Concerning these lists, the regional office of the Forest Service wrote (Coleman to Larsen, Aug. 14, 1939) that they include "only minor errors minor mis-spellings and minor misapplications which we are permitted to correct and use on our maps without obtaining an official decision for each from the U.S.B.G.N. No further action is necessary on these names except that it would be well for the State Board to accept these corrections and advise all other state and county agencies of the correct spelling of the names. By doing this you will obtain uniform usage by all mapping agencies."

These are 79 name recommendations for features within or adjacent to the Superior National Forest.

Concerning these names, the regional office of the Forest Service writes (Leavitt to Larsen, Feb. 14, 1940): "The recommended names all have some measure of local acceptance, and our problem is to have some of the names officially adopted. We would like to point out that the cases were discussed with local inhabitants and, where possible, with local state officers. It is our opinion that local sentiment is favorable toward the recommended names . . . . The 79 cases which accompany this letter represent only a small percentage of the total number of major discrepancies (conflicts and duplications) which were found during our name survey. Many duplications still remain, but the names in most instances are so firmly entrenched that a change would be very difficult to effect at this time. Perhaps later we can, by joint effort, eliminate additional duplications and undesirable names."

I have checked all these names with Upham. Many of the lakes are not mentioned by Upham. (63) Some of them that he does mention agree with the Forest Service recommendations. (8) With some of them he disagrees, (8) and gives further information about their origin, of which the Forest Service was apparently ignorant. Some further research should be done on those names before they are accepted by the State Board. The Forest Service should be informed of our findings before these names are submitted to the national board.

These are name recommendations for features within or adjacent to the Superior National Forest.

Concerning these names, the regional office of the Forest Service writes (Leavitt to Larsen, Feb. 14, 1940): "The recommended names all have some measure of local acceptance, and our problem is to have some of the names officially adopted. We would like to point out that the cases were discussed with local inhabitants and, where possible, with local state officers. It is our opinion that local sentiment is favorable toward the recommended names....The cases which accompany this letter represent only a small percentage of the total number of major discrepancies (conflicts and duplications) which were found during our name survey. Many duplications still remain, but the names in most instances are so firmly entrenched that a change would be very difficult to effect at this time. Perhaps later we can, by joint effort, eliminate additional duplications and undesirable names."

On the following names of features in the Superior National Forest, submitted by the Regional Forester, U. S. Forest Service, the Minnesota Geographic Board has postponed action until further information has been obtained:

Meads Lake: T.64 N.,R.2 W.,secs.11,13,14,15,16, Cook County. The man for whom the lake was named was Alonzo D. Meeds of Minneapolis, an assistant in the Minnesota Geological Survey. Should not the proper spelling of his name, Meeds, be retained in the name of the lake?

Rosebush Creek: T.61 N.,R.1 W.,secs.23,26, Cook County. Warren Upham, in his Minnesota Geographic Names, p.137, says: "Rose Bush river, as it is popularly known ... in the east edge of T.61,R.1 W. The creek a mile farther west, mapped as Rose Bush river, has no recognized name among the settlers." Other authorities consulted agree that Rosebush River, or Creek, is the stream in the east edge of the township (secs.12,13,24), and they call the stream in secs.23 and 26 "Fall River."

Stoney Creek: T.63,64 N.,R.2 E., Cook County. Webster's Dictionary spells the word "stony."

Lake 14: T.60 N.,R.19 W.,secs.11,13,14, St. Louis County. Is there any local use of "Fourteen Lake" instead of "Lake Fourteen"? It appears as "Fourteen Lake" on some maps, and the State Geographic Board prefers to accept that form if there is any local authority for it. If not, the Board will accept "Lake Fourteen."

Wynne Lake: T.58,59 N.,R.15 W.,secs.5;18,19,30,31,32, St. Louis County. The Chippewa Indian name for this lake was "Showiminabo," which means "grape liquid," or "wine." Warren Upham, in his Minnesota Geographic Names, p.500, says: "The people of the Mesabi mining range universally know it by the translation of its aboriginal name .... Wine Lake." Is "Wynne" a corruption of "Wine"?

Ge-be-on-e-quet Lake: T.67 N.,R.14 W.,secs.14,15,16,21,22,23, St. Louis County. The State Geographic Board would prefer to omit the hyphens, and call it Gebeonequet Lake.

Silaca Lake: T.64 N.,R.13 W.,secs.29,30,31,32, St. Louis County. Webster's Dictionary spells the word "silica."
