Co. Atlas, 1928: Castle Rock.

Upham, 164, 165: Castle Rock. Nicollet in his report, 1843, gives the Sioux name Inyan bosndata, Standing Rock. A former well known landmark, a pillar or towerlike remnant, spared by erosion and weathering, of "a sandstone rock which stands alone on a prairie This geologic formation, before its partial disintegration which left it in ruins, closely resembled a castle." Winchell, in Final Report on Geology of Minn., 2:76-79, has a good description of Castle Rock. Its height was 44 feet above ground at its base, and 70 feet above an adjoining hollow but the slender pillar, 19 feet high, fell about 20 years ago.

About 8 miles distant e.-s.e. from the Chimney Rock which is $1\frac{1}{2}$ miles e. of Lone Rock which is about 10 miles n. of the Castle Rock. This is another and more remarkable Chimney Rock. As described in 1905 by the present writer (Bulletin of Minn. Academy of Sciences, 4:302, with a view from a photograph which well shows the reason for its name), this Chimney Rock "is the most picturesque and perfect example of columnar rock weathering in Minn. It is a vertical pillar, measuring 34 feet in height and about 6 and 12 feet in its lesser and greater diameter, being no thicker near the base than in its upper part."

Upham,165: Hastings. Former names, Oliver's Grove, Olive Grove. Platted as a village in 1853. Incorp. as a city in 1857. Co. seat of Dakota Co. "Was named in drawing of lots by its several proprietors, this second name of Henry Hastings Sibley having been his preference." Before the platting and naming of Hastings, this locality had been known during 33 years as "Oliver's Grove", often ignorantly changed to "Olive Grove". So named after Lieut. William G. Oliver, who was ascending the Mississippi with one or more keel boats in the autumn of 1819, but was prevented from going further by the ice in the bend of the river, opposite this city. Oliver was on his way from Ft. Crawford at Prairie du Chien with supplies for the soldiers at St. Peter's camp, among whom was the first settler of Hastings, Joe Brown.

Upham,170: Kaposia. The village of the successive hereditary Sioux chiefs, named Little Crow, was situated from 1837 to 1862 on a part of the site of South Park, a suburb of St. Paul. Previously, in the time of the expeditions of Pike, Cass, and Long, this movable Indian village had been located on the eastern side of the Mississippi. In 1820 and till 1833 or later, it was on the upper side of Dayton's Bluff, within the area of St. Paul; but earlier, during a dozen years or more, in 1805 and in 1817, it was at the Grand Marais, one to two miles south of that bluff. Concerning the name Keating wrote: "The Indians designate this band by the name **Kapoja**, which implies that they are deemed lighter and more active than the rest of the nation."

Mitchell,153: Lewiston. A village named Lewiston was platted and laid out by Charles Lewis, who afterwards sold an undivided interest to Stephen Casey. There was an excellent water power there. The town proprietors, however, put their property right up to the highest speculative point, and far above the reach of those who would have settled if they could have procured lots at reasonable figures, and the consequence was that the town never became full fledged, and in a short time it died a natural death, and never again arose.

Weekly Pioneer and Dem.,Apr.17,1856: Lewiston. Entered as a town-site.

Pioneer and Dem.,Aug.25,1856: Lewistown. About 18 miles from Hastings. "The Dakota Journal says it is beginning to emerge from its original wildness and present a townlike appearance."

Mitchell, 154-55: Merrimac. In 1858, Mr. Theophilus Cushing, an extensive lumber dealer from Maine, came to this town, bringing all the machinery for a large saw mill, which he located at Merrimac, Mr. Cushing expended some \$28,000 in the enterprise, but when the western bubble burst in that year, this was among those that could not hold a footing, and with the general crash, this went too. This so disgusted the proprietors that they returned to Maine, and the mill was finally sold to Wm. L. Ames of St. Paul, or what the freshet had spared, who removed the machinery.

Description &

Name Origin

The name is a translation, first published by Nicollet's map in 1843, of the Sioux name. Its origin was probably from the very bright red and orange-colored ochre obtained by the Sioux in seams of Chimney Rock in Marshall Twp., and of other outcrops of the St. Peter sandstone beside or near the course of this river. The lower parts of the river, after

(over)

it reaches the Mississippi bottomland, there flowing in two streams Northwestward and Southeastward to the Miss. River, are named the Vermillion Slough. Four miles Southeast of Hastings, this slough or river is joined by the Friedell Slough, by which it is connected with the Mississippi. Thence Southeastward these two rivers, the Vermillion and Mississippi enclose Prairie Island, ten miles long lying mostly in Goodhue County.

Description & Name Origin "On Sunday Mr. and Mrs. John F. Hielscher of Seattle, former St. Paulites . . . are going to celebrate their golden wedding anniversary in the Old Salem Evangelical church . . . a church which Mr. Hielscher's father, the late Rev. Ernest J. Hielscher, helped build. The church, one of the oldest in the state, has not been used in recent years, so Mrs. Hielscher's brothers, John C. and C.J. Zehnder, put a new roof on it and repainted it for the occasion. Mrs. Hielscher's father, Frederick Zehnder of Inver Grove, homesteaded a piece of land near the church in 1853, now known as the Zehnder farm"

COATES IS ROSEMOUNT TO POSTOFFICE TOO

& Remarks:

The controversy that arose over changing the name on the Coates railroad station to Rosemount, another Dakota county community six miles to the west, leaves Uncle Sam's postoffice department unruffled.

