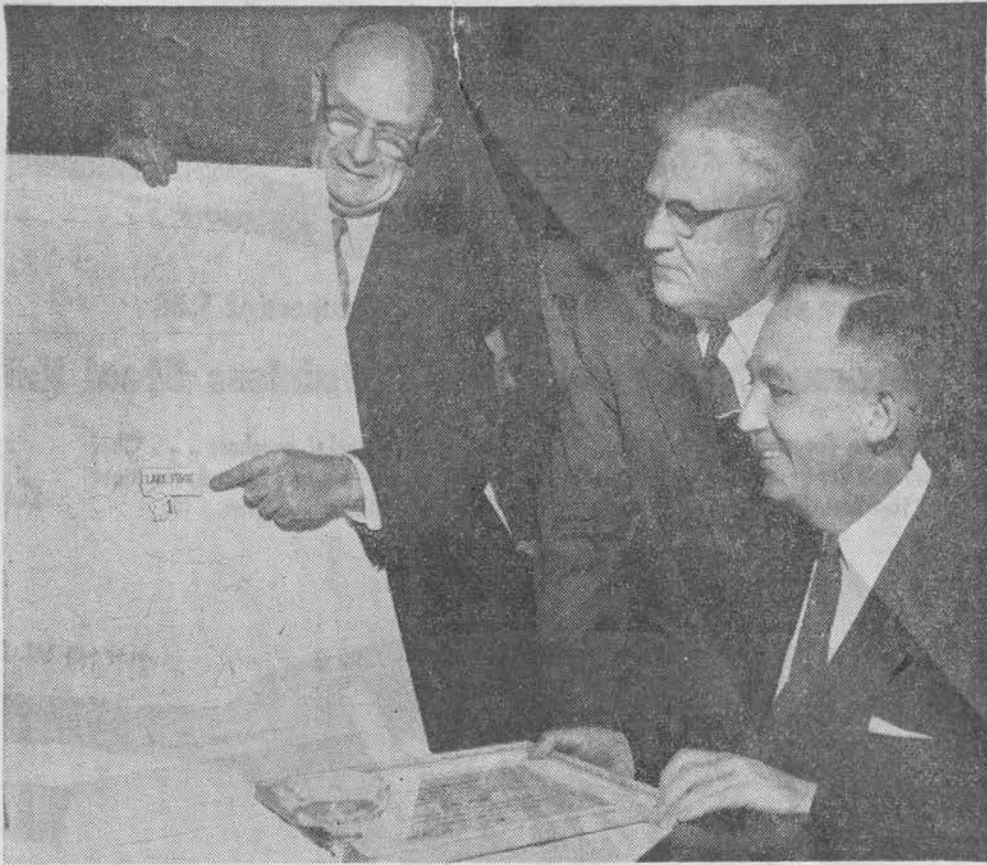

In the second place, the Northwest Angle is U.S. territory and nobody here ever heard of Delafield. If a piece of land in this country were to commemorate a politician, it should honor our own, who are as badly in need of honor here as in Canada.

Furthermore, we replied, the Northwest Angle was a term in common use, it was on all the maps, and as it would never be accepted locally, a change in name would only result in endless confusion.

We are now in receipt of a letter from the Historical Society stating that the State Geographic Board at a recent meeting, went on record as opposing the change of name on the ground that local usage favors the term, Northwest Angle.

As Mr. Larsen, Superintendent of the Minnesota Historical Society writes:

"It would be a tragic mistake to change the name of this area."

**LAKE NAMED FOR WILLIAM C. FIGGE**, seated, is indicated on map by James W. Clark, head of the state Department of Business Development. Dan A. Williams, president of the Chamber of Commerce, looks on.—Staff Photo.

## **Lake Named For William Figge- Brewery President Honored**

William C. Figge, president of the Hamm Brewing Co., was honored Wednesday at a testimonial luncheon in the Hotel Lowry attended by 500 business, civic and government leaders from all over Minnesota and as far west as California.

Speakers laid emphasis on the widespread favorable publicity that has come to the state through the brewery's nationwide publicizing of its advertising slogan "From the Land of Sky Blue Waters," and the sales and advertising expansion which has given the slogan widespread circulation.

