GEN LOC passes across the N.E. part of this County. It crosses at and west of Gary, in

the east edge of South Dakota.

Description & Name Origin

The description and map of Lincoln County in the Final Report of the Minnesota Geological Survey (vol. 1, 1884, chapter XX, p 589-612) direct attention to its two well developed belts of marginal drift hills and short low ridges and knolls, abundantly spimplesed with boulders.

Parallel with the western or outer Altamont moraine and about 15 miles distance to the northeast, the similar but broader Second moraine passes where its profusion of limestone boulders gave the names of Limestone and Marble

-over-

townships.

From this locality, described by the Minnesota reports, this second marginal moraine of the continental ice-sheet, in a successive series of twelve traced partly in this state, was named as above noted in 1883 by Prof. T. C. Chamberlin.

after the surrender of Lee, which had ended the war.

The patriotic legislature of Minnesota in the year 1861 desired to honor Lincoln by giving his name to a county established from the northeastern part of the present Renville county, with addition of the two most southern townships, now in Meeker county; but this act failed of the requisite ratification by the people of the counties thus changed. Next by an act approved March 9, 1866, the name of Rock county was to Lincoln. This law, however, was ineffectual, being ignored by the people of Rock county. Therefore a third

Description &
Name Origin

A third unsuccessful attempt was made, by an act of February 17, 1870, on the anniversary of Lincoln's birth day, to establish a county named Lincoln, taking it, as in 1861, from eastern Renville county, but not with the same boundaries as before. It again failed of adoption by the people.

LOCDescription &
Name . Origin

At three other places in the outly or Altamont moraine belt, in addition to the "Hole in the Mountain" in Lake Benton township, 11, 14 and 18 miles northwest from Lake Benton, similar channels have been eroded through the massive ridge of this moraine and through the smooth sheet of drift that slopes downward from its west side.

The first of these channels begins at the S.W. end of Lake Shaokatan,

over-

and extends about two miles S.W. in the same course with this lake, through the knobby belt of the moraine, beyond which its course for the next three miles is N.W. along its west side, crossing the state line. Lake Shaokatan outflows N.E. ward to the Yellow Medicine river, but the highest part of the valley that extends from it westerly is only slightly elevated above the lake.

The most northwestern of these remarkable channels or valleys, lying in Brookings county, South Dakota, and extending southward from the S.W. end of Lake Hendricks, was called by the Sioux "the Brother of the Hole in the Mountain," because of its close likeness to the pass S.W. from Lake Benton.

While the ice-sheet covered the basin of the Minnesota river and deeply overspread all the country northward, rising high above the Coteau des Prairies, streams outflowed from its melting border in the courses of these channels (and that of the Hole in the Mountain), at the same time with the accumulation of the Altamont moraine

Description &
Name Origin

The outer or Altamont moraine belt, and the thick sheet of till that descends thence westward, are cut by a deep channel or valley, which is called, translating the Sioux name, the "Hole in the Mountain". The railroad between Lake Benton and Verdi village goes south-southwest four miles through this gap, bounded on each side by picturesque bluffs. Its depth, wholly in the glacial drift, is from 150 to 200 feet below the knobby surface of the moraine, and its highest point is about 10 feet above Lake Benton This valley was evidently excavated by a

-over-

river that flowed from northeast to southwest across this great ridge, which is the highest land in S.W. Minnesota, being 1,000 feet above the Minnesota river on the northeast, 350 feet above the Big Sioux river on the west, and about 1,960 feet above the sea.

lying on the crest of Coteau des Prairies, extending north-northwestward through the
 GEN S. W. part of the County, past the western ends of Lakes Benton, Shaokatan, and Hendrick,
 LOC and thence continues in South Dakota a dozen miles west of the interstate boundary.

Description &
Name Origin

The description and map of Lincoln County in the Final Report of
 the Minnesota Geological Survey (vol. 1, 1884, Chapter XX, p. 589-612) direct attention to its
 two well developed belts of marginal drift hills and short low ridges and knolls,
 abundantly sprinkled with boulders. The western or outer moraine is called the
 Altamont Moraine.

From this locality, described by the Minnesota reports, this first
 marginal moraine of the continental ice-sheet, in a successive series of twelve

- over -

traced partly in this State, was named as above noted in 1883 by Prof. T.C. Chamberlin.

Much glacial drift was borne away by the streams from the lower part of the ice in which it had been held, producing hollows where that drift was deposited, in which lie

Description &
Name Origin

Was named for the Lake on which it is located. The lake was named by John C. Fremont, for his father-in-law, U.S. Senator Thomas H. Benton of Missouri. Fremont and Nicollet explored this territory and named many of its lakes and streams in 1838-9