Dr. A.A. Van Dyke, St. Paul postmaster, revealed that as far as mail deliveries are concerned, Coates station has long been considered part of Rosemount. Years ago it had its own postoffice, he said, but since has been served by a rural route out of Rosemount.

He reported, incidentally, that it wont make much difference one way or the other in delivering mail to the huge new Gopher Ordnance works in that area. All mail to the plant, he said, is handled directly through the St. Paul postoffice.

Description & Name Origin was named for the Dakotas people, meaning an alliance or league. Under this name are comprised a large number of allied and affiliated Indian tribes, who originally occupied large parts of Minnesota and adjoining States. The Dakotas called themselves collectively by this name, but they have been more frequently termed Sioux, this being a contraction from the appellation, Nadouesioux, given with various spellings by Radisson, Hennepin, and La Salle, a term evidently of Algonquian origin, adopted by the early French explorers and traders.

-over-

Radisson says (Voyages, p. 154) that the first part of the Algonquian name for the Dakotas, spelled, in the translation of his manuscript, Nadoneceronons, meaning an enemy.

Rev. Moses N. Adams informed me (Upham) that the Dakotas dislike to be called Sioux, and much prefer their own collective name borne by this country, which implies friendship or even brotherly love.

Description &
Name Origin

Dakota County (one of nine original counties in territory of Minnesota) embraced all the territory west of Wabasha County and south of a line beginning at the mouth of the Crow River, and running up said river and the north branch thereof to its source, and thence west to the Missouri River.

12.

	NAME	Dakota county	Co	
Form	11	Classi-		
No.		fication	Misc.	Ref Neill's History of Minn. Valley - p283-4
				(page)

Dakota was one of the nine original counties created by the first territorial legislature. The act was passed October 27th, 1849, which defined the boundaries and declared the existence of this county.

Those boundaries were scarcely such, however, as the boundaries of today. All that portion of the territory "lying south of a line running due west from the mouth of Clear Water river to the Missouri river, and north of the north boundary line of Wabasha county," was erected into a separate county, called Dakota ("allied") from the Indian tribe that inhabited it.

The north boundary of Wabasha county, referred to above is given in the laws of 1849 as "a line running due west from a point on the Mississippi river, opposite the mouth of St. Croix river, to the Missouri river." This immense territory included ten or twelve of the counties of today, but scarcely embraced the northern half of Dakota county as bounded at present.

Under the revised statutes, all the territory west of the Mississippi river, and east of a line running from Medicine Bottle's village at Pine Bend, due south to the Iowa line, was erected into a separate county known as Wabasha. This included Hastings and other valuable portions of the present Dakota county.

By the revision, also, Dakota county was made to consist of "all that part of the territory west of the Mississippi river, and lying west of the county of Wabasha, and south of a line beginning at the mouth of Crow river, and up said river and the north branch thereof to its source, and thence due west to the Missouri river."

(over)

Dakota county continued with a vast extent of territory for some years. By degrees many other counties were formed out of that territory, including Hennepin county, which was formed in 1852.

An act to organize certain counties, and for other purposes, was passed March 5th, 1853. By this Dakota county was given the following boundaries: "Beginning in the Minnesota river, at the mouth of Credit river, thence in a direct line to the upper branch of Cannon river, thence down said river to its lower fork, as laid down on Nicollet's map, thence on a direct line to a point in the Mississippi river opposite the mouth of St. Croix lake, thence up the Mississippi river to the mouth of the Minnesota river, thence up the Minnesota river to the place of beginning."

As time passed on other changes were made in the county boundaries. February 20th, 1855, quite important changes were made. June 11th, 1858, the boundary between Scott and Dakota was changed. It is said that political considerations determined its final location. It seems to have been a troublesome boundary to politicians, who determined, according to hearsay, that both counties should be democratic. By skillful division of the Irish farmers who occupied the eastern part of Scott and the western part of Dakota these politicians were able to accomplish their purposes, though at the expense of a regular boundary line. Changes in this western boundary were made again in 1860 and in 1871. The present northern boundary was fixed in 1873.

The county seat was first established in 1853 at Kaposia. There were no county buildings and no county offices, other than the houses of the officers. The following year the county seat was removed to Mendota, the commissioners meeting there for the first time February 6th, 1854.

At this time Hastings being the largest town in the county, and becoming the following month an incorporated city, on St. Patrick's day, March 17th, 1857, it was voted by the people to establish the county seat in the newly-fledged city. The records were accordingly removed from Mendota on the 2d of June following. 12/16/41
(Pine Bend & Farmington later unsuccessful in county seat fights by vote)

Name Origin

This is the oldest town in the state. The

Name is an indian word meaning in one language "the junction of
two trails," and in the Sioux tongue "the mouth of a river". As the
Sakota (Sioux) Indians frequented these parts, it is believed that
(over)

their meaning of the word should apply, as here the
Minnesota (St. Peter) River enters the Mississippi. As early as 1835
General H. H. Sibley had an indian trading post here and in
1837, erected a stone dwelling house that still stands and is
in good preservation.