In the last five years sales of Hamm's beer have jumped from 17th to seventh in the nation. The company's product is now distributed in 24 states, Alaska, Hawaii and Guam.

Dan A. Williams, president of the Chamber of Commerce, presided at the luncheon and Ed Shave, outdoor writer, was toastmaster. Mr. Figge received several plaques, scrolls and other mementoes from attending organizations.

Gov. Freeman announced that a lake northwest of Virginia has been named in Mr. Figge's honor and James W. Clark, commissioner of the state Department of Business development, presented Mr. Figge a map so he can locate the lake.

Arthur Kelly, sales vice president of Western Airlines,

praised the guest of honor for Hamm's sales expansion on the West coast, where the company now operates a branch brewery.

Mr. Figge has been president and general manager of the brewery since 1952. He previously was brewmaster, the

third generation of his family to hold the title. He is a graduate of St. Thomas Military academy and the College of St. Thomas and the United States Brewers academy and the Wallerstein Brewing school of New York.

The luncheon was sponsored by the Chamber of Commerce, the Minnesota Arrowhead, Hotel, Motel, Resort and Ten Thousand Lakes associations and Saintpaulites Inc.

Minneapolis Times-Tribune  
Jan. 28, 1941

for small "a" democracy.

### FINDING 'SUGAR LAKE'

There are two ways of looking at legislative investigating committee testimony concerning the game warden who couldn't find Sugar lake in Itasca county. One view would excuse him on the ground of understandable confusion—there are at least three Sugar lakes in the county. The other would berate him on the contention that, with three to pick from, at least one of the Sugar lakes should be found with comparative ease.

The incident brings up once more the confusing duplication of place names, particularly of lakes, throughout Minnesota. The Minnesota Writers' Project, carried out under the WPA, has been doing an unusual job in its study of place names. The names of two of Itasca county's three Sugar lakes have been changed, the study discloses, but it shows also that a list of some 800 lakes has already been compiled in the county, which claims no less than 1,100 in its resort advertising. Of more than 800 lakes now listed, 373 are not named on maps. The names, Mud, Spring, Crooked and Island are given to five lakes within the county in each instance; there are six Round lakes; four bear the name, Moose; and the county has no less than eight Bass lakes.

The study of place names in Itasca county and elsewhere has uncovered a great deal of interesting historic lore about Minnesota. A state gazetteer of place names will ultimately be produced under supervision of the Minnesota Geographic Board, created by a legislative act of 1937. It will make interesting reading matter, and in the meantime the move to change and systematize names to avoid the excessive duplication which now exists should be considerably advanced.

1/28/41  
Times Tribune

8-18-57 Maple Park

## **Name Is Mud No Longer for Richfield Lake**

The name of Richfield's second largest lake is no longer Mud.

The decision to change the name to Legion lake reduces the number of Minnesota's 90-some Mud lakes by one. The change was approved by the Minnesota geographic board.

Legion Lake is located in an area between E. Sixty-first and Sixty-sixth streets and Portland and Twelfth avenues S.

The board also approved a petition to change the name of Lake 22, near Shaw in St. Louis county, to Pioneer lake.

January 11, 1966

## FOR IMMEDIATE RELEASE:

On January 10 the Minnesota Geographic Board announced that the board had approved six names of Minnesota lakes.

The board is the official state agency responsible for the names of geographic features. Under the law it serves as the state's representative of the United States Geographic Board. It is composed of Wayne H. Olson, Minnesota commissioner of conservation; John R. Jamieson, commissioner of highways; and Russell W. Fridley, director of the Minnesota Historical Society.

The names approved were: Toohey Lake in Superior National Forest, Cook County; Divide Lake in the Lake County portion of Superior National Forest; Lake Placid for an unnamed body of water created by Pillager Dam in the Crow Wing River on the boundary of Cass and Morrison counties; Glacier Lake for a body of water in Aitkin County also known as Turner or Turtle Lake; Shumway Lake for a small body of water in Savanna Portage State Park also known as Green Lake; and Wright Lake for a body of water in the city of Fergus Falls formerly known as Stump Lake. The latter was renamed in honor of pioneer settler Vernon Wright at the request of the Fergus Falls City Council and the Otter Tail County Board of Commissioners.
